

Dr. Kline's SWAMP-ROOT cures all Kidney and Bladder troubles. Pamphlet and Consultation free. Laboratory, Blauvelt, N. Y.

The most potent of the Northwest is estimated at 125,000,000 bushels.

STATE OF OHIO, CITY OF TOLEDO, Lucas County.

FRANK J. CHESNEY makes oath that he is the senior partner of the firm of F. J. CHESNEY & CO., doing business in the City of Toledo, Ohio, and that he is the owner of the said firm.

Notary Public, Hall's Cataract Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.

A beautiful saucer-shaped "Hood" with every battle of the throat, certain Croup Cure. Ordered by mail, post-paid, 50 cents. Address: Huxley, Buffalo, N. Y.

LADIES who possess the finest complexion are patrons of Hood's Sarsaparilla. It is the most perfect of all skin treatments.

It's Hood's that Cures. The combination, proportion and process by which Hood's Sarsaparilla is prepared are peculiar to itself. Its record of cure is unequalled. Its sales are the largest in the world.

Hood's Sarsaparilla Cures. The testimonials received by its proprietors by the hundred, telling the story of Hood's Sarsaparilla Cures are unparalleled in the history of medicine, and they are solid facts.

The Mysteries of Medicine. "When a person takes a dose of medicine," said a doctor yesterday, "he never stops to consider what a wonderful provider nature is. When you consider that we are able to give drugs which will go through the entire system without having an effect upon any part or organ until it comes, perhaps, to some nerve upon which it expands all its force, it is indeed a miracle of the most wonderful kind. We don't know why it does it, but we know what it does. The progress in materia medica has been wonderful. By proving the specific effects of drugs have been discovered, so that they can be given with specific results. Medicine is gradually emerging from the dark valley of guesswork in the bright sunlight of science. The modern physician does not make a mixture of seven or eight drugs, hoping that some one of them will produce the effect desired. He does not take chances upon striking a remedy one in seven. He knows now just what drug will produce the results he wants and he prescribes that. I attended a man the other day who had not been sick for twenty or thirty years. I went into his room and, after observing his symptoms, asked for half a glass of water, into which I dropped a small pellet, a triturate. The old man looked at me after I had given him a dose of it and then smiled. 'Well, doctor,' he said, 'you treated me for this complaint when I was sick many years ago, and I must say the remedy you gave me then is still valid.' I don't think that a person could have mixed a more horrible concoction than that was. Now you treat me for the same disease and the drug is almost tasteless. How do you account for that? 'Progress,' I replied. And progress it is! Every day increases our knowledge of drugs and our power to alleviate suffering and save human life."—Pittsburgh Dispatch.

Nitro-Glycerine. Nitro-glycerine is a compound produced by the action of a mixture of strong nitric and sulphuric acids on glycerine at low temperatures. It is a light yellow, oily liquid, inodorous, but having a sweet, pungent, aromatic taste. A single drop, placed on the back of the tongue, produces headache and pain in the back which lasts for several hours. It dissolves readily in ether, alcohol and methylated spirits, but is only slightly soluble in water. This substance was discovered in 1847 by a gentleman named Sobrero, then a student in a Paris laboratory, and afterward a professor in Turin. It remained simply an object of scientific interest until 1864, when it began to be manufactured on a large scale for the purpose of blasting, by a Swedish resident of Hamburg, named Nobel, who called it "patent blasting oil."—New York Dispatch.

Miss Agnes Repply, who is now visiting London, has become a literary lioness in that city. Andrew Lang has given a dinner in her honor among the guests being Professor Max Muller, the philologist.

Lady Londonderry remains in bed a whole day every fortnight. No friends are admitted, and she permits nothing to disturb her. Her ladyship says that this custom enables her to retain her youthful appearance.

Mme. Carnot, widow of the murdered French President, is not only given to deeds of philanthropy, but she is a model housewife. There is no work in her home which she is not as competent as any of her own servants to do.

Edmund Russell says some things to women that are very good. For instance, he advises them to choose for evening dress tints as nearly as possible like flesh tints, "for," he says, "flesh has the most beautiful tints in the world."

The sanitary corps of New York City now embraces three female physicians, who are under the same rule, and are required to do the same amount of work, as their male associates. They are Drs. Alice Mitchell, Helen Knight and Frances G. Deane.

All the private correspondence of the Empress of Russia, or, rather, all those letters which she writes with her own hand, are on a delicate, pink-colored paper, just faintly perfumed with attar of rose. The envelopes are long and narrow, and entirely free from any heraldic emblazonment whatever.

A Strange "Story." There is a strange story of how Sir Walter Scott produced "The Bride of Lammermoor" during his illness, and was afterwards found to have forgotten entirely what he had thus created. According to James Ballantyne, "the book was written and published before Mr. Scott was able to rise from his bed, and he assured me, when it was first put into his hand in a complete shape, that he did not recollect a single incident, character or conversation it contained. The original incidents of the story which he had known from boyhood, he still remembered; but he knew no more about the story he had written than he did before he began to write, or even think about writing it." These facts are corroborated by Mr. Lockhart, Sir Walter's son-in-law and biographer, so that they are placed beyond question.—Gentleman's Magazine.

Black Strap Pudding—One cupful molasses, one-half cupful butter, one cupful sweet milk, four cupfuls flour, one cupful chopped raisins, one-half teaspoonful soda, one-half teaspoonful cinnamon, one-half teaspoonful cloves, a little salt. Steam three hours.

Delicate Cabbage—Slice half a head of cabbage very fine; put a little butter in a frying pan and with the cabbage, cooking it several minutes. Remove from fire and make a dressing of yolk of one egg, half a cupful of milk, scant teaspoonful of flour, a teaspoonful of sugar, tablespoonful of vinegar and a little mustard, half a saltspoonful of salt and a pinch of pepper. Stir all well, adding the vinegar last; pour over the cabbage and let it boil up once.

Cheese Straws—Grate three tablespoonfuls of any kind of cheese. Add three tablespoonfuls of flour, a little red pepper and salt. Add to dry ingredients one tablespoonful of melted butter, one of water and the yolk of an egg. Roll thin as for cookies, cut in strips five inches long and one-half inch wide. Bake fifteen minutes. Serve on plate and fringed dolly. Build the straws up like a log cabin. They are delicious with salad.

Potato Chowder—Cut half a pound of salt pork into thin slices, and fry lightly. Lay them in a kettle, and fry your sliced onions a light yellow color in the fat. Now have a quart dishful of pared and sliced potatoes, and put them in the kettle with alternate layers of the pork and onion, seasoning each layer with pepper, and dredging with flour. Cover with two quarts of water, and simmer forty minutes, or until the potatoes are done. Just before taking from the fire throw in a tablespoonful of minced parsley, or celery tops, or both. Pour over toast.

How to Control a Sneeze. Sneezing may be averted by pressing firmly upon the upper lip with the fingers. The "why" of this is that by so doing we deaden the impression made on a certain branch of the "fifth nerve," sneezing being a reflex action excited by some slight impression made-upon that nerve. Proof of this is seen in the fact that sneezing never takes place when the nerve mentioned is paralyzed, even though the sense of smell be fully retained.—Atlanta Constitution.

Two centuries ago the night-watchmen in Berlin were expected to carry about thirty or forty large keys, weighing together about fifty pounds.

NEWS & NOTES FOR WOMEN

Austria's Empress has \$1,000,000 in jewels.

Indianapolis (Ind.) girls run a co-operative laundry.

Flower scissors in steel or silver are now included in a set of scissors.

The Princesses Victoria and Maude of Wales have developed into bicycle riders.

Female bootblacks are reported to be multiplying in Paris and other French cities.

Miss Helen R. Benedict, of New York City, is said to be the best whip among women in America.

Amelie Rives Chanler is pronounced by the London Literary World "the most beautiful woman in literature."

At Flemingsburg, Ky., a woman had to pay \$10 damages to another woman for placing a bent pin in her church pew.

Mrs. Mary E. Lense, of Kansas, is said to be fond of practicing hypnotism, at which gentle art she is an adept.

Lady Margaret Scott is again the English golf champion, winning the championship at the recent contest at Littlestone.

Women smoke almost as much as men in Russia, and all the railways run smoking cars for ladies, which are well patronized.

R. D. Mehta and his wife have just started from Calcutta for England, Mrs. Mehta being the first Parsee lady to take the trip.

Mrs. Miles, wife of the coming head of the United States Army, is a sister of Mrs. Don Cameron, and is Senator Sherman's favorite niece.

In Persia the women of fashion paint black circles around each eye and ornament the cheeks with figures of various small animals, bugs, etc.

The Princess of Wales has a tea service consisting of sixty pieces, and every piece has upon it a photograph taken by the Princess in Scotland.

A lady doctor, Miss Hamilton, of Indiana, has been engaged by the Amoor of Afghanistan to take charge of the health of the ladies of his household.

For boating and tennis, blouses are made in flannel or flannelette, shaped in various ways. They are prettily trimmed with feather stitching in silk.

Octave Thonet is greatly interested in photography. She is going to use a number of the photographs she has taken as illustrations in one of her stories.

Mrs. Benjamin L. Beall, of Baltimore, enjoys the distinction of having been kissed by General Lafayette, when he was making a tour of this country in 1824.

New York dealers in the photographs of celebrities say that the picture of Mrs. Ballington Booth, of the Salvation Army, is among the most popular in the market.

This is how the Empress Eugenie describes herself: "Marie Eugenie, Countess de Pierrefonds, widow; aged sixty-seven; born at Granada, in Spain; naturalized French."

A fund is being raised in England for the education of the child-widows of India, who are condemned by caste to solitary and profitless lives. A school is to be opened in Bombay.

Mr. Howells's only living daughter, Mildred, is quite an artist. She has done an occasional illustration for poems of her father's and is said to be giving art very serious attention.

Hesba Stretton, author of "Jessie's First Prayer," is said to be one of the best paid writers in Europe. She recently received a royalty of \$2000 for a short story, copies of which sold at a shilling each.

Miss Agnes Repply, who is now visiting London, has become a literary lioness in that city. Andrew Lang has given a dinner in her honor among the guests being Professor Max Muller, the philologist.

Lady Londonderry remains in bed a whole day every fortnight. No friends are admitted, and she permits nothing to disturb her. Her ladyship says that this custom enables her to retain her youthful appearance.

HOUSEHOLD AFFAIRS.

HOW TO BROIL FISH.

Though every cook will proclaim that to broil a piece of fish is an exceedingly easy matter, it is more often done badly than well. If not cooked enough the fish is extremely disagreeable to the taste, and if cooked too much it is hard and dry. It is always best to have an exact rule as to the time it shall be cooked. When the fish is put on the fire look at the clock and take it off as soon as it is done.

A split fish, such as white shad, white fish, mackerel, scrod or bluefish, should be timed according to the thickness. If the fire be bright and hot, a fish an inch thick can be cooked in twelve minutes. If two inches thick it will take twenty minutes. Of course, when the fire is dull it will take longer.

Always season fish with salt and pepper before cooking. A fish with the skin on should be broiled with the skin side from the fire until the last five minutes of cooking, when that side can be turned to the fire, but it must be watched closely or it will burn. It is only dry halibut that requires the butter and flour before broiling. Many people prefer to dip the slice of fish in olive oil rather than butter. If the oil be used it must not be heated, and it is well to apply it to the fish an hour before cooking.—New York World.

TO REMOVE FRUIT STAINS.

As the fruit season waxes it becomes burdensome to keep delicate drapery spotless. Who has not beheld with dismay one's favorite dresstiege hopelessly—'it would seem—discolored with peach, cherry and berry stains? Some suggestions culled from that best of teachers—Experience—and that are not generally known may be of assistance in remedying the mishap.

In the first place, do not wash the linen before applying other remedies; do so first to the stain almost indelibly, and it then has to pass through all stages until time and laundry leave but a pale yellow reminder, which consumption does not follow usually until the fabric is threadbare. For berry stains have some one hold the cloth so that it sags a little and pour absolutely boiling water through the spot; rub well. If this fails, light a bit of sulphur and hold under the wet spot—a lighted match will answer; the sulphurous gas usually does the work, the stain gradually disappearing.

But there are some that, like Lady Macbeth's "damned spot," will not "out"—peach stains, for example. Then you must have recourse to salts of lemon, which is good, but apt to leave a hole in lieu of the stain. By extreme carelessness in its use, however, it will not do such dire damage. Take a sunny day for the task; first moisten the spot and then rub on a very little of the salts of lemon; lay the linen in the sun for two or three minutes and then wash thoroughly with soap and warm water. Success nearly always follows.

Other stains, like iron rust, are more easily removed. After washing the article, squeeze lemon juice on the spots and then cover thickly with salt. Lay in the sun all day, wash, and if the rust is not entirely removed repeat the application. This is equally good for ink stains.

An excellent washing fluid, that closely resembles the celebrated Javelle water, is made as follows: Have ready two gallons of boiling water; stir in thoroughly a pound of sal-soda and a quarter of a pound of unslaked lime. When it is settled and perfectly cold, skim well and let it boil again. Take from the fire and when settled pour off the clear fluid into bottles or stone jars that can be tightly corked. Use in the proportion of a cupful to a large bucketful of water.—Detroit Free Press.

Black Strap Pudding—One cupful molasses, one-half cupful butter, one cupful sweet milk, four cupfuls flour, one cupful chopped raisins, one-half teaspoonful soda, one-half teaspoonful cinnamon, one-half teaspoonful cloves, a little salt. Steam three hours.

Delicate Cabbage—Slice half a head of cabbage very fine; put a little butter in a frying pan and with the cabbage, cooking it several minutes. Remove from fire and make a dressing of yolk of one egg, half a cupful of milk, scant teaspoonful of flour, a teaspoonful of sugar, tablespoonful of vinegar and a little mustard, half a saltspoonful of salt and a pinch of pepper. Stir all well, adding the vinegar last; pour over the cabbage and let it boil up once.

Cheese Straws—Grate three tablespoonfuls of any kind of cheese. Add three tablespoonfuls of flour, a little red pepper and salt. Add to dry ingredients one tablespoonful of melted butter, one of water and the yolk of an egg. Roll thin as for cookies, cut in strips five inches long and one-half inch wide. Bake fifteen minutes. Serve on plate and fringed dolly. Build the straws up like a log cabin. They are delicious with salad.

Potato Chowder—Cut half a pound of salt pork into thin slices, and fry lightly. Lay them in a kettle, and fry your sliced onions a light yellow color in the fat. Now have a quart dishful of pared and sliced potatoes, and put them in the kettle with alternate layers of the pork and onion, seasoning each layer with pepper, and dredging with flour. Cover with two quarts of water, and simmer forty minutes, or until the potatoes are done. Just before taking from the fire throw in a tablespoonful of minced parsley, or celery tops, or both. Pour over toast.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder

ABSOLUTELY PURE

A Smoke-Proof Helmet.

A device which the fire laddies are particularly anxious to try is a smoke-proof helmet which was recently exhibited with much success in Austria. It is the invention of Chief Inspector Muller, second in command of the Vienna fire brigade. The appliance is lined with chamois skin, and has an air-tube for use in cellars or in underground buildings when on fire. The air tube is spirally protected and cannot be dented or split; the end is attached to the helmet and the air pumped through. The helmet is securely fastened to the shoulders by two thin chains passed under the armpits.

It was subjected to a rigid examination in the court of the Central Fire Brigade in Vienna, and made a good impression on delegates from a number of European countries. The fire-proof collar which the firemen thus equipped entered was full of the densest smoke. The fire fighters had no trouble in remaining in the cellar for a time, while those who had no helmets could only venture as far as the entrance. A large number of English firemen were present, and of these new helmets is soon to be given a trial in the Queen's domain.

Australian Eucalyptus Honey.

Undismayed by previous failure, the Australians have made another honey shipment to England. If it possesses the eucalyptus flavor of the first supply, it is likely to meet a similar fate. Most people do not like medicine, even when they are ill.—New York World.

\$1000 in money, besides other valuable premiums to good guessers. Base-ball Rooters, catch on. See story in HOME AND FOREIGN MAGAZINE. Price, 25 cents. Sample Magazine can be seen and full particulars obtained at this office. All Newsletters, or 25 East 10th Street, New York City.

PISSIS CURE FOR GOUT, GRAVEL, RHEUMATISM, NEURALGIA, MIGRAINE, BRUISES, SWELLINGS, AND ALL AFFECTIONS OF THE URINARY SYSTEM. Sold by druggists.

EPILEPTIC, PARALYTIC AND NERVE INSTITUTE, 667 Massachusetts Ave., Boston, Mass. (Near Washington St.)

For the treatment of epilepsy, paralysis, brain and nervous diseases in all their forms. The only paralytic institute in the United States. Consultation free. Patients boarded, nursed and cared for. Office treatment if desired. Institute open daily. Send for circular.

PENSION JOHN W. HORRIS, 147 Washington St., Boston, Mass. Successfully prosecutes Claims. Law principal, 123 Union Street, Boston. Suits in last year, 15 adjudicating claims, \$15,000.

A Glut of Horses.

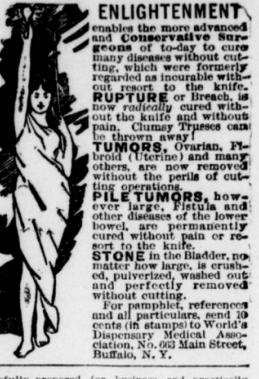

"You doubtless have noticed the general publication, some time ago, of an article describing the great glut of horses in the Northwest, and particularly in Montana," said Paul S. Wells, of Columbus, at the Biggs House this morning. "I have had some experience of recent years in the buying and selling of horses, and I venture the remark that in no form of property has the value decreased so greatly as in horses. The prices, too, are growing lower every day. One great reason for the overstocking of the market has been the introduction of cables and electricity on the street car lines in various cities. Under the old system of horse power thousands of animals were used every year by the companies, and there was always a steady demand for strong horses of fairly good appearance. It didn't take long for street car work to kill a horse, either. The introduction of the new styles of street car propulsion has taken away about the liveliest branch of the horse trade in this country, and I hardly exaggerate when I say that the cables and trolleys of this country have done away with the services of over 100,000 horses a year."—Washington Star.

Highest Mountain in North America.

According to the bulletin of the American Geographical Society, the loftiest peak is Mount Logan, as recent observations on mountain summits show it to be 19,500 feet in height, exceeding Orizaba 1200 feet and being 1500 higher than Mt. St. Elias.—Atlanta Constitution.

Swimming Cavalry.

Some very interesting exercises in swimming cavalry took place lately on the Cabri River, at Peshawar. The Thirteenth D. C. O. Bengal Lancers have been practicing their horses in a large tank in their lines and on the river for some time. One squadron took cover along the river bank and kept up a steady fire to protect the passage of the other squadron, who placed all their arms, accoutrements and clothes in large country boats, and conducted their horses into the water. Some horses seemed to thoroughly enjoy themselves in the water; others became unmanageable from fear. However, the opposite bank was reached and war paint resumed, and the squadron was with most creditable rapidity taking measures to protect their comrades, who then crossed in like manner.—Broad Arrow.

ENLIGHTENMENT. The most advanced and conservative Surgeons of today to cure many diseases without cutting, which were formerly regarded as incurable without resort to the knife. RUPTURE or Hernia, as well as all other diseases of the abdomen, can be cured without pain and without cutting. CHINCY GRIPE can be removed without cutting. TUMORS, Ovarian, Fibroid (Uterine) and many others, are now removed without the peril of cutting operations. PILE TUMORS, however large, Fistula and other diseases of the lower bowels, are permanently cured without pain or resort to the knife. STONE in the Bladder, no matter how large, is crushed, pulverized, washed out and perfectly removed without cutting. For pamphlet, references and all particulars, send 10 cents (in stamps) to World's Dispensary Medical Association, No. 63 Main Street, Buffalo, N. Y.

YOUNG MEN AND WOMEN

Carefully prepared for business and practically taught some honorable vocation whereby a living may be earned and money made. EASTMAN Business College gives courses in Bookkeeping, Banking, Correspondence, Cost Accounting, and all other branches of Business. Terms reduced to a bare minimum value any day in the year. No vacation. No VACATIONS. FOR CATALOGUE, WITH 175 SPECIMENS OF PEN WORK, ADDRESS CLEMENT C. GAINES, President, 30 Washington St., Poughkeepsie, N. Y.

Those who have the most have it, as a rule, because they save the most. They're more economical. These people buy Pearline. Proof—in all stores of the better class throughout the land, you'll find the sales of Pearline far in the lead. Now, these economical people wouldn't use Pearline for their washing and cleaning, if they didn't find it to be just what we say—the most economical in every way. Would they?

Send Peddlers and some unscrupulous grocers will tell you "this is as good as" or "the same as Pearline." IT'S FALSE—Pearline is never peddled, and if you grocer sends you something in place of Pearline, be honest—send it back.

Send it Back. Peddlers and some unscrupulous grocers will tell you "this is as good as" or "the same as Pearline." IT'S FALSE—Pearline is never peddled, and if you grocer sends you something in place of Pearline, be honest—send it back.
