

THE BAKER'S BILL

Tallor's Greatly Increased Appetite

It affords me great pleasure to tell not only the condition of my present health but also that of my whole family. A friend who knows of my poor health advised me to use Hood's Sarsaparilla. After two bottles a great change in my health was noticed. I do not have that tired feeling, no pain in the stomach, especially after eating, and in fact I feel like a new person and hold more pleasure in life. Every member of my family is using Hood's Sarsaparilla and with beneficial results. I will give you my baker's bill each week. Hood's Sarsaparilla is wonderful for purifying the blood and aiding digestion. 75¢ a bottle. 145 Alabama Ave., Brooklyn, N. Y.

Hood's Sarsaparilla Cures

Keep On Their Pius.

"There are some horses that have never been seen to lie down in their lives," says a horse fancier. "Some horses that continue to work for years almost sleep standing, but their rest is not complete, and their joints and sinews stiffen. Young horses from the country are liable to refuse to lie down when first placed in a stable in town, and the habit may become confirmed unless special pains are taken to prevent it. Sick horses are very apt to refuse to lie down. They seem to have an instinctive fear that if they lie down they never will be able to get on their feet again. I once rode a horse seventy miles in a single day. I put the animal in as comfortable a stable as could be made but he stood up all night, going to sleep with his breast against the manger."—New York Dispatch.

In August, 1894, there were 5775 steamers flying the British flag, 810 the German, 510 the Norwegian, 508 the French, 462 the Swedish, 430 the American, 359 the Spanish, 213 the Italian, and 1382 the flags of other Nations.

In Our Great Grandfather's Time,

big bulky pills were in general use. Like the "blunderbuss" of that decade they were big and clumsy, and inefficient. In this century of enlightenment, we have Dr. Pierce's Pleasant Pellets, which cure all liver, stomach and bowel derangements in the most effective way.

Assist Nature a little now and then, with a gentle, cleansing laxative, thereby removing offending matter from the stomach and bowels, toning up and invigorating the liver and quickening its tardy action, and you thereby remove the cause of a multitude of distressing diseases, such as headaches, indigestion, or dyspepsia, biliousness, pimples, blotches, eruptions, boils, constipation, piles, fistulas and maladies too numerous to mention.

"If people would pay more attention to properly regulating the action of their bowels, they would have less frequent occasion to call for their doctor's services to subdue attacks of dangerous diseases." That, of all known agents to accomplish this purpose, Dr. Pierce's Pleasant Pellets are unequalled, is proven by the fact that once used, they are always in favor. Their secondary effect is to keep the bowels open and regular, not to further constipate, as is the case with other pills. Hence, their great popularity, with sufferers from habitual constipation, piles and indigestion.

A free sample of the "Pellets," (4 to 7 doses) on trial, is mailed to any address, post-paid, on receipt of name and address on postal card.

Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

Don't Cheat Your Stomach.

You must have pure, wholesome food, no matter how much of the sham you'll take in other things.

Hecker's Buckwheat

is pure and wholesome.

Radway's Ready Relief

Always in the house. Its use will prove beneficial on all occasions of pain or sickness. There is nothing in the world that will so promptly arrest the progress of disease as quick as the Ready Relief.

STOPS PAIN

50 cents a bottle. Sold by druggists. RADWAY & CO., New York.

MINEG WHITE MARBLE.

THE GREEN MOUNTAINS MONEY-COMBED QUARRIES.

The Largest Opening in the World is in Vermont—The Diamond Drill Revolutionized the Industry.

VERMONT furnishes more than sixty per cent. of the marble used in the United States for building purposes, and almost all that goes into graveyards and public monuments, and the greater per cent. of the Vermont marble comes from Rutland County. The man who first discovered the possibilities of the quarries in Rutland County traded an old horse for the property. The original owner had become disgusted with the land, for nothing would grow on it, and he swapped a fortune for a decrepit nag which was dead at \$15. The gold craze of '49 urged men to risk their lives and limbs in the most hazardous and unprofitable mining in the world. They found the yellow metal, and the marble craze in Vermont which followed the discovery of the rich deposits of pure white marble caused men to pour money into holes and sink fortunes in the ground. The Green Mountains are pock-marked with abandoned quarries, and the quest for the fortune which awaited a man at the bottom of a rich marble quarry sent prospectors into New Hampshire and all along the backbone of the Green Mountain State.

Until the diamond drill was invented prospecting for marble was almost always a matter of guess-work. But the faithful detective which bores its way into the earth's crust and brings back a piece of everything it touches placed marble-hunting in the list of exact sciences. The diamond drill is a cylinder of steel which has black diamonds fixed in the edge of its cutting surface. The diamond-studded cylinder is driven into the earth or outcropping stone, and as it twists it way farther into the crust it cuts out a core which enables the prospector to judge of the quality of the marble, if the drill goes through marble, and the extent of the deposit. Sometimes, however, the enthusiastic prospector and his moneyed men who are back of the enterprise are sadly fooled by the diamond drill, for the drill might be bored in the direction of the layer and not through it. If the layer is thin, the core might indicate a thick deposit, and the truth would not be known until thousands of dollars had been spent in opening the quarry. Over \$100,000 has been expended in opening a quarry before a single dollar's worth of marketable stone was taken out.

When all the tests show that the marble is there, and enough of it to pay for the working, the top rock usually of limestone, is first stripped off. Blasting powder and dynamite are employed in stripping the quarry, but the blasts are small, and the quarrymen proceed carefully, for if the powder should penetrate the marble it would do serious damage. When the top stone is cleared away and the top layer of marble is exposed, channeling machines similar to those which are at work in the rock cut of the sanitary canal are started. They are worked by steam or compressed air, and they travel back and forth, cutting the marble into the widths required. Sometimes the diamond borer, or quick-acting diamond drill, is used to bore together, the holes being connected by webs of marble. These borer revolve about 1500 times a minute and when the marble is not hard work rapidly. When the channeling machines, or diamond borer, have cut the marble into slices the stone is cut away at either end so that the quarrymen can get at the bottom of the layers that have been cut. Then steam-drills bore holes into the bottom of the layer from eight inches to a foot apart. Iron or steel wedges are placed in these bottom holes and driven in until the whole block of marble is broken away from its bed and lifted up. Sometimes blocks or strips forty to sixty feet long are thus cut out of the solid rock. The huge block is divided into blocks of the required size by boring holes and breaking it with iron wedges. If slabs or tiles are wanted the smaller blocks are taken to the saw and sawed into strips. Several strips are sawed at once. The saw is made of steel strips without teeth. They play back and forth over the block and cut the stone by means of the sand and water which are continually fed under the metal strips.

The marble quarries of Rutland lie in a valley an extent over an area of only about half a mile square. The layers uncovered vary in thickness from two to ten feet. In this limited space the best marble is quarried, but marble is found over a large extent of Vermont. The farther south from Rutland the marble is the coarser-grained it is. On the other hand, the finest found north of Rutland is finer-grained than the Rutland marbles, but it is full of little cracks, so fine that they are not noticed in the quarry, but when the marble cutter or sawyer takes the block and begins to work upon it it flies into bits and acts like a piece of highly tempered steel which has been plunged into cold water when it is hot. Geologists say that in the remote ages Vermont was an arm of the sea, and that marble was made of the remains of corals and shells which had been subjected to a great pressure and a high heat, and that the reason the marbles north of Rutland are finer-grained and brittle is because the heat and pressure were greatest there.

Marble is quarried in New York, Massachusetts, Maryland, Tennessee, Georgia and Vermont. Large deposits are said to exist in certain Western States, but they have not been developed. The largest single quarry opening in the world is said to be in Proctor, Vt.

Vermonters use machinery to compete with Italy in quarrying marble. The beautiful marble of Carrara, Italy, is all quarried by hand, but the Italian quarrymen take more risks, for they do not hesitate to use powder for blasting the marble itself. The powder penetrates the marble, and though it may not be noticed at first the black specks are sure to come to the surface in a few years. The Italian Government has tried to

break the Italian stonecutters of this bad habit, but they persist in hanging on to primitive methods and doing what has been done in the 500 quarries in the mountains around Carrara ever since gunpowder was used for quarrying purposes. The Carrara quarrymen literally takes his life in his hands in many of the quarries, for he often is swung over the side of the marble precipice and "chug-chug" with his hand drill suspended in mid-air. When this aerial quarryman has drilled his holes and loaded them with blasting powder, he is pulled out of harm's way and the marble block, ripped from its lofty bed by the blast, tumbles down the mountain side, sometimes being shattered into fragments.—Chicago Record.

SELECT SIFTINGS.

In Japan the flute is played only by men of rank. The big bridge at Montreal, Canada, is nearly two miles long. Artificial bleaching of celery is said to spoil its taste and crispness. Big crabs are found in India. Some of them measure two feet in length. Paris connoisseurs affirm that old horses for food are more tender than young ones. It is said that the gold product of Montana for 1894 shows an increase of seventy-five per cent. over that of 1893. Canadian Indians have the old Roman habit of alternately gormandizing and sleeping when there is a mouse at the fire. Old Tom Tudor, of Mount Olivet, Ky., celebrated his eightieth birthday by marrying for the seventh time. His children do not object to the match. Japan is a corruption of the Chinese word Shi-pen-ku, which means "root of day," or "sunrise kingdom," because Japan is directly east of China. The Philadelphia Grand Jury suggests that the street railway companies of the city be compelled by law to adopt at once fenders on the cars. A New York woman is charged with training her twenty-month-old baby to toddle into the rooms of a large boarding house and steal money and jewelry.

The first surgeon to use the antiseptic treatment for wounds was Sir Joseph Lister, the famous English operator. He is now about to retire from his profession on account of old age. Although Italians are very much addicted to quoting, they have never had a dictionary of quotations. Such a work, tracing 1575 quotations to their original sources, has just been published in Milan.

The most of the officials of Japan have some of these Soshi with them when they go about over the country. In some cases they ride on the outside of their carriages and in others they follow along on foot. Mound City, Mo., has a thirteen-year-old boy who weighs 242 pounds; and Casco, Me., a twelve-year-old girl who weighs 225 pounds. This may serve to introduce them one to the other, and who knows what may happen later?

A model has recently been made to illustrate the currents of the Atlantic. The water is blown out of various nozzles representing the mean direction of the permanent winds. The movement of the water is made perceptible by a dust sprinkled over its surface. Oats sometimes escape from cultivation and grow from year to year so persistently as to seem wild. They have been found thus in regions as widely separated as Algeria and Japan, the Pyrenees and North China, the Hebrides and the Desert of Mount Sinai.

On the skeleton of a lady who died at Pompeii were found two golden bracelets, six of silver, four golden anklets, six earrings, thirty finger rings, a golden collar, a golden belt and a golden band on her head, while by her hand lay a purse containing 197 silver coins. A singular feature of the decorations of the city of Leeds, England, on the recent visit of the Duke and Duchess of York was a triple archway formed entirely of loaves of bread and enclosed in a light frame of wood and iron. Nearly six tons of bread were used in its construction, and the next day it was all distributed among the poor.

A Singular French Timepiece.

The latest among these curious timepieces is constructed as follows: A sunflower of silver protrudes from a white crystal vase, graceful in shape and soberly decorated. The stalk is of brown gilt, the leaves green, the petals yellow, and the heart of the flower oxidized. Hour and minute marks are engraved around the heart of this sunflower, which faces the looker-on. A lady-bird of spotted red nameled gold apparently rests on the flower, on the line dividing the heart from the petals. This pretty insect, which moves imperceptibly by means of a mechanism hidden within the flower, shows the time. By only close inspection can one detect the time divisions on this original dial, which is granulated all over and is bluish-black. As to the hollow circular line on which the lady-bird travels, it is completely invisible.—Jewelers' Circular.

Dentists Dread Fine Weather.

A Philadelphia dentist says that dentists always dread fine weather. "I can always tell," he explains, "when a storm is coming without consulting either a barometer or the weather forecast. My patients are the best barometers in the world. The teeth are peculiarly affected by damp weather, particularly bad teeth. When strangers begin frowning to my office complaining of toothache and pains in the jaw, I know that we are going to have a spell of bad weather. A good bit of it is neuralgia, but it is a sure sign. This rush of business keeps up until the stormy weather sets in, and when business falls off I know the storm is abating, and that we will have fine weather. When toothache patients are few and far between you can rest assured that a season of pleasant weather is at hand."—New York Tribune.

NEWS FOR WOMEN

Deep lace collars are the vogue. Women's work in India has made great progress. There are now 711 women missionaries—foreign and Eurasian—in India. In a single sawmill in Washington State two women work on shingle machines.

French law makes it the duty of a wife to accompany her husband wherever he goes. The average age at which women marry in civilized countries is said to be twenty-three and a half years. Mrs. Emma Scott, of Birmingham, was elected enrolling and engraving clerk by the Alabama State Senate.

Opalescent colors are again coming into favor, and garments of opalescent shades are in the very height of fashion. Women have recently been appointed to clerkships in the Bank of England, after passing preliminary examination. Mr. and Mrs. Frank Selous are now making a wedding tour in tents through Asia Minor, attended by five servants.

Miss Lizzie Darlington, a daughter of ex-Congressman Darlington, of West Chester, Penn., is about to become a lawyer. In Paris hair dye is considered so detrimental to long life that one insurance company refuses to insure the lives of women that use it.

Black and yellow are a favorite combination. Fine, soft black net over lemon-colored silk is especially becoming to a spirited brunette. Miss Francis E. Willard says that good cooking is essential to human happiness, while bad cooking has driven thousands of men to drink.

Blue tulle, cerise and magenta pink are the three colors now most favored by modistes and milliners and the majority of the fashionable feminine world.

The neglected women of India have now the prospect of skilled medical treatment. There are sixty-five hospitals and dispensaries now affiliated to the Countess of Dufferin's fund for supplying medical aid to them, ten of these having been built, and kept up by native Princes.

Mme. Casimir-Perier has received so many disgusting and insulting letters since her husband became President of France, and has been so upset by the many ugly drawings inclosed, that her correspondence is now opened by a secretary before being handed to her for perusal. It is said that a red parasol destroys in a great measure the actinic power of the sun, and must therefore keep the skin from freckles. Photographers long ago availed themselves of this peculiarity of light transmitted through a red medium, and it seems reasonable to suppose that a red shade might protect the complexion.

The most noteworthy feature in general style is the continued popularity of the bodice unlike the skirt. With the exception of the huge sleeves, which often matches the skirt, the bodice is generally in contrast to it. As many as three corages are furnished with one expensive velvet skirt; a low-necked bodice for elaborate wear, a high-necked bodice, with demilines, for dinner, and a long-sleeved, high bodice.

The collar has become almost as much an objective point of the waist as the sleeves. Large rosettes on either side and at the back, and sometimes in front, give fullness around the throat in the effect of a ruche. Sometimes a huge bow of lace and chiffon is placed high up on the left side of the collar, which no longer lies in closely-drawn folds, but is often puffed and filled in various ways to increase its size.

Quant but Full of Meaning. "A crik"—"a stich"—"a twist"—"a jam"—"a halt"—"a raw spot"—"a blue spot"—"deal aches," etc., are queer names well known among the ills of flesh, bone, muscle, nerves and joints, and are better understood as being so easily and surely cured by Dr. Jacobs Oil. The names are collectors to what it has done and always will do readily. None too readily, either, for many of the infirmities indicated by these queer names, if neglected, often lead to very serious results, which the great remedy for pain stands ready to resist and prevent. None the less useful it is to have on hand always ready, for the sudden pain is very often the fatal one.

The enormous supply of Florida oranges will make them cheap. Dr. Kilmor's S.W.A.T. ROOT cures all Kidney and Bladder troubles. Pamphlet and Consultation Free. Laboratory Binghamton, N. Y. Illinois farm lands contain 32,500,000 acres, worth \$1,010,000,000. \$100 Reward. \$100.

The reader of this paper will be pleased to learn that there is at least one dread disease that has been able to cure in all stages, and that is Catarra. Hall's Catarra Cure is the only positive cure known to the medical profession. It is a constitutional disease, requires a constitutional treatment. Hall's Catarra Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CHERRY & Co., Toledo, O. Sold by Druggists, 75c.

Child Enjoyment

The pleasant flavor, gentle action and soothing effects of Syrup of Fig, when in need of a laxative, and if the father or mother be costive or bilious, the most gratifying results follow its use; so that it is the best family remedy known and every family should have a bottle. A Cure That Cures is the kind most people dread. Such a cure is Ripans Tablets, but not a cure for everything. They are for all liver and stomach disorders and one reliable cure.

Ladies who possess the finest complexions are patrons of Glenn's Sulphur Soap. Bill's Hair and Whisker Dye, fifty cents. Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle. Kar's Clover Root, the great blood purifier, gives freshness and clearness to the complexion. 50c a bottle. I can recommend Pilo's Cure for Consumption to sufferers from Asthma. E. D. Townsend, Ft. Howard, Wis., May 4, 1894. If afflicted with sore eyes use Dr. Isaac Thompson's Eye-water. Druggists sell at 25c per bottle.

A Savings Bank's Guarded Treasure.

The Old Norwich Savings Society, the second richest bank of Southern New England, has about completed its magnificent building at Main street and Broadway, Norwich, Conn.; it is three stories high, of cream-colored, unfinished stone.

The Norwich Savings Society has deposits of over \$9,000,000, and next after the Pratt Street Savings Bank, of Hartford, is the richest savings bank in Connecticut. The building will cost about \$100,000. Its style is Romanesque. The inner walls are of fire-proof, holohek brick, iron-faced. The interior fittings are in marbles and polished woods. It is absolutely fire-proof.

The most remarkable feature of the building, perhaps, is its wonderful great vault, which embodies the latest ideas for the construction of burglar-defying devices. The new vault is fourteen feet six inches long, ten feet four inches wide, and eleven feet high. Its walls are five inches thick, being composed of alternate plates of iron and steel. Its exterior is of bronze plating. The massive and immense outer door has an automatic locking device, being equipped with triple time-locks. Fifty seconds after the door has been closed, twenty great bolts noiselessly slip into their places, and they stay there until the clockwork relieves them. The massive inner door is also equipped with a double combination lock and a triple time-lock. And inside this door is a day-gate of brass and wicket, which is closed by gravity, and cannot be opened without a key. The interior of the vault is divided into two compartments. In one are three combination safes, and there are shelves for papers. The other compartment is reached through a metal door five inches thick, which has two combination locks and a triple time-lock. In this chamber are iron shelves protected by gates, and on these shelves, so securely guarded by doors and gates, that a man must turn sixteen locks in order to enter there, are stored the securities of the bank, representing millions of dollars.—New York Tribune.

The New Diphtheria Cure.

The officials of the Marine Hospital Service, Washington, have been notified that a firm of manufacturing chemists at Detroit, Mich., is making preparations for the manufacture of anti-toxin, the new remedy for diphtheria which has created such widespread interest in Europe. This is believed to be the first house of its character in the United States to be given experiments. It is reported that this firm has established a bacteriological department where the experiments will be carried on under the direction of competent scientists. Healthy young horses have already been inoculated with the toxin, but it is expected that it will be three or four months yet before the results of the experiments can be announced, as the processes are not only delicate, but tedious. The strength of the toxin obtained from the cultures of diphtheria bacilli, and the strength of the anti-toxin, is ascertained by experiments upon mice and guinea-pigs.—New York Post.

Breeches reaching to the midcalf are mentioned as parts of the Roman uniform B. C. 67.

BEECHAM'S PILLS

(Vegetable)

What They Are For

Biliousness	indigestion	sallow skin
dyspepsia	bad taste in the mouth	pimples
sick headache	flat breath	torpid liver
bilious headache	loss of appetite	depression of spirits

when these conditions are caused by constipation; and constipation is the most frequent cause of all of them.

One of the most important things for everybody to learn is that constipation causes more than half the sickness in the world; and it can all be prevented. Go by the book.

Write to B. F. Allen Company, 365 Canal street, New York, for the little book on CONSTIPATION (its causes consequences and correction); sent free. If you are not within reach of a druggist, the pills will be sent by mail. 25 cents.

GOING TO SCHOOL \$100

should know that one hundred dollars pays entire expense of tuition, books, stationery, board, room, etc.

EASTMAN BUSINESS COLLEGE

gives courses of instruction in Bookkeeping, Penmanship, Correspondence, English, French, German, Spanish, and Typewriting. The Academic Branch, Modern Languages, etc. Business men supplied with assistants. Situations furnished complete students. Terms reduced to a half-time basis for transient individuals. Apply to nearest agent in the year with equal advantage. No vacations. For catalogue, with fine specimens of Pen Work, address CLEMENT C. GAINES, President, 30 Washington Street, Poughkeepsie, N. Y.

"IF AT FIRST YOU DON'T SUCCEED," TRY SAPOLIO

Are You Fortified?

When you are in a low state of health, and on the verge of illness, there is no nourishment in the world like

Scott's Emulsion

to restore strength. Scott's Emulsion nourishes, strengthens, promotes the making of solid flesh, enriches the blood and tones up the whole system.

For Coughs, Colds, Sore Throat, Bronchitis, Weak Lungs, Consumption, Scrofula, Anemia, Loss of Flesh, Thin Babies, Weak Children, and all conditions of Wasting.

Buy only the genuine! It has our trademark on salmon-colored wrapper.

Send for pamphlet on Scott's Emulsion. FREE. Scott & Bowne, N. Y. All Druggists. 50 cents and 91.

No Substitutes

For Royal Baking Powder. The "Royal" is shown by all tests, official, scientific, and practical, stronger, purer, and better in every way than all other Baking Powders. Its superiority is privately acknowledged by other manufacturers, and well known by all dealers.

If some grocers try to sell another baking powder in place of the "Royal," it is because of the greater profit. This of itself is good evidence of the superiority of the "Royal." To give greater profit the other must be a lower cost powder, and to cost less it must be made with cheaper and inferior materials, and thus, though selling for the same, give less value to the consumer.

LOOK with suspicion upon every attempt to palm off upon you any baking powder in place of the "Royal." There is no substitute for the "Royal."

A Kiss Made His Fortune.

A kiss once played an important part in the life of the famous Belgian statesman, Frere-Orban. In his youth the future Minister was a poor student, bearing the simple name of Frere. He had great difficulty in earning enough money to keep him at the university till he was ready to pass his examination in the department of law.

The young man fell in love with a Fraulein Orban, the daughter of a wealthy and aristocratic family, who opposed his suit.

"If you pass your examination well to-morrow," said Fraulein Orban on the eve of the trial to her lover, "come to the theatre and to the box in which I shall be sitting with my parents."

"Will they allow me?" asked the student.

"I shall see to that," was the determined young woman's answer.

Frere was successful and entered the box in the evening happy but frightened. The pretty girl, as soon as he had crossed the threshold, stood up, rushed toward him before a word was spoken, and kissed him heartily on the lips. The astonished parents were soon informed of the significance of the kiss by the daughter. As many other people had seen the young girl's action, the parents decided to make the best of it, and accepted young Frere as a son-in-law on condition that he add Orban to his name. This he did as a matter of course and made it famous.—New York Tribune.

With One Mule.

With one mule Mr. V. A. Hoffman, near Holly Springs, made the following crops this season: Three hundred and thirty bushels of sweet potatoes, sixty-five bushels of Irish potatoes, spring crop, and forty bushels fall crop; three bales of cotton, 100 bushels of cotton seed, 2000 bushels of fodder, twenty bushels of peas, five bushels of peanuts, three tons of hay, 445 bushels of corn.—Jackson (Miss.) Clarion-Ledger.

Mississippi's Deep Water.

A complete revolution of the Government's system of river improvement is in prospect. Plans to that end have already been made, and some experimental work accomplished which promises mutual benefit to the commercial interests of St. Louis and the entire country. The subject of dredging the Mississippi River along its whole navigable length is now receiving the earnest consideration of the Mississippi River Commission, the members of which are at present on an inspection tour of the big stream from St. Louis, Mo., to the Gulf. Experimental work with a dredge especially constructed promises the success of extended operations.—New York Press.

TO SINGERS.

The girls who put up my Medical Discovery all go to our Warren Street Methodist Church and two of them sing with great pleasure to themselves and others. One of them came to me one day, saying, "Dr. Kennedy, I must tell you what good the Discovery is doing in our church."

"Glad to hear that," said I.

"Well," she went on, "When I was so hoarse last Spring, you said it seemed like INWARD HUNOR and advised me to begin at once with the Discovery. I did so and in one month the hoarseness was all gone and my voice had improved so much several of our church mentioned it. Of course I told them you had advised the Discovery and I was taking it. In fun, one of the girls said, I want to try it too, and the fact is that the whole church, I might say, found out that KENNEDY'S MEDICAL DISCOVERY would cure their throats and pimples and many other troubles."

"All due to Inward Humor," said I, and that's what I explain in my little book which I send to any one who asks for it, and my Medical Discovery is sold in your town.

Yours truly,
DONALD KENNEDY, Roxbury, Mass.

WALTER BAKER & CO.

The Largest Manufacturers of PURE, HIGH GRADE COCOAS AND CHOCOLATES

On this Continent, have received HIGHEST AWARDS Industrial and Food EXPOSITIONS In Europe and America.

Unlike the Dutch Process, no Alkali is used in our Chocolates. They are pure and soluble, and costs less than one cent a box.

SOLD BY GROCERS EVERYWHERE.
