Family Likenesses

Some curious investigations have recently been undertaken by a photographic society in Geneva. The purpose
was to show that the longer a married
couple lived together—we apprehend
harmoniously—the more and more
marked became the resemblance
which the two persons bore to each
other. Photographs of seventy-eigh?
couples were taken, as well as an equal
number of adult brothers and sisters.
On careful inspection it was found On careful inspection it was found that the married couples were more like each other than the brothers and sisters of the same blood. Apparently, therefore, there seems to be a stronger force available for the production of "family likenesses" oven than that of force available for the production of "family likenesses" even than that of hereditary transmission. In accepting the statement of the society in question as true as to fact, it is not difficult, in a certain measure, to account for the phenomenon referred to. Human beings, for example, have quite a faculty for copying each other in their ways, movements and temperaments.—Photographic Times.

Practical Logic.
To reason from cause to effect is very good logic in its way, but to practice on physical conditions in seeking the cause first, is a very slow process indeed. All allments seem to give an expression in pain, and especially in rheumatism where it takes hold deeply. This is an effect, whatever the cause may be, and pain would become intolerable if one waited to find out the cause. Hence sufferers are bent on curing the pain promptly, and for this reason know, or soon find out that St. Jacobs Oil is surely the best remedy. Pecules seldom have reason to hunt further, for once this aliment is cured by it, it stays cured, and thus puts an end to argument and pain at once. slow process indeed. All ailments seem to

BUCKWHEAT CAKES

You must Of course use

Select a log of the desired size from a gum sycamore, or any other hard timber that does not split readily, writes G. M. Davis, of Wayne County, Illinois. Saw off the wheels, making them the desired thickness. Then take out the spokes from an old wagon wheel, square the hub, and fit into the center of the log wheel. The wheel is then completed and will last many years on farms, or even for the road, if well taken care of. Many of these are in use in this vicinity, and are quite satisfactory.—American Agriculturist. Select a log of the desired size fro

WHEAT HAY FOR COWS. Wheat hay is not a good feed for dairy cows. There are some other kinds of fodder which are much better, as oats and peas, which will grow where wheat will. Corn is an excellent fodder, especially when made into silage. Millet grows well in dry, hot localities, and wheat grain, ground, for the cows, will make an excellent addition to these fodders, with sugar beets or mangels. Thus, there will be no searcity of crops to take sugar beets or mangels. Thus, there will be no scarcity of crops to take the place of wheat. A silo should be one-fourth deeper than its diameter—thus, if it is twelve feet square, it should be fifteen or sixteen feet deep, and, in fact, the deeper it is the better all round, as the silage packs more solidly, and this makes it keep better. Thus, the depth is a matter of convenience mostly—the greater the betvenience mostly—the greater the bet-ter—but it should not be less than the limit above mentioned. Corn is cut for silage when the grain is glazed. -New York Times.

VALUE OF CORN.

Considerable difference of opinion exists among farmers as to the number of pounds of pork that can be made from a bushel of corn. The estimates run all the way from three to twelve pounds. The amount depends upon the kind of stock, the weather, the skill of the feeder and other conditions. Breeds, too, differ in this respect, some showing somewhat greater gains than others, but all the improved varieties respond more readily than the scrub. It is impossible, therefore, to lay down any regular rule by which to find the pork equivarent of a broth of a broth of a condition. improved varieties.

ily than the serub. It is impossible, therefore, to lay down any regular rule by which to find the pork equivalent of a bushel of corn. We are able only to determine the approximately to the imported varieties.

The tulip trees and our native oaks the finest shade trees in the world.

in this direction it was found that thoroughbred pigs required nearly one thousand pounds of meal to carry them from 100 pounds to 300 pounds in a growing condition and without making them too fat. Greater gains can be made, however with pigs un. can be made, however, with pigs under 100 pounds, the smaller the animal the less amount of food being required to support its weight while making the gain.—New York World.

There is no better time to do this work than in the fall, and there are few buildings that would not be the better for more or less work of this kind. At some points, perhaps only a wheelbarrow load or two may be needed while at others governly wear. needed, while at others several wagon loads may be required. For the ben-efit of the foundation walls, the grade should be at least three inches to the foot for at least five or six feet, espe-cially if there is a cellar located under the structure. It not only looks bet-ter, but makes the cellar walls firmer, prevents water from soaking into the cellar, and renders it warmer in win-ter and cooler in summer. The earth used for the surface of the grade should be well enriched, and either sodded over now or grass seed sown and well raked in. About the doors of the barn buildings use stiff clay or gravel, and stones two or three inches in diameter should be placed on the surface and driven into the soil with a sledge and

SHIPPING LIVE POULTRY.

Country shippers ought to pay more attention to the condition of their coops before using. Considerable stock is lost by shipping in worn out coops which come apart in transit if roughly handled, as sometimes happens. Every coop should be carefully examined, and all bottoms and cleats securely nailed. The coops should be strong, but light; heavy wood is unnecessary if long nails are used. They should not be so large as to render handling difficult. handling difficult.

handling difficult.

The coops should be high enough to allow the poultry to stand easily upright, and should not be overcrowded. Too close packing and too low coops are cruel and cause loss by suffocation. Hens and roosters should be shipped contracted whenever rossible. separately whenever possible. All poultry for the New York market should be well fattened, and should be led lightly before being placed in the should be well fattened, and should be fed lightly before being placed in the coop, if it reach its destination the day after shipping, as the New York law requires that the crop be entirely empty before killing. From more distant points provision must be made for feeding and watering in transit. At the beginning of their journey they should be fed lightly, as overfeeding at such time makes the birds sick and dumpish and unfit for the fatigue of travel. After the first day or two, when the poultry have become accustomed to their new quarters, the supply of food should be increased. All these things should be considered and every care exercised to have the birds arrive in the best possible conand every care exercised to have the birds arrive in the best possible condition, so that they may sell readily at the highest prices. It is only good stock that really pays. The shipper who does not get the best market price for his stock should consider seriously where the fault really lies.

—New York World.

general satisfaction as shade and orna

mental trees.

Here, as in almost everything else tastes differ, but we think we are safe Here, as in almost everything else, tastes differ, but we think we are safe in saying always plant native trees if you wish your work to be permanent and approved by posterity; for tree planting should have the blessing of those who come after us. We have such an abundauce of beautiful native trees that we can have large room for selection. Our sugars and hard maples, our fulip tree and our elms, our lindens and our sycamore, all make good shade trees in soils well adopted to them, in the Middle and Northern States. For general purposes as beautiful shade trees we would prefer the sugars and elms and the tulip tree, which is very beautiful tree and a rapid grower if it has a fair chance. The ash trees make a fine growth in an open space, and for roadside shade we confess a liking to the black walnut, as well as to the white walnut or butternut, which is a very attractive tree and a rapid grower, but these last must be grown from the nut, as transplanting unless quite small is scarcely ever successful. To these may be planting unless quite small is scarcely ever successful. To these may be added our evergreens, which may be selected according to the taste of the planter for the climate in which he lives. We have omitted an elegant and favorite tree, "the magnolia," which is beautifully ornamented when which is beautifully ornamented when the climate is not too severe. There are so many other native trees, especi-ally in the Southern States, which can be selected that we have only yet to say, do not plant "foreign trees," un-less for mere curiosity, and do not plant trees which produce a litter around your premises for half the summer, or such as send their roots to the surface for forty feet around them.

the surface for forty feet around them, from which myriads of sprouts are

our sycamores are not only excellent shade trees but are among the best lightning rods ever furnished by art

Farmers, let us plant our home trees.

FARM AND GARDEN NOTES. New milk will fatten a colt faster

than skimmed milk. Fertilizer can be profitably applied with or without manure, and will more than pay for their cost.

In keeping down the expenses do not do it by denying wife needed help in the house. That is the poorest Care should be taken not to cloy the

appetite of a colt, and when there is any symptoms of that the feed should be out down at once. Manure is recommended by all experienced farmers and experimenters, but it is a scarce article compared with

the area of land to be covered, unless there is a large number of animals kept on the farm.

If the legs, ankles, joints and pasterns are strong, and the colt's appetite is keen, the grain ration can be increased to three quarts at a feed three times a day, especially if he has regular work to do, either to harness or on the kindergarten.

driven into the soil with a sledge and covered with two inches of soil. Every year again cover the stones that become exposed.—American Agriculturist.

The majority of farmers prefer to use manure, and seldom resort to the use of fertilizers. They cannot produce sufficient manure for a large farm and manure one field a year. The plan is excellent, but they lose time by not using fartilizers on those time by not using fertilizers on those

Those who keep but one cow and save the cream until a sufficiency has save the cream until a sufficiency has accumulated for a churning will not succeed in making choice butter, as it is a mistake to mix the old and new cream. This is a fact that is frequently overlooked, and has been the cause of more failures than anything else.

The Russian thistle has moved little closer to the East, and it is simply a matter of time when it will be established on the Atlantic coast. The railroad cars bring the seeds and scatter them along the lines. Good cultivation destroys it. It is not as

A writer in the Chicago Times-Herald recently advocated preserving corn in air-tight bins. He says, and truly, that less care is taken of the corn crop than of any other grain the farmer raises. He also holds and en-deavors to prove that no other grain deavors to prove that no other grain is injured more by exposure to storm and other misuse.

With many farmers the most serious problem of life is to get out of debt. The only way to solve it is either to keep down the expenses or to increase the income, or, if possible, both. The danger is that in endeavoring to increase the income expenses are increase. crease the income expenses are in-creased to a point that leaves no profit and the debt is as far from being paid as ever.

The great mistake which farmers make in sowing clover seed under Western conditions is that they do not give it a deep enough covering. As price for his stock should consider seriously where the fault really lies.

New York World.

KINDS OF TREES FOR SHADE.

Those who wish to plant trees often ask what kinds of trees are the best to be planted and the most likely to give the summer season at almost any depth to which it might be covered in ordinary agricultural operations.

TO CLEAN WINDOWS AND MIRRO Put a little methylated spirit on a soft rag; rub the surface briskly all over, and polish with a soft, dry cloth or wash leather. The selvyt cloths are excellent for all polishing purposes.

RIDDING A HOUSES OF FLEAT

"I have just succeeded in ridding my house of fleas," a correspondent writes, "by sweeping the entire house from top to bottom in one day with salt. I did it all in one day so the fleas would not be carried. Then each day for a few days afterward I brushed up around the beds and in the nursery with salt strewn over the floor. This treatment must have been successful, as I see none now, and before, after as I see none now, and before, after trying everything else I had heard of, they were very annoying."—New York Telegram.

A LOVELY CRACKER JAR The decoration of clovers and grasses is well suited for a cracker jar or marmalade dish. Wash in a soft background of greens and blues before beginning to paint it. Use grass green, deep blue green and a bit of yellow, here and there, with a touch of dark green in the shadows. For the clovers use carmine, No 1 black, and here and there deep purple in yery limited there deep purple in very limited quantities. A very faint wash of ultramarine will give you the soft purplish shadow found in a clover. Use yellow brown, dark green, black and a touch of violet of iron in the soft grasses. Keep the tone of the leaves cool, using grass green deep blue green, dark grass green, deep blue green, dark green and black in painting them. Gild the handles and knob on the lid. —New England Homestead.

THE HOUSEHOLD GARBAGE CONSUMER A Boston physician has invented a vice by which all kitchen garbage may be utilized as fuel. The material is put into a dryer through which the hot air from the range circulates until all the moisture is evaporated. The receptacle then contains a quantity of refuse that is highly inflammable and will make excellent kindling. or may be thrown upon the fire and speedily burns out. This, of coarse, is practicable only where people burn coal fires. In wood-stoves the heat is coal fires. In wood-stoyes the fired is kept up to a raging pitch. Where gas or electricity or oil is used for heating, this way of disposing of garbage is out of the question. There are, however, enough coal-stoyes used in our large cities to make this a watin our large cities to make this a matin our large cities to make this a mat-ter of very great importance. It would pay the Board of Health to furnish these garbage dryers to every family, and pass the most stringent laws com-pelling their use and proper care. The most useful plan would be to use the garbage as a fertilizer for worn out lands, but this involves great cost and great danger. Decaying animal and great danger. Decaying animal and vegetable matter must be carted through the streets, drippings fall upon the pavements, are dried and whirled by the wind into the nostrils of pedestrians. Where it is possible, garbage should be consumed, and, by the way, a great deal of this is done when nothing is said about it. Many families put into the kitchen range everything of a waste character, and find great economy in fuel in consequence.—New York Ledger.

RECIPES.

Veal Cutlets-Cut, pare and flatten and dip in a beaten egg seasoned with pepper and salt, roll in bread crumbs or cracker dust, flatten again and try. Serve with rashers of bacon and slices of lemon,

Graham Muffins---One quart graham Granam Munns...One quart granam flour, two teaspoonfuls baking powder, one-half tablespoonful butter, one saltspoonful salt, two eggs, enough milk-to make a good batter. Dake in well-buttered muffin pan.

Peach Granite---Half-dozen peaches, skinned and chopped, make a sirup of a cupful of sugar and a little loss water. Season with lemon; pack in salt and ice. When nearly frozen add the whites of two eggs firmly whipped, mix and mold.

Swiss Salad.--Take one large beet, and three potatoes, cooked and cold; slice. Three spoonfuls vinegar, two spoonfuls salad oil, pepper, salt, one onion and a small piece of celery shredded. Pour over sliced beet and potatoes and serve potatoes and serve.

Hot Beet Salad-Boil five large or slice. Put in saucepan one cup milk, one-half cup water, one-fourth cup vinegar, one tablespoonful butter, a little celery salt and a little cayenne pepper. When boiling put in beets. beets until soft; peel

pepper. When boiling put in beets.

Bonne Femme Soup---Heat one quart chicken or veal stock. Boil one pint good milk. Beat up the yolks of two eggs, add to them the boiling milk, and stir this into the soup quickly; do not let boil. Season with pepper and salt. Before serving add shredded lettuce which has been boiled with a pinch of soda to keep green; also small three-cornered pieces of toast.

Fish Kartoffel—Cut into thick slices

Fish Kartoffel—Cut into thick slices six or eight peeled potatoes. Boil in salt water. When done do not pour water off, but add a tablespoonful butter, a pinch of cayenne pepper, a little celery salt, juice of one onion and a little minced parsley. Then add one-half cup cold milk in which a tablespoonful of flour has been smoothly stirred. Boil until creamed.

stirred. Boil until creamed.

Scalioped Apples.--Mix one-half cup sugar with the grated rind and juice of a lemon. Peel and slice eight large apples. Melt one-third cup of butter and stir in it two cups soft bread crumbs. Butter pudding dish. Make a layer of bread crumbs, then a layer of apples, then add sugar and one cup water; cover top with bread crumbs. Bake forty-five minutes covered; then uncover until light brown. Serve with cream.

Expert in an Odd Line.

Expert in an Old Line.

An expert employed by a New York house earns the handsome salary of \$8000 a year for just four weeks work—two in the autumn and two in the spring. His business is to go to Hamburg, and out of thousands of designs made there and submitted to him for "edgings," to select those that shall be manufactured for the American market. His judgment is almost uncring, and, while the salary seems large for the service performed, it means literally thousands of dollars in the pockets of his employers,—Atlanta Constitution,

Tucson, Arizona, has

Ada Rehan's salary is said to be 3900 a week. Mrs. W. K. Vanderbilt owns 126 diamond rings.

Two women photographers are doing a big business in Harbine, Neb. Caroline Hook Haas is a new Southern novelist, who has made quite a hit in Atlanta.

A new and pleasing writer on Hellenic art and antiquities is Mary Burnside, of Dorchester. Miss Vanderbilt bought forty-five

pairs of shoes as a part of her wedding outfit as a Duchess. The latest atyle of entertainment in Boston is a girl child-reader. She is said to be quite successful.

A somewhat remarkable feature con-nected with the recent railway race to Scotland was the number of ladies in

The Queen of Hawaii, the Queen of Madagascar and the Queen of Korea have come to grief this year. It is a bad year for queens.

Mrs. Lillie Pardee was a candidate

for State Senator in Utah. She is thirty years old, a teacher of Latin and Greek, and the wife of a Salt Lake

lawyer.

A woman drummer for a cigar factory appeared in Valdosta, Ga., a few days ago, and surprised the merchants.

She further surprised them later by proving that she was an expert in handling cigars and understood her business thoroughly.

Baron von Thoemmel, who has just retired from the post of Austrian Envoy at Belgrade with the rank of field marshal, is indebted for his diplomatic success to a sewing machine which he presented to the Princess of Monteegro, teaching her to sew himself.

A Keeley cured woman of Fargo, North Dakota, has been appointed National Lecturer of the Keeley League, her present assignmemt being to Virginia and North Carolina. She is a "morphine graduate," and is said to be the first woman Keeley lecturer.

Mrs. J. R. Green, widow of the historian and herself a writer of high standing, has a thorough knowledge of Greek, Latin, higher mathematics and the Roman languages, which she obtained entirely by self-culture, hav-ing never even had a governess as a

The Princess of Wales appreciates The Princess of Wales appreciates the bouquets which fall to her share at public ceremonials. The flowers are preserved as long as possible, taking their places among the thou-sands of rare exotics with which her rooms in Marlborough House are dec-

Cycling costumes are cheap in Paris. Good ones can be bought for \$5 and the more expensive styles run as high as \$10. These prices, of course, are the ones charged at the large shops, Costumes made by a fashionable modiste are as expensive as a fine street gown.

Glover mending sets are sold now, and no more useful present for a well groomed girl could be thought of. The apparatus comes in a neat wooden box, and consists of different sizes and kinds of buttons, all shades of silk and sizes and qualities of needles, a thim-ble and a little stretcher and "mending stick.'

ing stick."

Mrs. Mary Jackson, of Louisville, Ky., has just passed her 103d birthday. She lived in Louisville when all the houses were stockaded to guard against Indian surprises and the red men made considerable trouble for the farmers thereabout. She was a grown woman when Lafayette visited Louisville in 1820 and well remembers him.

Miss Nellie Adams, a pupil of the institution at the Royal Normal College for the Blind of England, passed the second-class figure skating test of the National Skating Association with great success. She is only sixteen years old, and has the distinction of being the first woman (blind or other-wise) who has passed this test on roll-

The roll of Southern poets has increased by Miss Mary Louise Hunt-ley, of Atlanta. She is a tall, slender, dark girl, reserved, dignified and studious. Her last poem, "The Sobbing Rain," was an exquisite idyl, and was quoted and requoted by the press of the country. She is the third talented singer in her city, the other two being Lollie Belle Wylie and Arelia Bell Kov. Key.

FASHION NOTES.

The popular delft effects are shown now in brooches and even stick-pins. The day of the glazed kid glove for dress occasions seems about over. The soft, dull suedes are once more popular and glazed kid is regarded as a poor substitute for the heavy dogskin gloves dear to the tailor-made girl.

dear to the tailor-made girl.

Hatpins of solid gold, in the shape of round balls, looks very pretty when used to pin on a black velvet hat. Turquoise, surrounded by diamonds, or more often rhinestones, is the pin par excellience for the bonnet of the uptodate girl. to-date girl.

Black velvet capes, elaborately em-broidered with jet, are very fashion-able. In shape they are much like those in vogue last year, but are rather longer. Flower-strewn satin is used for the same purpose, adorned with jetted trimming.

jetted trimming.
Corduroy is coming to the front as a fashionable material for street suits.
Double-breasted stylish coat bodices opening over vests of leather is one handsome design for them. The material is practically everlasting in wear, and if made with elegance, is exceedingly effective.
