Hill Figuring the Chances.

It seems to be pretty well settled that Governor Hill will not succeed Senator Evarts. The Governor has apparently made up his mind that the Senatorship would practically shelve him. Therefore, he'll have none of it, although he will continue to manifest a lively interest in the process of naming a candidate.

In spite of the warnings that come up from all over the country where Democrats most do dwell, that the name of Cleveland stands for Democracy these days, the Governor continues to consider himself a candidate for the Presidency. It has been political gossip for some time that he intends to try it again -take the nomination for Governor next year for the third time, and hazard his Presidential aspirations upon the result. The Governor's personal organ, the Albany Times, threw out the suggestion with the object of drawing the fire of the opposition and rounding up its magnitude. It has succeeded fairly well, and dosen't seem to scare worth a cent. In a review of the situation it remarks :

Ah, but the Mugwumps! They Republican editors. parasitical nuisance, the Mugwumps. Drive them off send them away, climinate and banish them forever. It is a consummation most devoutly to be wished. Governor Hill would make a campaign which would for-ever emancipate the Democratic party of New York from their association, from their machinations and their treachery and send them back where they belong—to the Re-We repeat that in our judgment the renomination of David B. Hill for Governor furnishes the true key to the situation.

If it is Governor Hill who is thus talking through his newspaper organ it would seem that he is more earnestly considering the proposithe bar room, and then shot Curley,
others, an, although they may not tion than most people have given who had just came down stairs. him the credit for. But in making up his estimates he will do well not to confine the opposition to the Republicans and Mugwumps. Some room must be left on his slate for calculations regarding the attitude of the thick and thin Cleveland men. New York is still too small a place for Cleveland and Hill both, and this fact may become strikingly apparent as 1892 approaches.

committees to attend at State and to be on the eve of closing. The manner in which the Indians acted, however, as described in this morping's telegrams, caused some of the Indian fighters to feel that treachery would be practiced when the troops came to the actual work of disarming them. These fears have been realized.

The Seventh Cavalry is the regiment, the contingent of which died of around Custer in 1878, and the tate of some of its members now will have an effect on the survivors which will not be be at all friendly towards the hostiles.

It is reported that another fight has occurred, this time near the agency. This afternoon one of Colonel Forsythes troops of the Seventh Cavalry, was firred on by some Indian who went out from the Rosebud camp near Pine Ridge, and on their return they fired into the agency. This caused a skirmish, in which two soldlers were wounded. The Indians who were camped near where this skirmish took place,

Pianos Organs.

The improved method of fartening strings of Pianos, invented by us, is one of the most important improvements ever made, making the instrument more richly musical in tone, more durable, and less liable to get out of tone.

Both the Mason & Hamin Organs and Pianos excel chiefly in that which is the chief excellence in any musical instrument, quality of tone. Other things, though important, are much less so than this. An instrument with unmusical tones cannot be good. Hiustrated catalogues of new styles, introduced this season sent free.
