# HOW TO GET RICH.

## Every Great Fortune Made by Some Short Road to Wealth.

Every Great Fortune Made by Some Short Road to Wealth. The desire to see something of the famous mining region of the Rocky Mountains led me, sveral years ago, to pass a portion of world renowned Constock Mines. While billing about and absorbing, as it were, in-formation throug it the pores of my skin, a similarity of tastes brought me into failly contact withom of the Flood, Mackey & O'Brien syndicate of Bonanza Kings, and the inelegant but forceful philosophy of his great accumulator of wealth made a lasting incresion upon my mind. Thing ane evening in hisroom and enjoy-ing at once his quaint humor and his needs to do the old proverbs recites that 'there found one. You are still a young man, com-partively, and are quoted a multi-milion-aire." "Yes," he said, 'and of all the un-fare, the most false and misleading. Look, for a moment, over the list of you any men whose fortunes amount to \$80,-woo and my hol in out to me, if you end how you may ind. wealth."

"" wealth." " we days of man are few, and time is not-given in this age of the world for men to ac-cumulate much wealth except by means of special openings, and by taking advantage of the nigh cuts." 'You may be right," I suid, "but where one man succeeds in renching his goal by a cross country road, do not the many fail?" "No," said he, "Dini't I see you starting out yesterday by the man road to the camp on the other side of the moun-tain?" "Yes," I suid. "Well," he replied, "you could have tuken the trail over the bills, savel pro-ably two hours' walking, and reacked the camp in absolute safety and hills, save 1 protably two hours' walking, and reneided the camp in absolute safety and certainty, only you did not know of the trail. It is just so in business, the man that wants to travel with an ox team and ride in the wagon, must go by the big road, while the fellow who goes by the trail will get there first, ami if there is only one supper to be hai at the station the cross country there first, and if there is only one supper to be had at the station the cross country traveler is the one who will ent it. Take my own experience, which is simply an il-lustration of the way every fortune has been made. I was keeping a little store here and barely 'making tonguo and buckle meet,' when I had an opportunity to get hold of a block of stock in the them infant Comestock Mines. I chewed it over for three days and decided to take it in, and that move lead naturally to all that I have done since, and proved the foundation of my formove lead naturally to af that I have done since, and proved the foundation of my for-tune. I bought more stock, as I had money; bouchs stock in other good mines, and before I knew it I was well fixed." "But," I stad, "prices here are so high that there is little chance for a man of small means." "That's true," ha replied, "but there are plenty of good properties about here and their success is ony a question of means and good management. Then, too, if you want to do something in mines. I will tell you of a field where you can do better than here, and dhe that in my opinion is to" best on the American continent. I should have gone myselt oi if I had not been so heavily interested here that I could not get away. I refer to the gold region of North Georgia. There is the first, an ', as I said before. I think the best mining region in this country." "Why," I said, "is not more heard about it?" "Because," he replied, "plauting was the great absorbing industry of the Souta before the war. That region during the war was the battle ground, and miners were forced into the West, where, in the meantime, the centre of the industry has become established. In Grogia you can get hold of mines on the basis of \$100,-000 that in the West would be worth a million, and to make them success-ful you only neel money to operate and efficient management. There you can work out doers every day in the year; labor which is high here is cheap there; fuel and wate are abundant, and the ores generally in larger bodies, equally as rich or richeer than ours, and the cost of mining, owing to the softer walls about the veins and lower wages, is less than one-quarter of the cost for the same work here." Naturally I was interested to look up the history of the Comstock, and I found that stock quoted at 28.00 per share in the early davis operations, sold soon after as high as it's) per share, and that upwards of \$200, 600,600 were paid out in dividends to share-holders. SOWING RYE. Rye is a crop easily raised and is sub-ject to fewer casualities than wheat and grows freely on soils tha' will not produce remunerative crops of other grains. It may often be profitably sown in the fall on light soils as a kind ot supplementary crop which may be used for winter pasture when the ground is frozen, and also be cut for soiling in early spring, when the green stubble can be turned under as a fertilizer for a cerning crop. On ground well adapted move lead naturally to al that I have done since, and proved the foundation of my for-tune. I bought more stock, as I had money; bought stock in other good mines, and before I knew it 1 was well fixed."

days of operations, sold scen after as high as first per share, and that upwards of \$300,000,000 were paid out in dividends to shareholders. To a knowledge of these facts, and a subsequent therough acquaintance with the Gergian gold regula intance of the second of the

There are now 143,000 nautical miles of cable under the different oceans, which require thirty-seven specially equipped telegraphic ships to keep them in order.

There is considerable difference be-tween Galloway and Angus cattle, although both are black and hornless.

-American Dairyman.

THE COW STALL.

The cow stall is having much atten-tion and ingenuity lavished upon it, but the horse worries along with the most objectionable kind of imprisonment in the narrow quarters where he is fastened

in a painful manner. A few days ago a stable was burned, and a valuable horse was slowly roasted to death, because held by a chain that could not be loosened or cut. Imprisonment in chains

is a refinement of cruelty awarded to

SOWING RYE.

after the harvesting, successive crops may be raised with but little fertilizing

material other than what is furnished by the rye and the potato vines. The latter contain much fertilizing matter,

which, if all saved, will go a good ways toward making up for what is carried off in the tubers. The trouble in such cases

be done at a time when farm work is

not pressing. It would therefore seem that such a use of land at a season when it would otherwise be unemployed might often be advisable.--New York World.

CUTTING OFF THE BLOOMS.

The old fancy that cutting off the blooms of potatoes will increase the weight and quality of the tubers seems to have broken out afresh, but careful

series of experiments which showed

land. In no single year was there any difference in the quality and weight of the potato, and the average results

showed that there was no gain derivable

from this operation.

Stock that is continually tempted by weak fences should not be blamed for although both are black and hornless. The former belong to the west coast of Scotland, the latter to the east coast and the neighborhood of the city of Aber-deen, whence they are called sometimes Aberdeen or Aberdeen-Angus cattle. These are finer in form and hair than the Galloways, which have long, silky hair and a stouter build. Both are good beeves, but the Angus are the better becoming breachy. Sweet potatoes cannot be kept through

the winter unless you handle them gently when harvesting. The farm will never give you com-

The farm will never give you com-plete satisfaction so long as you have to buy truit from your neighbor. If the weeds have possession of the bed this fall you can hardly expect a good strawberry crop next spring. If the "first-class farmer" would maintain his rank he must keen on beeves, but the Angus are the better milkers and give exceedingly rich milk maintain bis rank he must keep on

studying and learning all the time. If you expect the boy to love the farm you must permit him to get some enjoy-ment from it as he goes along.

Something new must be planted every week if we wish to maintain a good garden throughout the season. The wrong way to make money from hogs is by beginning to feed them only

"when big enough to feed off." You can never keep up with the work on the farm if you ever put off until to-morrow what can be done to-day.-American Agriculturist.

### pirates and the most atrocious criminals; and this because of the extreme torment of it. It breaks the heart of a sagacious FARM AND GARDEN NOTES. horse and is the cause of those unavail Plant deep in dry weather; shallow in hig protests, the constant kicking and pawing—eloquent remonstrance against the cruelty.—Chicago Sun. wet.

Ascertain the merits and demerits of a cow before buying her.

Drive a horse with a rein that both you and the horse can feel. If you want your berry bushes to be productive keep them cut back. There is generally lime enough in the

soil, but its presence is indispensable. There are few breeds but what will lay well if they are well fed and cared

Buckwheat hulls produce piles in pigs. Therefore, it is not very well to use the as food for the pigs. coming crop. On ground well adapted to the ulture of the sweet potato rye is an excellent crop to precede it, and, whether pastured or cut for soiling, the

It is thought that pigs grown from old dams exhibit greater vitality than others, and are less liable to disease.

Set the first laying of both turkey and remains of the rye when plowed under will be of considerable benefit to the duck eggs under hens; more eggs and root crop. Then, if equal care is taken to turn under the sweet potato vines better fowls will be secured.

The cholera symptoms in poultry in a nutshell are. Intense thirst, debility, prostration, greenish droppings.

Young chickens will eat wheat o sorghum seed when two weeks old and they will be better than soft feeds.

In very hot weather see that the chick ens have some chance to get into the shade. Too hot a sun is not good.

The enterprising farmer will hasten the fattening of his hogs, so as to have them ready for the market in the fall. Stone drinking vessels for poultry are better than tin ones during the summer;

toward making up for what is carried off in the tubers. The trouble in such cases often is that the rye is so promising in its appearance in the spring that the in-ducement to keep it a few weeks longer for the grain and straw is too strong to permit of its being plowed under for green manure. While the amount of fertility derived from the green rye would not be large, the cost of the seed would be small, and the seeding would be done at a time when farm work is water will keep cool in them longer. A wide wagon tire is a road maker, not a rut cutter. One secret of the good roads of France is the wide tires in use

there. Lice always attack the poorly-kept, illfed chickens first. Coal oil is said to b destructive to them, but must be used

with caution. Having a system will save time; have

a time for feeding the fowls, for gather ing the eggs, for cleaning out the poul-try house and for cleaning the roosts. While liberal feeding is necessary to

experiments made in England and Swit-zerland disprove this. The theory was given to the world by a German ex-perimenter, who published the results of secure a good growth, poultry should never be so well fed that they will not willingly forage for something to eat. An old gobbler or pea fowl will often that a considerable gain in the weight and quality of the tubers resulted in cutting off the blooms. get very troublesome in fighting the other poultry; when this is the case the quicker they are got rid of the better.

An account of a series of experiments The cost of feeding a thoroughbred made by an intelligent Englishman seem to be so thorough that it is worth while flock is no greater than for scrubs, while such birds give their owner far more pleasure and he can occasionally sell fowls or eggs at a good price. to give his results. His experiments extended over a period of three seasons with but one variety, Paterson's Vic-toria potaso, a profuse bloomer, and at that time in general cultivation in Eng-

The farmer who raises hogs the flesh of which is fine will be able to get more than the market price if he once secures a reputation for such. The big, coarse, and over-fat pork will not bring much money, for the simple reason that it does not sell very good when placed on the Thorough experiments were made in witzerland to test the truth of this

market. All farmers do not use coal, but those

SOAP MAKING. The following is a good recipe for making soap: To one pound of potash add three gallons of water until it is dissolved; then add three pounds of any kind of soap grease, the cleaner the bet-ter, to the lye, and set it to boiling. Let it boil slowly so that it will not boil over. It usually becomes soap after boiling from one to five hours. If it boils down before it becomes sap, add sufficient water to keep the same quan-SOAP MAKING. boils down before it becomes sap, add sufficient water to keep the same quan-tity in the kettle until it is soap; then add nine gallons of water and stir well together; when cool, this will be a beau-tiful white soap if the grease was clean. --New York Dispatch.

## CHECKER BOARD WORK.

Woven or checker board work for cushions and anti-macassars is quite popular and not at all difficult to make. For hard usage the wider kind of mohair skirt braid is most serviceable, but satin ribbon is, of course, much handsomer. Select two colors or two shades or the same color and cut the ribbon into strips some color and cut the notion into strps of the required length; pin each strip to a cutting board or table and weave cross pieces of the other shade in and out with regularity. The intersections should afterwards be secured at the back by an invisible stitch or two. A broader plain ribbon or a piece of plush, match-ing one of the shades used in the weav-ing, may be sewed on for a border, and for an anti-macassar lace or fringe can be added to the lower edge .- New York

THE HOUSEWIFE'S TABLE.

Here is a list for the materials most commonly used in the kitchen, writes Maria Parloa in the Ladies' Home Joural. The spices are all ground: Ginger-1 heaping teaspoonful, ‡

Butter-1 solidly packed cupful, 9

unces. Sugar-1 cupful, granulated, 8

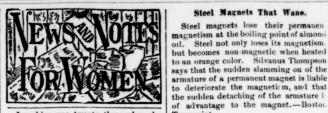

Liquids-1 cupful of ordinary liquid, ounces. The cups used in these estimates hold

half a pint, old measure.

ABOUT COOKING MEATS.

The orthodox rule for the cooking of meat, fish and fowl is to allow a quarter of an hour to every pound; yet this re-cipe needs to be mixed with brains. Some families like rare, others well-done meats; again, a joint may be unusually thick or remarkably thin. Again, full-grown and mature meats, such as beef nd mutton, are best with the red gravy oozing from them; while immature, or white meats, such as lamb, veal, pork, etc., are absolutely dangerous unless done through to the bone. A good rule is to allow twelve to fifteen minutes, ac cording to the taste of the family and the thickness of the joint, for the cook-ing of every pound of beef and mutton; and fifteen to eighteen minutes for the cook. ing of every pound of pork, veal, lamb, ham, bacon, fish and every kind of

Accidents happen, however. The oven may be too hot or too cool, the fire too slow and—what not. So a cook should learn to know by the appearance

breeds in existence, and one of their drawing cards is a disposition to take on from the start a great amount of flesh and fat. Another point in their favor is the immunity which they have from discase. This is not saying that they are disease proof, but on account of their strong constitutions they are more able to keep disease at bay.

## Trees Which Bear But Once.

The sago palm tree bears but one crop of fruit. Its load of nuts is its first and final effort in the way of fruit bearing.

The nuts become ripe and are strewn in thousands around the tree until the great stem stands up by itself, empty and bare. The branches turn brown and frop one by one to the ground. Inside the true the mark of doesn is grain on

the trunk the work of decay is going on until what at one time was a mass of white sago and pith becomes nothing but a collection of rotten brown fibers. One day the trade wind blows more strongly any used and the leafess column of the z, an usual and the leafless column of the trunk falls with a crash, destroying in its fall many of the young palms that are already springing from the nuts scattered some months before. The tali-

put or Palmyra palm, a native of Ceylon, is another tree which flowers and bears fruit but once. When about eighty years old, which is when it has attained

showers down an abundance of nuts,

lowing the meat to cook so long that it raises itself from the bones, as it were; for then it is what is graphically known as being "done to rags."--New York Recorder,

found a remedy for the terrible disease should learn to know by the appearance of the meat itself when it is sufficiently cooked. How can this be done? By carefully observing the appearance of the meat around the centre bone or bones. If the learner be in doubt, the blade ot a The University Club of San Francisco

is to have an annex for ladies. There are only four large cities in this country that have taken the "unclubable se and given them a portion of the build-ing. They are the Metropolitan of New York, the Hamilton of Brooklyn, and the Somerset and Algonquin of Bosknife can be run in about half an inch at the bone, and the meat slightly raised and carefully examined for a moment or two. After one or two trials this will ton.

be found to be an infallible method. It is quite right that next to the bone beef and mutton should be red and juicy, but if the beef be blue or the mutton has Perfumes, to be agreeable, should float about the garments, but never overpower the senses. The odor should be subtle and suggestive. Handkerchiefs and that strange raw look peculiar to muton that sharper aw look peculiar to muton that has just felt the heat of the fire, the joint needs a little more cooking; while gloves are best perfumed by keeping them in sachets powdered with the favor-ite violet, heliotrope, or whatever the preferred scent may be. It is nice also meats should be white, even to the bone. with the exception, perhaps, of lamb, which many people prefer with a little pinky juice oozing through. Fish-Fish is not eatable till the flesh to have small sachets.

Mme. Carnot, wife of the President of France, is the antithesis in physical and mental attractiveness of the preceding mental attractiveness of the preceding mistress of the Elysee, Mme. Grevy, for separates easily from the bones. By running a knife in a little way, say un-der the fins, so as not to spoil the ap-pearance of the fish, this can be judged whereas the latter was a plain and practical old lady, devoid of the graces which the French demand of women in official station, Mme. Carnot is as charming as she is clever. Chops, Steaks or Cutlets-An inch-

thick mutton chops or steak, put over a clear fire on a piping hot gridiron, gen-Yellow is a practically favorite color of the season, and if carefully chosen, suits blondes and, brunettes alike. There is one tone of clear pale, primrose clear fire on a piping hot gridiron, gen-erally takes about ten minutes to cook; pork chops and veal cutlets a little longer but the rule of finding out whether they are cooked or not by examining the bone also holds for them. Turkeys, Chicken and Fowl of all Kinds—Look between the leg and the body of the fowl, and if necessary, slit the skin a little with a sharp knife, and if the flesh there be still raw looking the refers one one of clear pare, primose yellow, especially becoming to a dark complexion, which will take the delicacy out of a fair one. A peculiar greenish tint of yellow, well suited to the sweet pea tinting of blondes, no brunette should attempt.

The Queen of Italy, once one of the if the flesh there be still raw looking the bird is not cooked enough. Salt Meats-Salt meats are not so easily tested as fresh meats, yet even most beautiful girls in the kingdom, is now one of its handsomest women. She is bright and witty in conversation, and here look at the bone. Beware of allearned, with a leaning toward blue stockingism, but without pedantry. She is universally admired and loved by her subjects, and the attachment King Hum-bert has for her is a rare example of conjugal devotion in a royal household, RADWAY'S READY R WAAY'S READY RELIEF.
