iy, are the most mischievous. In one ones are prominent enough to compel attention. Do you not, for example, trust all your tradespeople implicity? You can't afford to do so. The head servants in the Vanderbilt and Astor.

DON'T IRON NICE HANDER

As Electric Thermometer. A new thermometer has been invent-ed, designed especially for determining the temperatures of difficult or inac-cessible places, such as the bottom of the sea, etc. Its action depends upon the well-known fact that different con-ductors of electricity vary in their re-sistances at different temperatures, and at different ratios. It has also been applied to measuring the tem-perature of steel tape, used to estab-lish a base line, instead of ascertain-ing the temperature of the air, as was DON'T IBON MICE HANDRERCHIEFS. Nice handkerchiefs should not be ironed. When rinsed, pass them through a wringer, siter they have been folded in a fine towel. Spread on a sheet of glass (a clean marble-topped table, if that abomination is left in the household. answers), and smooth till every wrinkle is out. The tinen or muslin will eling to the mar-ble or glass and dry with that finish that is on the fine, unstarched ker-chiefs just from the shops.—Detroit Free Press. ing the temperature of the air, as was previously the custom.

Edible Snails.

As the German yearns for his san-rage and the Englishman for his beef-steak, so the Frenchman, in whatever clime he may be, looks forward to the season for snails. For some senti-mental reason the land snail never has here so widely member with English mental reason the land shall never has been so widely popular with English-speaking people as the sea snail, and this is the more noticeable in Eng-land, where the sca snails known as whelks or winkles are eaten largely by the lower classes. It now appears, however, in this country as if the land snail were coming into favor, as the importations are said to be increasing every year, and snails, served in various ways, are growing popular for

various ways, are growing popular to-late suppers. As som as the first January thaw is reported in Paris, the Frenchmen of New York and other large eities in this country begin to look out for the first consignment of snails. When the steamer containing the first shipment will sensial wirnte dinners are arsteamer containing the first shipment sails, special private dinners are ar-ranged, principally in the neighbor-hood of University place, to take place as soon as the snails are received. Last year a curious thing happened. These snails are not common garden snails, but carefully selected follows, well fed and cared for, which in the fall are packed in barrels, a layer being placed at the bottom so that they quickly seize on the wood, then servants in the Vanderbilt and Astor, and other weakthy families have among their chief duties that of weighing the household supplies. Dry goods meas-urements in the large shops are gen-erally very accurate because the em-ployes are under strict orders to be exact. But grocers and butchers will bear watching. Get for yourself or your kitchen priestess a set of meas-ures and some scales, and after you and she have learned to use them, you will be amazed to see how much you have been paying for that you hawn't had. Even in the most reliable shops —so called—the weighing is very lax. hall are packed in barrels, a hyer being placed at the bottom so that they quickly seize on the wood, then nother layer, who seize on the shell beneath them, and so on until the barrel is filled. Then they are placed in cold storage of a modified type, and kept hibernating until January. When shipped they are marked as snails, and great care is taken to have them stowed in a cool part of the hold, so that they arrive in a normal state. Last year a consignment for a con-spicuous downtown restaurant was reported off Sandy Hook. The regu-lar guests were notified that a cer-tain hour the snails would be ready, and all preparations were made. When the casks arrived it was found that they had been stowed too near the they had been stowed too near the boiler room, and that all the snails were awake and out of their shells, and could not be coaxed back into them Those put near ice did not go back into their shells, but just died. So no Escargots a la Bourguignonne could be had, and the snails had to be eaten in other ways. -- New York Sun

No Time Lost.

Catherine Tudor, at the funeral of her first husband (John Sanlabury), was led to church by Sir Richard Clough, and from church by Morris Clough, and from church by Morris Wynn, of Gwedir, who whispered to her his wish of being her second. She refused him civilly, and informed him that the had accepted the proposals of Sir Richard Clough on her way to church, but assured him that if she buried Sir Richard he might depend on being her third, which really was the case.—London Scraps.

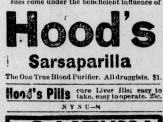

Where Did You Get This Coffee ?

Baked Bananas—Cut five bananas in two lengthwise. Lay in a pudding dish and bake for half an hour in a moderate oven, basting frequently with a syrup made of the juice of one lemon, a tablespoonful of melted but-ter and three tablespoonfuls of sugar. Normandy Salad—Stew very gently in their own liquor a small can of French pess. When the peas have ab-sorbed all the liquor remove from the fire and allow to cool. Chop half a pound of English walnuts, mix with the peas and pour over half a cnp of mayonnaise dressing. Prune Pie--Stew the prunes as for sauce, ston; them and tear into small Had the Ladies' Aid Society of our Church out for tea, forty of them, and all pro nounced the German Coffeeberry equal to Rio! Salzer's catalogue tells you all about it! 35 packages Earliest vegetable seeds \$1.00 Order to-day.

A WOMAN'S DISCOVERY.

Mrs. Zonowsky, an American wo-man, though the wife of a Russian, has invented a new kind of paper, and has sold the secret to a Liverpool firm has sold the secret to a Liverpool firm for a large cash remuneration, with tle promise of future dividends in case of commerical prosperity. Mrs. Zonowsky one day left some hard on a window sill, wrapped in ordinary brown paper, and when she came back for it she noticed that the under por-tion of it had peeled off in a most ex-traordinary manner, making a thin substance like athin sheet of transpar-ent paper between the lard and the substance like a thin sheet of transpar-ent paper between the lard and the actual paper wrapping. She went to work to investigate, and after many failures, demonstrated by practical[ex-periments that a new material can be manufactured from animal substance. The material is to be used for various purposes, such as for making tissue paper, flowers and artists' paper.— New York Telegram.

INFLUENCE OF BEAUTIFUL WOMEN.

Emerson long ago apprehended the truth when he said : "Beauty reaches

truth when he said: "Beauty reaches its perfection in the human form. All men are its lovers. Wherever it goes it creates joy and hilarity. It reaches its height in women." Our reminiscences are, therefore, only the recognition of the tributes men pay to beauty, and wher we re-call the stories of Pualine de Viguire, that withouts and secomplished call the stories of Pualine de Viguire, that virtuous and accomplished maiden⁵ of the fittenth century, who so fired the enthusiasm of the people with her enchanting face and form that the civil authorities compelled her by edict to appear publicly twice a week on a balcony to allay the ex-citement-and the accounts of that other lovely woman, Elizabeth Dun-ning, the Duchess of Hamilton, of whom Walpole says that when she was presented at court the noble crowd clambered on the tables and chairs to look at her-when we recall this mad-

look at her-when we recall this mad-ness of the world, it is not difficult to perceive how the theatre can become the pedestal and the wand of a beauti-ful woman.—New York Commercial Advertiser.

SEVERE ON HUSBANDS. According to the Massachusetts Su

have been paying for that you havn't had. Even in the most reliable shops —so called—the weighing is very lax. Butchers claim that the deficiencies in their weights are all due to the waste in trimming. Very well, order the meat sent untrimmed. You will get fresher meat, and what you trim off will often give you nice bits for the stock pot, suct, etc. Try it and be convinced. A quick-witted housekeeper says she has saved many a dollar in plumbers' bills by buying a force cup and learn-ing to handle a wrench. Despite washing soda and potash, now and then something unmeltable slips through the sink strainer and clogs the pipe. All the more modern plumbing has a nut at the bottom of the "goose-neck," just below the sink. By setting a pan beneath this, and with a wrenel loosening and then removing the cap, the obstruction will generally be found right there. Sometimes the force cup applied over the strainer in the sink will be sufficient to clear the ning preme Judicial Court husbands can no longer rule their wives. The Court says, in rendering a recent decision: "By virtue of this legislation a mar-"By virtue of this legislation a mar-ried woman becomes, in the view of the law, a distinct and independent person from her husband, not only in respect to her right to own property, but also in respect to her right to use her time for the purpose of earning money on her sole and separate ac-count. She may perform labor, and is entitled to her wages and earnings. If she complies with the statutory re-quirement as to recording a certificate she may carry on any trade or busi-ness on her sole and separate account, and take the profits, if profits there applied over the strainer in the sind will be sufficient to clear the pipe without taking the cap off the goose-neck. If both fail, no harm will have been done, but one or the other, or

A most pronounced feature of the ball-rooms this winter is the ubiqui-tious aigrette, worn, it is safe to say, been devoted to each other since they

HOW THE BOERS FIGHT.

GRAPHIC ACCOUNT OF THE BATTLE OF MAJULA HILL.

The Boers Carried by Storm a British Position Considered Impregnable -A Brilliant Victory.

NGLAND'S war with the Be NGLAND'S war with the Boers in South Africa, in 1881, showed the ability and cour-age of the latter as fighters. An English correspondent who was taken prisoner by the Boers at the disastrous battle of Majula Hill, in which General Sir George Colley, the British Commander, lost his life, wrote the following account of the British defeat:

his wife to the place. Mrs. Marion Butler, wife of the North Carolina Senator, has tastes decidedly domestic, but she likes so-ciety in moderation. Miss Mary French Field, daughter of Eugene Field, and nincteen years of age, is preparing herself to give readings from her father's poems. Mrs. H. M. Stanley has not a sincle the following account of the British defeat: The column which left camp at Mount Prospect consisted of 600 men, all told, belonging to the Fifty-eighth, Sixtieth and Ninety-second Regiments and the Naval Brigade. The night was dark, and the march across an un-known country tolsome in the ex-Sixtieth and Ninety-second Regiments and the Naval Brigade. The night was dark, and the march across an un-known country tolsome in the ex-treme. The troops carried cighty rounds of ammunition, water bottles and three days' provisions. Daylight was breaking when we approached the hill which was the object of the ex-pedition. We were six hours in ac-complishing what, as the crow flies, is a little over four miles, to the summit of an eminence from which we looked down upon a long line of Boer in-trenchments stretching from a point immediately below us to Buffalo River. Our occupation of this hill made the Boer position absolutely untenable. The enery's principal langer was about 2000 yards away. The position we had secured was undoubtedly one of immense natural strength. At surnise the Boers were to be seen moving in their lines, but it was not until nearly an hour later that a party of mounted videttes were seen trotting out toward the hill, upon which thay evidently intended to take their stand. As they approached our outlying pickets ired upon them, and our pres-ence was for the first time discovered. At about 7 o'clock the Boers opened fire, and the bullets whistled thickly over the plateau. The men were all perfectly cool and confident. I do not think the possibility of the posi-tion being carried by storm occurred to anyone. From 7 to 11 a.m. the Boers, who were lying all around the hills, maintained a constant fire. Their shooting was wonderfully ac-curate. The stones behind which our men in the front line were lying were hit by almost every shot. Our men only showed themseives to take an oc-rece out lot at the men were lying were hit by almost every shot. Our men only showed themseives to take an oc-rece out lot at the men were lying were hit by almost every shot. Our men Mrs. Thomas Carter, wife of Mon-tana's Scantor, has a decided talent for music. One of them, Miss Lhie, has been elected secretary of the senior class. The ultimate object of these women is to return to China as Christian medi-cal missionaries. men in the front line were lying were hit by almost every shot. Our men only showed themselves to take an oc-casional shot, and accurate as was the enemy's shooting, up to 11 o'clock we had but five casualties. So far our position appeared perfectly safe. The Boers had, indeed, got between us and the camp; but we had three days' provisions, and could hold out until reinforcements accurate just retired from the Governorship of Ohio, recalls the fact that during the term of President Hayes she and her husband occupied the White House for ten days by invitation to "keep house" there while the President and

the camp; but we had three days' provisions, and could hold out until reinforcements came up. From 11 to 12 o'clock the enemy's fire continued as hot, but as harmless as before. Between 12 and 1 it slackened, and it seemed as though the Boers were drawing off. This, how-ever, was not the case. The enemy had been, as was afterward learned, very strongly reinforcing their fight-ing line in preparation for an assault. Soon after 1 o'clock a terrific fire sud-denly broke forth from the right lower slopes of the hill, the side on which the firing had all along been heaviest. A tremendous rush was simultaneously made by the enemy. Our advance line was at once nearly all shot or driven back upon our main position. This position may be de-scribed as an oblong basin on the top of the hill. It was about 200 yards long by fifty broad. Our whole force now lined the rim of the basin and fixed bayonets to repel the assailants. The Boers, with shouts of triumph, swarmed up the sides of the hill, and made several attempts to carry the position with a rush. Each time, how-ever, they were driven back with the buyonet. At last the Boers, who had gathered his family were absent. Miss Williams, professor of English at the Normal School of Sevres, has founded a "Franco-English Guild," the object of which is to make French girls who have learned English ac-quainted with the views of American and English women through lectures and meetings in Paris, or by corre-spondence. Mrs. Potter Palmer has lectured before the society on the

ever, they were driven back with the bayonet. At last the Boers, who had gathered near the edge of the slope, made a tre-mendous rush at a point beyond that at which they had before been attack-ing, and where the number of defend-ers was comparatively small. They burst through the defenders and poured in over the edge of the basin, and our position was lost. The main line of our defenders, their flank turned and taken in reverse, made a rush along the plateau to endeavor to turned and taken in reverse, made a rush along the plateau to endeavor to form and rally, but it was useless. With fierce shouts and a storm of bul-lets the Boers poured in. There was a wild rush, with the Boers close be-hind. The roar of the firing, the whistling of the bullets and the yells of the enemy made up a din which seemed infernal. All around men were failing. There was no resistance were falling. There was no resistance -no halt. It was a fight for life. At this moment I was knocked down by the rush and trampled upon, and when the rush and trampled upon, and when I came to my senses the Böers were firing over me at the retreating troops who were moving down the hill. Try-ing to rise, I was taken prisoner and led away, On the hill I found the body of General Colley, shot through the head. After conversation with the Boer general I induced him to grant me a pass to go into our camp the head. After conversation with the Boer general I induced him to grant me a pass to go into our camp and bring out succor for the wound-ed. They were lying thickly both on the plateau and everywhere on the descent of the hill. The Boers were yery civil. They took, it is true, a few articles I had about me, but no troops in the world could on the whole have behaved better as victors. As to the completeness of their vic-tory there can be no question. They extide by sheer fighting a position which our general himself considered to be, defended by the force at his command, impregnable. Even now I can hardly understand how it was done, so sudden was the rush, so in-stantaneous the change from what we regarded as perfect safety in immi-nent peril. It cannot be denied that the capture of Majula Hill is an ex-ploit of which any troops in the world might be proud. During the enemy's advance our men hardly caught sight of a single Boer. The Boers crept through the grass, taking advantage of ground. When driven back by the fire at one point they would work around unperceived and thence open with heavy volleys upon us, themselves being all the time invisible.

Wind Swept.

Wind Swept. Were it not for the intervening mountain ranges, this country, from Northwest to Southeast, would at times in winter be swept by devastating tornadores. Blizzards seem to arise out of the cares and canons of the plains. Gaining strength and volume over a wide expanse, their force is arrested by the intellements of big hills. Sometimes they list above the barriers and sweep the Middle States with fury. There you enjoy one day a mean temperature, and the next may be far below freezing. It is like an ice water both wolers and circulation is the cause of both wolent and neuralize and the shock to mur-cles, nerves and circulation is the cause of both wident and neure. Those predisposed for below the bould have the master cure. St. Jacobs Oil, always ready. Its prompt use responses the chronic stage, and in the chronic stage it is a prompt, sure cure.

were babies, but the one grew like a bean pole, and the other stayed a roly-poly little thing, and now they look positively ridiculous together when they are walking on the avenue. Carrie alone would be rather pretty, although she is short and plump, but with Ethel she seems a positive denset

dwarf. "That is the worst of tall people, by the way; they make every one else ap-pear to be undersized. Of course, you cannot exactly choose a friend as you cannot exactly choose a friend as you would a gown, because she sets you off to the best advantage; but, all the same, it is much nicer to have some one who harmonizes with your general appearance."—Philadelphia Inquiter.

Eighteen American women bear, by marriage, the title of Princess. The post of Secretary of the Utah Senate is filled by a woman, Mrs. Pardee.

The Empress of Austria, who has reputation as a horsewoman, now rides a bicycle.

The Duchess d'Uzes, of France, is the only feminine Master of the Hounds in the world.

In the world. A woman, Miss Emmu Whitney, of Oleveland, was recording cierk of the Ohio Legislature last year. Miss Helen Gould has presented \$8000 to Vassar College for a scholar-ship in memory of her mother. Mrs. Texnela, with of the Bichen et d

Mrs. Temple, wife of the Bishop of London, acts as his private scoretary. She is an excellent shorthand writer. The Dowager Duchess of Atholl, who

has been lady in waiting to Queen Vic-toria for forty-two years, is about to

The last census shows that there are in the United States 1235 women preachers, 208 lawyers, 4555 physi-cians and surgeons.

by ninety-nine women out of a hun-dred. In spite of the fact that the immense

sleeve has been frowned upon in high quarters, fashionable women in society continue to appear in sleeves quite as voluminous as ever.

Big hats are plentiful in the winter's millinery, and they are sure to im-press by their size and richness, but the out-and-out wonders of headgear are really in the small sizes.

Among the hundred and one pretti-nesses of the winter are adjustable collars made of velvet, which are out into square tabs at the outer edge and lined with a contrasting color.

The plain, tailor-made gown, having full skirt, and three-button outaway coat, under which a pointed vest shows, will be one of the ready-made leaders in light spring cloths of season-able color.

Moire is a popular trimming ma-terial. Moire ribbons trim skirts from waist line to hem, and are made into rose ruchings to trim over the shoulders and down the sides of the front of the belt.

A pretty new fashion, which has been shown on several of the lately imported evening dresses, is a deep, square yoke, cut round on the neck, the yoke being made of a different ma-terial from the rest of the gown. The inductions can that the akint

terial from the rest of the gown. The indications are that the skirt and coat style will continue in favor for ordinary walking, shopping and traveling costumes, and that mohairs, cheviots, English tweeds and serges will be the fabrics used for these.

will be the fabrics used for these. Among the popular ideas in skirts are the five box plaits at the back. The skirts are cut on very much the same plan as those heretofore worn, but all of the fullness is laid in these plaits, which are very narrow where they are attached to the belt,
