A Vagary of the Law.

A man in the city of Baltimore stoles a cat. The owner of the cat procured his arrest on a warrant for theft. Then the man's lawyer arose and told the court that his client had not stolen a cat, because it was legally impossible to steel a cat, because only property can be stelen and east in the impossible to steel a cat, because only property can be stolen, and cats in the commonwealth of Maryland are not property, but ferre nature—that is to say, fleras, which are wild beasts, such as tigers, lions and felis catus, living in the state of nature. The judge was struck dumb by this argument of the man's lawyer, and referred the cure. struck dumb by this argument of the man's lawyer, and referred the question to the attorney-general, a person of great learning, who in his youth was a mighty hunter of wild-cats, which he pursued over peaks and through chasms of the Blue Rilge and chased over back fences and through vacant lots in his native village. The formal decision of this eminent authority has established that, under Maryland law, you cannot steal a cat. Which is another illustrative example of the variation and conflict of the of the variation and conflict of the local laws in this country.—Legal

Berlin is one of the most cosmopolitan of European cities. Though it is the capital of Germany, only thirty-seven per cent. of its inhabitants are Germans by birth.

The Nicaragua Canal.

The project of the Nicaragua Canal has been debated in the U. S. Senate very vigorously. One thing should be remember about that climate; it is death to alm about that climate; it is death to almost every foreigner who goes there, and laborers especially succumb. It is said that the Panama Railroad cost a life for every tie. What an idea of pains and achee is in this sentence. It is mostly due to carelessness. Every laborer provided with St. Jacobs Oll would be armed against these troubles. Men's muscles there are cramped with rheumatic pain and they ache all over. That's just the condition where this sovereign remedy can do its best work. The fearful malady is very much like the break-bone fever in certain parts of America.

In a cubic meter of limestone Orbigny found 3,000,000,000 sea shells.

THE GREAT DISMAL SWAMP

THIS HUNTERS' PARADISE A MYS TERY TO SCIENTISTS.

Extends Forty Miles Along the Coasts of Virginia and North Carolina-Weird Traditions.

olina-Weird Traditions.

HE great unexplored swamp which extends for fortymiles along the coast of Virginia and North Carolina varies in width from a few hundred yards to twenty-five miles. It is the paradise of hunters, a mystery to the scientists, an inspiration to the artists and a terror to the superestitious.

About five miles from the village of Suffolk, where the Dismal Swamp begins, is Lake Drummond, named, some say, for a hunter who was lost in the swamp in the too ardent pursuit of a wounded stag, that led to the discovery of this beautiful sheet of water. Others say it is named for Sir William Drummond of North Carolina. This lake is an almost perfect oval. It is seven miles long and five miles wide. The water is dark, almost black, but perfectly transparent, reflecting wide. The water is dark, almost black, but perfectly transparent, reflecting every object with startling distinctness. When held in a glass vessel it looks like pure, strong coffee. This color is caused by the exudations from the cypross and juniper trees, which form a thick forest throughout the swamp. Gorgeously colored wild flowers grow in profusion in the rich, dark soil. The trees are garlanded with festoons of gray moss from the topmost boughs to the water's edge. The yellow jessamine, a brilliant and most fragrant, but poisonous, wild flower, wreathes its perfumed blossoms over this drapery of moss. The scarlet trumpet shaped flower of the poison oak vies with the yellow jessamine in abundance of bloom and wealth of coloring.

wealth of coloring.

The approach to Lake Drummond is by a rude canal, three miles of which is a straight waterway into the lake. This forms an avenue, bordered by cypress trees, which rise erect out of the water 130 to 150 feet in height, and as symmetrical in shape as the masts of a ship. The boughs, densely draped with moss, form an arch over this canal, which in midsummer, is so thick a sunbeam can scarcely pierce it.
The lake is surrounded by the same tall, erect cypress trees, interspersed with monster junipers of white cedars. The reflection of these straight, lofty, sentinel like trees in the clear, black water is peculiar. The most unac-countable thing about the Dismal Swamp is it is higher than the firm outlying country, and increases in al-titude towards the interior, where it is twelve feet higher than the sur-rounding land. This elevation of this morass has been accounted for on the hypothesis that where Lake Drummond now is was the crater of an ex-tinct volcano, and was fathomless. This theory has exploded; the lake is fifteen feet in depth, and every char-acteristic of the soil disproves the idea that its substratum is volcanic.

that its substratum is volcanic.
Sir Charles Lyell and other scientists of the past and the present have found layers of spongy decaying vegetable matter over the better known portions of the morass. Lord Lyell made an especial study of the great Dismal. His description of it and the conjecture as to the future coal deposits are of great scientific value. Five rivers find their sources in this swamp. Two canals now penetrate parts swamp. Two canals now penetrate parts of it. The tow paths are logs of wood, on which the man who pulls the canoe walks. These logs of wood in warm weather are literally covered with terweather are literally covered with terrapin, water moccasin, copperhead snakes, lizards and other reptiles, which make walking over them sometimes dangerous. Brawny men usually pull these canoes and lumber rafts, and find good excuse to take plenty of whisky along as an antidote for the inevitable snake bite. The raison d'ete of these canals is the value of the cypress shingles which are sold in immense quantities along the shores of the swamp. Another singular feature of the great Dismal is the growth known as cypress knees. These are coneknown ascypress knees. These are conshaped excreseences from the roots of the cypress tree, and look like miniature pyramids rising up from the

In 1725 Colonel Byrd, of Westover, Va., made a survey of the Dismal Swamp at the request of the proprie-tary Governor, who was auxious to in-duce George III to have it drained. Colonel Byrd's report was favorable, and was forwarded to England with a longer my friend. and was forwarded to England with a strong petition from a number of Virginia planters, who promised to bear all the expenses of the drainage if his Majesty would give them the land free of taxes. A copy of Colonel Byrd's report is now in the library of Congress. He left his party in the swamp; what became of them he never told. Colonel Byrd got out, however. Extracts from his manuscript are interesting:

"March 13, 1728-Early this morn-"March 13, 1728—Early this morning the chaplain repaired to us with the men we had left at Mr. Wilson's. We had sent for them the evening before to return those who had the labor oar from Coratuck Inlet. But, greatly to our surprise, they petitioned us no to be relieved, hoping to gain immortal reputation by being the first of mankind that ventured through the great Dismal. Our day's work ended within a quarter of a mile of the Dismal Swamp when the ground began to be already full of sunken holes and slashes.

be already full of sunken holes and slashes.

"It is hardly credible how little the bordering inhabitants are acquainted with this mighty swamp, notwith-standing they had lived their whole lives within smell of it. Yet, as great strangers as they were to it, they pretended to be very exact in their account of its dimensions, and were positive that it could not be over seven or eight miles wide, but never knew more of the matter than star-gazers know of the distance of the fixed stars. At the seme time, they were simple enough to te! our men idle stories of lions, panthers and alligators they were to encounter in that dreadful place. In short, we saw plainly that no intelligence of this terra incognita was to be got but from our experience. For that reason we resolved to make preparations to enter the next morning. We allotted each one of the surveyors twelve men to attend in this painful enterprise."

The "enterprise" proved too much for Colonel Byrd and his party. After terrible experiences with wild beasts,

quagmires and snakes they abandoned the swamp.

There are many weird traditions connected with the Great Dismal. One of the most uncanny is of a phantom ship said to be a merchanten and the content of the most uncanny is of a phantom ship said to be a merchanten captured by Captain Kidd, the pirate. The ship was dismantled, robbed, its crew murdered and then towed up one of the rivers flowing from Lake Drummond to the sea. The ship, covered with phosphorus, stands near the lake. The ghosts of the orew still man it, and on moonlight nights the hunter who sees it hears a banshee wail, which means disaster, sickness or death to him.

One of the most romantic traditions is of an Indian warrior, who loved the favorite daughter of his chief. The father looked higher for the maiden, but the lovers ran off to the shores of Lake Drummond, built a wigwam beneath its cypresses and lived so happily together until they were both very old that the Great Spirit allowed them to revisit the earth every full-moon and ride on the lake in a boat drawn by white swans. This Indian myth bears an analogy to Lohengrin, one of the most romantic of the Rhinegold legends, the only instance of this kind I recall among the traditions of the American aborigines. Another story is of an Indian lover who was driven insane, by the death of his affianced bride. This was related to Thomas Moore when he was in this country, and by him embalmed in verse. The Indian warrior fied to the lake of the Dismal Swamp and disappeared forever, excepting at midnight, when he, too, crosses the lake with his sweetheart in a white cance. Many people who live near believe Lake Drummond to be the rendez-Many people who live near believe Lake Drummond to be the rendez vous for numerous other ghosts which are supposed to haunt the swamp. This supposition arose from the num-ber of ignes fatui which are really seen every night in almost every par of the Dismal Swamp.—St. Louis Globe-Democrat.

To clean jet bonnets and jet trimmings use a piece of black velvet or a bit of plush to rub lightly over the dusty beads, and rhinestone buckles and ornaments can as well be cleaned by this means, while feather-trimmed headgear is freshened greatly by shaking gently near an open fire.

The voluminous sleeve seems about to be cut down in its career of expansion, for the Princess of Wales and the Duchess of York have declared in favor of one of more modest proportions. At a recent wedding their sleeves were perceptibly smaller, and as the English bridegroom had the courage to request a similar reduction in the size of the wedding gown, it was granted.

Seven million miles of thread is an aually used in the United States.

Military Men in Business

"A military Men in Business.

"A military training is invaluable to a business man if he will make it so," said the Vice-President of a Chicago wholesale house. "A man learns perseverance, courage and self-control. He learns to be thorough and, best of all, pernaps, he acquires the habit of order and the facility of handling men and situations. Having learned how to obey, he knows how to command. He keeps cool and collected in trying situations. I was in the artillery service under General Thomas. I always noticed that the excitement over any incident increased at an accelerated ratio the farther down it went into the ranks. The officer in command would be calm, the officers under him comparatively so, but the corporals were freezely wear weak and the selected of the command would be calm, the officers under him comparatively so, but the corporals were freezely. tively so, but the corporals were frequently very much agitated. I remember at the battle of Stone River quenty very much agitated. I remember at the battle of Stone River General Thomas, who was my ideal of a soldier, rode to an exposed position, where he could get a good view of the enemy. The bullets were coming thick from one quarter among the trees. He didn't seem to mind it, but turned his field glass on that particular point and surveyed it carefully. Then he ordered up seventy pieces of artillery and we opened up. In a short time that territory became quiet and we had no more trouble from there. "It was a ticklish kind of business, that of studying the situation with bullets whizzing by and cutting the twigs every moment. The General might have sent somebody else to do it for him and bring back a report, but no words could have described the conditions as he could get them for himself, and knowing this he took the risk without hesitation. I remember

risk without hesitation. I remember he examined the field as calmly and critically as if he had been looking at an eclipse through a piece of smoked

glass.
"A man in business life isn't often "A man in business life isn't often called upon to inspect a rife volley at close range, but he sometimes comes suddenly upon things almost as disconcerting. If he remains cool and collected and faces them as 'Pap' Thomas did the guns at Stony Ridge, he will win unless the odds are too heavy against him. Look over the list of successful business men in Chicago and you will find ex-soldiers largely represented."—Chicago Tribune. In southern and central Sweden there are some twenty factories for preparing peat-litter and mold, each factory turning out from 15,000 to 30,000 bales a year, fetching about fifty cents apiece. The mould is used for gardening in Sweden, while stuffing for mattresses or furniture, and surgical bandages are made from the white moss of the moors. In France the peat is moulded into "briquettes" with tar and resin, teased into litter, or woven into fabrics, which are used

Washerwoman to a Poet.

Surely few house-warmings—and a ouse-warming is one of the most house-warming is one of the most memorable and significant of domes-tic celebrations—are likely to be re-membered with more satisfaction and pride than that which attended the

pride than that which attended the first occupancy of the dwelling of Mrs. Choate, of Amesbury.

She was the poet Whittier's washerwoman; and when by persevering industry she had earned a home for herself and her family, he was one of the foremost among the neighbors and friends who organized the festivities, and heightened the delight of their hostess by leaving substantial tokens hostess by leaving substantial tokens of their regard, including a complete set of furniture for the new parlor.

Mr. Whitter was present among the guests and made the speech of con-gratulation, concluding it with the recitation of a poem which he modestly described as a piece of machine poetry entrusted to him for the occasion. It was his own, of course, and it is given in full in his "Life and Letters." recently published. The recently published. last three verses are as follows:

Thanks, then, to Kate Choate!
Let the idle take note,
What their fingers were made for;
She cheerful and jolly,
Worked on late and early,
And bought—what she paid for.

Never vainly repining, Nor begging, nor whining; The morning star twinkles On no heart that's lighter As she makes the world whiter And smoothes out its wrinkles

So, long life to Kate!
May her heirs have to wait
Till they're gray in attendance;
And her flatiron press on
Still teaching its lesson
Of brave independence.

Mr. Whittier's early poems accorded, in his "Song of Labor," due poetic honors to the professions of drover, shoemaker, ship-builder, farmer and fisherman. It is pleasant to find him also gracefully recognizing the worth of a profession no less useful and honorable, but less honored. "Long life to Kate," too, he has doubtloss secured, in transferring her, flatiron and all, from the steamy realm of the kitenen to the more romantic atmosphere of verse.—Youth's mantic atmosphere of verse. -Youth's Companion.

Japanese Patriotism.

Lafcadio Hearn asked in different classes of his Japanese school for written answers to the question: "What is your dearest wish?" Twenty per cent. wished to gain glory by dying for the Emperor. Others stated a similar wish in less definite language. Patriotism'is, in Japan, devotion to the ruler personally rather than the country. Atlanta Constitution.

Baking Powder ABSOLUTELY PURE

Peat as Fuel.

In Friesland and other parts of Hol-land the "black turf" is made into fuel for brick-kilns, litter for stable, and

mould for mixing with sewage. Some of it is exported to Bremen, Brunswick and Belgium, and it is stated that 280,

000 tons of the fuel, worth \$665,000, are annually consumed thoroughout the Netherlands. The Dutch canals

the Netherlands. The Dutch canals facilitate the transport of the peat, and as the subsoil of the moors is always cultivated after the peat is lifted, the barges that take away the peat bring back manure for the ground. At Groningen, for instance, all the sewerage of the city is applied to the reclamation of the surrounding turf-

noors.
In Denmark, where there is no

great supply of peat, it is chiefly used by the peasants as fuel, or as bedding in the dairy farms. In Sweden, on

the contrary, there are bogs extend-ing for hundreds of square miles, and of late years over 600,000 acres of the moorland have been brought under

moorland have been brought under the plow. The peat is prepared as fuel, and largely consumed in making iron, glass, or brick, either alone or mixed with coal and fir-cones. In southern Sweden there are factories solely engaged in manufacturing peat-fuel for sale, as its use is steadily in-creasing, and some 30,000 tons a year are employed in metallurgical opera-tions.

In southern and central Sweden

or woven into fabrics, which are used in the army, in barracks and hospitals, as blankets, mattresses, and saddle cloths, or for stuffing cofferdams and certain parts of machinery.—The Nineteenth Century.

Fireproof Celluloid.

Ordinary celluloid is a very useful material, but its manufacture is at-

material, but its manufacture is attended with considerable risk, and its combustible character even unfits it for some purposes. A so-called fire-proof celluloid is now being made by a company of Exeter, England. It is prepared from the spent fibres of paper mills, which are reduced to a cel-

per mills, which are reduced to a gel-

atinous state by certain chemicals, given an even substance in a centrifu

gal pump, colored as desired with ani-line dyes and strained through flannel. The product hardens after a time,

when it can be cut into slices, or it can be moulded while liquid.—Trenton (N. J.) American.

KNOWLEDGE

Brings comfort and improvement and

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative: effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weak ening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Folding Chicken Coop. Thomas A. Allen, of Astor, W. Va. has patented a coop or crate in which the sides and ends are joined to the bottom, the sides folding inward and outward between the ends and links connecting the ends and top and forming stops to limit the outward move-ment of the sides. It may be easily opened for use or folded into small

space, being especially designed to facilitate the shipment of chickens, turkeys, pigs, rabbits, etc.—Chicago 000,000 of the greenback notes have been lost and destroyed and will never have to be redeemed after thirty-three years of service.
