# The First "Human Ostrich"

State States in States

The first case on record of a human being indiscriminately devouring every-thing that came within his reach is that thing that came within its feach is that of the French boy, Tarare, who first gave an exhibition of the capacity and strength of his stomach by eating a full peck of carrots and seven bars of soap with ap-parent relish. Of course, he was not always a boy, and as he grew up the freakish antics of his stomach took many varied twists. On one occasion, when reaction antics of his stomach cook many varied twists. On one occasion, when a druggist's back was turned, Tarare hastly swallowed a couple of dozen of corks of all sizes. At last, his stomach being full of such indigestible matter, he became the victim of violent attacks of colic and was finally commelled to seek colic and was finally compelled to see concerned was many compensation seen the advice of M. Girard, of the Hotel Dicu. Girard called a council of phy-sicians and Tarare's case was thoroughly discussed. They tried to explain to the man what would be the final outcome of such performances, but were greatly prised, if not angered and chagrined, to find that he had actually swallowed a watch chain, scals and all, beside a bunch of seven keys and a glove hook which were on an ivory ring nearly two inches in diametes; all this while the learned in diametes; all this while the learned gentlemen were lecturing him? At the time of this examination he regularly ate twenty-four pounds of, beef a day, be sides other victuals in proportionate quantities. He now entered the Frence Army, being first attached to the Ninth Regiment of Hussars, Major Courville Regiment of Hussirs, Major Courvine retaining him as a freak. He was daily allowed the regular rations of three men and the right to the refused scraps and other pickings. When on the march he would eatch ech and scrpents and swillow ther whole. On one occasion he ate a cat, bones, fur and all. Colonel Marpel and General Beauharris both make affi-A frequent mistake is to apply too strong pressure at first to the newly-hooped curd. The pressure should be gradual, and the snug squeeze only given after several hours. The white whey toat starts from a severely pressed curd is rich in butter fats, which will not ap-pear if the curd is allowed to settle davit that they saw him cat thirty pounds of liver at one sitting, and others declare that he once ate a fourteen months old child !- St. Louis Bepublic.

### "Raining Cats and Dogs "

In Northern mythology the cat is supposed to isave great influence on the weathor, and English sailors still say: "The cat has a gale of wind in her tail," when she is unusually frisky. Witches that rode upon the descent that rode upon the storms were thought to assume the shape of cats; and in the Harz Mountains the stormy northwest wind is called the cat's nose. The dog is the signal of wind, like the wolf, both of which animals were attendants upon Odin, the storm-god of the Northmen. The cat, therefore symbolizes the down-pouring rain, and the dog is the strong gusts of wind that accompany a rain-storm. Hence "raining cats and dogs" means a heavy rain with wind.—Courier-Journal.

### Where Wolf Hunting Pays.

The wolf-farming industry around Galena, Ill., received a big impetus at the last meeting of the County Board, which placed a bounty of ten dollars on old wolves and five dollars on whelps. As a result the county has spent \$500 for woil scalps in the last two months. One individual brought the scalps of twentycight wolves to the County Clerk in one day and received \$150 bounty. big bounty makes wolf hunting so profit able that it is alleged that nimrods of contiguous counties drive the wolves over the border and round them up in Jo Daviess, where they kill them for the bounty.-Chicago Herald.

A slow but healthy growth is desira-ble in a fruit tree. Potash is an essential element in the soil of an orchard.

DETASSELING CORN. Detasseling corn is again a subject for consideration. The process consists in removing the upper portion of the stalk to which the spray of male or pollen-bearing flowers is attached. Several ex-periments have shown that it increases the crop to remove the tassel from fully one-half of the stalks before the pollen is shed. The results of some extensive tests made by the Nebraska Experi-mental Station show the oppcsite effect. There was a uniformly lessened yield upon the plats when one-half or the stalks were detasseled. Similar results obtained when the tassels were removed Don't be in a hurry to pull the mulch off from your strawberries.

The goose eggs set under a hen should be turned every other day. Farming in the garden works badly, but gardening on the farm is excellent. Manage to plant trees in some way along the fence, if no other place is

open. For raspberries, the richer the ground the larger and better the quality of the berries From this time on through the summer

obtained when the tassels were remove after the pollen had been matured and the average farm butter does not pay for the making. Manure from the pig pen is one of the best that can be used around the rhu-

barb plants. "Two is company and three is

crowd" applies to triplet lambs as well as to lovers and the gooseberry.

Shrewd flockmasters put to use a ewe that has lost her lamb by making her act as wet nurse for lost or discarded lambs. If they are picked regularly during the season geese showed average a pound of feathers each, and this should make them pay.

On rich, level bottom land stock farm ing can be made profitable, if anywhere. But do not waste such an opportunity on

the consumer. Great hue and cry is raised over the idea that it mmerscrub cattle. Hay that is cut, cured and housed be-tween daylight and dark does not often lose its sweetness by being sun burned or water soaked.

All pain-ful operations not required for the good of the animal operated on are of a cruel nature. No operation causing pain to an animal should be performed by an unskilful person. All necessary opera-tions ought to be performed in a scien-tific manner and by the most human methods, in order thereby to prevent the When the farmer finds his cattle with a husky cough he may attribute the same to indigestion from over feeding. Cut down the supply fifty per cent. for two days and the result will be immediately methods, in order thereby to prevent the

# HOUSEHOLD AFFAIRS.

# A DUSTER OF MANILLA ROPE.

A DUSTER OF MANILLA ROFF. One of the latest caprices in fancy work is a duster made of manilla rope. A piece of rope eighteen inches long is used, the rope being of any size that the maker may fancy. Double the rope midway, and with a strong waxed cord tie it about half the distance from the looped portion to the off ends. Wind the cord in carefully, making it very tight, and then the in a strong Knot and cut the ends off close. Then fringe out the cut ends almost to the tied portion. Beat them on some hard substance to get out the lint loose scraps of manilla. This makes a very useful and durable brush.—Chicago Herald.

# HOW TO WASH CLOTHES.

usual cases which had come under his obser-vation in which little less than a miracle had been performed. Bo important has the entire subject become that I determined to investigate it to the bottom, and accordingly called upon Mr. Albert G. Eaves, the prominent costumer at No. 63 East Twelfth street, the gentleman mentioned in my interview with the doctor yesterday. Mr. Eaves has made quite a name. A complete knowledge of history, an appreciation of art and reliability are essen-tial in his profession. "Mr. Eaves," I said, "I learn that your wife has had a most unusual experience; are you willing to describe it?" The gentleman thought a moment and an expression of pleasure passed over his face. "When I think," he said, "of what my wife once passed through and the condition she is in to-day, I cannot but feel gratitude. Nearly three years ago she was at the point of death. You can understand how sick she was when I say she was to tally blind and lay in a state of unconsciousness. Three doctors attended her and all agreed that her death was only a question of hours, perhaps min-utes." "May I ask what the doctors called her now TO WASH CLOTHES. The following is a Western lady's method of doing her own laundry work: Place your boiler on the stove contain-ing five pails of water, and when the water is boiling hot add salsoda and soap sufficient to make good suds. Put the clothes that you wish to boil first in a convenient tub, and as soon the water is boiling noun anough once the clothes a convenient tub, and as soon the water is boiling pour enough over the clothes to thoroughly wet them and let them soak for a few minutes. Now add more water to the boiler, and as soon as it is boiling hot wring out the clothes in the tub and put them in the boiler and boil for the tub man boil the tub and boil "May I ask what the doctors called her "May I ask what the doctors called her trouble?" "Uraemia and puerperal convulsions, so you can imagine how badly she must have been. At last one doctor (it was Dr. R. A. Gunn) said that as she was still able to swal-low, one more attempt might be made, and a medicine was accordingly given her. She seemed to improve at once; in a few days her sight was restored. 'I have had a long, long sleep,' she said, upon recovering conscious-ness, and I am rejoiced to say that she was restored to perfect health wholiy through the use of Warner's Safe Cure, which was past all consciousness." I looked at Mr. Eaves as he said this. His face was beaming with satisfaction. He continued: "The physicians told us, after my wife's for twenty minutes. While this first batch is boiling prepare the second lot as you did the first. At the end of twenty minutes transfer the first batch of clothes to the washing machine and rub them a few minutes while the second batch is boiling. They will then be batch is boiling. They will then be ready to rinse. I wash colored clothes the same as white clothes, except new ginghams or calicoes. Heat the first rinsing water for the flannels; also rinse them in warm water. Borax, salts of tartar and salsoda makes a good washing fluid. I find the secret in washing is to have the water hot. Wringing the clothes through the wringer several clothes through the wringer several times with boiling hot suds will take out much of the dirt and will help very materially.-New York Herald.

# MUSLIN CURTAINS.

Very few women like to use their best

His face was beaming with satisfaction. He continued: "The physicians told us, after my wife's recovery, that she could never endure child-birth, and yet we have a fine boy nearly a year old, and do not know what sickness is. I attribute it to the wonderful power of Warner's Safe Cure. Why, my sister, who resides in Virginia, was, a while ago, afflict-ed precisely as my wife had been. I at once advised ber to use this same great remedy; it cured her promptly." "You find that it is especially adapted for women, do you?" I inquired. "By no means. I have known it to be won-derful in its power in the case of gentlemen to whom I have recommended it. I speak from my experience entirely, and you should not be surprised that I am so firm a believer in this discovery, which has done so much for me." I was not surprised. I saw by every word. lace curtains during the summer. The curtains get dusty, and after they are washed they never look quite as nice as they did before. Besides, laundrying lace curtains wears them out more than a year's wear at the windows. And so, sooner than run the risk of spoiling her oner than run the risk of spoiling he treasures, the good housewife puts away her lace curtains in the spring and sub-mits to bare windows during the sum-

mer. A very pretty substitute for the lace curtains may be found in muslin ones. The muslins may be white, with colored dots in it, or it may be plana, white dotted muslin which is familiar to every

The colored muslin is, however, more artistic and will not so quickly show the

dust and wear of summer. Fasten the curtains upon the pole or cornice and then cut them off just long enough to touch the floor. Now take the curtain of the cornice and gather on all around its edge a narrow ruffle or a side plaiting of plain white muslin or mull. The ruffling should be of very thin material, so that it gives somewhat the ap pearance of lace. Tie back the curtains with strips of

and turn a bit of ruffling over the hook which holds the curtain back, so as to make a neat and pretty finish.-New York Commercial Advertiser.
