A Meal Grant Enjoyed.

An unpublished story of General Grant was told yesterday at the Grand Pacific by Paul Gores:

'I was steward at the Palmer House," he said, "when the ex-President stopped there on his return from the tour of the world. One noon I was all but stupefied at seeing General Grant creep into the kitchen door, as though escaped from some one. 41 am sorry to trouble you,' some one. 'I am sorry to trouble you,' he said, as though asking a great favor, 'but may I have a little corned beef and cabbage?' 'Why, certainly,' I replied. 'But shall I not send it to you out in the dining room?' 'No,' he answered, 'I'll eat it right here, if you let me sit down at this table.' So I cleared away a place on the rough board table, where the cook had been fixing the meat, drew up a stool and the way he got away with that corned and the way he got away with that corned beef and cabbage made my eyes bulge. When he had finished he laid down his knife and fork and with a funny sigh of satisfic tioa, put one hand on my shoulder and said, 'Young man, I suppose you don't care for that at all, but if you had had to eat what I have for the past few months it would taste like a dinner for the gods.' The poor old fellow had dined with everybody from the Queen down, and that cabbage in my kitchen did him more good than all the rest together."--Chicago News.

Gruesome Souvenirs.

'A remarkable tribe of Indians are the 'A remarkable tribe of Indians are the Napos, who Hve in the northern part of Chile. Instead of wearing scalps at their belts as tropies, like the American sav-ages, the heads of their enemies dangle at their girdles. By a mysterious pro-cess known only to themselves, they re-move all the facial and cranium bones without cutting the skin or destroying the interior. Then the head is then re-duced, without maining any of the duced, without maining any of the features, to the size of a man's fist."-Pittsburg Dispatch.

As a Drowning Man Clutches at a Straw So Mr. Powell Took Hood's Sarsaparilla

And It Rescued Him From Danger "A year ago I was in very bad condition. I run down to 125 lbs. The trouble was **dys**. **pepsia** in its worst form, accompanied by

Nervous Prostration

I could not eat, I could not sleep, and at times I could scarcely move my hands. I felt that un-less I could get relief soon that I should surely die. I at length concluded to try Hood's Sarsaparilla, for

Like a Drowning Man

LIKE a Drowning Man I could catch at a straw. When I began taking it my face and hands were covered with sores, which are all gone. After I had been taking it a couple of weeks I could not deny that I felt better. I have now taken 3 bottles and as a re-suit I weigh 150 lbs., am able to work again and feel a thousand times better. I am certain that in a short time by continuing the medicine ishall be completely cured as I am now so near it. My friends all express surprise to see such a change.

Hood's Sarsaparilla Is indeed a wonderful medicine, and its claims are fully justified in my experi-ence." B. C. POWELL, Bigelow, N. Y.

Hood's Pills are the best after-dinner

"August Flower"

map.

"For two years I suffered terribly with stomach trouble, and was for all that time under treatment by a physician. He finally, after trying everything, said my stomach was worn out, and that I would have to cease cating solid food. On the rec-ommendation of a friend I procured a bothe of August Flower. It seem-ed to do me good at once. I gained strength and flesh rapidly. I feel now like a new man, and consider that August Flower has cured me." Jas. E. Dederick, Saugerties, N.Y.@

able place for the nests is to be provided, and short strew, old rags, and such ma-terial is given to them for making their

Rich, juicy beef is the product of breed and feed. If a good breed is ob-tained, a good system of feeding then becomes essential for the highest perfec-A constantly warm and moist atmos-phere is essential to ferns. The stock of terns can be increased by dividing the tion of meat. There is such a thing as flavoring beef by feeding it, and breeders could make a distinct and noble deparfor solution of the solution o late summer or autumn. The spores should be sown in pans of fibrous peat mixed with sand and broken crocks,

ture in this line. Feeding in this way is not simply to give the animals any-thing that they can convert into flesh, but only the food that will add to the beef certain flavors and richness which will make the meat desirable. It is the wild celever which makes the pressed firm, and kept perpetually moist by being stood in saucers of water. The pan should be shaded with paper until It is the wild celery which makes the delicious flavor of the meat of the canvas-back duck. Chestnuts and other As soon as the seedlings are large enough to han-dle they should be pricked off into thumb pots. The best time for repot-

nuts make turkeys and chickens pro-duce meat of a superior flavor, and it is now demonstrated beyond a doubt that clover-made pork is far preferable to that made entirely from corn. In many other ways every article of food flavors the meat, making it better or worse for having entered the system of the animal

the ball. Once in two years is often enough to repot ferns as a rule; old plants require repotting less often than young ones. While repotting, old and or bird. Just previous to slaughter, beef takes its flavor directly from the food given to the animal, and the correct method of feeding is to give the cattle only such foods as will make the meat sweet, julcy and aromatic. A really choice article in beef, as well as in any other food, will be eagerly sought after and paid for at fance prices. withered fronds may be cut away, but at no other time of the year should the leaves be cut back. The roots should never be allowed to get dry in winter or summer.—New York World.

fancy prices. BEST TIME TO SHEAR SHEEP. But the feeding for flavor is not con-There is considerable difference of opinion as to the best time for shearing

fined entirely to cattle. The same truth holds among the swine, poult g and other animals. Successful dairymen are very careful in feeding their cows, because they know that the food will directly affect the milk. Rich, juncy grass pro-duces the fine June butter and cream which is very different from the butter winter. It is important that all who raise meat for market should take a lesson from the dairymen, and then try to adopt similar methods in their feeding. Vary the diet, and feed for bone, muscle and fat, but also feed for flavor. Even tender meat that has no juice or flavor is

tender meat that has no juice or flavor is not very desirable. The French produce for market the finest poultry in the world, and they have succeeded in studying the question in this respect better than any other farmers. The meat of their poultry ex-cels, and is of a remarkable flavor. They do it by feeding the fattening birds with cloves and spices, which become mixed in the meat so that there is a deare also liable to contract severe lung diseases. The removal of a fleece of average weight must make a great dif-ference in the condition of the animal, and one which it cannot safely with-stand in cold weather or if it is soon to exposed to sharp winds or heavy rms. On the other hand, the heat of be exposed to sharp which on heavy storms. On the other hand, the heat of some of the early summer days is very prostrating to sheep which still have their fleeces, and must not only be ex-tremely uncomfortable but also decidedly unhealthful. For this reason we believe it is safer and better to avoid either of these arternas. It is not wall to do the mixed in the meat so that there is a de-licious aroma from it all of the time. So excellent are their methods in fattening

poultry that farmers of other countrie adopt their rules. Feeding for flavor is thus founded up-on a law of nature which should not be overlooked. There is a wide field for these extremes. It is not well to do the shearing until the weather is warm, and there can be no gain, and there may be much loss, in delaying the work after that time has arrived.—American Dairyinvestigation and experiment. The im-provement of poultry, swine and cattle

flesh is annually becoming more essen-tial, and those who lead in this respect are sure to reap the profits.—Boston Cultivator. FARM AND GARDEN NOTES. Do not dog the cows.

A WALL POCKET.

vator.

A WALL POCKET. Cut two pieces of rather stiff, heavy pasteboard, having one a little longer than the other. The larger piece is for the back. With an awl punch holes in the sides and across the lower edges of the pasteboard pieces, then cover by pasting heavy paper or thin cloth all over the pasteboard, neatly pasting the edges back so as to make a smooth finish at the front of the pieces of pasteboard. Now fill a large darning needle with narrow ribbon and lace up the sides and lower edges, having the former loose towards the top but the latter. quite close. Cut the top but the latter quite close. Cut out a pretty head or figure from some picture, or use a colored photograph, and aste it in the center of the front of the wall pocket. Hang by heavier ribboa, and place two bows of this at the upper left-hand and lower right-hand corners. Detroit Free Press.

THE CARE OF SEALSKIN. "

It is said with truth that the moth which exterminates does not enter sealskin; this is quite true, but in his place comes an insidious little worm which eats his way through and is a hundred times

nore objectionable. He is the result of lirt. You look indignant, and yet many of you put your seal coats away while they are absolutely dirty. Now, the proper way to do is to get out your coat, shake it thoroughly, hang it on the clothesline and beat it until not a particle off fluff will come from it, then let it sun for half the day: after this fold it, care. for half the day; after this fold it care. fully, not doubling it over, but allowing it to lay out its full length; then sew over it very closely coarse muslin; over this pin heavy sheets of newspaper; then, having lined your box with newspapers. lay in the queer shaped package, cover it with newspapers, put the lid on, and to be sure that it is air tight, tie it with a good strong cord, mark what is in the box and put it in the dark closet. Use newspapers in preference to any other kind. By putting your coat away so that it is air tight, in utter darkness and horoughly clean, it will come out when you need it as good as new. For the trimmed coats a somewhat more elaborate arrangement is necessary. Of course the rimming must have a special cleaning and you must be sure to literally bang and you must be sub-sector iterative barg out all the moth eggs in it, if any are here. For if you put a coat away in which these tiny eggs are, you might just is well count it as eaten up, for they will batch, and your fur triming will be greedily absorbed by them.—Ludies' Horee Lournal

MACARONI.

Home Journal.

Macaroni, like rice, is often used to take the place of a vegetable; it is nice erved with roast beef. It should be baked with chese when used with game. It is sometimes cooked in stock and erved with brown sauce or tomato sauce. It is also nice cooked in clear water and served with cream sauce.

Macaroni Soup-Take half a pound of small macaroni, boil it in clear water uasman macaroni, bor to in the data and cut in pieces about one inch long, take enough nice beef soup seasoned with salt, add the macaroni and cook fifteen minutes;

serve. Baked Macaroni-Take about onefourth pound macaroni and put in water until tender; skim out of the water, put a spoonful of butter in the pudding dish and a layer of macaroni; grate as much cheese as you have macaroni, and sprinkle in a layer; fill the dish with alternate layers of cheese and macaroni; pour over the whole a cup of rich milk; bake half an hour or more. Boiled Macaroni-Pour one pint of

boiling water over one-fourth pound of macaroni; let it soak half an hour; drain and cut fine; put in double kettle, with hot milk enough to cover; cook until tender; drain and season with a table-spoonful of butter, a little salt and a tea-cupful of cream, if you wish; grate a little cheese over the top. Macaroni With Tomato Sauce-Break fine one-fourth pound of macaroni, throw into salted, boiling water, cook rapidly from twenty to thirty minutes, rapially rom twenty to intry minutes, drain in a colander, then set the colander with macaroni in a pan of cold water ten minutes. Prepare a put of stowed tomatoes, put over the fire and heat, sea-on with salt and butter, add the maca-
