He later operated a saw mill at Barclay, entering into the lumber business very extensively. He afterwards resided in Monroeton and moved from there to Athens about eight years ago, where he has lived at the home of his son, Volney up to the time of his death. TRADE CONDITIONS.

R. G. Dun & Co.'s Weekly Report of NEW YORK, March 23.—R. G. Dun & Co.'s weekly review of trade says: Business has responded to the influence of settled spring weather at most points, and the proximity of Easter has increased retail sales of dry goods, millinery and footwear. Many dealers had underestimated requirements, and urgent demands are made upon jobbing houses. Transportation is more satisfactory, but at many cities there are still complaints that reasonable goods do not come forward as specified. In addition to current trade there is a volume of preparation for later seasons that maintains activity at manufacturing plants, the high prices readily paid on most of this forward business testifying to the fact that confidence remains unshaken.

One of the best features of the present situation is the steady improvement in mercantile payments despite the unsettled condition of the money market. "Open weather has brought out much new structural work, and the movement of building materials is heavy, while at many cities real estate is still advancing. Railway gross earnings thus far reported for March exceed those of a year ago by 7.6 per cent, but higher wages and other increased costs of operation have started a movement to advance freight rates. One new schedule is announced to take effect on May 1.

Official statistics for February showed larger foreign trade than in the corresponding month of any preceding year, while at this port alone for the last week imports were \$3,900,000 larger than a year ago and exports increased \$1,919,298. Security markets continued irregular, but money rates fell to a more normal position. Bank exchanges at New York for the week were \$1.2 per cent larger than a year ago owing in part to special syndicate settlements, while at other leading cities the gain averaged 18 1/2 per cent.

Failures during the week were 185 against 218 last week, 213 the preceding week and 218 the corresponding week last year.

MAYOR JOHNSON IN CRASH.

Chicago Flier Detailed—Officials Suspect Pool Play.

PITTSBURGH, March 23.—Train No. 23, the Chicago Limited, from New York for Chicago, on the Pennsylvania railroad, while going about thirty-five miles an hour was wrecked at Stearns, Pa., about seventeen miles east of here. Among the passengers were Tom L. Johnson, mayor of Cleveland, and Holland C. Webster, assistant district attorney of Toledo, O.

The engine and the first five cars were derailed, but no one was hurt. It is said that evidence leading the officials to believe that the track had been tampered with was found at the scene of the wreck.

Wires Struck By the Electric Field

and the Men Nearly Kicked Down.

Athens—The severe electric storm that struck Athens at about 9 o'clock last evening made things lively for a time but did not do much damage. It came so suddenly that many were drenched with the rain before they could reach a place of safety. The wires of wrath were unhooked and the vivid lightning held high carnival filling the air with streaked thunderbolts and balls of fire that were appalling to behold. At the Forrest House the lightning dived down the wires and snuffed out the electric lights for a second and Jim Leahy was nearly knocked down. It struck the wires between Fuller's residence and the Crawford barn and put out the lights on the bridge. The East Athens telephones were put out of business and the inhabitants were isolated for several hours. No serious damage resulted and everything was remedied this morning.

Four Frozen to Death.

BATHURST, N. B., March 23.—Four lives were lost in a severe blizzard which swept over the eastern provinces late at night. During the height of the gale Mrs. John Comeau and three of her children were frozen to death in a snowdrift at St. Simon, a small island village. The wind, which reached a velocity of sixty-five miles an hour, carried off the roof and upper portion of the Comeau dwelling. Comeau took one child to the nearest house, a quarter of a mile distant, but in attempting to return for the others lost his way in the thick snowstorm. When Comeau reached home he found his wife and three children frozen to death in a drift.

Used Dynamite to Save Bridge.

HARTFORD, Conn., March 23.—Dynamite was used freely today to break up the ice in the Connecticut river in the vicinity of the new \$8,000,000 bridge to East Hartford and also the temporary structure. In some places around the foundations of the aqueduct the ice is several feet thick, and it is thought that if it is not cleared away before the general breakup occurs the foundations of the temporary structure may be swept away.
