

## The Modern Home

COMPLETE PLANS AND DESIGN OF  
MODEST DWELLING

Copyright, 1905, by Dennis & Gastmeyer, Architects, 250 Broadway, New York.

The accompanying design and floor plans show a model low-priced frame home with all the modern improvements, including hot-air heating. There is a cellar under the whole house, with walls of brick.

The piazza is of frame, with a tin roof. The rails, cornices, brackets and other outside work are of pine and cypress lumber and moldings. The main gables and the roof are covered with clear heavy dimension cypress shingles. The exterior woodwork is painted with two coats of white lead and linseed oil paints of any desired colors.

The floors are laid with narrow white pine tongued and grooved flooring, blind nailed. The interior walls are lathed and plastered with hard

the natural wood. The main stairs are of yellow pine, with cherry newels, rails and balusters, finished in the natural wood, with fluted and two coats

of light varnish properly rubbed between coats.

The kitchen contains an up-to-date range, boiler, sink and wash trays, with open plumbing.

The bathroom has a steel-clad bathtub and a porcelain basin in a marble slab, with back and sides. The water closet is porcelain, front washout, attached seat and low down tank, with open nickel-plated fittings.

The house is piped for gas, and fitted with gas fixtures. The hardware is of plain black iron, with combination roses and escutcheons and box-shaped birch knobs.

The cost of this dwelling is estimated at \$2,200, but of course it will vary according to local conditions. This house is well adapted to a corner lot, but of course can be used elsewhere to equal advantage. Grilles are all of fancy oak and finished natural. Dining-room contains a modern, complete brick mantel and open fireplace. This has proven to be a very popular design with home builders.

patent plaster, white finished. The trim throughout is of clear kiln-dried cypress of special design, finished in

### TREE TELEGRAMS.

**Army Officer Finds That the Leaves and Branches Aid in Wireless Communication.**

United States government experts have lately made the discovery that every tree possesses the properties essential to a wireless telegraph station. The leafy tops of the forest kings have in them the capacity to collect messages from the air.

Along the branches to the parent trunk the message can be flashed with the same certainty as though it came on a wire, and an operator with his device at the bottom can receive the word just as readily as if he sat at the keyboard of a regularly equipped telegraph office.

This is a discovery of far-reaching importance, and one that is likely to play a big part in the warfare of the future. It means that Uncle Sam can press into his service as messengers all the trees of the forests at will. The advantages of such a system will facilitate communication between parts of an army to a degree undreamed of.

It is to Maj. George O. Squier that the credit must go for putting to practical use the discovery that any ordinary healthy tree can be pressed into service in place of a tower with antennae of wires.

The experiments have been conducted principally at Fort Mason, San Francisco, Cal., where the United States signal service has a wireless station, and Alcatraz island, San Francisco bay, another wireless station of the signal corps, about a mile and a half away.

Later the naval wireless station at Yerba Buena island was used. A grove of eucalyptus trees on the lawn in front of Gen. MacArthur's quarters at Fort Mason was utilized as a receiving station.

This part of California, in common with many other points in the west, has seasons when the folt becomes so dry that it is difficult, almost impossible, to use the ordinary single wire grounded circuit, even when great care is taken in making the ground. Heroin rests the great advantage of the tree method of establishing the circuit. It is only a matter of a few moments to rig the device, drive the

spike into the tree, and a perfect means of communication has been established.

It is found that the conductivity of a growing tree in a healthy state, for telephonic currents, is such that the earth contact need not be at the root of the tree, but may be carried to a height up the tree of 30 feet or more, and the telephone used from that elevation with satisfactory results.

Indeed, experiment shows that good communication can be maintained from one tree top to another with the trunks of both trees in the circuit.

When the operator holds the ground wire in the hand and completes the circuit to earth by merely touching a live twig or leaf the transmission of speech is good.

This permits the military scout to use the vantage point of the tree elevation for observing the enemy, while being screened from view by its foliage, and at the same time to transmit by telephone to the distant station the information thus obtained.

**A New Motor Roadway.**  
A roadway or track for motor-propelled vehicles has been invented recently by Dr. T. A. Johnson, of Xenia, Ill., which promises a valuable means of transportation. It consists of two parallel tracks of concrete, formed so as to present an outer flange, and a broad treadway with a strengthening rib running down into the ballast, which has been rolled firmly in the ditches previously excavated. This roadway is designed for motor vehicles, both passenger and freight, the cars having rubber tires. The track can be used as a toll line for automobiles. The inventor has also a device which can be attached to the steering lugs of the vehicle, preventing contact of tires with flanges, and obviating steering by motorman.

**Night Farm Work.**  
In order to demonstrate that, if necessary, agricultural operations can be carried out day and night continuously with a gasoline motor, an interesting trial was recently carried out in England on a farm near Biggleswade. A field was illuminated by acetylene gas, and two six-foot mowers were attached to an Ivel gasoline tractor. Under these conditions 15 acres were cut in the short time of 3 hours and 35 minutes.

**Sure to Come.**  
Mr. Suburbs—Do you expect any visitors to-night, my dear?  
Mrs. S.—Well, considering that Bridget is going to leave, baby is teething, the cellar is flooded, and the grocer hasn't called for two days—yes, I do.—  
T.H. Bits.

**Railway in Palestine.**  
The latest railway improvement in Palestine is a line from Haifa across the plains of Esdraelon east of the Jordan to Dera, there to join the Hejaz railway now being constructed for the conveyance of pilgrims between Damascus and Mecca.

# GREAT SLAUGHTER SALE

OF

# CLOTHING AND SHOES

Your last opportunity to buy Clothing, Shoes and Gent's Furnishings at less than cost to manufacturer! Your last chance; can you afford to miss it? The saying is: It is not what you earn, but what you save. In buying goods at my store you are not saving cents, but dollars. It is not a question of cost or value of goods; it is a question of closing out a stock of Men's, Boys' and Children's Clothing, Boots and Shoes in the next few days. This is everybody's chance now, and a real welcome to all; no one has to take a back seat. Come and make hay while the sun shines. Remember, the stock consists of all new goods, made by the most reliable manufacturers; honest union made merchandise. It is not a clean-up sale of odds and ends, but a genuine Going-Out-of-Business Sale. This sale will not last always. Costs nothing to see our goods, very little to buy them.

## NEW CUT IN PRICES

Every article now in H. Sattler's store, corner Packer Ave. and Desmond St., Sayre, Pa., must be sold at once. If determination to sacrifice was ever written on the face of a price ticket you'll readily recognize it here. Profits, original cost and competition are things of the past. Think of this tremendous money-saving opportunity; the chance of a lifetime. You will be sorry if you miss it.

### Men's, Boys' and Children's Suits and Overcoats

Not Cheap Clothing but Good Clothing Cheap.

A fine lot of suits, all to match, in military cut and double breasted, fancy mixed chevots, former price \$8.50 to 10.00 Sale price \$4.98.

Lot of men's fine suits comprising a great assortment of single and double breasted sack suits in black, blue, fancy chevots and Scotch mixtures. Perfect fit guaranteed. Former prices, \$12 to \$15; sale price \$7.98.

- \$6.50 Dinner Set for \$4.98.
- All 50c Tams for 25c.
- 75c and \$1.00 Wrappers for 50c.

## Gregg's Racket Store.

#### Cosmopolitan Organizations.

The cosmopolitan character of all sorts of organizations in the United States is constantly brought to light, says Youth's Companion. Of the 11 men who composed the association football team of one of the great colleges during the season just closed, only one was an American. There were two Dutchmen—real Dutchmen, from Holland—one Englishman, one Scotchman, a Boer from South Africa, a Filipino, a Bulgarian, a Peruvian, and two players from Argentina. The Bulgarian seems to have been foreordained to football. His name is Dragoshinoff.

#### Costermonger's Parson.

Rev. "Tom" Collins, well known in the East End of London as the costermonger's parson, is enormously popular with the people among whom he labors. Nothing pleases him better than to chat with a lot of workmen on sporting matters, regarding which he is an expert writer. Sometimes on Sunday afternoons he addresses his hearers in his shirt sleeves while the men sit and smoke comfortably. Indeed, Mr. Collins on occasion joins them in enjoying the weed.

#### Wholesale Libel.

A curious case of wholesale libel is on in Paris. A newspaper of that city told of a certain gaited adventure in which it was alleged that a parish priest, unnamed, had figured. There are 66 parish priests in Paris, and all have instituted slander suits, each with the object of vindicating himself. Each asks \$200 damages.

#### Japan's Monopolies.

The Japanese government to-day controls many of the important monopolies. A large percentage of the railroads, the telegraph and telephone lines, the salt works, the tobacco monopoly and the camphor production are directly under the control of the government.

#### Unbreakable Will.

Belgian courts have upheld the will which a man named Devie, who hanged himself in Ardeane, scratched on a piece of rusty iron with a nail. He left \$60 for the fire brigade at Aiden "to have such a carousal as was never seen before."
