Ready-Made Forests.

Machinery has become so perfected that establishments now offer to re-move trees from six to twenty feet in

diameter and reset.
Such trees are now lifted, together with from one to four tons of soil, and

reset before one's door.

Tree-moving began in the West and records its greatest success there, but quite large undertakings of this kind have lately been successfully carried out in New England.—Boston Globe.

The Czar and the Poet,

An utterly unknown British poet recently sent some verses to the Czar congratulating him on his recovery. Apparently so surprised and pleased at getting a good word from England, he sent the poet, much to his astonishment, a magnificent fur coat. —New York Journal.

It Has Come. Will It Be Gentle?

Gentle spring with the flowers of May may woo us into a careless indifference of sani-tary laws. It is the old story, a thrice told tale of being rash and taking the consequences. There is no time in the whole round of the year when results are more serious from an ordinary want of care than now. What with a changeful temperature and in-fectious dampness, rheumatism is most prev-alent and in the most aggravated forms. Even in the pursuit of the season's pleasures, its pastimes and sports, there will be a pro-digious crop of sprains and bruises, of lame backs and stiffened limbs, of neuralgic affections and sciatic troubles. Men and women will suffer intensely, and only because they tail to be provided with what is known to be the remedy for them all. When it is said that St. Jacobs Oil is that remedy, it is only saying what thousands know and thousands have pronounced it the best.

Traly has twenty-one universities, with 300 professors and 9000 students.

Dr. Kilmer's SWAMP-ROOT cures all Kidney and Bladder troubles. Pamphlet and Consultation free. Laboratory Binghamton, N. Y.

FERTILITY UNDER WATER.

POSSIBILITIES OF THE BOTTOM OF CHESAPEAKE BAY.

It is One of the Richest Agricultural Regions in the World-Adapted Only For One Crop.

HESAPEAKE BAY, says the Washington Star, is one of the richest agricultural regions of the earth. The fertility of its bottom can be compared only with that of the valley of the Nile and the Ganges and other great rivers. But it is adapted for producing only one crop—the oyster. This mollusk, it must be remembered, lives on vege-table food, as do all animals directly or indirectly. If there were no plants, all animals would starve at once

All human food is vegetable in its origin, whether eaten in the shape of plants or as beef, mutton and eggs. In the sea the blue fish preys on smaller fishes; many of these on smaller ones; these, in turn, upon minute crusta ceans; these on still smaller creatures and these last pasture on the micro-scopic plants which swarm at the sur-face of the ocean. All animals on land and water depend for their existence on vegetable food

To the superficial observer the vegetation of the sea appears to be very scanty, and, except for the fringe of sea weeds along the shore, the ocean seems, so far as plant life is concerned. seems, so far as plant life is concerned, to be a barren desert. But the microscope shows that the surface swarms with minute plants, most of them of strange forms, having nothing in common with the trees and herbs and grasses of the land except the power to change mineral matter into food that is fit for animals.

Most of these plants are so small as

that is fit for animals.

Most of these plants are so small as to be invisible to the unaided eye, and, even when they are gathered together in a mass, it looks like slimy, discolored water. They seem too insignificent to play any important part in the economy of nature, but the great monsters of the deep, beside which the elephant and the ox and the which the elephant and the ox and the elk are small animals, owe their existence to these microscopic plants Their vegetative power is wonderful past all expression. Among land plants corn, which yields seed about a hundredfold in a single season, is the emblem of fertility, but it can be shown that a single marine plant very much smaller than a grain of mustard seed would fill the whole ocean solid in less than a week, if all of its descendants

were to live.

As countless minute animals are constantly pasturing upon them the multiplication of these plants is kept in check, but in calm weather it is no rare thing to find great tracts of water many miles in extent packed so full of them that the whole surface is con verted into a slimy mass, which breaks the waves and smooths the surface The so-called "back water of the Arctic and Antartic Oceans con sists of a mass of these plants crowded together until the seas are discolored

Through these seas of "black water" Through these seas of "black water" roam the right whales, the largest animals on earth, gulping at each mouthful hundreds of gallons of the little mollusks and crustaceans which feed on the plants. In tropical seas ships sometimes sail for days through great floating islands of this surface vegetation, and the Red Sea owes its name to the coloration of its water by to the coloration of its water by swarms of microscopic plants which are of a reddish tinge. It has been surmised that man may at some future time assert his dominion over the time assert his dominion over the fishes of the sea, sending out flocks and herds of domesticated marine animals to pasture and fatten upon the vegetable life of the ocean and to make its vast wealth of food available. Chesapeake Bay receives the drainage of more than 40,000,000 acres of fertile land, the most valuable part of the soil from which is received eventually in the bosom of its quiet waters.

ally in the bosom of its quiet waters.

There it is deposited all over the bottom in the form of fine black sediment, known as oyster mud. This is just as valuable to man and as fit to nourish plants as the mud which setnourish plants as the mud which set-tles every year on the wheat fields and rice fields of Egypt. It is a natural fertilizer and it is so rich in organic matter that it putrities in a few hours when exposed to the sun.

shallow waters of the bay, under the influence of warm sunlight, this mud produces a most luxurious vegetation, but with few exceptions the plants which grow from it are microscopic and invisible. They are not confined like land plants to the sur-face of the soil, their food being difface of the soil, their food being dif-fused in solution throughout the whole body of the water. As they are bathed on all sides by nourishment, they do not have to go through the slow process of sucking it through roots and stems, and they grow and multiply at a rate which has no par-allel in the land plants. In fact, they would quickly choke up the whole bay if they were not held in check by countless minute animals which feast

upon them.

The oyster is an animal especially adapted for living in such waters and for gathering up these microscopic plants and turning them into food for man. Microscopic animals also contribute to its diet. These are rather abundant in all water, though not so much so as most people ma-gine. When a professional exhibitor shows you, under the microscope, what he calls a drop of pure water, it is nothing of the sort. It is either a collection made by filtering several bar-rels of water, or else it is a drop squeezed from a piece of decayed moss or from some other substance in which such small organisms have lived and

Took the Hint.

There was a man in our town Who was not wondrous wise; For though he had fresh goods to sell He would not advertise.

But when he saw his rival seli More goods than e'er could be, He stormed about his grocery As mad as mad could be.

He soon found out the other ma Had "ads." in shorts, betimes He took the hint and did lik wise And now piles in the dimes.

Plans have been approved in Lon-don for a great Ferris wheel after the Chicago pattern. It is to cost a quar-ter of a militon dollars and will be known as the "Gigantic Wheel and Becreation Tures."

HOUSEHOLD AFFAIRS.

CHICKEN WITH TOMATO.

Fry the chicken a little brown. Then put it into a hot dish. Pour into the pan in which the chicken was fried one pint of boiling water, half an onion chopped fine with a sprig of parsley, two tomatoes, half a table-spoonful of butter and half a table-spoonful of flour. Let it stew for fif-teen minutes. Turn it upon the chicken and serve.—New York Herald.

SWEET POTATO CROQUETTES.

For sixteen croquettes take the fol lowing ingredients: One cup (medium size) hot milk, four large table-spoonfuls butter, one level table-spoonful salt, four eggs, two to be used for blazing; one quart of mashed and sieved potatoes and one pint bread crumbs. Add the buter and hot milk to the potatoes. When cool add the eggs, the whites and yolks beaten separately. Beat until the mixture is separately. But until the instate is light and smooth. Then shape as desired, glaze with egg, crumb, and immerse in deep bath of smoking hot drippings. Use the frying basket. When richly browned drain on brown paper, then arrange on platter with a garnish of green.—New York Tele-

PUMPKIN PIE. Pare and cut the pumpkin in pieces about one inch square, put them into a stewpan with just enough water to keep them from burning; stew slowly till tender (about half an hour), then press through a colander. To every half-pint of pumpkin add a piece of butter the size of a walnut and a quarter teaspoonful of salt; mix and let it stand till cold. When cold put one pint of this pumpkin into a large bowl, add to it one pint of milk, half a teaspoonful of ground cinnamon and one teaspoonful of ground ginger; mix all well together and sweeten to taste. Beat four eggs until light, then add them to the mixture. Line four deep pie dishes with good, plain paste, fill them with this mixture and bake in a quick oven for about thirty minutes. - New York

A CHOICE BEAN SOUP.

One of the best of the purce soups is made from black tourtle beans and stock. It is choice enough for any dinner, though, as it is quite nutritious, it would not be as suitable as a clear soup for a dinner of many courses. Pick over a pint of the beans and soak them twelve hours in cold water. The next morning drain and cover with three pints of boiling water Cook slowly until the beans are ten-der. Drain the beans, press them through a fine wire sieve. Heat three pints of beef stock, add the beans, and stir thoroughly. Heat to a boiling point, season to taste with salt and pepper. Garnish the soup with slices of lemon. Hard-boiled eggs are also excellent in this soup. Cut them in thin slices and use with the sliced lemon. Have your soup plates hot. - New York Advertiser.

HOUSEHOLD HINTS.

Keep a dish of water on the back of a tight stove to purify the air.

A clean apron worn while hanging the clothes helps to keep them clean. A teaspoonful of ammonia to one teacupful of water for cleaning jew

Place a strip of wood back of the door where the knob hits the paper in opening.

Before laying a carpet wash the floor with turpentine to prevent buffalo bugs.

Powdered pipe clay, mixed with water, will remove oil stains from In bottling pickles or catsup boil the corks, and while hot you can press them in the bottles, and when cold they are sealed tightly.

Kid gloves for ordinary wear are painted; only the bright opera tints, such as tashionable ladies wear to match their colored dresses, are dyed.

Vinegar and salt will clean the black crust off sheet iron frying pans, but they should be thoroughly scoured afterward with sand soap or any good

scouring soap. If shelves and floors of closets are wiped with hot water with cayenne pepper and afterward sprinkled with porax and alum, roaches and other vermin are kept at bay.

When the fat's in the fire it is never wise to throw water upon it. If fat in a kettle boils over and there are ashes convenient to throw on the blaze, it is the surest, safest way to put it out.

A simple plan of disinfecting rooms consists in putting a saucerful of salt in the middle of the room and pour-ing on it a dram or two of sulphuric acid. The fumes that arise do the work of disinfection.

Silver cracker jars with separate re-ceptacles for different kinds of bis-cuits and crackers are a novelty. An-other new effect in table silver are the wooden bread platters set in broad rims of worked silver. A silver bread knife goes with them.

The chimney of a lamp should never be touched with water. A few drops of be touched with water. A few drops of alcohol, or even paraffine oil, will re-move the dimmed, smoky effect, and make the chimney as bright as possi-ble when it is polished with a soft flannel or chamois skin.

To clean hair brushes quickly and easily, take a dessert spoonful of hartshorn to a quart of cold water in a wash hand basin. Dip in the hair of the brushes, and rub them together until clean. Then rinse well with cold water, rub dry with a towel and stand unight at a one. stand upright at an open window.

A Seventy-Foot Dragon.

The Elasmosaurus, a giant serpent which lived in one of the latest of the geological ages, frequently attained a length of seventy feet. Its chief habit seems to have been the shallow sons that formerly lashed their waves over the prairies of Nebraska, Kansas and Indian Territory. A skeleton of one of the creatures found in a West Kansas anyon a few years ago proves that sas canyon a few years ago proves that thirty feet of the beast was neck; the remainder body, tail and flopers. The Gaucho's Dietary.

The dietary of the South American gaucho (cowboy) is simple, so his cooking is elementary in its characcooking is elementary in its charac-ter. As a rule, he eats only once in the day, toward sunset; when, jour-neys or toil being ended, supper, con-sisting of a thin piece of meat, is roasted upon a spit of iron or wood stuck slantingly over a quick fire. If this should be in winter, all sit around this should be in winter, all sitaround on the skeletons of horses' heads, and with their long knives or facons (falchions) cut lumps from the haunch. This, being held in the left hand by one end, is seized with the teeth at the other, and a tempting tit-bit is skillfully cut off. The hard, dry meat, defining the teeth at the country is washed.

fully cut off. The hard, dry meat, deficient in fatty constituents, is washed down by copious draughts of mate, made from the favorite yerba.

The hut, dimly lighted by a lamp in which bullock's tallow is burned, bears some resemblance to a stable, from the bridles, saddles, spurs, bolas, and lassos which decorate the roughly-daubed walls. If the Gaucho happens to be a family man, fat, black-eved. to be a family man, fat, black-eyed, good-natured, nearly naked children indulge in antics during the meal, while the poultry wink drowsily from their perches. No wayfarer is turned from the door, for the hand and heart of the child of the pampas is ever open to the stranger, and the arrival of such is made a convenient excuse for bringing out the cana, a coarse spirit, which has perhaps been provo-cative of more evil than anything else which he can call his own. Watermelons are sparingly partaken of in their season, but these are almost the only vegetables the wild horseman cares for.—Temple Bar.

A Meat-Eating Nation.

The recent dinner of the Vegetarian Society in this city has attracted considerable attention. A gentleman from Germany who has recently made a tour of observation in this country, commenting on this vegetarian move-ment, said it was just what the United States needed. He added, "Ameri-cans eat too much meat. I have ob-You have meat for breakfast, for luncheon and dinner. In Germany our breakfast is a cup of coffee and a boiled egg or two. Then come our mid-day dinner in courses, a simple supper and a snack before we go to bed." My German friend was com-pelled to admit, however, that he was not as frigal in his diet as he prenot as frugal in his diet as he pre-tended to be, for he said that the Ger-man people always felt free to take a sandwich and a cup of coffee or a glass of beer between their meals and as a rule managed to eat at least five or six times a day. Englishmen are great meat eaters. Perhaps we inherit our appetite and our taste from them.— New York Mail and Express.

The Sand-in-Sugar Fiction.

Nearly everybody entertains the opinion that a dishonest merchant will mix sand with his sugar for the purpose of gain. This is indeed a popular error, for sugar is but rarely adulterated, from the fact that unless scientifically done, and then only with a certain kind of clay, the fraud would come to light without the consumer applying any test. If sand is mixed with sugar it would be discovered by the sugar eater, or the sand would be found as a deposit at the bottom of the coffee cup, or it would betray itas a deposit at the bottom of self by the grit in the cake. - Home

KNOWLEDGE

Rings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

PENSION WALL STATE

Take no Substitute for Royal Baking Powder. It is Absolutely Pure.

All others contain alum or ammonia.

Blood Drinkers.

The Zoothermic Institute in Rome is a "cure" place, where people go to drink fresh blood for the cure of gout, rheumatism and the great prostration and anemia caused by the malarial fevers of the Tontine Marshes. The blood to be imbibed is first rapidly freed from fibrine, by a carefully aseptic method, the animals from which it is derived having previously undergone inspection by a veterinary surgeon. Some patients bathe either a part or the whole of the body in the warm blood, and the Italian dectors which sith great benefit, in spite of which, it seems a barbaric survival. The poor are treated gratis, but the highest fee is equivalent to fifty cents of our money.—New York Independent

The total area of land and water in the united kingdom is 77,799,793 by General Jackson when he was acres.

Lavers of Petrifaction in the West

North Colorado and parts of Wyoming and Montana are genuine mines of petrifactions. There are petrifactions of every kind, including many varieties of wood, ferns and plants, fish, toads, snails, frogs, serpents, shell fish and objects which cannot be classified. The deposits often occur in layers as though some great natural convulsion had destroyed the animal life of a whole district at once. The scientists make very few and tolerably weak attempts to explain the singular phenomenon, and the fact is evident that they know no more about the matter than do the men who pick out the best specimens and sell them to tourists.— Chicago Herald.

The New England Historical Society

After reading the following letters can any one longer doubt that a trustworthy remedy for that terribly fatal maindy, consumption, has at last been found! If these letters had been written by your best known and most esteemed neighbors they could be no more worthy of your confidence than they now are, coming, as they do, from well known, intelligent and trustworthy citizens, who, in their several neighborhoods, enjoy the fullest confidence and respect of all who know them.

fullest confidence and respect of all who know them.

K. C. McLin, Esq., of Kempsville, Princess Anne Co., Va., whose portrait heads this article, writes: "When I commenced taking Dr. Pierce's Golden Medical Discovery I was very low with. a cough and at times spit up much blood. I was not able to do the least work, but most of the time was in bed. I was all run-down, very weak, my head was dizzy and I was extremely despondent. The first bottle I took did not seem to do me much good, but I had faith in it and continued using it until I had taken fifteen bottles and now I do not look nor feel like the same man I was one year ago.

and continued using it until I had taken fifteen bottles and now I do not look nor feel like the same man I was one year ago. People are astonished and say, 'well, last year this time I was no year ago. People are astonished and say, 'well, last year this time I was no year ago. The property would have resulted in my death."

Byen when the predisposition to consumption is inherited, it may be cured, as verified by the following from a most truthful and much respected Canadian lady, Mrs. Thomas Vansicklin, of Brighton, Ont. She writes: "I have long felt it my duty to acknowledge to you what Dr. Pierce's Golden Medical Discovery and his 'Pleasant Fellets' have done for me. They almost raised me from the grave. I had three brothers and one sister die of consumption and I was speedily following after them. I had severe cough, pain, copious expectoration and other distributions, rouses every organ into healthful action, purities and enriches the belod, and through it cleanes, repairs, and invigorates the entire system.

A Treatise on Consumption, giving numerous referencing, pain, copious expectoration and other than time I was persuaded to try the 'Golden Medical Discovery' and the first bottle acted like magic. Of course, I continued on with the medicine and as a result I gained my firends all thought I had but a few months to live. At that time I was persuaded to try the 'Golden Medical Discovery' and the first bottle acted like magic. Of course, I continued on with the medicine and as a result I gained my firends and the magic. Of course, I continued on with the medicine and as a result I gained my firends and the magic. Why firends were astonished to the medical Association and the medical discovery' and the first bottle acted like magic. My firends were astonished to the medical firends and the first bottle acted like magic. Why firends were astonished to the medical firends and the first bottle acted like magic. Why firends were astonished to the first bottle acted like magic. Why firends were astonished to a

ished. When I commenced the use of your medicines, six years ago, I weighed but 120 pounds and was sinking rapidly. I now weigh 135, and my health continues perfect." mrs. Thos. Vanscekling

"Golden Medical Discovery" cures consumption (which is scrofule of the lungs), by its wonderful blood-purifying, invigorating and nutritive properties. For weak lungs, spitting of blood, hortness of breath, masal catarrh, bronchitis, severe coughs, asthma, and kindred affections, it is a sovereign remedy. While it promptly cures the severest coughs, it strengthens the system and purifies the blood.

"Golden Medical Discovery" does not make fat people more corpulent, but for thin, pale, puny children, as well as for adults reduced in fiesh, from any cause, it is the greatest fiesh-builder known to medical science. Nasty cod liver oil and its "emulsions," are not to be compared with it in efficacy. It rapidly builds up the system, and increases the solid flesh and weight of those reduced below the usual standard of health by "wasting diseases."

To brace up the entire system after the grip, pneumonia, fevers, and other prostrating acute diseases; to build up needed flesh and strength, and to restore health and vigor when you feel "run-down" and "used up" the best thing in the world is "need up folden Medical Discovery. It promotes all the bodily functions, rouses every organ into healthful action, purifies and enriches the blood, and through it cleaness, repairs, and invigorates the entire system.

A Treatise on Consumption, giving numerous testimonials with phototype, or half-tone, portraits of those cured, numerous references, also containing successful Home Treatment for chronic nead catarrh, bronchitis, asthma, and kindred diseases, will be mailed by the World's Dispensary Medical Association of Bufalo, N. Y., on receipt of six center.
