- -Great sorrows tone and strengthen the mind: it is the accumulation of petty ills, acting on a temperament that has never been fortified by the bracing airs of adversity, which disturbs the mental equanimity.
- -We cannot all go to the front and it is only necessary that a small percentage of us should; but we can all cheer on those that do, and can make them feel that wherever they are, the great pa triotic heart of the Nation sustains them
- -One of the war correspondents in describing the capture of the Buena Ventura, said that when the second shot was fired she hove to so suddenly as to jar her machinery It is evident from this that a shot from Sampson's guns acts like an air brake on a Spanish ship and throws open the sand valve at the same time.

### The Lehigh Valley Railroad to Enter

Williamsport,
The Lehigh Valley railroad has for some time been seeking an outlet which would bring it into Williamsport and it is gether. believed now that it has almost accom plished its end. The executors of the estate of John Satterfield, of Buffalo, the practical owners of the Williamsport & North Branch railroad extending from Satterfield to Halls, have decideded to dispose of the property. The necessary legal steps have been taken, and all parties interested are agreed upon the sale.

The executors of the Satterfield estate have received an offer of \$450,000 for the road, \$50,000 of which was to be paid down; they refused to state the name of the purchaser, but it is believed to be the Lehigh Valley railroad. This purchase will secure for that road its own tracks as far as Hall's and entrance to Williamsport from that over the Philadelphia and Reading tracks. It would have an other effect, also, in that it would check mate the projectors of the road from Binghamton to Williamsport which was to use the Williamsport and North Branch will occur as follows: as part of its system.

The Lehigh Valley would find this branch a valuable teeder, both in freight and passenger business and would give it access to and business from a portion of the State which it does not now touch.

### Sonestown.

Miss Nora Crist visited friends in Nord mont last week.

B. G. Welch and wife of Hughesville spent Sunday in town, Mr. Welch as Supt. of the E. M. R. R. will be in town a large part of the summer.

A few of the young people enjoyed a 'musical" back to George Hazen's on last Friday evening. Misses, Ada Hall, Bertha McClintock, Maud Starr and Leah Hazen, Mesers, Walter and Ed. Hazen and Jesse Lovelace were there.

Mrs. A. Edgar made a trip to Elk Lick and returned last Thursday to see Mrs. Dorson Speary who has been stricken with paralysis.

The upper grade school closed on Friday. A very interesting program was given by the Junior class.

R. E. EAVENSON, Gen, Manager-

A case of youthful depravity has re-cently come to public notice at Turn-ers Falls, Mass. It appears that several boys from "Tough end," who had heard the particulars of the execution of O'Nell, pacluded to try one of their number i, the crime of murder. An empty frei, to car was used as a court room, and the trial proceeded with ludge, jury, and full complement of

After the trial, in which the accused was found guilty, the sentence of death was pronounced upon the accused, and preparations taken to carry out the decree of the court. The death watch was set and a gallows improvised in the car. When the time drew near for the execution the condemned boy was mounted upon a box and the processed. mounted upon a box and the noose adjusted. The box was knocked out from under his feet, and the victim was told that when he stopped kick-ing he would be cut down. He was soon unable to kick, and the breaking of the rope probably saved the boy's life. Some little time was re-

quired to bring the boy around.

The ages of the boys are given as from 10 to 15, and the victim's age was about 12. The matter has been kept very quiet, and it was only by accident that the affair became known.

'Cuba is an ash heap, "said a soldier returned from serving in the patriot army. That describes the situation.

"The powers" declare they are going to Crete. Oh, yes! And the Spaniard is going to establish reforms in Cuba too. The two will probably come along to

The finest spectacle the close of the nineteenth century could witness would be the noninterference of the powers of Europe while Greece sailed in and lought it out to a finish with Turkey.

It must be an uprush of their own subliminal consciousness that is causing so many estimable citizens just now to consider themselves exactly fitted for political preferment.

The reply of the Greek minister of foreign affairs to the remonstrance of the European powers against Hellenic occupation of Crete is a sentence that will become historic, "Greece accepts full responsibility for all her acts."

The examination of applicants for common school diplomas in districts having adopted the Berkey system of grading

Yours very respectfully, A. E. CAMPBELL.

## **America's Ten Greatest Dairying Authorities on Cream Separators.**

The Wisconsin Agricultural Experiment Station.

In conducting our Dairy School, we have had occasion to use the various size of Improved U. S. Separators for dairy instruction during several winters past. Our students have always been pleased with the operation of these Separators, and we find that they skim the milk very clean indeed from fat, and that they are generally very satisfactory.

W. A. HENRY, Dean College of Agriculture.

Cornell University Experiment Station. ITHACA, N. Y., November 15, 1597, We have used the U. S. Separators for the past four or five years, and have und them at all times efficient and reliable. They are easily cleaned and kept order, and can be depended upon for satisfactory work.

H. H. WING, Prof. Dairy Husbandry.

Massachusetts Agricultural College.

We regard the Improved United States Separator as one of the very best all round machines. In cleanness of skimming it surpassed all the others. It compares favorably with the rest in capacity. Our man calls it the smoothest running machine we have, although it has been in use nearly three years—a good comment on its wearing qualities.

P. S. COOLEY, Prof. of Ag't.

Michigan Experiment Station.

AGRICULTURAL COLLEGE, MICH., Jan. 27, 1897.

Your No. 5 Separator was received, set up, and has been operated daily since the 4th of January. Each of our dairy boys has now had a turn at it, setting it up, running it, washing it, and testing the skim-milk. They all like the machine, on account of its easy running and simplicity. We are running through milk 12 to 24 hours old, warmed to over 85 and usually about 90 degrees. The per cent, of fat in the skim-milk, so far as reported, will not reach on the average a tenth of a per cent, and often is too small to read, in the skim-milk bottle. We are pleased with the machine in every possible way, as far as we have been able to observe it in a month's use. a tenth of a per cent, and success are personally as the second with the machine in every possible way, as the second to observe it in a month's use.

CLINTON D. SMITH, Director Michigan Experiment Station.

1893 Record Equally as Good. AGRICULTURAL COLLEGE, MICH., March 25, 1898.

I do not know that I have anything to add to what I wrote you in January
1897, or any changes to make in the statements therein made (see above).

C. D. SMITH, Director.

Vermont Experiment Station.

Your two machines have been here in use for some time and are doing excellent work.

We have succeeded in skimming over 2,600 pounds per hour, and as close as 0.07 of one per cent. of fat left in skimmilk, with the larger machine. This we consider excellent work for the winter. The small machine also does good work.

G. L. McKAY, State Dairy Instructor, lowa Ag'l College.

## Again in June; Iowa Experiment Station.

AMES, IOWA, June 25, 1897.

Your large size factory machine has been doing excellent work. We have used it six days per week for the past two months, and it skims to a trace right long, skimming 2,500 to 2,700 pounds per hour.

G. L. McKAY, State Dairy Instructor.

Ohio Stato University.

COLUMBUS, OHIO, June 25, 1897.

Enclosed you will find statement of the several runs made with your various Separators.

(Tests from the runs referred to show the following):

January 15,....0.02 February 2.....0.00 February 15,....0.02

is tests show not over 0.05 of one per cent. of fat.

Of course, you will understand that these runs were made by students who at the beginning had no knowledge of separator work. The same efficiency can hardly be expected under such circumstances as where operated by an expert.

THOMAS F. HUNT (Professor of Agriculture).

Idaho Experiment Station.

Moscow, Idaho, March 56, 1897.

Our Dairy School has just closed, having had a very successful career. We have used daily one of your No. 3 Improved U.S. Separators. It has given perfect satisfaction, and is the favorite with all the book.

CHAS. P. FOX, Professor of Agriculture.

Connecticut Exporiment Station.

The Improved U. S. Steam Turbine is running every day, and has been since April. It is an easy-running and therough skimming machine. In the weeter day, and has been since in the weeter day and the skimming a trifle over 700 lbs. of milk per hour, the skimmink showed:

No. 2, 0.07 (1) and 10 (1) the fat.

This is as close as any one could ask for.

This is as close as any one could ask for.

A. W. OGDEN, Chemist, Conn. Ag'l Experiment Station.

Missouri Experiment Station.

COLUMBIA, Mo., March 25, 1898.

The Improved U. S. Hand Separator was used in our Dairy School during the winter term to the entire satisfaction of instructors and students, and did most excellent work.

J. H. WATERS, Dean and Director.

The Improved United States Separators are now not almost but altogether universal. The number in use is 126,000, more or less. Their sale is eleven to one of all imitating machines combined. The latest improvements carry them still further to the front. Send for new Dairy catalogue No. 201 or new Creamery catalogue No. 196.

VERMONT FARM MACHINE CO.,

Bellows Fails, Vt.
