Royal Backwheats

For generations it has been the cus tom to mix the batter for buckwheat

tom to mix the batter for buckwheat cakes with yeast or emptyings, retain-ing a portion of the batter left over from one morning to raise the cakes for the following day. If kept too warm, or not used promptly, this batter becomes exces-sively sour and objectionable. Buck-wheat cakes raised by this means are more often sour or heavy than light and sweet. If eaten daily they dis-tress the stomach and cause skin eruptress the stomach and cause skin erup tions and itching. Instead of the old-fashioned way we

have been making buckwheat cakes this winter with Royal Baking Powder, mixing the batter fresh daily and find the result wonderfully satisfa tory. They are uniformly light and et, more palatable and wholes and can be eaten continuously without the slightest digestive inconvenience Besides they are mixed and baked in a moment, requiring no time to rise. Following is the receipt used :

Two cups of pure backwheat flour (not "prepared" or mixed), one cup of wheat flour, two tablespoons of Royal Baking Powder and one-half teaspoon-ful of salt, all sifted well together. Mix with milk into a thin batter and bake at once on a hot griddle. Once properly tested from this receipt, no buckwheat will find its way to your table.-Domestic Cookery.

Unwise Economy.

Do not buy anything that is not needed because it is cheap. Nothing is cheap to a purchaser that does not meet an immediate want. Goods Aid away rot, grow old-fashioned, yellow, and lose in value monthly. Bargain counters are dangerous foes to true Bargain economy, unless a woman has the clear headed wisdom to decide exactly what she needs to purchase in advance, and the firmness of character to resist the assaults of the salesman who makes unnecessary purchases seem attractive at the moment. If you need articles displayed on the bargain counters, look for them there; if not, avoid these fascinating displays as you would a moral pestilence, lest they prove too much for resistance. I know the force of the bargain counter, for I have, alas ! mourned the waste of good dollars when too late, and bit terly repented me of articles for which ould find no rational use except the missionary box; and even thus dis posed, my conscience has reproached me for questionable charities.—Jen-ness Miller's Monthly.

Midair Duel Retween Aeronauts.

During the Franco-Prussian war a lood-curdling duel occurred in midwhom was conveying dispatches from the Governor of Paris. The balloons, approaching at a considerable altitude, the encounter was encounter was commenced with ols. For some time neither compistols. batant could secure the advantage, but at length one balloon mounted above the other, and its occupant, seizing his momentary advantage, threw his grappling irons on top of the other balloon. They tore through the silken fabric as though it had been so much paper. There was an escape of gas, a shriek and the next minute both balloon and balloonist lay bat-tered out of recognition upon the ground 2000 feet below.—London Tit-Bits.

100 Bus. Wheat From Two Acres

This remarkable yield was reported by Frank Close, Minnesota, on two acres of Mar-vel Spring Wheat. Speaking of this wheat, this new sort takes the cake. It is the greatest cropping spring wheat in the world. Farmers cropping spring wheat in the world. Farmers who tried it the past season believe seventy-five to one hundred bushels can be grown from one acre, and are going to get this yield for 1894. At such yield wheat pays at 30ca bushel. Salzer is the largest grower of vege-table and farm seed in the world. IF you will CUT THIS OUT AND SEND IT with 7c postage to the John A. Salzer Seed Co., La Crosse, Wis, you will get free their mammoth catalogue and a package of above spring

CARROT GRUB.

An English gardener reports that he effectually destroyed the carrot grub, after it had become so abundant as to this purpose. The woven wire fence ing which is made in various width cause the tops of carrots to wilt, by watering them with a liquid made by putting a bushel of lime and a bushel watering them with a liquid made by putting a bushel of lime and a bushel of soot into 100 gallons of water. This was well stirred up and allowed to sind over night, then the next morn. well, but it is liable to be broken by was well stirred up and allowed to stand over night, then the next morning the clear water was used freely in the common rose-nozzled water-pot. -New York World.

WASTE OF GOOD FODDER

An enormous quantity of corn fodder is grown each year, but not one-third of its feeding value is procured. Hundreds of thousands of acres of stalks are allowed to stand in the fields until December or January until the grain is husked, and then the cattle are turned in the field to get what they can. Usually they find only blades whipped off by the wind and blown away, and the stalks bent posts may be used. From five to seven wires are needed, according to what it is desired to fence against. The lat-ter number put four inches apart near the ground, and farther apart toward the top of the post will keep hogs, cattle, sheep or horses within the in-closure. The railing or board at the top is often used on barbed wire fences, as the animals can see it more plainly than they can the wire alone, and there is less danger of their running against it. Wire fences of any kind should be thoroughly braced and very and the upper part—the best portion —ruined, and even the husks weather-beaten so as to be of little value. Such feed as remains is of poor quality. greater part of it is rotting on ground. There is hardly a better The the ground. There is hardly a better or cheaper stock feed than corn fodder, yet most farmers treat it as though it had little or no value. - Farmer's Guide.

NOTES ON WHEAT.

From field experiments carried on at the Agricultural Experiment Stashould be thoroughly braced and very tightly stretched, or they will soon sag and get out of shape.—New York tion, Purdue University, Indiana, re-ported in Bulletin 15, extending over ten years, it appears that none of the varieties of wheat tried have any ten-dency to deteriorate or "run out," pro-Tribune. vided proper care is exercised. No wheat proved to be "rust-proof," but early wheats were generally less in-jured by rust than later kinds. Eight Strain the milk before the cream be gins to rise. Medium sized hogs now bring the pecks of seed per acre gave the best returns at the station, the average largest prices. Gloves that are but slightly soiled may be easily cleaned by the exercise of a little patience and care. The best way to do this is to place the glove upon the hand, wet a piece of clean flannel with benzine, and wipe the stained part very lightly and care-fully. As soon as the flannel shows any discoloration, take a new portion. Do not rub the glove at all, or the color may be ruined, but wipe it gently from the tips of the fingers toward the wrist. The smell of the cleaning egent will be gone as soon as way to do this is to place the glove cleaning agent will be gone as soon as the glove is dry.—New York Observer.

HOW TO MEND CROCKERY.

A valued correspondent says: Be-fore being allowed to get dirty or greasy tie all the broken pieces in their places nicely with any kind of string that suits, then put in an iron or tin dish that can be put on the fire, pour in as much milk as will cover the pour in as much milk as will cover the ractures well, put on the fire and boil for say ten minutes, and the whole operation is complete. Don't undo the wrapping until the dish is completely cold, and if yours hold as ours do, you will call it a success. -Scientific Amer can.

LINOLEUM IN THE KITCHEN.

An authority on such matters recon mends a thin quality of linoleum to be used as a dado for the walls in a kitchen. It should be glued close to the wall, and may be finished at the the war, and may be insided at the top with a plain molding. It may then be olled or varnished, or left in its na-tural condition, as one chooses. It is in every way to be preferred to a dado of wood, which is liable to crack and here intracting in which income more leave interstics in which insects may lodge. The dado of linoleum is as easily washed as a dado of tiling and is even more durable, while it is a good

deal cheaper. In the natural wood color in which this material comes it would make a very pretty dado for a wall painted pale blue. As linoleum is nothing pale blue. As linoleum is nothing more than the blown pulp of wood, combined with oxidized linseed oil, it can be readily seen that it can be treated in any way that wood can be treated, while it is exactly suited to treated, while it is exactly suited to this purpose and the purpose of cov-ering kitchen floors. A dado is almost a necessity in a kitchen, because a plastered wall gets chipped with con-tinual wear. Linoleum offers just the right material necessary for such pro-tection. -- New York Commercial Advertiser.

A Means Out of the Difficulty, Any strain or bending of the back for an length of time leaves it in a weakened con dition. A means out of the difficulty is al-ways handy and cheap. Do as was done by Mr. Herman Schwaygel, Aberdeen, S. D. who says that for several years he suffere with a chronic stitch in the back, and wa given up by doctors. Two bottles of St. Jacobs Oil completely cured him. Also Mr. John Lucas, Elnora, Ind., says that for several years he suffered with pains in the back and one bottle of St. Jacobs Oil cured him. There are manifold instances of how to do the right thing in the right way and not

KNOWLEDGE

Brings comfort and improvement and

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live bet-ter than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs. Its excellence is due to its presenting in the form most acceptable and pleas-ant to the taste, the refreshing and truly beneficial properties of a perfect lax-ative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kid-neys, Liver and Bowels without weak-ening them and it is perfectly free from every objectionable substance.

German Army Dogs.

German Army Dogs. The German army has trained war dogs. On the march each dog is led by his master and is required to carry a heavy pack on his back. Dogs of a dark color are preferred, because they are less visible to the enemy. The training is pursued on the general principle that the dog would be treated very cruelly by an enemy, so that the creature is taught to creep round tho foe unnoticed and to give a distinct foe unnoticed and to give a distinct

warning of a hostile approach without bringing itself into notice. For instance, in the German training process, some of the soldiers put on French and Russian uniforms to represent the enemy. This arrangement, by, suggests the idea that the Germans have quite made up their mind whom
