VOL. XIII.

LAPORTE, PA., FRIDAY, OCTOBER 4, 1895.

NO. 52.

Chicago expects soon to monopolize the industry of making car wheel tires.

A London physician is now recom mending the bicycle as a preventive and cure for asthma. I Statistics show that in Germany's

population of 50,000,000 the females outnumber the males by nearly a mil-

The tax on bicycles paid France about \$400,000 this year. There are nearly 200,000 machines in use in that

Massillon, Ohio, has granted a pension of \$350 a year to a school ma'am, who has been assisting its young ideas to shoot for the past fifty years.

Andrew Carnegie has got Great Britain down on him by comparing the equipment of their railroads unfavorably with that of the American

American railway engines are more favored in Japan than English ones. But the Japs will build their own right away, laments the New York Re-

In 1890 the horses of the United States were valued at \$978,000,000. At present they are valued at shout \$576,000,000, though there are a million more of them.

In the high schools of Japan the English language is placed on the same footing as the Japanese and its study is compulsory. The Japs are as good at looking after the future as they are in keeping up to date in current af-

Max Edel, a German bacteriologist, recently took a bath and then examined the water for microbes. He found that it contained 5,850,000,000! After a bath of one foot only he estimated the number of microbes at 180,-

A report to the English Parliament shows that from 1877 to 1893, inclusive, 353 English convicts were sentenced to be flogged under laws which allow this punishment to be inflicted in certain gross cases of assault. It is said that such crimes have not diminished in frequency as a result of the severity of the punishment.

Miss Edith Sessions Tupper says the new man as seen in New York City has a vacant stare in his eyes. No wonder, observes the Chicago Times-Herald, the new woman is crowding him out of nearly every channel of activity, and he has been hunting for a vacancy for so long he can be excused if he has a vacant look about the eye.

Fish-hatching in China is sometimes conducted with the aid of a hen. The spawn is collected from the water's edge and placed in an empty egg-shell. The egg is then sealed with wax and placed under a sitting hen. After some days the egg is carefully broken and the spawn empted into water well warmed by the sun. There the little fish are nursed until they are strong enough to be turned into a lake or

Paris has now 81,201 "houses," 885 "workshops" and 1807 buildings which are designated as "a mixture of houses and workshops" -- representing a value of \$2,200,000,000. The value of real estate has doubled since 1862. As especially notable in connection with these statistics, the Petit Journal mentions that, just as the residence in the richer quarters must have horse stables convenient, so, now in the construction of new buildings nearly everywhere provision is being made for properly "stabling the steel horses"—the all-pervading bicycle.

The New York Sun says: At last it is beginning to be realized that the case of the English grain raisers is permanently hopeless. The fact was practically admitted at the conference on the question of National bread supply held this week. The comforting notion had been clung to for several years past that there is such a thing as a limit to the depression, and when that has been reached matters will necessarily begin to mend. Last year it was thought that British corn had reached such a point, and that as the framer could not possibly do worse he was bound to do better. This cheerful calculation has been upset. In the coming season England will import a larger proportion of meat and flour even than last year. As matters stand wheat can only be grown at considerable loss, and though the large farmers may continue to produce it at a loss for the sake of collateral advantages, the small ones cannot afford to do so, and more arable land is bound to go out of cul-

THE REAPERS.

The long day's toil was over-A bird sang in a tree; The sunshine kissed the clover Good-by, and—she kiss

Then lovelier seemed the sunshing And if the clover listened

My throbbing heart it heard,

For all day long, a-reaping In fields of silver-shine. In fields of silver-shine,
I felt her heart a-creeping
And cuddling close to mine.

And lighter seemed the labor, And winsomer the wheat That spread its golden tresses For the failing of her feet.

And when the toil was over A bird sang in a tree; The sunshine kissed the clover Good night, and—she kisse i me! -Frank L. Stanton

A MODEL EXISTENCE.

matron-one who believed in Women's Rights, and

abused personage, deposed from her proper sphere and trampled on by the tyrant Man!

Mrs. Dewsford had come very near

being a man herself—what with a deep voice and bearded chin, and a figure quite innocent of all superfluous curves

or graces!

But Lizzy Dewsford was quite dif-ferent—Lizzy Dewsford who stood be-side her mother with cheeks round and ripe as a fall peach, deep blue eyes made mystic and shady by their long lashes, and brown hair wound round her pretty head in shining coils. You wondered, as you gazed at her, how they could both be women, and yet so public.

"Nonsense, child!" said Mrs. Dews ford, critically examining a butterfly with pale yellow wings, sprinkled with

carmine.

"But, mamma," pleaded Lizzy, "it isn't nonsense. He really does want to marry me."

"Marriago is all a mistake, Elizabeth," said Mrs. Dewsford, laying down her magnifying glass. "I don't mean you shall marry at all."

"Mamma!"

"Mamma!"

"A woman who marries," went on strong-minded matron, "is a woman enslaved. If I had known as much about life when I was eighteen as I do now, I would never have married.

From the standpoint of a grand mistake committed in my own life, I can rectify yours, Elizabeth."

"But, mamma!" cried poor Lizzy, "what shall I do?" cisculated the "This, ma'am?" hazarded Charley, clutching at a fat-leaved clover of weedy growth.

"The child! do!" cisculated the "Charles how strong the content of the

"what shall I do?"

"Do, child! do!" ejaculated the mother. "That is a pretty question for my daughter to ask! Why, read—study—improve your mind. Devote all the energies of your nature to the solving of the great social problems that surround you."

"I don't care a pin for the social problems, mamma," remonstrated Lizzy. "I like Charley Everett, and I'm going to marry him."

I'm going to marry him."
"Never with my corsent."
"Oh, mamma," cried Lizzie, aghast,

will interrupt my studies no longer. Go and read that 'Report of the Eng-lish Convention for the Amelioration of Womankind.' What are you cry ing for? A well-regulated woman

never cries."
"I wish I wasn't a woman," sobbed poor Lizzy. "I wish I wasn't some-thing that had to be elevated and im-proved and cultivated! Oh, mamma, darling, you weren't in earnest when you said you wouldn't consent to my marrying Charley! We shall be so happy together; and he says he will be miserable without me, and—"
"Elizabeth, I am astonished at you. Of course I was in earnest! I have

Of course I was in earnest! I have neither gold nor jewsls to lay on the shrine of the cause; but I have a daughter, and I intend to show the world what a woman unshackled and world what a woman unsnackled and unfettered can be capable of! You, Elizabeth, should glory in thus be-coming an offering." But Lizzy, apparently unapprecia-tive of the great lot in store for her,

cried more piteously than ever.

"Tears will not melt me," said
Mrs. Dewsford, calmly resuming the
encyclopedia. "I only regret to be
the mother of so degenerate a daughter!"

the mother of so degenerate a daugh-ter!"

"Mamma," ventured poor Lizzy, after a few minutes of silt t grieving.

"I—I promised Charley ride out with him this afternoonb"

"You must give him up, Eleabeth.
On such a subject I can accept no

rietles of Adiantum and Asplenium to be found in those woods, and my collection of ferns is as yet incomplete."

And Lizzie went away in great consternation—not to read reports, nor to study paleontology, but to slip out in the garden where a great Michigau rose carpeted the velvet grass with showers of soft pink petals at every passing breath of air, and where Charley Everett was busied in whittling out stakes for carnations!

"Oh, Charley, Charley! I am so miserable!"

"Lizzy, what is the matter?"

miserable!"

"Lizzy, what is the matter?"

He dropped knife, and all, in dismay at her woeful countenance, and Lizzy told him to the best of her ability what "the matter" was!

"Is that all," he asked quietly, when the recital was concluded.

"Isn't that enough," she rejoined, piteously. "When we were going to have such a nice drive all by ourselves, and come home by moonlight, and—"

and—"
"Don't fret, cara mia, it will be all right. So she won't consent to our marriage, eh?"
"She says most positively that she will not."
"What shall we do, Lizzy? Shall we alone quietly?"

"What shall we do, Lizzy? Shall we elope quietly?"
"Oh, Charley, you know I would never marry without her consent!"
"And are two lives to be made misgerable just because she thinks matrimony a mistake?" he asked gravely. "I suppose so, Charley!"
Lizzy Dewsford's pretty head dropped like a rose in the rain. Charley watched her quivering lip and the tear-wet eyelashes, and said no more!

Mrs. Dewsford was ready, with a preposterous drab umbrella to keep off the sun, attic case to put ferns in, and an extra pair of Jeoots, in the event of swampy walking, when Mr. Everett's little light wagon drove up to the door. The springs creaked ominously as she stepped in, and Lizzy, meekly following, was nearly overwhelmed by her mother's voluminous draperies.
"I had better sit in the middle—it proserves the equilibrium of the verification."

"I had better sit in the middle—it preserves the equilibrium of the vehicle better," said Mrs. Dewsford, wedging herself in between Lizzy and Mr. Everett with a smile of great community of the community of the

placency.
And she immediately began discoursing on the properties and habits of the fern, with unpausing volubility, while Lazzie, perched on the extreme outer edge of the seat, had all she could do to keep in the wagon, and Mr. Everett's eyes were in extreme danger with the points of the drab tumbrella. which veered to and frot like a ship in a storm, as Mrs. Dewsford's tale waxed in interest.

Suddenly she checked herself, as her eye caught a cluster of green waving vegetation on the crest like point of a rock which overhung the road.

"Charles! Charles!" she cried, "stop a minute! Can't you reach that Asplenium Ebenum?"

"Is this it, ma'am?" said Mr. Everett, making a dive at a tall mullein stalk.

clutching at a fat-leaved clover of weedy growth.

"Oh, dear, dear, Charles, how stupid you are!" sighed Mrs. Dewsford.
"Il jump out and get it myself!"

"Mamma!" remonstrated Lizzy.
"Oh, I'll help her!" nodded Charley, springing nimbly on the cliff, and pulling Mrs. Dewsford by main force up the steep side of the rock. "Here you are, ma'am!"

you are, ma'am!"

"Yee," panted Mrs. Dewsford; "but
but it was very steep. I really think
women should devote more attention
to gymnastics. Ob, here's the Asplen-

cal treasures."

cal treasures."

"Yes; but, Charles—"

Mrs. Dewsford's words of remonstrance were drowned in the rattle of the wheels, as Mr. Everett drove briskly away, with Lizzy nestling up at his side. One long lingering glance aboggive after the departing rair and she gave after the departing pair, and then returned to her tin case and um-

"They'll be back presently," she

But the afternoon sunlight faded off

But the afternoon sunlight faded off from the cliff, and the red orb of day sank majestically down behind the evergreen glens that bounded the evergreen glens that Dewsford grew tired and cross and rheumatic, and still, like the character of romance, "they came not."

'Something has happened!" cried the prophetic soul of Mrs. Dewsford.

"It can't be possible that I shall have to stay here all night!"

She looked nervously round. It was a tall, steep cliff whereon she stood, cut off from the woods beyond by the rush and roar of a wide and by no means shallow stream on one side, while on the other three it was almost perpendicular, rising some twenty feet up from the road. Mrs. Dewsford began to feel, as she surveyed it, very much like St. Simon Stylites on his column in the wilderness.

"If they shouldn't come," she thought.

But at the same instant a welcome.

with him this afternoonb"

"You must give him up, Eleabeth.
On such a subject I can accel no compromise.

"But I promised, mamma!"

Mrs. Dewsford gravely rubbed the end of her nose.

"A promise is a promise, Elizabeth; nor shall I require you to break it." (Here Lizzy visibly brightened.)

"But I shall accompany you." (The pretty face became clouded and overcast once more.) "Where are you going?"

"To the woods beyond the glen, mamma. Charley is going to get some wood sorrel for my herbarium."

"Nor will the expedition prove unprofitable to me," said Mrs. Dewsford, gravely. "There are many choice variations in the wilderness.

"If they shouldn't come," she thought.

But at the same instant a welcome rumbling of wheels broke the hushed stillness of the seldom traveled mountain road, and Mrs. Dewsford's strained eyes caught sight of Mr. Everett's spirited grays flashing round thankful for anything in my life! m tired to death waiting."

"At our we of the hushed stillness of the seldom traveled mountain road, and Mrs. Dewsford's strained eyes caught sight of Mr. Everett's spirited grays flashing round thankful for anything in my life! m tired to death waiting."

"At our we of the hill.

Well," she cried, "I never was more thankful for anything in my life! m tired to death waiting."

"At our we of the hill.

"At our we have a caught and ware life." m t

"Why, of course I did. I'd has been home long ago if I could got off this place."
"Well, r.a'am," said Charley, in accents of the coolest deliberation, while Lizzy clung, frightened and yet smiling, to his side, "I shall be very happy to help you off the cliff on one condition."
"Condition! Charles Everett!" exclaimed the astonished and indignant

"Condition! Charles Everett!" ex-claimed the astonished and indignant matron; "what do you mean?" "Simply this, Mrs. Dewsford; I want to marry your daughter. But Lizzy, like a too dutiful child, will not become my wife without your con-sent." "Which she shall never have!" said

"Which she shall never have!" said Mrs. Dewsford, emphatically. "Very well, ma'am! Get up, Whitey," and he shook the reins. "You're not going so leave me here?" shrieked Mrs. Dewsford, in a

panic of trror.

"Unless you comply with my condition, ma'am, I most certainly shall."

"And that condition is—"

"Your consent to my marriage with your daughter."
"Elizabeth!" cried Mrs. Dewsford, "will you be a witness to this—this atrocious conduct and not inter-

fere?"
"Charley won't let me have a voice
in the matter, mamms, at all," said
Lizzy, demurely. "He says he don't
believe in women's rights."
Mrs. Dewsford gave a hollow groan.
Mr. Everett touched his horse slight-

Mr. Everett touched his horse singuly with the whip.

"Stop!" cried Mrs. Dewsford. "I consent—but it is under protest!"

"You can protest all you like, "said Mr. Everett, driving closer to the

mr. Everett, driving closer to the rock, and standing up to assist his mother-in-law-elect into the wagon. Silently Mrs. Dewsford entered the vehicle—silently she rode home—silently she crossed the threshold of her house, as became a conquered

party.

"To think," she said in a hollow voice, as she sat down to a woman's universal solace, tea, "that after all my precepts and example Elizabeth should end her career by getting mar-

don't think it is so very terrible, after all!"

"To think," sighed Mrs. Dewsford, paying no attention to her daughter's reply, "that you should meet the fate of any ordinary woman!"

"But, mamma, I never had any ambition to be an extraordinary woman."

And so was brought to a termination the plots and plans for a "model existence" which had becarformed for Mrs. Dewsford's daughter!—New York News.

Mysterious Thirteen Trees.

Over a century ago, on the upper West Side, in New York City, at a spot known as Fort George, but now a part of Harlem, Alexander Hamilton, whose breath was stopped by Aaron Burr's bullet, planted thirteen trees within a radius of thirteen square feet. Now they are sturdy oaks, and a splendid object lesson in forestry. Although planted in the knoll of an obscure hill, this bunch of timber attracts the attention of all who pass that way, whether they who pass that way, whether they know its history or not. Like Hamiton was, these trees are now—namely, eccentric. One may face them from any angle, or range of vision, and count them, but by some hocus rocus one is sure to miscalculate their number, invariably falling short at least one tree, a round dozen alone being wighle

whole world with its effects and results.

When the issue of slavery came to dominate parties all else of politics and economics in the South departed, and for at least ten years before the war, and ever since, those things which have grown out of it have made the South "solid." There is a breaking up in North Carolina, in South Carolina, in Louisiana, in Alabama, in Kentucky, in Tennessee, and the whole South is on the brink of a political volcano. This is not inexplicable. The South desires to advantage itself of progress, to share in the Nation's development, and it cannot hope to do that under the policy of s'tariff for revenue only." That policy has struck at sugar and rice, coal being visible.

In order to accurately count the trees in this big trunked maze one must scale the dilapidated fence sur-rounding the oaks and count them "Surely you would not—"
"Surely you would not—"
"Elizabeth," said Mrs. Dewsford, in a tone of judicial calmness, "don't you see what a confusion you are creating among these insects which I have so carefully classified. I beg you will interrupt my studies no longer.

"Only for a little turn, ma'am, then find that the unlucky number is there."

"Symmastics. On, here s the Aspiration."

"The symmastics. On, here state Aspiration."

"The symma there. Harlemites who are acquainted with the mystery frequently lay wagers with the uninitiated. After rousing a stranger's curiosity, they eagerly bet him liquid refreshments or money that he cannot count the Hamilton oaks correctly. They always win, of course. Then they take pride in telling the loser how to play the game on others and get even. The thirteen trees were planted by Alexandre and the course of into banking and business circles. Protection is a policy too broad to be limited by sectional lines, and its advocates are too liberal, just and generous to withhold its beneficent efthirteen trees were planted by Alexander Hamilton to commemorate the original thirteen States.—Pittsburg

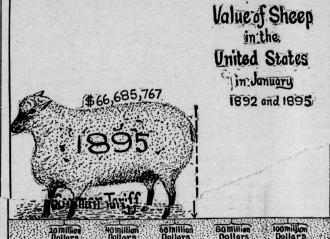

"Insolent."

From Paris comes an excellent story, though the flavor (as the Morning re-marks) seems ancient. The other day Vivienne into a good-sized stream, to the despair of a great lady who was unable to cross the street. A powerfully built young Englishman was passing at the time, and, seeing the embarassment of the lady, unceremoniously lifted her in his arms and set her down in safety on the other side. He saluted her, but the lady only thanked him by exclaiming "Insolent!" Whereupon the young Englishman, without saying a word, took the lady once more in his arms, carried her to the pavement where he found her, re-saluted her, and walked off.—New York Journal.

A Blind Mathematician.

Professor John A. Simpson, of Raleigh, N. C., blind from birth, has mastered mathematics "from addition to quaternions" mentally, has learned ancient and modern languages, and tike many other blind people is a good musician. His blindness is without doubt the cause of his extraordinary mental development. It is thought that the too great use of pen and paper or of slate and pencil to relieve the memory has a marked effect in checking mental growth. The industrious blind, relieved of this check, often accomplish what the seeing regard as miracles.—New York World,

Protection For Farmers. \$116,121,270 Kinley Tarif

fects from any part of the country desirous of embracing the advantages of that policy.

Svengali Mesmerizes Trilby.

James Buchanan's Idea.

Speaking in 1842 in the House in favor of an increased duty on hemp to keep out foreign hemp and encourage our Kentucky farmers, James Buchanan said that the increased importduty on hemp demonstrated that:

"An additional duty was absolutely necessary to ckeck its further progress, unless you wish to give the growers of the article in Russia an exclusive monopoly in preference to our own farmers. The additional duty is moderate; it is no mote than a protective

The additional daty is moderate; it is no moie than a protective duty in favor of our own agriculture."

There was not a word said about placing duty on agricultural products for revenue, nor for "revenue only."

Quite the reverse.

The Cost of Democracy. The South Not Solid. There have been already three bond sales under the Cleveland Administra-The South was not always "solid"-The South was not always "solid"—not always Democratic. It was broken on the tariff question, and will be again. Time was when the South refused to regard a "tariff for revenue only" as its political Koran. A great upheaval, reaching beyond the silver agitation, is going on among a people who have passed through a flery furnace that seems to have been required to make them even wiser, better and greater than they were before the war. Thirty years have sufficed to remove all old prejudices. Reconstruction is a thing of the past. The fear of "negro domination," which astute aspirants for office so long held up as sales under the Cleveland Administra-tion, amounting to over \$160,000,000, ranging from nine and a half years to thirty years in length of time, when they will fall due, and bearing inter-est at 4 and 5 per cent.

The charge thus saddled upon the country by taking away the duties on imports which would have made the bond sales unnecessary makes the following startling aggregate:

Principal.

550,000,000 at 5 per ct., 10 years.

50,000,000 at 5 per ct., 25,000,000

62,315,400 at 4 per ct., 30 years.

74,778,430 of "negro domination," which astute aspirants for office so long held up as the "bogie" man to frighten and consolidate the people, has departed, and upon the apex of all this gone and forgotten political lore we find agricultural and mineral development, and a commercial impetus which will, ere long, astonish the North and the whole world with its effects and results. \$162,315,400

\$123,2315,400

This makes a total of principal and interest of \$285,543,880, representing less than three years of Democratic meddling with the finances of the country, and immediately following an Administration under which the National debt was being steadily reduced, the National reserve fund augmented and unprecedented prosperity prevailing throughout the land.—The Irish World.

They Know It Now. When the Republican party gets control again, as it will next year, with some Republican for President such as Reed or McKinley or some other man, we will take up that tariff yet and go over it item by item and make such amendments to it as will give reasonable protection to American labor and American industries as against foreign labor and foreign industries. The people of this country never knew they wanted that sort of protection—they were never certain of protection-they were never certain of it—until the Democrats, by mistake, got possession of this country two years ago.—Senator Cullom.

Will Win as We Did Belore.

Next year we will go before the people as we did before. We will unfurl the banner of Republicanism, emblazoned with gold and silver, on which there shall be the words "Protection to American Industry and Protection to American Labor." Let us stand on the platform of the Republican party and waill seek the contraction of the Republican party and waill seek the contraction of the Republican party and waill seek the contraction of the Republican party and waill seek the contraction of the Republican party and wail seek the contraction of the Republican party and wail seek the contraction of the Republican party and wail seek the contraction of the Republican party and wail seek the contraction of the Republican party and wail seek the contraction of the Republicanian and the contraction of the contraction of the contraction of the Republicanian and the contraction of the Republicanian and the contraction of the Republicanian and the Republican can party, and we will again see the grand and magnificent State of Lin-coln and of Grant and of Logan wrest-ed from Democratic misrule.—Gen-eral Horace Clark.

Follow This Example.

The consumption of home products and manufactures has been very effectively agitated by the Manufacturers and Producers' Association of California. This association has 850 State factories affiliated with it, employing about 34,000 working people, and it believes in protection in its strongest form.

Will Free Traders Explain?

The open markets of the world seem to be checking the sales of American cattle, as we sold 1,870,000 head less last May than in May, 1894.

A Chapter on Cheapness,

Free trade does cheapen the cost o' living by compelling cheapness in the mode of living.

GETTING TANGLED.

SOME FRIENDS OF PROTECTION LED FROM THE RIGHT TRACK.

Impracticable Idea That Cannot Penefit the American Farmer— Forests, Mines and Factories Must Be Included—Protection Has En-abled the Construction of Ameri-

Representatives of the Atlantic coast shipping interests met in Phila-delphia to take action toward "secur-

coast shipping interests met in Philadelphia to take action toward "securing equitable protection, through
National legislation, for agriculture
and shipping." Among the resolutions passed was the following:
Resolved, That since neither of the two
great unprotected industries can derive any
beneft from a tariff on imports, we call
upon Congress to equalize the protection
system by extending to agricultural staples
and American shipping in the foreign trade
that just measure of protection to which
they are entitled, as long as protection is the
controlling and public policy of this Nation,
and that this be done by an export bounty
on the staples of agriculture and to American shipping in the foreign trade, either by
a bounty on tonage or a differential duty
which shall discriminate in favor of American
and against foreign ships, all to the end that
a restoration may be brought about of our
merchant marine and that the independent
land-owning farmers of the Nation may not
be driven into bankruptcy and ruin by the
competition of the cheap land and labor
countries of the world.

countries of the world.

This resolution is incorrect. Both the agricultural and shipping industries can derive benefit from a tariff on importe. It was by a tariff on inporte, a discriminating tariff, that the American, shipping interests were once so receperous. By a similar tariff, on importe, a discriminating tariff, American shipping interests on a similar tariff. can shipping interests can again be re-stored. And we are heartily in fa-vor of the renewal of this policy, which is so simple and so thoroughly effective.

which is so simple and so thoroughly effective.

To say that the agricultural industries of the country derive no benefit from a tariff on imports is equally untrue. What has been the experience true. What has been the experience of farmers who grow wool or hops, for instance? The necessity for a protective tariff on foreign farm products will become more and more apparent with each coming year as the farm supplies of India, Australia, South America and Russia increase in quantities.

America and Russia increase in quantity and seek markets for their surplus. We believe in giving both to agriculture and to shipping "that just measure of protection to which they are entitled," but we do not believe in doing so to the exclusion of the products of our forests, our mines or our factories, all of which were totally ignored by the shipping and agricultural representatives at Philadelphia. But where would the money come from to pay such a bounty?

Our farm products are the finest in the world, as are the products of our shipbuilders. Mr. Charles H. Cramp, the great ship manufacturer of Philadelphia, does not believe it would be a good thing if the United States were a manufacturing country alone. We

good thing if the United States were a manufacturing country alone. We quite agree with Mr. Cramp and we are glad that we are able to produce almost every article of consumption that is a necessity and a comfort to our daily life.

As Mr. Cramp well knows, we can build in this country steamships second to none in the world. It is equally true of our sailing vessels. The idea that we cannot build iron vessels is rubbish. We have the iron and we have the steel in abundance and of the best quality. It was not so much the superiority of the iron and steel vessels that caused the English shipyards to give up building wooden vessels as it was their inability to secure an abundant supply of the proper kind wooden ships and gave the preference to those built of iron and steel. With-out protection to our iron and steel interests Mr. Cramp would not to-day be able to manufacture the splendid specimens of naval architecture of which his shipping yards are capable.

GOLD AND COAL IN ALASKA.

Result of the Exam nation of the Fields by Covernment Geologists.

Dr. George F. Becker, geologist in charge of a division of the United States Geological Dr. George F. Besker, geologist in enarge of a division of the United States Geological Survey, has returned from Alaska, where he has been making a survey of the gold and coal fleids along the shore line. He was accompanied by Dr. William H. Dahl, who went to make a special report on the coal fleids. This is the first work that has ever been done by the Geological Survey in Alaska. Dr. Becker says there is no doubt that Alaska is going to be an active mining re-

Alaska.

Dr Becker says there is no doubt that Alaska is going to be an active mining region, but he does not believe it will rival the California mining belt. The veins are not so large and well developed as they are in that State. There has been quite an excitement this summer among the placers at the head of Cook's Inlet, but the amount of success thus far achieved hardly warrants the amount of interest exhibited. The profitable washings thus far are confined to a few miles on Bear Creek which empties into Turnagan Arm.

As to the coal deposits, the only coal found that seems likely to be of commercial value was at Cook's Inlet. It takes about twenty tons to do the work of one ton of Vancouver Island coal. Coal could be economically mined if the work was done on a large scale and with as much system as the coal mines of Western Pennsylvania are worked.

The Hungarian Government has issued its annual statement concerning the wheat trop of the world, which statement is based on consular and other reports. The estimated production of wheat importing countries is 749, 422, 900 bushels, and of exporting countries 1,651,701,000 bushels. The total patimated production is 232,000,000 bushels less than the amended estimate of 1891.

A Bicycle for a Princes A Bicycle for a Princess.

A bleycle manufacturing firm in New England is constructing a machine for the Princess Manu, of Wales, that is to be one of the handsomest products of the wheeling craze. It will be silver mounted and the appointments will be of the richest character. A special messenger will accompany the bicycle to England whose duty it will be to see to it that the Princess receives the machine uniteract.
