

Swiss Vineyards.
Many Swiss vineyards are formed with persevering industry upon these precipitous slopes by means of parallel walls, whose narrow intervals are filled with earth that has been carried up by the peasants in baskets or upon their backs from below, and in the same way they must be abundantly covered with manure. These successive terraces are reached by steps, frequently cut with infinite labor in the hard rock, and with every economy of the land. Every inch of the ground is valuable, because only on one side of certain hills will these vines come to perfection. These lands, after being purchased at so high a rate, need constant attention; for the soil is washed away from these steps beneath the stone walls, and must be replaced every spring; every clod of earth is a great treasure, and they carefully collect the earth that has been thrown out of a ditch to fill up their vineyard patches. A square foot of land is reckoned to produce two bottles of wine annually.—American Agriculturist.

A Chinaman in a Library.
A Chinaman in search of books in his own tongue was an object of interest at the Astor Library the other day. He was the most richly and comfortably dressed man in the building, for his loose, light tunic was of elegant shimmering silk, his trousers seemed to be of the finest broadcloth, and his shoes were beautiful specimens of Chinese footgear. He was polite also, to the last degree, smiling, suave and soft spoken. The librarian found some rich-looking books printed in Chinese characters, and after the visitor had returned one of them, a small inn employed as a messenger in the library carelessly opened the uncut pages with a lead pencil, to the injury of the delicate paper.—New York Sun.

A practical joke upon John Washburn, a lad in West Union, Ohio, has had a deplorable result. Some men pretended that they were about to arrest the boy, and he has become insane.

Hood's Sarsaparilla Cures

"I cordially recommend Hood's Sarsaparilla to all suffering with indigestion, impure blood, humors, loss of appetite, or run down, or out of order generally. It is a very powerful medicine, and I have found it a very great benefit for malaria, chills and fever, rheumatism, kidney complaint and catarrh, even when I considered myself incurable." HENRY S. FOSTER, Scarborough, N. Y. He was cured by Hood's Sarsaparilla.

KARL'S GLOVER ROOT
IT GIVES FRESHNESS AND CLEARNESS TO THE SKIN.
CURES CONSTIPATION, INDIGESTION, DIZZINESS, ERUPTIONS ON THE SKIN, BEAUTIFUL COMPLEXION.
An agreeable Laxative and Nervine Tonic. Sold by Druggists or sent by mail, 50c, 50c, and \$1.00 per package. Samples free.

KO NO
The Favorite Toilet Powder for the Teeth and Breath, 50c.

PENSION JOHN W. MOHRERS
Successfully Prosecutes Claims.
275 to 285 West 15th St., New York City.

THE KIND THAT CURES

A Victory Over Disease!

"Terrible Pain in Head and Stomach!"
"My Face was one Mass of Eruptions!"
"Walked the Floor Night After Night!"
The following from Mrs. Hams proves the WONDROUS POWER OF DANAR'S Sarsaparilla.
"I was afflicted with a severe case of Eruptions on my face, and a terrible pain in my head and stomach. I had tried many remedies, but they all failed. I then bought a box of DANAR'S Sarsaparilla, and after using it for a few days, I began to feel better. In a few more days, the eruptions had disappeared, and the pain in my head and stomach was gone. I am now perfectly well, and I can truly say that DANAR'S Sarsaparilla is a most valuable medicine." DANAR'S Sarsaparilla Co., Boston, Mass.

DANAR'S SARSAPARILLA
Cures Eruptions, Headache, Stomach Pain, and all Skin Diseases.

SCOUTS OF THE PLAINS.
HOW SOME OF THESE BRAVE FELLOWS MET THEIR DEATH.

Vigilant, Cool, "Nervey" Men Who Fought Savages—Their Lively Rides—Perils That Beset Them.
PROPERLY speaking, a scout is a person who is sent out in the front or on the flank of a military command to observe the force and movements of the enemy. He should be a keen observer and withal fleet of foot or well mounted. There are a number of unmarked graves along the Arkansas River and the tributaries of the Canadian and Smoky Hill—graves where never loving hands have strewn flowers, resting places over which no prayer has ever been said, or memorial slab or stone fence, distal "with their boots on." Many of these graves are tenanted by scouts killed by hostile Indians while acting as couriers, spies or dispatch bearers.

In 1867-68 we were at war with the Cheyennes, and during the winter General Alfred Sully made the campaign an offensive one by moving with his command into the medicine country of the hostiles, south of where Dodge City, Kan., now stands. The entire campaign was under the general direction of Major General Philip H. Sheridan. The war claims of the latter for promotion to the rank of lieutenant-general, vice Sherman, vice Grant, were supplemented by active Indian service until March 4, 1869, but Phil Sheridan never remained long in any one place, and several good soldiers acting as dispatch bearers, were sacrificed owing to their unfamiliarity with the topography of the country in which General Sully was operating.

In consequence of these losses General Sheridan authorized the employment by the United States of twelve citizen scouts at a compensation of \$100 a month, and one chief of scouts who was paid \$150 a month. These men were sworn into service at Fort Dodge. In addition to the pay mentioned, each scout was furnished with a good horse, with all the arms, ammunition, etc. he wanted, with rations same as issued to enlisted men, free medical attendance, with fuel and comfortable quarters when within the limits of a Government post. Each scout was told that if he chose he would make it his duty, in case the scout was killed in the discharge of his duty, to communicate the fact to the postoffice address of any person or persons whom he might wish to be notified.

Without exception the thirteen men were American born. All had histories. Every scout had one address or more to communicate, coupled with some message to give. None of these men were of the Texas ranger or cowboy type in dress or appearance. Only two wore their hair long. One was discharged for cowardice in falsely reporting the location of a large body of hostiles on Coon Creek, between Fort Larned and Fort Dodge, investigation having proved the presence only of Apache Bill. He was afterwards killed in an affray at Junction City, Kan. Another scout named Webster, was discharged for shooting his horse in the neck while carelessly and unnecessarily discharging his firearms within the limits of a military post. Two of the scouts, Fanshaw and Davis, were killed by the Cheyennes while in the act of watering their horses at Mulberry Creek, one of the small tributaries of the Arkansas, on the south side of the river. Their remains were interred in the Fort Dodge cemetery.

Another of the scouts was a man named Ransome, alias Ledford. He was an apparently frank, cheery, handsome fellow, of splendid physical proportions, and a magnificent shot. He owned a black horse, docile to him, but a fiend incarnate to his enemies. The man was a great favorite with army officers, whom he often bantered for friendly shooting matches, and was rarely beaten in contests of skill in that line. He took more chances and more often volunteered for dangerous service than any other scout; was never derelict, but was killed in 1872 at Wichita, Kan., by Lieutenant Hargons, an officer of the Fifth Infantry, who was on duty with a posse aiding a Deputy United States Sheriff named Bridges to arrest him on a charge of horse stealing. When arrested by Lieutenant Hargons, Ledford fired first at the army officer, who dropped as if killed. Lieutenant Hargons was not hit, however. Ledford was maddened by liquor and strode over the prostrate body of the officer, firing at Jack Bridges as he advanced, and wounding him in the arm. The scout then made a rush at a soldier who had accompanied as a member of the posse, when his further shooting was prevented by a bullet through the heart. Like Hickok, the original "Wild Bill," Ledford respected the army line, and the affray in which he was killed was the only occasion that he was ever known to shoot at any person in the permanent military establishment.

The winter before his death Ledford, then in Government service, accompanied a detachment of the Third Infantry, acting as escort for Major Rodney Smith, paymaster United States Army, to Camp Supply, Indian Territory, and return. The route for about 200 miles was over a broken and undulating region so covered with snow as to appear level. Thus a ravine, snow-filled, appeared at a distance no different from an elevation, snow-covered. There were no trees or bushes above the dead level of the snow. Buffalo were numerous, and were often seen floundering in a ravine, struggling to get away from the soldiers. The soldiers were intent only on making their way through the drifts to their point of destination, and could not afford to lose time in shooting buffalo, but Ledford would urge his horse up to and into the herd, fire both revolvers in order to further frighten the buffalo, and throw himself beside the nearest bull buffalo and stab him. The steam from the animals

the snow whirled, the whorls of the scout, the red gouts from that gleam-knife made a strange, exciting tableau. Another scout, known as Curly Walker, was killed near Dodge by a resident of Salina, Kan., in an encounter resulting from an effort on the part of Walker to sell a lot of cattle stolen and run off by him from their lawful owner. This man Walker was cowed once when drunk and disorderly at Fort Dodge in a way that Lieutenant Colonel John B. Brooke is too modest to tell about. Bob Wright was present when he was killed. He was pierced by several bullets from a Westchester rifle while dismounting, from his horse, and died with one hand on his revolver, vainly trying to release it from the holster, in the stitching of which the hammer was caught. In the other hand Curly Walker had a revolver which, in his death throes, he used as a knife, repeatedly thrusting it into the prairie soil, discharging it and bursting the weapon by the act.

Captain Harry Beale, who for eighteen years was an officer of the Twenty-fifth United States Infantry, was formerly a scout in Government service upon the Western plains. He never wore a buckskin suit or affected long hair, however, and in the quiet retirement of his Massachusetts home knows not the perils of the days when he, with only a single companion scout, carried dispatches through a region populous with Kiowa, Arapahoe and Cheyenne Indians, who ambushed the watering places, fired the river bottoms, and whose keen-eyed abilities sought by every artifice and skillful device to intercept, chase down and kill the Government scouts.—Cincinnati Commercial Gazette.

WISE WORDS.

Obedience is not servility.
Forgiveness is a rose without a thorn.

The sun can't shine through a broken heart.

It is easy to forswear unknown delights.

Nothing is more disgraceful than insincerity.

It takes a philosopher to reason out his faults.

Nothing is so immortal as an unfortunate love.

Youth, when thought is speech and speech is truth.

Prudence is the diamond setting in the crown of valor.

Money may buy silks and satins, but not angels' clothes.

Most of our troubles are cowardly if we face them bravely.

A little taffy now and then is relished by the wiser men.

Only a parent can understand the language of a baby's cry.

Obstinacy is not force of character so much as it is its opposite.

Art cannot live without genius, but genius may live without art.

A tiny voice will always be raised in defense of the mother-in-law.

There is no calamity which right words will not begin to redress.

As a rule when a man "gets even" he wishes he had got something else.

The fairest ornament for a woman's breast is the fresh flower of humanity.

With the blood of babes is the stagnant stream of life replenished and renewed.

Duty is the telescope through which we should look to pick out the way before us.

The stanchest adherents of blue blood are those animated by a more sanguine variety.

We are less apt to criticize the extravagances of others when we are made the favored partakers thereof.

Origin of the "Hello!"

"Hello!" is almost a new word, as it differs in form, sound and use from the old "halloo." It is merely mentioned by Webster, and the searcher for information is referred to "halloo," which is defined as an interjection, a loud call or the noise of the hunt. The forms there given—"halloo" and "halloo"—are not well adapted to the American tongue, neither are they susceptible of the variety of expression that can be given to "hello." Probably the word "halloo" grew out of the call "hail, oh!" which was almost universally used by wayfarers in olden time when halting at a house along the way. "Hail, oh! the house," was another form quite common in this section in early times. This would quite naturally take the form of "hal-loo! the house." However, this derivation is not given by Webster, but merely suggests itself.—Pittsburg Gazette.

Concentration of the Sun's Rays.

A fire occurred Saturday in a show window at Boston, caused by the sun, which focussed through a mammoth magnifying glass and set fire to a photograph. This is only one instance of the frequent recurrence of unexpected fires by concentration of the sun's rays by magnifying glasses or by concave mirrors. A few years ago a bright tin dish concentrated the rays of the sun in a store window at Lynn and caused a sufficient fire to call out the Fire Department. There have been many fires in physical laboratories of colleges from lenses, and it is the rule in all properly ordered physical laboratories to keep lenses covered with black cloth caps, hangman's caps, as it were.—New York Commercial Bulletin.

Cooling Railway Carriages.

A contrivance for cooling railway carriages is described by Indian Engineering, which consists of a small tank at both ends of the carriage, which receive their supply from the main tank above, which holds water for the passengers' use. From these tanks are conveyed "drinking troughs," which work automatically, emptying gently when full of water, and perfectly saturating kus-kus bottles that are suspended across an open trapdoor, which is let down at the fore end of the carriage in whichever direction the train is traveling.

NEWS NOTES FOR THE NAME.

The Empress of Austria has a lady doctor in her suite.

Do not wear a veil just below the nose if the face is long.

Mme. Modjeska, the tragedienne, has educated and named five nephews and nieces.

One of Mrs. Hicks-Lord's fans, with its gold and ivory sticks, has a lace mount valued at \$1000.

Mrs. John Sherwood, the New York department authority, says that her favorite heroine is Portia.

Mrs. Bart, of New York City, has a bed carved by her own hands. There is not another like it in the world.

Mrs. Austin Corbin's drawing-room in New York City is lighted with electric lights, shaded with pink globes.

Mrs. William Walter Phelps, wife of the ex-Minister to Germany, has crossed the Atlantic Ocean sixty-five times.

An elderly bride was recently married in Grimsby, England. Her name is Mary Benton, and her age is 102 years.

Mrs. Mary Hall, attorney-at-law, conducts a class in "Civil Government" at Woodside Seminary, Hartford, Conn.

Ella Wheeler Wilcox, the poetess, has invented a dress which has no buttons, hooks or eyes, strings or any other fastenings.

The "foot corset," which is becoming popular in Paris, enables the wearer to readily crowd a number four foot into a number three shoe.

Miss Mary Redmond, the Irish sculptress, whose colossal statue of Father Mathew was recently unveiled in Dublin, is only twenty years of age.

Miss Helen Gould, daughter of Jay Gould, spends much time at her Irvington (N. Y.) estate, where she has one of the finest conservatories in the country.

The Queen of Italy is said to be one of the best patrons of music in Europe, and many young aspirants for musical honors receive encouragement from her.

Mrs. Levi P. Morton, wife of the ex-Vice-President, has a preference for the linen of the whitest, finest and softest, without lace or color for the dinner table.

Mrs. Cornelius Vanderbilt, of New York City, uses attar of roses, which is said to cost \$50 per ounce, one drop of which is a veritable benediction to the senses.

The primrose is very soothing to those who suffer from excitable overwrought nerves. Two or three handfuls of blossoms should be thrown into the water of the bath.

Nearly every day flowers and fruit are sent by Mrs. John Rockefeller, wife of the Standard Oil king, to St. Luke's Hospital, in New York City, across the way from her house.

Two Boston ladies, Miss Laura Lee, an artist, and Mrs. Flower, wife of the editor of the Arena, are said to have determined to do their calling in dress reform costumes of the bloomer type.

The ex-Empress Eugenie is said not to put trust in French medical men. When she fell ill of a sore throat in Paris, not long ago, she telegraphed to England for a physician to attend her.

Mrs. Ormiston Chant, the well-known preacher, says that she has officiated in churches of every creed except those of the Church of England and the Roman Catholic denominations.

Miss Eleanor Baldwin, who graduated from the Harvard Annex in the class of 1892, has been appointed to teach literature and composition in the new English High School at Worcester, Mass.

Doctor Julia Washburn, of Lexington, Ky., is in charge of a bureau in the Kentucky State Medical Society, and will deliver the public address this year, at the meeting of that body in Danville, on "Women in Medicine."

The Baroness Burdett-Coutts has taken to "book-writing," and a work on the philanthropic work of women throughout the world, shortly to appear in London, will be entirely under her editorship, and partly the work of her own pen.

Benjamin Constant, the French portrait painter, says he prefers painting American women rather than those of any other nationality. They have more faith in the artist than the Parisians possess, and allow him to pose them and surround them as he thinks best.

The largest New York "provider" employs two women detectives—Lens Vorsemmer and Eva Peyser. They are both mere girls. They receive high salaries, have the run of a lavish wardrobe, and completely change their attire twice a day—so effectively that there is hardly a shop thief in New York who is quite sure of the identity of either of them.

Since jeweled fillets became the rage among rich women, New York jewelers have produced many fabulously expensive things of this sort. Regular coronets are not uncommon, and one jeweler has made to order for a New York woman a reproduction of one of Queen Victoria's crowns, an elaborate affair of gold enriched with handsome work and jewels.

Most societies in Japan are for one sex only, and in many churches there must be two societies, one for the young men and one for the young women. In other churches, however, where it is possible to do so, pastors find the society an admirable means of breaking down the artificial distinctions between the sexes, which often stand in the way of the best church work.

It seems now a settled matter that eriolinole will be entirely unnecessary. The latest French dresses are quite close about the waist and flare from the knee, but a line of thin eriolinole muslin is all the stiffening necessary at the bottom. Horse hair or heavy stiffeners are vulgar and superfluous. The stiffener of eriolinole muslin is not a heavy weight, but the quality one degree removed from tarlatan in weight.

Traits of Turkish Nomads.

The Yuruks, indeed, assert that human souls return into the bodies of animals, and that the spirits of the latter take also a human form and appear at determined epochs. This is certainly the reason they are so kind to animals. M. Elisee Reclus says that a Yuruk loves his horse as much as his family. The horse have their place under the tent, and it is not uncommon to see them warmly wrapped in a magnificent robe when the Yuruk and his children are covered with rags. Some other customs attest also a pagan origin; in the Orient everybody knows that the Yuruks worship certain trees and rocks. These facts suffice sufficient evidence that monotheism is by no means the essential dogma of their religion.

Among the qualities possessed by the Yuruk, hospitality is, no doubt, prominent. Deprived, by the very influence of his adventurous life, of all the fierce instincts which characterize the Turkomans; restricted, by his occupations, to the woods, the plains, or the mountains, constantly exposed to the inclemencies of the seasons, to dangers and enemies of all kinds, the Yuruk has conceived a generous and noble idea of hospitality, and he practices it with disinterestedness and pleasure. His tent, whether in his presence or in his absence, is always open to the traveler, and food and drink in abundance are given him. The tents of the Yuruks are square, and made of a sort of thick black woolen cloth.

Aside from the information I have given here, nothing precise is known of their private life. For instance, nobody ever knew what became of their dead, as no one has ever seen a cemetery. All I am able to say is that the body of the deceased is placed on a black mule, destined exclusively for that use, and thus carried to a mountain. There, I am not aware whether it is cremated or buried; but, as I was told that they also take a sheaf of firewood, it is safe to believe that cremation takes place.—Popular Science Monthly.

Edison's Practical Ways.

An incident once happened in Edison's laboratory illustrating capitally the intense practicality of the "Wizard's" nature and also showing the impractical ways of professors. During the course of some incandescent lamp experiments Edison wished to know the amount of space enclosed in the glass bulb, and so, turning to two of his well learned assistant electricians, requested them to ascertain the cubical contents of one of his electric illuminators.

To these professional minds there occurred but one way to solve the problem—mathematics. Any one who has ever probed very deeply into this science of quantities and magnitudes will know by reason of the irregular form of an incandescent lamp that to ascertain its cubical volume is no easy task. In fact it called for the greatest mathematical skill. But the professors went to work with true grit, and after using several sheets of paper and consuming considerable time, informed Edison of the result. To their surprise the inventor said these figures were not within gunshot of the true solution, and to the question as to how he knew, the "Wizard" would only shrug his shoulders and tell them to find out for themselves.

The electrical experts again went over their figures, checked them and tried all the forms of mathematical calculation, from arithmetic to applied mechanics, but without avail, for the final result was again declared wrong by Edison. After several more useless attempts, and when a good portion of the day had been wasted, the professors would work no more upon the problem until they knew Edison's method of computation.

The "Wizard" then simply took the cap off an incandescent, filled it with water and then poured the liquid into an instrument used to determine the volume of fluids, whence the cubical contents was known.—New York Herald.

We Cure Rupture.

No matter of how long standing. Write for free treatise, testimonials, etc., to S. J. Hollenbeck & Co., Oswego, Toga Co., N. Y. Price \$1.00 by mail, \$1.50.

J. S. Parker, Fredonia, N. Y., says: "I shall not call on you for the \$100 reward, for I believe Hollenbeck's Cure will cure any case of rupture. Was very bad." Write him for particulars. Sold by Druggists, 75c.

Inventors of anything made of wood assisted financially or otherwise to patent or place on market. Wm. H. Wilson, Box 1710, New York.

Hatchell's Universal Cough Syrup will cure that cough surprisingly quick. 25 cents.

A wonderful stomach corrector—Bechman's Pills. Bechman's—no others. 25 cents a box.

To Set Up Pneumatic Guns.

Some of the pneumatic guns intended for New York harbor will probably be put in position during the present summer. Of the five guns for New York two fifteen-inch guns will be set up at Sandy Hook and one at Wille's Point. One ten-inch gun will also be set up at the latter point and one eight-inch gun at the former. Early next year it is expected to place the three fifteen-inch guns intended for San Francisco, after which the three guns for Boston harbor will be set up. There is no doubt that the pneumatic guns may be effective auxiliaries in land defense.

While they are quite limited in range, yet within that range they have the power of throwing an enormous quantity of dynamite or other high explosives upon an enemy's fleet. Hence they are particularly adapted to defending a narrow channel or to protecting fortified works from suffering too close a fire from an enemy.—Washington Star.

George III. was the only British sovereign whose reign was longer than Victoria's. Victoria has occupied the throne fifty-six years, and George III. occupied it sixty.

All other baking powders are shown by the latest United States Government Report to be inferior to the Royal in both Purity and Strength.
(See Bulletin 13, Chemical Division of U. S. Agricultural Dept.)

HANDSOME IS THAT HANDSOME DOES—HARTMAN STEEL PICKET FENCE "takes the bun" on all points of view. It will beautify and protect your lawn forever.
We sell more Lawn Fencing than all other manufacturers combined, because it is the **HANDSOMEST AND BEST FENCE MADE**—**CHEAPER THAN WOOD**—The new HARTMAN WIRE PANEL FENCE costs less than barbed wire, and is **Strong, Visible and Ornamental**. Our **Patented Gate, Tree and Flower Guards, and Flexible Street Wire Door Mats** are unequaled. A 40-page illustrated catalogue of **HARTMAN SPECIALTIES** mailed free on application. Mention this paper.
Works: Newburgh Falls, Pa.
Branches: 102 Chamber St., New York, 208 State Street, Chicago, 51-53 South Forsyth St., Atlanta.
