

A Suit Is Right

Or it isn't right. There is no half way about tailoring. These Rochester Clothes will fit right, and they'll wear right, because they are made right.

The beauty of it all is that they're as well tailored beneath the surface as they look on the surface.

Our \$10 special is a wonder, a dozen styles to choose from, a dozen patterns of a style, a dozen reasons why you should look through our line before you buy a suit.

The Valley Record

"All the news that's fit to print"

TUESDAY, JULY 3 1906

LOCAL BREVITIES

The cannon cracker will have an inning tomorrow.

"The Country Tavern" at the park theatre this evening.

The Record will not be issued tomorrow on account of the Fourth of July.

Given away a rifle with every child's suit from \$2.50 up at H. Sattler's.

The Globe Warehouse will be open the evening of July 3rd for the accommodation of its patrons.

Wanted—At once, a secondhand flat top desk. Must be in good condition. Enquire at The Record office.

Say! Seen the Scottii, Barrowsii, Piersoni, Elegantisima? These are the new Ferns, 300 just in. Snow, the Florist.

Send in your Fourth of July order today to the Sayre Bottling Works for Iroquois beers and Standard ales and porter in kegs or bottle—the goods that has stood the test—not the cheapest but the best. Valley phone 212.

COUNCIL APPROPRIATES \$25,000 FOR TRUNK SEWER

Report of Committee Immediately Followed by the Adoption of An Ordinance Providing for the Installation of the System

EXPECTED THAT WORK WILL
BEGIN BY SEPTEMBER FIRST

The Committee Has Made An Exhaustive Study of the Question and the Report Is Highly Satisfactory

The sewer question which has agitated the residents of Sayre for the past year, during which time the matter has been in the hands of a committee from the borough council, was quickly disposed of at the council meeting held last night, when the ordinance was introduced and passed providing for the construction of a trunk line sewer on certain streets in Sayre, and providing for a bond issue of \$25,000 with which to begin the work. Five thousand dollars of this amount, however, will be used to liquidate the borough's outstanding indebtedness, so that to be exact only \$20,000 will be used for sewer purposes.

The council voted unanimously to adopt the ordinance which was presented immediately after the sewer committee had made an exhaustive report through Chairman Heverly. The report has been carefully prepared and it contains a comprehensive resume of the various steps that have been taken by the committee since the matter was placed in their hands over a year ago.

From time to time the gentlemen on the committee have gone over the plans in detail, and have in every way been guided by that which would eventually mean the protection of the taxpayers.

When the committee was appointed by the council they were instructed to have a comprehensive set of plans prepared. These plans were prepared, involving no end of hard work and thorough investigation. Williams & Whitman, civil and sanitary engineers, in conjunction with the borough engineer, N. F. Walker, designed the plans last summer, and the committee confidently expected to make a report on January 1st.

The committee felt, however, that it would be more satisfactory to have the plans approved by the state health authorities, and with that end in view communicated with the state engineer. By so doing it was learned that before sewerage could be emptied into the Susquehanna river the consent of the newly organized department of health must be secured. State Commissioner of Health Dr. Dixon was communicated with and in March last sent his chief engineer to Sayre, at the expense of the department and he made an exhaustive study of the streets, topography, general locations, etc. Later Dr. Dixon requested the committee to meet him at Harrisburg to further discuss the plans. At this meeting Dr. Dixon advised the committee that he could not approve the plans unless Milltown and the northern districts of Sayre were included. The plans were amended and some time ago were approved by the health department, and consent was also given to empty the sewerage into the Susquehanna river.

The committee has spent considerable time in studying the different plans under which lateral sewers may be constructed, and while being convinced that a system should be built by general taxation, this plan did not appear practicable under existing financial conditions. Therefore it was determined that the most equitable and satisfactory plan to all concerned would be on the basis of a foot frontage, the price to be determined by the whole cost of the

sewer on any particular street to be sewered. This plan would lessen the burden of portions of the town not directly benefited. On some streets, however, a more equitable basis could be obtained by assessment of benefits and damages. The committee, however, does not deem it advisable to recommend any particular plan for the installation of the lateral lines.

The recommendations of the committee follow:
First. In view of the fact that the designing engineers have specified the sizes of the trunk lines, ranging from 24 inches downward and the fact that the Commissioner of Health has not seen fit to assume the responsibility of recommending a specific reduction in the sizes of any of said pipes, and further that such reduction would only effect a possible saving of about \$1,000 in the cost of the whole system, and further that it is possible to temporarily use the trunk lines for surface water, thus effecting a temporary saving at least, to the taxpayers. Also that any change in the sizes as originally specified would relieve the designing engineers of responsibility to that extent, and also any reduction in sizes would necessitate a correspondingly deeper ditch, thus increasing the danger of encountering quicksand. We recommend that the sizes as originally specified by the designing engineers be maintained.

Second. We recommend that so far as possible the trunk lines be equipped with necessary catch basins and utilized temporarily for carrying off surface water, until such time as it may be necessary to put in a disposal plant, or the pipes may not be adequate for both purposes.

Third. We recommend leaving the construction of a separate storm water system until such time as it may be found necessary to install it.

Fourth. We recommend that the following trunk lines be constructed at the earliest possible date beginning at the outfall at the river and running to Lehigh avenue, on Lehigh avenue to Hayden street, on Hayden street to Desmond street, on Desmond street to Lehigh avenue, on Lehigh avenue to Cayuga street, on Cayuga street to Stevenson street, beginning at the river and extending over the above streets toward Stevenson street.

Fifth. We recommend issuing \$2,500 4 per cent bonds, from the proceeds of which \$5,000 is to be applied on current indebtedness, and the remaining \$2,000 expended toward the construction of trunk lines, as above specified, bids to be received from street to street, and as a whole.

Sixth. We recommend omitting the flush tanks from the lateral lines when constructed, as approved by the commissioner, on account of the large saving in the initial cost, as well as the cost of operating and maintaining them.

Seventh. We recommend that connections with the trunk lines shall be paid for on the foot frontage basis of what an 8 inch lateral would cost on the same street, as estimated by the borough engineer, or such other charge as the borough council may deem proper and just. Respectfully submitted,
G. W. Heverly,
Chairman Sewer Committee.

In another column of today's Record will be found the ordinance authorizing the construction of the sewer, naming the streets through which it is to pass, and the manner in which the cost thereof is to be paid. The ordinance providing for the increasing of the borough's indebtedness is also printed in this issue of The Record, and shows in what manner the amount appropriated shall be expended.

The construction of the sewer will cause a raise in the tax rate of one mill on the dollar, and will be levied each year until the amount is paid.

These ordinances must be published for ten days, and at the end of that time the council will advertise for bids. Thirty days will probably be given for this purpose. Therefore it is expected that the actual work of construction will begin not later than September 1.

The gentlemen composing the committee, Messrs. Heverly, West and Samuels, are to be congratulated upon the excellent report they have made, and it is believed that their recommendations, which were unanimously endorsed by the action of the council, will meet the approval of the citizens of Sayre borough.

STOLEN CLOTHING IS FOUND IN BOX CAR

Jacob Solomon Recovered a Portion of His Clothing at East Waverly Yesterday

Jacob Solomon of the firm of Solomon Brothers, clothiers, went to the box cars occupied by a gang of Italians near East Waverly and recovered possession of several suits of clothes which were stolen from the store on Wednesday night last. Dominic Musa, the young Italian who was wearing a suit of the stolen clothing when arrested yesterday, accompanied Mr. Solomon and showed the latter where the clothing could be found. Nine garments in all were recovered, not including the clothes worn by Musa at the time of his arrest. Musa claims that two men came to the box cars on Friday afternoon. One of the men described as being tall, well dressed, and wearing a moustache, said that he was selling out his store, and offered several suits of clothes to Musa for \$5.00. Musa declared that he would not pay this price, but finally decided to take the lot at 50 cents. He says that he would know the men if he saw them again.

The police believe that the burglary was committed by local talent and that the guilty party will sooner or later be apprehended.

Musa's bail was continued until a thorough investigation can be conducted. Before leaving the court room yesterday he agreed to buy the suit of clothes he was wearing, as he claimed that it was all the clothing he possessed. Mr. Solomon consented to this arrangement.

COUNCIL SAYS THESE FIGURES ARE TOO LOW

Property Valued at Twenty-Five Thousand Dollars Is Assessed for Less Than Three Thousand Dollars

At the meeting of the borough council held last evening it developed that the Beach property, situated at the corner of Elmer and Packer avenues has been assessed for less than \$3,000, when the valuation of the property is placed at \$25,000. The rule has always been to assess at three fourths of the estimated valuation, but in this instance, according to statements made by the councilmen, the valuation on which the assessment is based has been placed ridiculously low.

While the council has no authority to act in the matter, it was deemed advisable, however, to call the matter to the attention of the borough assessors and tell them what their duties are in the matter. For this purpose a committee consisting of Councilmen Ademy, Samuels and Hawes, with Burgess Cross as chairman, was appointed, and they will wait upon the assessors and advise the latter to have the assessed valuation of this particular property placed upon an equitable basis.
