It is said that on an average every champagne cork is utilized for three separate bottles before it gets broken or thrown aside as useless. English waiters get about fifty cents a pail for theat from the manufacturers and twenty-five cents a pail for soda water

When Nature

Needs assistance it may be best to render it promptly, but one should remember to use even the most perfect remedies only when needed. The best and most simple and gentle remedy i the Syrup of Figs manufactured by the California Fig Syrup Co.

pornia Fig Syrup Co.

Deafness Cannot be Cured
by local applications, as they cannot reach the
diseased portion of the ear. There is only one
way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an infamed you do not into the mucous lining of the
Eustachian Tube. When this tube gets infamed you have a rumbling sound or inperfect hearing, and when it is entirely closed
Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be
destroyed forever; nine cases out ten are
caused by catarrh, which is nothing but an inflamed condition of the nucous surfaces.

We will give One Hundred Dollarse for any
case of Deafness (caused by catarrh) that can
not be cured by Hall's Catarrh Cure. Send for
circulars, free.

MEASUREMENT OF HAY IN A STACK. Hay settles in the stack quite slowly on account of the elasticity of the grass stems. It is a matter of guess work wholly how much it may settle but in a month it may settle one-tenth in the height of the stack and more slowly after until it stops. New hay stacked twenty-four hours only will weigh more than a ton for 1000 cubic feet; after a month the weight of a ton will be about 900 cubic feet.—New

MULES FOR FARM WORK.

The mule is used much more than the horse in the South, probably in part because Southern laborers are not to be trusted with the part because Southern laborers are not to be trusted with the more spirited and valuable animal. A Southern planter mentions as advantages of mules over horses: Their feet are smaller, so they injure the crops less when working in them, and can be when working in them, and can be used in closer rows than horses; they are less liable to disease, are better feeders, being less fastidious as to what they eat, endure hardship better, are not so easily injured and are steadier to work at the plow. The experience of most Northern farmers with mules is that, however serviceable for work on the farm, it is less pleas ant and less safe to work among them Good horses are none the worse for the farm, because they require better care than the mules will put up with.

—Boston Cultivator.

A calf to each cow can be raised on kim milk and a little additional food. A calf may be fed skim milk when one week old, with the addition of one gill of boiled flaxseed, increasing this rawith the addition of one gill tion gradually to a pint per day when four weeks old, and then adding fine middlings or corn and oats ground together, or a pint to one quart of oats

get one-fourth to one-third as much profit out of the butter. Selling butter robs the land of nothing valuable—only carbon, which has no manural value. —Mirror and Farmer.

THE EXCELLENT LIMA BEAN.

The Lima bean is the best flavored and largest variety of the bean family, yet it is not raised for the market in any large quantities on account of the able and expense of getting poles them. The villager has to buy for them. The villager has to buy poles for what he plants, and the sum expended for them often exceeds the income from the vines. Those farmers who have timber on their land are generally too busy, or think they are, to bother with pole beans, so they plant some of the bush varieties that are not half so good in flavor and yield very poorly. For the benefit of those who poorly. For the benefit of those who like Lima beans and do not raise them because of the trouble of providing with poles, we give the following plan of a trellis, which answers every purpose fully as well as the old method: If they are to be raised on a large scale two heavy posts may be set at in-tervals of forty feet, the full length of the row, being sure to brace the end ones. Then plain wire is stretched from post to post. As the vines are very heavy, it is best to strengthen it by putting two or three pieces of ordinary three-inch board. Then loop a strand of package twine from the top wire to the lower one. These twines should be about sixteen inches apart. Very little trouble is experienced in making the vines follow the wires, and no tying is necessary. This trellis will last many years, and we think it is a great improvement over the poles.—

American Farmer.

American Farmer.

Crops than those that are not mulched. A little extra work in mellowing the soil will give a larger profit when the crop is harvested.

Market gardeners are proposed.

PLANTING THE GRAPE.

Experienced grapemen everywhere urge deep planting and it is a lesson one must learn sconer or later. We may think it an absurd thing to plant a vine a foot and a half or two feet deep, but unless we do we may as well bet grapes alone.

grapes alone. Nearly all planters recommend at least the former depth, and it is a cus-tom followed in the oldest grape countries. Not only is it an all but universal method, but in some of the Rhine countries all surface roots are cut off by thrusting the spade down alongside the vine, so compelling the plant to find its entire sustenence in

Without a deep and thorough pre-Without a deep and thorough preparation of the soil our vines will be both short lived and unproductive.

Drainage must be secured if necessary, for a grape will not endure wet feet, nor will fertilizing the subsoil be of the least use so long as water remains in it.

How to earlie the whole soil to the Christy that the carried the whole soil to the Christy Clay Company, has secured an option on 6000 acres of coal land in the Christy that the carried the whole soil to the Christy Christy the carried the carried the carried the content of th

depth of at least one foot is, in the vineyard, an important matter. It may possibly be done otherwise, but to promote a good healthy growth of vine and fruit, there is to my mind no way at all equal to ploughing in good comand fruit, there is to my mind no way at all equal to ploughing in good compost, either of muck well dried out or of parings of how rich lands, including wire grass, bushes, vines, all the small growth. Such a compost made up with hardwood ashes and a sprinking of hone, distributed all through the soil by repeated ploughings, will give you wood and fruit.

Now, is preparing to plant, throw out wide, open furrows, or dig holes at least three feet wide and a foot and a half deep, and put in a generous sup-valuable in making paint. A bar of

balf deep, and put in a generous supply—a bushel or more—of the same compost. Mix it with the best surface soil, and in that plant. You cannot fill up at first; let the upper roots be covered three or four inches, and for the rest successive horings as the vines grow will suffice, and by the close of that used here.—St. Louis (ilobe-Democrat.

the first season the ground will be

down near the bottom of the prepare holes, for most of the failures in grape growing result from surface prepara-tion and shallow planting.—Florida Agriculturist.

POOR PASTURES. Good pasturage is essential to successful dairy farming in most sections of New England. On a large proportion of the farms these pastures are not and very many of them cannot be cultivated, and, as a consequence, these that are stocked with cows are slowly being depleted of their original fortilbeing depleted of their original fertility, and brush and weeds take the place of nutritious grasses.

A short time since the writer passed

A snort time since the writer passed through a hilly town where sheep rais-ing was formerly the leading farming industry, but after the collapse of the Merino boom the farmers changed from sheep raising to dairying, and for the sneep raising to dairying, and for the past ten or twelve years cheese making has been their specialty. For a few years this line of farming was profitable. The pastures furnished an abundance of feed, and the cows gave a good flow of milk with small cost. But things have changed. Many of the things have changed. Many of the pastures now are overgrown with weeds and bushes, and produce but little good feed. Farmers are obliged to buy large quantities of grain to keep up the flow of milk through the sumer months. The grain bills absorb the profits and keep the farmers in financial straits all of the time. The only practicable way out is to try sheep. only practicable way out is to try sheep raising again for a few years. Last spring I turned a flock of sheep

into a pasture that was so overrun with meeds and daisies as to furnish but little feed for cattle. To-day not a weed or a daisy is to be seen, and the sheepand lambs which are long wooled, Costwold and Leicester, have done gether, or a pint to one quart of oats unground.

Flaxeed gruel, with plenty of skim milk, will produce a very fine growth, leaving the calf as mellow to the touch as if sucking the cow. A calf two months old will gain three pounds per day on this ration. The oil taken off in the cream can be replaced for one-fifth of the money value of the cream. Butter dairymen may raise a calf to each cow upon the skim milk and a little additional food as indicated, and get one-fourth to one-third as much profit out of the butter. Selling but-

HOUSEHOLD AFFAIRS.

BAKED CHICKEN.

An appetizing way to cook chicken is to cut it in pieces, as if for a fricassee. Dip the pieces in beaten egg and then in fine bread crumbs. Season with salt, pepper and minced parsley. Put them in the dripping pan with bits of butter over them, and a little water in the pan. Bake slowly until they are done. Put the chicken upon a hot dish, make a rich gravy of the contents of the pan and pour over them. Garnish the dish with parsley.—Boston Cultivator. Cultivator.

PLAIN WAFFLES.

One quart of sifted flour, two ounces of butter, one teaspoonful of salt, one-half cup of yeast, or half a compressed cake, three eggs, one and one-half pints of milk. Rubythe butter into the flour, add the salt, then the milk, which should be scalded and cooled, which should be scalded and cooled, and then the yeast. Beat thoroughly and continuously for three minutes; cover and stand in /a warm place for two hours or until very light. Then beat the yeggs separately, add to the batter first the yolks and then the whites; let stand fifteen minutes. Have the wafte iron gradually and thoroughly heated. Dip a small brush in melted suet and brush the iron until every parties well greased. Pour the batter into a pitcher so that you may fill the iron quickly. Open the the batter into appreher so that you may fill the iron quickly. Open the iron, pour the batter from the pitcher into the iron until you have covered the elevations, close the iron quickly and turn it over. Bake about two minutes or until a nice brown, then respect them carefully, place on a better the carefully. move them carefully, place on a hot dish and serve quickly.—New York

DELICIOUS SUGAR COOKIES.

Delicions sugar cookies that are so rich that they will keep some time are made by beating a cupful of butter and two of sugar to a cream. Beat the yolkstof four eggs until, light, and add them to the butter and sugar, then add the beaten whites. Mix thoroughly and quickly, and add just enough flour to make a stiff paste. Roll out as thin aspossible without breaking, cut and bake in a moderate oven. Cookies are more tempting oven. Cookies are more tempting when baked a delicate brown than when white. Jumbles made with sour cream are also excellent. Cream a cupful of butter with two of sugar, and add a cupful of sour cream to which a teaspoonful of soda, dissolved in a lit-tle hot water, has been added. Sep-arate the yolks and whites of two eggs, beat both until light, then mix them, and add to the other ingredients. Add enough flour to make as soft a paste as can be rolled, not a particle more. can be rolled, not a particle more.
Roll as thin as you can without breaking and bake in a hot oven. The
grated rind of a lemon added to either will improve the flavor, -New York

Most Costly of Habitations,

The largest and most costly private mansion in the world is said to be that owned by Lord Bute, known as Mountstuart. It is described as follows: It covers nearly two neres, and is built in Gothic style; the walls, turrets and balconies are built of stone. The immense tower in the centre of the building is 129 feet high, with a balcony mease tower in the centre of the building is 129 feet high, with a baleony round the top. The halls are constructed entirely of marble and alabaster; all the rooms are finished in mahogany, rosewood and walnut; the freplaces are all carved marbies of antique designs. The exact cost of his fairy palace is not known, but it a estimated at more than \$9,500,000.

The greatest naval action in Greek istory was that at Salamis, B. c. 480.

Queen Victoria has about forty pet

dogs. Her greatest favorites are col-lies.

The Queen of Corea has a lady phy-sician who gets a salary of \$15,000

The Crown Princess of Sweden is trying to establish women photographers in Stockholm.

For the privilege of wearing trousers the French Government charges women a tax of from \$10 to \$12 a

year.

The Queen Consort of Siam owns a wonderfully beautiful thimble. It is shaped like a lotus and made of solid gold, studded with diamonds.

Mrs. Henry G. Newton, the wife of a New Haven lawyer, was the first woman in Connecticut to register as a voter for the coming school election. Among the ladies who own solid gold

dinner services are Mrs. Astor and Mrs. Andrews, of New York, and Mrs George William Childs, of Philadel

phia.

Miss Amye Reade, a niece of the novelist, Charles Reade, has followed in the footsteps of her uncle to the extent of writing two novels, "Ruby" and "Zerma." Among the many decorations worn by the Queen of Portugal is a medal

which was conferred on her several years ago, when she threw herself into the Tagus to save her children. The British Medical Association has at last admitted women as members. The principle was approved last year, and this year the by-law excluding women was formally expunged.

Miss Lucille Rodney, who won a wager by walking from her home in Galveston, Texas, to the World's Fair, counting ties all the way, made \$500 by the way, selling her photographs.

Queen Victoria proposes to erect a cairn in memory of the marriage of the Duke of York. It will be in Scotland near the one she erected in remembrance of the wedding of the Prince of Wales.

Grecian women possessed twenty-two kinds of footgear, which may be classed as those which cover all the foot up to the ankle, and those which simply tied on the top of the foot with wide ribbons or straps.

A co-operative household, comprising forty connected dwellings, is to be established in Cleveland, Ohio. The cooking and laundry are to be done in one house, and the expense is to be divided among the families.

Mrs. Arundel-Colliver began service graph operator, and has just retired from the head of the Clearing House department (and a salary of \$10,000), of which she has been chief twenty-

Five ladies have been sent as official commissioners of education from Great Britain to the World's Fair to examine the American school exhibits and see what features of our system of public instruction can be adopted with profit

Miss Ella M. Grubb, who has been elected Superintendent of the Schools for Adams County, Illinois, is only twenty-eight years old, and is the first woman elected to the post in that county, which is one of the most pop-ulous in the State.

There are 110 women lawyers in the United States, and eight of this number have carned the right to practice before the Supreme Court. To acquire this it is necessary to have practiced three years at the bar, without a flaw in that career.

Mrs. Taylor, of Little Washington, Penn., is called among her neighbors 'an artist in oils." She began by making a few careful investments in the Pennsylvania gold fields. She has sold these at an advance, bought others and is now worth \$3,000,000.

Another of Queen Victoria's oldest servants has just died. This time it is W. H. Gower, who was "yeoman of the silver pantry" at Windsor Castle. Yeoman Gower has been in the Queen's service for over half a century, and was much esteemed by his mistress.

The favorite handkerchiefs at pres ent are of India linen almost as as mist. They have hemstitched edges about half an inch wide, with the initials or monograms embroidered in one corner. The lettering is deli-cate and the design is worked in out

line stitch. A yoke having the square neck effect will shorten the apparent length of your waist, as also will an empire belt Slender arms are made to appear larger by covering with sleeves very full at the top and sloping toward the arm, but not closely defining the arm until the wrist is reached.

Empress Elizabeth, of Austria, lately built, at an enormous cost, a mag nificent marble villa at Corfu and christened it "L'Achilleion." Her christened it "L'Achilleion." Her Majesty has made the following codicil to her will: "I wish to be interred at Corfu, near the river, so that the waves can continually break on my tomb."

Mrs. Arthur Stannard ("Johr Strange Winter") will in the fall make her appearance in a new light. According to the London Literary World, "she has just concluded a novel of a

"she has just concluded a novel of a theological bent, upon which she has bestowed an immense amount or pains." The book will be issued it pains." Ti

A small Marie Antoinette fichu i formed by three little gatherer flounces in wheat mouseline de soie This fichu is moveable; it is mountee on a small silk ribbon fastened on the inside and fastens upon the corsage with the aid of some pins in bijouterie. This happy combination permits the placing of this little field on different Dark fruit shades, such as mulberry.

Dark fruit shades, such as mulberry, nasturtium, dahlia, rosewood, petunia and grape red, are largely imported in velvets, tailor clothe, silks, brocades and ribbons. New names are given these colors, but the familiar titles will give the modistes a more intelligent idea of the ruling tints. Vandyke, sandal and chataigne are oak and ocra shades. Autumn sky is a dark silver tint that combines well with many of the new autumn calors. many of the new autumn colors.

THE ROYAL Baking Powder surpasses all others in leavening power, in purity and wholesomeness, and is indispensable for use wherever the best and finest food is required.

All other Baking Powders contain ammonia or alum.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK. Tailor-Made Grief.

According to one of the authorities the period of mourning for a father-in-law is twelve months, ten months black, two months half mourning; crape is seldom worn, though the crape period was formerly six months. For a parent the period is the same as above. The longest period for a brother is six months, five months black, one month half mourning; the crape period was formerly three months; it is now almost discarded. The shorter period is four months black, no half mourning. The period of mourning for a father-in-law is often shortened to six months when orten shortened to six months when relatives reside at a considerable distance from each other. All of which prompts the remark that the world would be made more cheerful and considerable if
