Electric Wires

Electric Wires. Some writer very aptly likens the nerves to electric wires, and the general working of their system to that of electric cars. A man who "slips his trolley" like Mr. Jeremiah Eney, 1812 W. Lombard St., Baltimore, Md., will need something botter than oven a gal-yand that something in the following way: "I suffered," he says, "a long time with neuralizin in the head. I guve St. Jacobs Oli a fair trial and an entirely cured." In this way the great remedy acts as a motorman to prestore broken wires, and sets the system to portect action.

The cats that remain all the time around the house soon become lazy and good for nothing as mousers. This is not true of the barn cat. Keeping close to the fire, as most house cats do, they soon become so worthless that mice may be all over the house without their noticing one of them

close to the fire, as most house cats do, they soon become so workless that mice may be all over the house without their noticing one of them. The cat was made for activity, and its thick fur coat, always warmest in win-ter, is its best protection against cold. —Boston Cultivator. ECONOMY IN PLANTING. In small fruit growing a change of crops should take place without waits ing a year or two for the plants to grow. When my strawberry bed has but one more year to grow I set in the rows raspberries. The raspber-ries are ready to bear as soon as the strawberries are given up. No year is lost. So in my raspberry gardens I strawberries are given up. No year is lost. So in my raspberry gardens I plant pear trees, and expect them to be in good bearing by the time the berries are worn out. A red raspberry plantation should be good for twelve years or more if properly cared for and manured. The pears will by that time he giving beary groups. There is It is hopeles to expect sheep to eat the butts of corn stalks as a cow will when they come from the silo.

It makes little difference how rocky land is for grapes. They have been known to flourish where it was necestime be giving heavy crops. There is such a thing as alternation of crops for fruit as well as grains and vegetasary to carry soil to cover the roots when planting. A farmer said before the Iowa Insti-tute: "It has been proved that clover sod is as good to produce corn as the virgin soil. Farmers are just awaken-ing to the importance of sowing all small grain fields to clover. It is the only wholesale fertilizer we have dis-covered." bles. Apples planted again in old apple orchards do not thrive as well as on fresh 'ground.—American Agri-

culturist.

HOW TO HANDLE AND KEEP POTATOES. Potatoes should be handled very

carefully, as they easily peel their skins and bruise, when rot is certain to ensue. Potatoes should be kept at a temperature of from forty-five to fifty degrees in a moderately dry, well-ventilated apartment, from which light must be carefully excluded, else the potatoes will develop a strong Keep the back barnyard as neat as the front; have the manure pile, the old board pile, the rubbish pile, al-ways under cover. Make the neatness of your place noticeable, and teach not only your own boys, but the whole neighborhood, lessons of beauty and thrift and thrift.

Ight must be carefully excluded, else the potatoes will develop a strong, rank taste. They are a bulky crop, and every time they are handled unnecessarily involves a cost which materially re-duces the profit. The earlier farmers can sell the better as keeping in win-Sheep and hogs are good in orchards -hogs preferable to sheep, because they root the ground over and pre-pare it for an application of fortilizer. Neither class of stock is sufficient for duces the pront. The earlier farmers can sell the better, as keeping in win-ter 'involves further work and loss from rot, while later on the weight and value of the potatoes will be greatly reduced by the growth of the eyes. Judging by the present outlook, it will pay every grower who has po-tatoes to take the best care of them.— New York World. the full amelioration of the soil to bring the orchard to its best productive capacity.

Excepting the golden rod, milk weed and ragweed, all the rest of our weeds have been imported. These foreign weeds are the most trouble-some and persistent. If it was some-one's duty to keep them from the highways, these pests would not travel so fast. highways, the travel so fast.

TRELLISING GRAPES.

New York World.

TRELISING GRAPES. Grapes trellising according to they ful at the Oklahoma Experiment Station this year, that Professor Waugh unhesitatingly recommends it for adoption in general vineyar ling. Ac-cording to this system, posts stand six feet out of the ground. At the top a crosspice two tect long is nalled, and at each end of this a wire is run. A third wire is run through the middles of the posts eight inches below these two, so that the three wires set in a sort of V shape nearly six feet from the ground. This great height is an set

third wire is run through the inteness of the posts eight inches below these two, so that the three wires set in a sort of V shape nearly six feet from the ground. This great height is an es-sential feature of the system, and should not be modified. On this trel-lis the grape vines spread out as they do where they grow wild in the woods. This furnishes a shade for the fruit At the same time the fruit is so far above ground as to be [safe from the intense reflected rays of the sun, which caused more damage in Oklahom vineyards the past season than all other causes combined. The trellis also has many other advantages and only a few disadvantages.—Farm, Field and Fireside.

The clover hay harvest should be-gin as soon as the field is well in bloom, and every care possible exercised in curing and harvesting the crop, and while all undertakings are uncertain in which the weather takes such an im-portant part, much may be done to SHIPPING CATLE. The golden rule in shipping all kinds of cattle is to get them as fast as possible from range, ranch, farm or feed-yard to mirket. It has been proved time and again that a range bullock shrinks every hour aftor he leaves his native hannts. It stands to the uncertainties by extreme watchfulness and care, and no dairy-man can afford to withhold these in such a case. The peach may be budded on the

HOUSEHOLD AFFAIRS,

TO DESTROY ANTS. TO DESTROY ANTS. They may be kept from climbing by tying wool round the stems and stakes and putting pine tar on them. Trace to their haunts and pour boiling water on them. To drive from their haunts, dig the dirt and mix with gas lime. To kill them, pour over their nests at night a strong decoction of elder leaves or turn a flower-pot over with the hole stopped; the ants will build ap into it and thousands may be de-stroyed.

ON CAKE BAKING.

ON CAKE BAKING. For baking most kinds of cake the oven should be rather slow. If it be too hot when sponge cake is baking the cake will sometimes rise very high and fall again. In any case, it will be coarse grained and tough. A good test for sponge cake is to put a piece of white paper into the oven, close the door and open it in five minutes. If the paper be a rich yellow the oven is right, but if it be light yellow the oven is too cool, or if a dark brown it is too hot.

THE KITCHEN TOWELS.

Housewives are sometimes debarred from the use of crash for kitchen towels by its cost, as well as by the fact that it needs to be partly worn before it makes really good towels. Now that fashion sanctions the use of this very serviceable material for toilet articles as well as aprons, it may be economically used in that way first, and then descend to the more utili-tarian household uses. For instance, your delicately checked linen crash apron, when worn soft, will make the best possible glass or dish towel, and your toilet cover and pin-cushion cover even, after having served their apprenticeship in your room, may be Housewives are sometimes debarred apprenticeship in your room, may be turned into roller towels and dish-cloths. Crash is very easily hem-stitched, and with this ornamentation and the state of immaculate cleanli-ness in which it is so easily kept, it makes the most desirable of bureau and table covers.

HOW TO BOIL A PUDDING.

How TO BOIL A FUDDING. The most difficult way of cooking a plum pudding is boiling it in a cloth; a novice will be likely to spoil it un-less the following directions are ob-served in every particular: To boil a plum pudding successfully have a large pot half full of actually boiling water, with a plate in the bottom to freen the cloth from burning or stickwater, with a plate in the bottom to keep the cloth from burning or stick-ing to the pot, and a teakettleful of boiling water to fill up the pot as the water boils away; there must always be enough water to float the pudding, and it must boil without ceasing, ("imming" in the not

"jumping" in the pot. The cloth must be of linen towel-ing, about a yard square, scalded by dipping in boiling water and then thickly dusted with sifted flour; and after the pudding has boiled steadily for at least air hours it should be unafter the pudding has bolied steadily for at least six hours it should be un-rolled, laid upon a suitable dish and set in the oven to dry off while the sance is being made. Allowance must be made for the swelling of an ordin-arily rich pudding, the cloth being made about three-quarters full.

RECIPES.

Broiled Chicken on Toast-Clean and carefully singe and split down back, season with salt, and broil over quick fire, turning frequently. When cooked put bits of butter over meat and place on pieces of toast with cresses and small bits of lemon.

Peppermint Creams — Take two cup-fuls of sugar, two-thirds of a cupful of boiling water, one teaspoonful of glu-cose and two pinches of cream of tar-tar. Boil until it threads, cool slightly and heat until it begins to thicken. Then flavor with peppermint accord-ing to taste and drop on tins.

ing to taste and drop on tins. Everton Taffy-Boil one pound of best brown sugar in half a pint of water; when thick drop a few drops in a cup of cold water, and if the drops retain their shape and become brittle, add too ounces of butter and boil a few moments until it will harden again. Flavor with lemon.

Dutch Apple Pudding-One pint of flour, one and one-half tenspoonfuls of baking powder, one-half tenspoonful of salt. Rub one-quarter cup of but-ter into the flour. Beat one egg light, add to it three-quarters of a cup of

e flour

The Rise of the **Buckwheat** Cake

The leaven of yesterday ruins the cake of to-day Don't spoil good buckwheat with dying raisingbatter-fresh cakes want Royal Baking Powder.

Grandma used to raise to-day's buckwheats with the souring left over of yesterday! Dear old lady, she was up to the good old times. But these are days of Royal Baking Powder-freshness into freshness raises freshness.

And this is the way the buckwheat cake of to-day is made : Two cups of Buckwheat, one cup of wheat flour, two tablespoons of Royal Baking Powder, one half teaspoonful of salt, all sifted well together. Mix with milk into a thin batter and bake at once on a hot griddle.

Do not forget that no baking powder can be substituted for the "Royal" in making pure, sweet, delicious, wholesome food.

ble to get so buised as the former. Since the invention of patent ears, such as Street's and other varieties, parties a long distance from market have been greatly benefited, says an exchange. One only needs to go down to the stockyards and see the cattle rolling in every day from points 1000 to 1500 miles west without unloading to find out how much better cattle shipped in this way look than those that have been knocked about at the local feeding points, and have had to local feeding points, and have had to be unloaded and loaded probably a couple of times betwixt their point of shipment and their destination

out shade trees. Evergreens ought never to be set near the house. They are useful as windbreaks in the North and West, at some distance from the The outward appearance is nothing to the inward look when the hide is to the inward look when the hide is off and the braises show up. We be-lieve that all cattle, whether natives or rangers, should be sent to market without unloading. We have cattle reaching us every day from a distance of 1200 miles that stay in the cars all this distance. They are fed in the cars and watered also. The old-fash-ioned railroad feeding-yard is a thing of the past so far as it usefulness is concerned. Just as we believe it is better to kill cattle as near the feed-yard or range as possible, so is is betand west, at some distance from the house, where they may be set in clumps or hedges, but never on a lawn. Grass does not do so well under them as under deciduous trees, and so many of them drop cones almost the entire year that they are unsightly and interfue with the mount interfere with the mower. The Greater New York.

cars and watered also. The old-fashioned railroad feeding-yard is a thing of the past so far as it usefulness is concerned. Just as we believe it is better to kill eattle as near the feedyard or range as possible, so is is better to kill eattle as near the feedyard or range as possible, so is is better to run them to the central marking as possible. —New York World. A NEW CABEAGE MOTH. A new cabbage moth made her first appearance here about three years summer she comes in through the is pot to be seen on the wing by day, light, but I find her in silent slum bet between the leaves of the cabbage. Her body is half an inch in the common cabbage moth in structure. She carries a small shapely head and long slim legs. Her color, a pretty moth and covers each egg after depositing it on the under side of the cabbage leaves, with a white filmy covering. After the eggs are raid days under their filmy blanket,

such a case. The peach may be budded on the plum, but there is less advantage in this than is commonly supposed. The peach tree is usually hardy enough to live, and if the crop suffers it is from freezing the buds when too far ad-vanced. This, of course, the plum stock cannot remedy. It is a mistake also to suppose that peach trees will not do well on heavy soils. They only require soil that is well drained and from stagnant water at any season. Many mistakes are made in setting cold water, and stir into t Spread in well-buttered shallow pans. Pare, core and quarter four or five sour apples, place them on the dough, and sprinkle over them two table-spoonfuls of sugar. Bake twenty or thirty minutes. Serve at once with lowner server lemon sauce. Many mistakes are made in setting

lemon sauce. Squash Pio-Peel the squash and cut it in small pieces. Cook until done, using very little water. Mash it fine and to two cupfuls of squash, add one cupful of sweet milk, one cupful of sugar, the yolks of four eggs, well beaten, a pinch of salt, one-half tea-spoonful of ginger. Mix all the in-gredients thoroughly, line a pan with paste and fill it. Bake until done. Beat the whites of the eggs to a stiff froth, add one-half cupful of sugar, spread it over the pies and leave them in the oven. rich brown

Baked Macaroni (with cheese)-Baked Macaroni (with cheese) — Break one-half package macaroni into inch pieces, cover with boiling water slightly salted and stew gently twenty minutes. Drain well, and put a layer in the bottom of a buttered pudding-dish; upon this grate some mild rich cheese, a sprinkling of salt and bits of butter. Spread on this more maca-roni, and proceed as before until all the macaroni is used, having the the macaroni is used, having the macaroni on top well buttered, but without the cheese. Cover with s scant pint of rich milk salted, acd bake, covered, half an hour in a hot oven. Remove cover, brown and serve. serve.

A Singular Mishap.

In Trieste, an Englishman, Profes-sor Jones, has suffeted a severe loss through a strange mishap. Ho was holding a lecture in the large hall, which contained his books, when a cat, jumping upon the table covered with papers, threw over the petroleum lamp, and the efforts of the professor and his andience to extinguish the fire were of no avail. All the valuable books were destroyed.—San Francisco books were destroyed. - San Francisco Chronicle

SAPOLIO

"Furnace" is a geographical name not unusual in the Atlantic coast re-gion just below Mason and Dixon's line. In many instances the actual furnace is a mere tradition, but sixty or seventy years ago many such fur-naces were built to smelt the bog iron ore usual in all that region. It was once profitable to smelt this ore, but the marvelous abundance and cheap-ness of iron deposits elsewhere have made it impossible to carry on the old furnaces.—New York Sun.
