Rapid Promotion.
Athens—George N. Tidd has been in Auburn since Monday and returned today. He will go to Philadelphia tonight where he enters upon the duties of his new office at once. It is a pleasure to note his rapid promotion in the chosen profession he has become so prominent in. He is an Athens boy and in his younger years he started out to investigate the science of electric engineering. We remember when he struck wires to the different houses in Athens and with his young associates they started in to learn telegraphy. He soon became so proficient that he was offered a situation with the Postal Telegraph company. From that he has worked up until now he has become assistant manager of the General Electric Company of America and his headquarters will be in Philadelphia. His duties will take him all over the United States and is a position of great responsibility. He is a young man of the strictest honor and good habits and it is a pleasure to see him thus honored.

KICK ON REASSESSMENTS.
Real Estate Promoters Making Trouble for Commissioners.
Media, Pa.—The real estate promoters and those who are buying and selling land in Delaware county, especially in the counties in the northern part and along the northern border, where properties are selling at enormous figures, do not take kindly to the reassessment begun by the County Commissioners, and in their transfers are giving the latter as much trouble as possible.
The matter was originally taken up by the commissioners from the amount of money mentioned in the consumation of deals, in which land assessed and taxed as farm land was being sold for almost fabulous prices.
It is alleged that to entangle the assessors who are working on the reassessment all properties are being sold for a nominal sum, which as quoted, "for the sum of \$1 and other lawful money of the United States," is said to be all that is necessary under the existing law. This places the commissioners at a disadvantage and gives a greater chance to appeal, and until it is overcome the assessors scarcely know how to act.

ATHENS.
Library Club Meeting.
Athens—The meeting of the Ladies' Library club yesterday afternoon was an informal gathering for their own amusement and enjoyment—one of that class of social gatherings where one feels as though they had been wise long enough and the time had come to throw off their dignity and have a good time. The jokes and anecdotes they spun off would fill a good sized book and they were thoroughly enjoyed. Mrs. Estabrook created a great deal of merriment by reading some exercises or pronouncements showing how easy it was to get tripped up on the English diction. Had President Roosevelt been there he would have been convinced that his efforts for spelling reform were eclipsed by the ladies of the Library club. After the program that was not a program) was completed they had refreshments and a social good time generally. We have not seen the critic yet and so can not give anything farther about the meeting.

MORE PAY FOR MAIL MEN.
Says a Washington special of Feb. 20: Ninety per cent. of the postal employees are affected by provisions in the postoffice appropriation bill increasing salaries. These provisions, which were eliminated on points of order raised in the House during debate on the bill were all restored under a special rule before the House passed the bill.
By the terms of the amendments reported from the Committee on Rules seven grades of clerks are established in first and second class offices, with salaries ranging from \$600 to \$1,200. City letter carriers are divided into five grades, with salaries ranging from \$600 to \$1,100. Railway mail clerks are divided into six grades below that of chief clerk, salaries in each grade being increased from \$800 to \$1,700. The maximum salary of rural carriers is fixed at \$540. Another section provides that the postmaster general may allow a railway mail clerk 30 days' sick leave in any fiscal year with pay.
This bill has been passed by the House; it now goes to the Senate and if passed by that body will become effective July 1, 1917, as the President is sure to approve of it, having already expressed himself favorable to it.
People familiar with conditions along the river say that things are shaping up for a big flood when the break up comes. A solid body of ice bridges the channel for a hundred miles, and when this breaks up it will pile up and dam back the water.
