That there is a considerable quantity of land unoccupied or waiting for occupants in some of counties is only too well known. An estate in the eastern counties, a large portion of which is unoccupied, has been abso-lutely offered to responsible tenants rent free for the first year, the owner being willing to accept an extremely low rent for subsequent years or to

take a percentage of the returns. In some of the southern counties there are plenty of large farms vacant, although these are ill adapted for most occupants. Farmers now prefer land upon which they can keep a large dairy herd or breed a few horses and cattle of high quality. The farms in question are practically sheep farms and of little value for any other pur-poses than the production of mutton and barley.-Manchester Guardian.

Selden was once committed to prison for his attacks on the divine right of kings.

KNOWLEDGE

Brings comfort and improvement and Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live bet-ter than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs. Its excellence is due to its presenting in the form most acceptable and pleas-ant to the taste, the refreshing and truly beneficial properties of a perfect lax-

and to the taste, the ferreshing and truly beneficial properties of a perfect lax-ative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and mat with the appreciated the medical

It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kid-neys, Liver and Bowels without weak-ening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all drug-gists in 50c and \$1 bottles, but it is man-ufactured by the California Fig Syrup Co. önly, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered. accept any substitute if offered.

phosphates have proved valueless; horse manure spread on clover sod a It pays to look the farm over before the hurry of spring work comes on, and find out what ought to be done to year previous to planting is the best preparation. The land is plowed in preparation. The land is plowed in the fall, twice dragged in the spring, keep everything about it in good con-dition. If time is taken by the forewith a spring tooth harrow. The drills are marked out three feet apart with a two-horse reversible plow, letdition. If time is taken by the fore-lock in this matter, a great deal of the hurry and worry of spring work, as usually experienced on the farm, can be avoided, and the sundry jobs neces-sary to keeping things about the place in good shape can be done more satis-factorily, because more leisurely.— American Agriculturist. ting the plow run as deep as when the land was first plowed, turning all fur-rows down hill, which forms a bank on the lower side. Where land is steep the soil cannot be worked up to the hill from the lower side. The other way is marked with a narrow-toothed marker, which drags some fine earth back into the furrow, which

POTTING COMPOST FOR PLANTS.

The soil used for potting is made of one part of clean leaf mold or decayed sods or rich garden soil free from weed seeds, one part of clean sand from a stream, and one part of thormakes a perfect seed bed. The cut seed is dropped and stepped on by boys. With the same plow and one horse walking in the trench, the seed is covered, throwing the soil the same way as before, not back. The tubors are covered six to eight inches deep and the ground is two-thirds reoughly-decayed cow manure. For bright flowering plants some powdered charcoal is often added, thus giving great brilliance to the bloom. A good liquid manure for house plants is plowed. The potatoes will be a long time in coming up, will escape the first crop of bugs, will withstand inquid manure for house plants is made by dissolving one pound of ni-trate of soda, two pounds of good su-perphosphate of lime, and two pounds of fresh wood ashes in a barrel of rain water.—New York Times. drouth, can be harrowed several times and, best of all, will be strong, rank growers, soon shading the ground with their foliage. I have never yet found a new tuber below the piece planted, nor above that point on the

TO KEEP HOGS HEALTHY.

TO KEEP HOGS HEALTHY. Cleanly surroundings, pure, clean, good food of the proper kinds for building the growing frame work whilst growing or for fattening when finishing off is as essential to the health of home to sure other animal estimate stalk which first saw the light, no matter how much soil was piled around it afterwards. Therefore it is best to It alterwards. Incretore it is best to plan so as to have a long bearing stem, with tubers attached far enough from each other to expand fully, instead of a hat full of the size of hens' eggs at-tached to two inches of stalk. of hogs as to any other animal, says Colman's Rural World, and to reverse these is to induce frailty, weakness, loss of appetite, and, sconer or later, disease. It may be in individual cases only, or it may attack and decimate the whole herd and bring ruin and dis-aster to the owner. Filthy pens, filth fed with food, filthy, rotten, and de-cared food acour wrill the land

From the time the potatoes are plant-ed until they break through the ground, they are dragged several times with a heavy two-horse spring drag, drawn in the same direction they were caved food, sour swill, the dead car covered, but not across the furrows This levels down the two furrows par tially, and forms a rounded hill, com casses of diseased animals, the droppings of diseased animals, etc., etc. and a like line of feeding and keeping are all conducive to unthrift and displetely mellows the soil in the hill, kills all weeds, can be done by a boy at a very small experse, as compared ease, just as surely as that dry wood will burn when heaped upon a big fire, and we do well to recognize the fact with cost of cultivating, and is infinitely better in the quality of work using By this process no hoe ever goes into the field, nor any sunburned potstoes come out. The root growth is enorbetter in the quality of work done. and act upon it. Hogs as raised and fed for market nowadays are the merest kind of hothouse plants anyhow. They are crowded, and crammed and made gluttonous from their earliest feeding days and unless great care is inches long before any tubers have set. The after cultivation is very shallow to keep the ground from crusting over after rains, and to keep the soil fine taken very easily become feverish, ex-cited, overheated, and fit receptacles

for floating microbes or other animaland mellow, so as to serve as a mulch culæ in the air, the grass, or on their food. Select some large yielding, medium late, disease resisting, long white po-tato, and the battle is half won. Round MAKING AND MENDING FENCES. potatoes are not favorites in the mar-Building and maintaining the fences ket, and peal to waste. Do not let Ket, and peal to waste. Do not let your seed sprout. In a trial row I cut the seed early last season, placed it in crates and covered it with land plaster, which kept it cool; when planted the buds were swollen full, but not enough

eggs a year.

on the farm is an item of considerable expense. It will be found advisable to plan the farm so as to lessen the quantity of necessary fencing as much as possible. In many cases the greater part of the cultivated land can be put into one field and in this way a conto break off. Thus treated, it gave the largest yield of any of my trial into one field and in this way a considerable saving be made. What fences are necessary should be rows. My rule is to seed according to the quality of the land. The pooren the land the farther apart the hills, good ones. A fence is intended either to keep stock out or in, and if it fails and the less seed. -- American Agricul of this purpose it is an expense with-

out benefit. In the spring go carefully over the fences and see that they are in good repair, as it certainly is not good economy to risk a crop where there is a chance of stock breaking into it. One of the best times for driving posts is in the spring when the frost is all You can feed clover to laying here four or five times a day with profit. So in the spring when the rost is all you can be rectual and the soil is soft. If the positive well sharpened they can be set more rapidly in this way than in any other. At this season there is always more or less time when the profitless. Be sure to fix up a warm poultry house for next winter. Cold hens are ground is too wet to work, and the

fences can be overhauled without in-terfering with the other farm work. for mildew. Wire fencing is so cheap and so convenient that it has largely taken Land that cannot be profitably cultivated may often be planted with trees the place of other kinds. One decided to advantage. advantage with it is durability, while a good barb-wire fence will restrain stock that no other kind of fence Between hay and grass is a precari-ous period for the cows. They will bear attention. will.

always be best to set the posts eight feet apart, taking care to stretch the

wires tight. One important item in a

good, all-wire fence is to have good, stout end posts, and to set them deep

in the ground and see that they are

omy to make an all-rail fence. Work

the timber into lumber, ties, posts or cord wood, and a better, cheaper and

ced.

In the growing of large strawberries One of the best fences, especially a rich soil thoroughly prepared is an when small hogs are to be restrained, is made with wire netting eighteen to important factor. Good drainage should always be proHOUSEHOLD AFFAIRS. THE HAY QUILT.

About the latest addition in bed covering is the hay quilt. It is r le of flannelette, cretonne or wool and an armful or two of hay. The goods are sewed strongly across the top and bottom and down one side, and quilt-ed across from side to side at dis-tances of about fourteen inches. The hay is put in lightly and the remain-ing side sewed down. When the hay becomes limp hang the quilt before the fire, and it soon becomes crisp again. The warmth of these quilts cannot be realized except by those who have tried them. In making who have tried them. In making these quilts they should be made quite as wide as the beds they are intended to cover. They are equal in warmth to two or three blankets.

Such quilts are much used by the peasantry in the Swiss mountains, who appreciate the warmth they afford. — Detroit Eree Press.

STRAWBERRY SUN PRESERVES

It is a curious fact, but well known both to scientfic folk and to experi-enced housewives, that the direct ac-tion of the sun is at once surer and more satisfactory than that of any other known heat. So when we learn it is a tradition of old Virginia cookery to preserve strawberries in the sun in place of over the stove there is lit-tle occasion for surprise, but only an opportunity to realize how much those

famous cooks can teach us. The berries treated after the follow-ing recipe are both richer and more perfect than those prepared in any other way. The object of the glass is of course only that of concentrating the heat, and the effect is not dissimi-lar to that known to every child who has played at the old trick of burning the skin by catching one of old Sol's rays upon a bit of broken glass.

rays upon a bit of broken glass. The peculiar purity of the sweetness combined with the succulent redness in this sun-cooked preserve gives a suggestion of some oriental conserve The berries seem to be permeated with the sun's sweetness in addition to their own, and the syrup become rich, pure and clear as syrup can be. The berry retains its shape and comes unbroken from the jar, which alone is cause sufficient for recommending this espe-

I trust enough has been said to in-sure a trial by every woman who loves a toothsome dainty; certainly those who know the luxuries with which a Virginia dame of the old school fills her closet will realize how lucky she is who finds these secrets out.

is who finds these secrets out. The Virginia rule requires three-quarters of a pound of sugar to a pound of strawberries. The sugar is mixed with just enough water to wet it and put on to boil. It is to be taken off before it thickens and poured over the strawberries. Then the box over the strawberries. Then the ber-ries are set in the sun two days, covered with a pane of glass. They are occasionally stirred. On the third day pour off the syrup

and boil it again-it will be found much thinned by the juice of the fruit. While boiling drop in a lump fruit. While boiling drop in a lump of alum the size of the tip of your lit-tle finger. Pour the hot syrup over the berries and set in the sun again, under glass. The next day pour all into the preserving kettle and boil until the berries plump up. Then set in the sun again for a day. The next morning seal the preserve in small jars with brandied paper on top. Strawberries preserved in this man-ner never mold or ferment. They are delicious for roll pudding, for filling tarts, for layer cake and to serve with glass custards, but most

serve with glass custards, but most toothsome of all with Old Dominion beaten buscuit.

SEASONABLE RECIPES.

Rhubarb Pudding—Butter a deep dish and spread thickly with bread crumbs; over this put a layer of rhu-barb, sliced but not peeled; sprinkle thickly with moist sugar and repeat the layers until the dish is full, letting the top layer be of crumbs and being careful that the sides of the dish are well lined with the same. Bake for an

hour, unfil well done. Flame Pudding-Beat two ounces of butter to a cream and add two of sugar and two of flour, the yolks of five eggs beaten, and the whites whipped stiff; flavor with grated lemon peel and thicken to a batter with crumbs of stale sponge cake. Boiling in a mold for one hour and serve with any nice pudding sauce, making a delicious dish. -American Agriculturist.

The Infanta Eulalie is in Paris with her children.

letter to Mme. Carnot, thanking French women for their co-operation at the World's Fair.

Women have used muffs since about 1540. 1540. They were first used by doc-tors to keep their hands warm when they rode from house to house.

Wives of Siamese noblemen cut their hair so that it sticks straight up from their heads. The average length of their hair is about an inch and a half.

"Severine," who is called in Europe the "queen of interviewers," and is one of the brightest women journal-ists in the world, is to visit this country shortly.

In France, the Senate by 114 votes to 79 has agreed to the bill admitting women who are carrying on business to rote in the elections for the Tribunals of Commerce.

Pueblo, Colorado, women are holding weekly meetings to discuss local political issues. A law giving women the right to vote has been passed by the Legislature.

Women are steadily making their way into church offices. At Redhill the Wesleyan Methodist Quarterly Meeting has appointed two ladies as circuit stewards.

In Kentucky there is only one woman who has authority to officiate at a wedding in a clerical capacity. Her name is Munns, and she is a licensed Baptist preacher.

Lord Honghton has, accepted the Presidency of the Bronte Society, formed for the purpose of collecting Bronte relics and establishing a museum at Haworth.

The Empress Frederick, of Germany, possesses a unique tea-service. The tea-tray has been beaten out of an old Prussian halfpenny. The tea-pot is made out of a German farthing and the tiny cups are made from coins of different German Principalities.

The Harvard Annex (Radcliffe College) now has in productive yielding funds from \$210,000 to \$220,000. Ten years ago Wellesley College had less than half that amount; to-day it has a fund of not more than \$200,000. Mount Holyoke Seminary has about \$270,000.

Laselle Seminary, Auburndale, Mass., is forming a boat club on unique conditions. Every young woman joining must be able to swim, to tread water while she removes heavy clothing and shoes, and to bring a mate from the bottom of the tank to its edge.

A spotted veil broke an engagement A spotted veil broke an engagement of marriage in Sedalia, Mo. The young man thought the spots were facial blemishes and took a trip to St. Louis, from whence he wrote a letter suggesting that times were hard and that the contemplated marriage might better be postponed for a year or two. He got his release by return mail.

There is an old lady of Glenlyon, near Crieff, in Scotland, Mrs. Kippen by name, who is in the position of be-ing able to say: "Rise, daughter, and go to your daughter, and ask her to go to her daughter's daughter"--- in oth er words, she is a great-great-grand-mother, and what is more remarkable, all the five generations are alive.

A movement is in progress to erect statue to Miss Palestrello, of Lisbon, Portugal. She was the daughter of a famous navigator and a part of her marriage dowry was a valuable collec-tion of charts and memoranda of her father's trips. She was, besides, an intrepid and enthusiastic traveler. In she became Mrs. Christopher 1470 Columbus.

*************** Housekeepers Should Remember.

The Government Chemists, after having analyzed all the principal brands of baking powder in the market, in their reports placed the "Royal" at the head of the list for strength, purity and wholesomeness; and thousands of tests all over the country have further demonstrated the fact that its qualities are, in every respect, unrivaled.

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome.

One of Jay Gould's Virtues.

A Real Lake of Fire.

Jay Gould had his faults, but he never forgot a friend. He was once, Hawaii, if not in the entire world, is while a young man, taken sick in a New Lake Dana, or Dana Lake, a body of Jersey town, and an old lady there nursed him through the illness. He never forgot it, alway inquiring after his bonderful lake annear as if it his benefactress, and on every possi-ble occasion reminded her substan-tially of her kindness. One time she made up her mind to visit a daughter made up her mind to visit a daughter in a distant place in the West, and set out to save the money for the trip. A few days before the day set she was surprised to get an envelope contain-ing passes all the way there and back. She never found out how Mr. Gould learned of ker intended trip.—New Orleans Picavune. Orleans Picayune.

The greatest natural wonder of this wonderful lake appears as if it were a sea of red hot water dashing against the cliffs which surround it on all sides to a height averaging 100 feet. J. J. Williams, of Honolulu, publie.
