A quarter of a century ago we placed some gold fillings in the teeth to a well known gentleman at present a resident of Sayre. These fillings today are just as bright, firm and useful as the day they were made. We will tell you the name of the party, if you wish to see him yourself.

There are variations in dentat workmanship, just as there are differences in the various brands of Rour. If you desire the highest degree of proficiency-the skill and knowledge that will make YOUR fillings serviceable twenty-five years from today—come in or 'phone for an appointment. On the other hand, of you take pleasure in having your teeth filled over and over again every year or two, you should go elsewhere -we do not do that kind of work.
