MINERS MEET OPERATORS.

Demand Eight Hour Day and Increase of Ten Per Cent. NEW YORK, Feb. 15.—The demands made by the miners at their conference with the coal operators here today are given as follows:

First—A trade agreement between the operators and the union which will be a full and complete recognition of the union.

Second—A reconstruction of the present conciliation board, so that each of the three anthracite districts shall have a separate and distinct board, the composition of these conciliation boards to be determined by the operators and district officers of the union.

Third—An eight hour day for all classes of labor, skilled and unskilled, working in and about the mines.

Fourth—A 10 per cent increase in wages without exception to all classes of workmen and to include employees of the independent collieries as well as the coal carrying railroads.

Fifth—A settlement of many minor grievances existing in the various classes of labor in the anthracite districts which the conciliation board has been unable to adjust under the award of the anthracite commission.

WHAT THE EARTHQUAKE DID.

Curious Franks Played on Steamer Sarnia at Cartagena. NEW YORK, Feb. 15.—An earthquake of considerable magnitude, which played curious pranks, but did little serious damage, was reported by the steamer Sarnia, which has arrived here from Cartagena, a seaport of Colombia. The shock was felt while the Sarnia was moored at a dock in the harbor of Cartagena.

The day was cloudless and the weather nearly perfect when the Sarnia suddenly began to roll and plunge. Immediately there was a report like that of a small cannon, and the four inch lawver which moored the steamer to the dock snapped in two. Smaller craft moored about the harbor were more seriously affected, some of them striking violently against the docks, while others were swept completely clear of their moorings.

The Colombian warship Cartagena, lying near the Sarnia, had a similar experience to that of the latter steamer, breaking a four inch mooring rope.

SUGGESTS GRAFT.

Detected Russian Admiral Rojestvensky's Story of Disaster. ST. PETERSBURG, Feb. 15.—"Perhaps I am guilty to some extent for our defeat and perhaps my subordinates did not do all they might have done, but at all events we who fought the battle were not thieves," said Admiral Rojestvensky, who addressed the Imperial Technical society on the causes of the defeat of the Russians at the battle of the sea of Japan.

The admiral made no specifications regarding rascality in the construction or equipment of the ships, but he commented at length on the destructive effect of the heavy Japanese shells, which when they only exploded in the water near the Russian vessels cracked their plates and opened great cracks, while those which hit the Russian ships were as destructive as mines.

A young lieutenant during the discussion attempted to lay the blame on submarine boats, but the admiral declared that submarine boats or mines were used during the engagement.

"Another Theory. "I don't suppose the Indians will ever get entirely over their desire to punish the whites for the wrongs to their race."

"No," answered the college professor; "It is possible that instinct, which makes them such aggressive foot ball players."—Washington Star.

Novel Medical Treatment. In a London hospital a wave siren is used to test what sounds a deaf person hears. When once it is discovered that a certain note is not heard or only heard indistinctly a tuning fork of this note is selected, and an attempt is made to stimulate the muscle and to arouse the nerve. If the tuning fork is not sufficient, the sound is increased by means of a resonator.
