ering hot-beds as glass.

maturing.

essful with them.

LATE CABBAGE AFTER PEAS.

The fact that peas are to some extent a renovating crop makes it practicable and sometimes profitable to grow another crop after them the same season. To do this, the rows of peas must not be left to be overgrown with weeds. Make the rows far enough apart to cultivate between with a horse. After the peas are about done, cultivate again to mellow the ground, and plant the cabbage in the same rows where the peas were. The introgen supply is there most abundant, as pea roots have the power of dissolving air and making its nitrogen available.—Boston Cultivator.

PLANTING CORN EARLY.

Farmers often get impatient when the season of corn planting is two or three weeks away, and if there has been a favorable spring and the weather has been warm and pleasant for a week or more, leaving the ground in good condition, their impatience overcomes their better judgment. The corn is planted with the usual result of rotting in the cold, wet weather, and the chances are that much of it must be replanted. Corn, planted two or three weeks later, will produce the better crop. This planting and sowing out of season applies equally well to many other crops. Remember, that, on an average, seasons vary but little from the set period of proper warmth and cold. Hence, do not let a week of unseasonably fine weather lead you to perform some rash farm operation, but be content to wait. There is plenty of other work that should claim your attention during this anxious period. Any PLANTING CORN EARLY. tion during this anxious period. Any seed grain is better off in the granary than it is sown unseasonably.—American

SHREP RAISING.

SHREP RAISING.

In starting a flock of sheep it would be desirable to begin with a few at first, when one is deficient in experience, as a knowledge of the habits of these animals is indispensable to success with them. By beginning with a small flock and getting as much information as possible from a good manual and exercising much care and patience there will be little difficulty in making a success of it and gradually increasing the stock. For a beginning it would be better to get the native sheep and use a ram of some hardy kind, as the Shropshire, and so gradually build up the flock. The ram should be changed the second year, another of the same breed being procured, but it is not desirable to change the breed when one has become used to it. The large bodied, long wooled sheep are more difficult to manage than the hardier short or medium wooled kinds, of which the Shropshire is the most popof which the Shropshire is the most pop-lar. A good book on this subject is "Stewart's Shopherds' Manual," which may be procured through any bookseller.

—New York Times.

SUNFLOWER-SEED CAKE FOR COWS. Sunflower-seed cake has found exten-sive use for feeding dairy cows within a few years in foreign countries within a few years in foreign countries and especially in Denmark. A trial is reported with four cows, made to compare the effects of sunflower-seed cake and linseed cake. The sunflower-seed cake was fed in the form of meal.

A summary of the results of the trial, which lasted nearly two months, shows that the addition of sunflower-seed cake to the usual ratios was accompanied.

to the usual ration was accompanied in the case of each cow by an increased milk yield. In this connection the addi-tion of one pound of the cake appeared to be practically as effective as the addition of two pounds. Sunflower-seed cake seemed to be fully as effective as linseed cake. The sunflower-seed cake apparently had no effect on either the fat contents of the milk or the live weight of the animals. Financially there was no advantage from the addithere was no advantage from the addi-tion of either the sunflower-seed cake or linseed cake to the basal ration in this

HOUSEHOLD AFFAIRS.

KERPING TAB ON THE BROILING STEAK A beefsteak one inch and a half thick should be brouled ten minutes over a red fire, if it is to be very rare; twelve minutes to be rare; fifteen minutes to be medium, and twenty minutes to be cooked thoroughly. When the steak is first held over the coals, hold one side next the fire long enough to count ten, turn the broiler and count ten again. Continue to turn and count by tens the first five minutes, then count by twenties and if you cook the steak after that count by thirties.—New York Post.

TO MAKE VINEGAR.

TO MAKE VINEGAR.

Excilent vinegar may be made in this way: Take six gallons of pure or filtered rain water, add two quarts of molasses and one quart of yeast, or some of the jelly mother of vinegar) from an old vinegar vessel. Put the liquid in a keg and in a warm place, with the bunghole covered by a fine wire gauze or a piece of muslin, and the vinegar will be made in three weeks. It will gain in strength for a long time. To replenish the supply an addition of as much fresh liquid, made in the same way, but without the yeast, may be added as is taken out.—New York Times.

WORTH REMEMBERING. Lemons will keep fresh for weeks if covered with water.

covered with water.

Nasturtium leaves are beautiful for garnishing fish and meat.

For taking blood stains from white goods nothing equals kerosene.

Never put left-over food in tin vessels.

Vegetable, scrubbing and other brushes should be kept with the bristles down.

Dip fish in boiling water for a minute and the scales will come off more easily.
Sadirons will not scorch if they are first wiped on a cloth saturated with

Rub soft, not melted, lard over the And sort, not merced, and over the top of bread before baking, and wrap in a damp cloth with a large dry one after baking, and there will be no hard crusts. Keep bread in a covered box.—American Agriculturist.

THE PORTUGUESE REBANADAS.

A dish as much eaten by the Portuguese as mince pie by Americans is the rebanadas. It is of Moorish origin and is easily and quickly prepared—as be-fitted the habits of a nomadic race.

Thick slices of bread are scaked in new milk, fried in olive oil and then spread with noney and eaten hot. The result is something delicious, and those who have once tasted the rebanadas will

who have once tasted the rebanadas will want to taste it again.

Although an oriental dish, why may it not be adopted by occidentals? I have seen it fit charmingly into a American luncheon, and it would be very welcome on the children's tea table. And why, by the way, are not Portuguese olives more extensively imported into our country? Unlike the queen olives of France, Spain and Italy, the Portuguese olives are pickled when they are wholly ripe, and are therefore much more palatable and nutritious.—Chicago News Record. Hatch early and do not move pullets about to various runs when they are

NICE WAY TO COOK A SHAD. A very nice way to cook a shad is to bake it. Prepare it as for broiling. Chop a couple of shallots or two small onions, and put them over the fish, which should be well buttered. Place which should be well buttered. Place it in the bottom of a dripping pan in a moderately hot oven. Let it cook till it is thoroughly done, which will take about half an hour. It should be covabout hait an hour. It should be covered with buttered paper if it shows any tendency to brown too much. Make a vert-pre sauce to serve with it as follows: Melt a tablespoonful of butter in a saucepan and stir in a tablespoonful and a half of flour. Stir this well, but do not let it brown. Then add slowly a cup of rich white stock. Break the yolks of two eggs in a bowl and pour the boiling hot stock over them, beating all the time. Strain the sauce through a "Scotch cap" or pointed French strainer. Add a tablespoonful of lemon juice, a tenspoonful of butter and a saltspoonful of spinach green. Set the sauce in a basin of hot water and stir it for about three minutes. Then add a tenspoonful of minced chervil. Pour half the sauce over the shad and serve the rest in a sauceboat.—New York Tribune.

Tea Cake—Two eggs; ‡ cup butter; 1‡ cup sugar; ‡ cup sweet milk; three cups flour, more if necessary to roll; one heaping teaspoonful of baking powder; roll thin, cut into small cakes and bake quickly.

Fried Hominy-Have a frying-pas Fried Hominy—Have a frying-pan with hot butter in it, and put in as much hominy as required for the meal. Pour over it a very little water or milk to keep it from burning on. Salt to suit the tasbe. Do not stir it while cooking, but leave the kernels whole.

Mushroom Sauce for Fowls—Peel about a pint of young mushrooms; put them into a saucepan with a little sait and pepper, a very little mace, a pint of rice, sweet cream and a gill of butter rubbed up with a teaspoonful of flour; beil up once and serve in a gravy boat.

traham Bread—Soak half a cake of compressed yeast, add one quart warm water and two quarts Graham flour. Dough should be as stiff as can be stirred with a spoon, put into a well-greased deep sheet iron pan. When light bake one hour. Make bread from the entire wheat flour the same way, only a little stiffer.

stiffer.

Yeast Cora Cake—Pour three cups of boiling milk over two cups of corameal; beat thoroughly; add a teaspoonful of salt, one tablespoonful of sugar, two of butter. Mix well. Let this cool and add two tablespoonfuls of liquid yeast and one well beaton egg. Let this rise five hours before pouring into a well greased baking pan, pouring about one and a half or two inches thick. Itaise a half hour before baking. Bake forty minutes.

The Golcouda mines are now exhausted. At one time 60,000 man were employed in them. When the Sultan Mahmoud, who reigned 1171-1206, ded, he loft in his treasury over 400 pounds weight of gent from tinicula.
