

A Fearful Amount of Hair.
"I am sixty years old," said a downtown merchant, "and I have shaved every morning of my life since I was twenty. I got to wondering the other day how much beard had gone to waste, and I made a calculation. It is safe to say that I grew a quarter of an inch of whiskers a week, which would give me thirteen inches a year, and thirteen inches a year for forty years would give me forty-three feet and four inches. That's a fearful amount of hair to get out of a man's system."
—New York World.

Why Not?
It is said that if we take care of little things, the big things will take care of themselves. But why can't we be always prepared for many of our little troubles. What's the use of suffering days and weeks, when in ten minutes we can get rid of them? A sudden attack of headache, toothache, or neuralgic headache, flurries the most of us without anything at hand, while St. Jacobs Oil would cure and put an end to the trouble promptly.

The police census of Brooklyn reports 31,580 horses owned in the city.

If you are doubtful as to the use of Dobbin's Electric Soap, and cannot accept the experience of millions who use it, after the 21 years it has been on the market, one trial will convince you. Ask your grocer for it. Take no imitation.

About \$500,000 worth of property is yearly lost by fire in England.

A COUGH SHOULD NOT BE NEGLECTED.
Brown's Bronchial Trochocid is a simple remedy and gives immediate relief. Avoid irritations.

In Germany the butchers have lately been raising the price of horse meat, owing to the exhaustion of the supply of cheap horses.

Where Did You Get This Coffee?
Had the Ladies' Aid Society of our Church out for tea, forty of them, and all pronounced the German Coffeeberry equal to Rio! Salzer's catalogue tells you all about it! 35 packages Earliest vegetable seeds \$1.00 Order to-day.

IF YOU WILL CUT THIS OUT AND SEND WITH 15c. stamps to JOHN A. SALZER Seed Co., La Crosse, Wis., you will get free a package of above great coffee seed and our 148 page catalogue! Catalogue alone 5c. postage. (A.)

FLORIDA FACTS.
February and March are two of the best months to visit Florida. The climate is fine and the scenery is beautiful. When you have made up your mind to go, you can get the best of the state as possible and in the most comfortable manner. If you live in New York, Boston or Philadelphia, you can get the "Big Four Route" from any of these cities to Cincinnati, and with only a change of cars continue your journey to Jacksonville. Direct connection made in Central Union Station, Jacksonville. For full particulars of all lines to Florida, Address: E. O. McCormick, Passenger Traffic Manager, or D. B. Martin, General Passenger and Ticket Agent Big Four Route, Cincinnati, Ohio.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney, is the only medicine that cures on the market. It is taken internally in doses from 10 drops to a teaspoonful. It cures Catarrh of the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials free. Address: J. Cheney & Co., Toledo, O.

Spring medicine
Your blood in Spring is almost certain to be full of impurities—the accumulation of the winter months. Bad ventilation of sleeping rooms, impure air in dwellings, factories and shops, overeating, heavy, improper foods, failure of the kidneys and liver properly to do extra work thus thrust upon them, are the prime causes of this condition. It is of the utmost importance that you

Purify Your Blood
Now, as when warmer weather comes and the tonic effect of cold bracing air is gone, your weak, thin, impure blood will not furnish necessary strength. That tired feeling, loss of appetite, will open the way for serious disease, ruined health, or breaking out of humors and impurities. To make pure, rich, red blood, Hood's Sarsaparilla stands unequalled. Thousands testify to its merits. Millions take it, because it is Spring Medicine. Get Hood's, as their

Hood's Sarsaparilla

Hood's Pills
Are the only pills that take Sarsaparilla.

FARM AND GARDEN

UNFRUITFUL APPLE TREES.
Too early fruitage in newly-set trees is often a sign that disease or insects have attacked the tree and driven it into premature bearing. Too late coming into bearing usually indicates an excess of nitrogenous fertilizer, and often a deficiency of the mineral elements of plant food. Liberal dressings of potash and phosphate will bring many old orchards into bearing. —Boston Cultivator.

RAW PHOSPHATE.
"Natural plant food" or "soft phosphates." These and other names are applied to the raw phosphate mined in Florida. In some of these deposits the phosphate is in a softer or more soluble form than in fine-ground South Carolina phosphate rock untreated with acid. These Florida phosphates vary widely in composition. All reputable dealers in these raw phosphates guarantee the amount of phosphoric acid or bone phosphate in the material they sell. In the absence of such guarantee, this is not only a matter of fact, but an inferior article was being palmed off on the strength of the known quality of certain brands or mines of reputed merit. —American Agriculturist.

POULTRY.
It would seem as if every person might see that poultry keeping is a profitable industry now that eggs are from forty-five to fifty cents per dozen; and there certainly is money in a limited number of fowls rightly managed. Considerable care and attention are, however, imperative. Perhaps there is more detail to the work of poultry culture than to any other class of live stock husbandry. Certainly there are any quantity of so-called "little things" to be attended to. Probably the poultry house needs whitewashing, if this has not been done recently. This not only makes things "look" vastly better, but is effective against lice and parasites. The wash may be mixed quite thin and applied with a spraying pump; or it may be used thicker and put on with a brush. To every gallon of the wash add a gill of carbolic acid, which is an excellent disinfectant and insect killer. The feed of fowls during these cold months needs attention. Bugs and insects are no more, and therefore, we must supply our birds with animal food. Boiled meat, beef scraps, etc., are all good; but fresh, raw meat and ground bone are much better and more nutritious. Only comparatively recently has a machine been put upon the market that will reduce hard, green bones to hen food and expedite the work. Bones themselves are readily worked up, and available as poultry food. Green food must be supplied to fowls that are confined; and in fact, to all poultry in winter. Hang up a cabbage, where the hen will be obliged to jump for it. This will "kill two birds with one stone," for the fowls will get the green food they need and also get the extra essential to health. Boiled potatoes, carrots, turnips, beets and parsnips, mix with bran and cornmeal, and feed same every winter's morning, as a warm mash. Once or twice a day scatter a small amount of grain about to induce the birds to scratch.

SMOKING AND STORING BACON.
Before it is hung up in the smoke-house, the entire flesh surface of the hams and shoulders, and sometimes the middlings also, are sprinkled thickly with fine black pepper, using a large tin pepper box to apply it. Sometimes a mixture of about equal parts of black and red pepper helps very much to impart a good flavor. The meat is now hung upon sticks and hooked, close together without actually touching, and is ready for smoking. A few lines are laid down, and a small fire is made of some dry stuff. As it gets well to burning, the fire is smothered with green hickory or oak wood, and a basket of green chips kept on hand, and used as required to keep the fire smothered, in order to produce a cheap smoke and but little blaze. If the chips are too dry, they are kept moist with water. Do not allow the fire to get too large and hot, thus endangering the meat hung nearest it. The fire requires constant care and nursing to keep up a good smoke and no blaze. Oak and hickory chips and wood impart the best color to meat, while some woods, such as pine, mulberry and persimmon, are very objectionable, imparting a disagreeable flavor to the bacon. Corncocks make a good smoke, but they must be wet before laying on the fire. Smoking half a day at a time on several days week for two or three weeks, will bring best results.

Bacon keeps nowhere so well as in the house where it is smoked. It needs air and a cool, dry, dark room for keeping well in summer. The least degree of dampness is detrimental, causing the bacon to mold. It has been noticed, however, that moldy bacon is seldom infested with the skipper. Some housekeepers preserve hams in close boxes or barrels, in a cold, dark room, and succeed well. Other, cook in oil shells or bran, or wrap in old newspapers, and lay away in shelves or in boxes. In closing in cloth sacks and painting the cloth is also practiced. The bacon thus cured for must be constantly watched to prevent mice and ants from getting access to it. —New England Homestead.

COMMON SENSE POULTRY MANAGEMENT
What breeds pay best? is a question often asked of the fancier and answered generally by recommending the breeds he handles, writes S. N. Wolcott. In my experience the first cross between the Leghorn and a large breed makes the nearest to an all-purpose fowl of any one I ever used. My first cross was from a White Leghorn cockerel and Plymouth Rock hen, it produced beautiful white fowls, the an-

Apple rust is caught from cedar trees affected with an enlargement of the canchens known as cedar apples. Hence the remedy for apple rust is to destroy all the cedar trees in the neighborhood, or else to paint the apple trees green with the Bordeaux mixture.

Those who retail fruits in the city find that those of good appearance pay best, irrespective of quality. The largest and best looking are first disposed of. It is only after quality is known, as in the case of the Socket pear, that a fruit of common appearance can be sold.

It is an almost universal mistake to think that trees require no water, or but little, in winter. There is a great deal of evaporation all through the winter, and if moisture is not close at hand the tree will die. Keeping this in mind, it will be seen why there is great benefit in mulching newly planted trees.

The impression that the growing of small fruits is both difficult and expensive has been obtained by the putting of this class of plants in the kitchen garden, which is usually too small. To save space, the plants are crowded. Cultivation is, therefore, to difficult to be thorough, and a good yearly yield is out of the question.

An orchard of 100 trees should contain not more than twenty-five summer and fall sort; the balance should be winter apples of best approved varieties. A few standard apples, well grown and prepared for market, will make a farm's reputation, while if there be a score of kinds, there will not be enough of any one to establish a name.

The fruit grower who desires to make the most of his trees must get acquainted with them and visit them frequently, even during the winter. Thus he can look after their welfare, protect them from rabbits and mice, remove insect eggs wherever found, and otherwise assist them. To leave an orchard to its own resources all winter is a great mistake.

Wise Words.
The sleeping fox catches no poultry. Be up and doing.
Some people are too intellectual, as some people are too nice.
A tyrant never tasteth of true friendship, nor of perfect liberty.
An ad that induces people to think is sure to induce some to buy.
Superstitions are, for the most part, but the shadows of great truths.
Often we love a woman when we can't admire the shape of her hat.
When a man is asleep and forgets that he is alive, it is his happiest time.
Most people waste the best part of their lives making other people rich.
The best sweets, like the greatest joys, should be speeded, not gulped down.
The most entertaining talkers are those who say the most in the fewest words.
A righteous man regardeth the life of his beast, but the tender mercies of the wicked are cruel.
Theologies are well in their place, but repentance and love must come before all other experiences.
As he that lives longest lives but a little while, every man may be certain that he has no time to waste.
The only time a man of experience takes his wife into his confidence is to tell her he is not making any money.
Man progresses from aversion to love; but when he began with love and arrives at aversion he never returns to love.
Every night before a man has put his head upon his pillow he has learned the hard way of making a fool of himself. —The South-West.

Cannibalism in Africa.
The cannibalism of the black secret society known as the Human Leopard, in the country near Sierra Leone, disclosed by a recent trial, brings forcibly before us the difference between the East African and the West African habits of eating human flesh. The Sherbro cannibals lay and killed their victims and afterward feasted on their flesh. The cannibalism of the east coast is of a very different kind.

The flesh of the old people—the grandfather and grandmother of a family—is dried and mixed with condiments, and a portion of this is offered, with a dim sort of sacramental meaning, to travelers who become guests of the family. To refuse it would be a deadly insult. To accept it is a passport to the privileged position of a friend of the house. Many of our travelers in East Africa have eaten this sacramentally of ancestors of some dark-skinned potentate.

The cannibalism of the west coast is as has just been seen, of a more horrible kind. There is a hideously genuine appetite for fresh human flesh still existing among the natives of West Africa. The cannibalism manifests itself in a refinement of gluttony which has its mid analogy in the tastes of Europeans. Young boys are fattened upon bananas and finally killed and baked. To these Thirteen feasts comes not only the savage chiefs of the interior but also, it is whispered, black merchants from the coast. —London Saturday Review.

Too Many Horse Hides.
The hide of the horse has always been valuable for making ladies' fine shoes and things for belt lacing. It is much finer than the hide of a beef, and when split makes a very fine and soft leather. A few years ago the market could not get enough of them. That was in the days when a horse was a horse, and worth something, before the electric motor drove him from the street car service. As high as \$5 was paid for a good hide, and it was a very poor one that would not bring \$2.50. But at the horse got cheaper and the advocates of horse flesh as food was re-forevered by the butcher who could palm it off for beef, things slowly began to change. Prices went down steadily, until now it takes a No. 1 hide to bring \$1.50, while fair ones go for fifty cents, and the poorer ones are thrown away. The consumption of horse flesh in Europe, particularly in Paris, seems to have increased wonderfully, judging from the heavy importation of hides to this country, while in this country it is said there is not a large city where the horse is not slaughtered for the market and sold either openly or secretly. The meat canning establishments are also credited with the horse hide market. Thus, while the beef hide market has its fluctuations and days of glut and scarcity, the horse hide market is completely stagnated, and there does not seem to be any possible hope for a revival of it. —St. Louis Globe-Democrat.

The Kick of a Thirteen-Inch Gun.
Some time ago the English Government experimented with a thirteen-inch gun on a ship of the Royal Sovereign class. At the first firing of the gun the entire upper deck was lifted from its position and sprung along its entire centre, so terrible was the shock. The United States battleship Indiana has been specially equipped to provide against any such disaster and her decks have been constructed in such a manner that naval experts agree that no such damage can befall her when the thirteen-inch guns send out their flaming message.

Naval experts are agreed, however, that when she is in action and the four thirteen-inch guns are performing their deadly work the explosions will shatter and destroy every piece of woodwork and glass in every portion of the vessel. That is expected and prepared for and for that reason the battleship Indiana is composed almost entirely of iron and steel. She has been aptly described as an enormous floating steel fort with a ship built around it for purposes of navigation. Fully one-half of her hull could be shot away and she would still float and retain her unequalled fighting power.

These facts and figures should bring us to a realization of what a serious thing war is in these modern times. —Philadelphia Times.

The camphor of commerce is the product of several varieties of trees which grow wild in India, Ceylon and other parts of tropical Asia.

PHYSICAL SUFFERING MAY WEAR OUT BODY AND MIND.
Ordinary Wholesome Food Will Restore the Former, But Not the Latter; a Brain Food Necessary.
From the Times, Troy, N. Y.
William H. Harrison, Jr., a well-known resident of Berlin, Ill., the Times how he was stricken with a complication of diseases some time ago, being left after his partial recovery, a mental and physical wreck. Considering the fact that Mr. Harrison was compelled to use crutches, and has now fully recovered so as to be able to put the crutches aside, this was indeed an interesting case.

Mr. Harrison tells this story:
"I am fifty-one years old. Three years ago last March I was taken sick with a complication of diseases; my doctor helped me somewhat, but I was left with my left leg swollen, there were purple patches on the inside of the ankle and there was a constant itching in the leg from the knee down. Above the knee there was a weak, faint feeling. The suffering was almost unbearable. I was in fact nearly blind, and I had had no sleep for many days. I had had no energy nor ambition, my mind was blurred and I could not concentrate my thoughts. I was nearly discouraged when I happened to read an advertisement of the cure of Dr. Williams' Pink Pills. I felt that they would help me, and a neighbor, telling me what the medicine was, I bought a box, made me decide to try the remedy; so I ventured to send to Schenectady for some of the Pink Pills.

"For a year I had been able to do no manual labor and walked on crutches most of the time, but before I had taken half a box of the pills I felt like a different man. After taking several boxes of the pills my legs improved, and my bodily health was altogether better. I put aside my crutches, my strength returned, my mind became clear and all the organs of my body seem now to be doing their work well.

"I am now working most every day and I am in as good health as I have been for several years prior to my last illness."
—Mr. Harrison was loud in the praises of Dr. Williams' Pink Pills, and he continued:
"I can honestly say that I feel that I had not had the pills should not have been here to-day, so I most cheerfully tell of the wonderful work they have done for me. I sincerely hope that this statement may reach some other poor sufferers and accomplish as excellent work for them as I have had the benefit of."

Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unequalled specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous debility, indigestion, and all diseases resulting from a disordered condition of the blood. Pink Pills are sold by all dealers, or will be sent post paid on receipt of price, 50 cents a box, or six boxes for \$2.50 (they are never sold by mail or by a 100, by addressing Dr. Williams' Medicine Company, Schenectady, N. Y.)

Goose Fed on a Diamond.
Mrs. Robert Rosenthal, of East Thirty-second street, recently became the possessor of a diamond of considerable value in a singular manner. About five weeks ago she went to her butcher's and selected a goose. It was sent home and, as she does not believe

in confiding such matters to her servant, she proceeded to open it. She felt something hard under her fingers and upon examination found what was very much like a diamond.
Mrs. Rosenthal did not at first suppose it was a diamond, but to make sure she took it to a friend who is a judge of precious stones. After inspecting it he declared it to be a diamond of excellent water, worth in the neighborhood of \$150. The goose did not cost more than \$1.50.

Mrs. Rosenthal said nothing about her find outside the family for some time, but finally the butcher heard of it and visited her house to examine the jewel. He said last night that it had a small fragment of gold adhering to it as though it had been set in a ring.
It is said that when he returned to his shop he immediately performed antipodes on all the geese he had in stock in the hope of discovering more jewelry. It was not successful, however, he had bought the particular goose which Mrs. Rosenthal purchased. It is his custom, he said, to purchase of wholesale dealers wherever he can get the best for his money. —New York Herald.

Parents of 58 Feet of Children.
The family referred to is famous in the West. Forks (Ind.) neighborhood as being the best and the aggregate of any in the country, although there are individuals of greater stature. What will also interest students is the fact that the parents are rather small. The father is 5 feet 4 inches in height; the mother less, though both are of squatty mould. The height and weight of the children is thus given:
James Connelly, 6 feet 9 inches in height, weight 260 pounds.
Edward Connelly, 6 feet 4 inches, weight 245.
Sarah Connelly, 6 feet 4 inches, weight 260.
W. Connelly, 6 feet 7 1/2 inches, weight 198.
J. Connelly, 6 feet 4 inches, weight 242.
Daniel Connelly, 6 feet 6 inches, weight 245.
Bernard Connelly, 6 feet 9 inches, weight 248.
Ellen Connelly, 5 feet 11 inches, weight 200.
Bridget Connelly, 6 feet 2 inches, weight 195.
T. Connelly, 6 feet 6 1/2 inches, weight 178.
The total height of the children is 58 feet 3 inches; total weight, 2277 pounds. The father thinks that life among the timber coupled with abundant diet, is the cause of the extraordinary growth of his children. —Indianapolis Sentinel.

A Good Dog Is Worth Looking After.
If you own a dog and think anything of him, you should be able to treat him intelligently when ill and understand him sufficiently to detect symptoms of illness. The best doctor book written by H. Clay Glover, D. V. S., specialist in canine diseases, is the "Dog Book," which will furnish this information. It is a cloth bound, handsomely illustrated book, and will be sent postpaid by the Book Publishing House, 134 Leonard St., N. Y. City, on receipt of 50 cts. in postage stamps.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle.

Gladness Comes
With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative Syrup of Figs, promptly removes. This is why it is the only remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase the well-known, everywhere Syrup of Figs, stands highest and is most largely used and gives most general satisfaction.
