

## "Evil Dispositions Are Early Shown."

Just so evil in the blood comes out in shape of scrofula, pimples, etc., in children and young people. Taken in time it can be eradicated by using Hood's Sarsaparilla. In older people, the aftermath of irregular living shows itself in bilious conditions, a heavy head, a foul mouth, a general bad feeling.

It is the blood, the impure blood, friends, which is the real cause. Purify that with Hood's Sarsaparilla and happiness will reign in your family.

**Blood Poison**—I lived in a bed of fire for years owing to blood poisoning that followed small pox. It broke out all over my body, itching intensely. Tried doctors and hospitals in vain. I tried Hood's Sarsaparilla. It helped. I kept at it and was entirely cured. I could go on the housetops and shout about it. MRS. J. T. WILLIAMS, Carbondale, Pa.

**Scrofula Sores**—My baby at two months had scrofula sores on cheek and arm. Local applications and physicians' medicine did little or no good. Hood's Sarsaparilla cured him permanently. He is now four, with smooth fair skin. MRS. S. S. WOOTEN, Farmington, Del.

**Hood's Sarsaparilla**  
Never Disappoints

Hood's Pills cure liver ills; non-irritating and the only cathartic to take with Hood's Sarsaparilla.

**Domestic Animals Bring Infection.**

Evidence that colds are infectious is furnished by what we observe among our domestic animals. Cats seem to be especially susceptible. Probably they often bring home from their nocturnal rambles those mysterious catarrhal attacks which so rapidly run through the house. It is an old saying "The cat is sneezing, we shall all have colds." Sheep, too, are liable; a whole flock may suffer, and may show that curious eruption round the lips, which we all know too well as one of the most unpleasant accompaniments of a bad cold in the head. On the Australian sheep runs, when the shearing season comes round, the men who congregate at the sheds are frequently smitten with an illness of a catarrhal nature, which rapidly takes hold of them, and often affects some ninety per cent. Sometimes it becomes very serious, and may even develop into a fatal pneumonia. To all appearance it is caught from the sheep.—The Spectator.

[LETTER TO MRS. PINKHAM NO. 29,602]

"Two years ago I was a great sufferer from womb trouble and profuse flowing each month, and tumors would form in the womb. I had four tumors in two years. I went through treatment with doctors, but they did me no good, and I thought I would have to resort to morphine.

"The doctor said that all that could help me was to have an operation and have the womb removed, but I had heard of Mrs. Pinkham's medicine and decided to try it, and wrote for her advice, and after taking her Vegetable Compound the tumors were expelled and I began to get stronger right along, and am as well as ever before. Can truly say that I would never had gotten well had it not been for Lydia E. Pinkham's Compound."—MARY A. STAHL, WATSONTOWN, PA.

**Another Tumor Removed by Lydia E. Pinkham's Vegetable Compound**

"What Mrs. Pinkham's Letter Did."

"DEAR MRS. PINKHAM—After following the directions given in your kind letter for the treatment of leucorrhoea, I can say that I have been entirely cured by the use of Lydia E. Pinkham's remedies, and will gladly recommend them to my friends.

"Thanking you for your kindness, I am gratefully yours, A. B. DAVIDS, BINGHAMPTON, N. Y."

**Lazy Liver**  
"I have been troubled a great deal with a torpid liver, which produces constipation. I found CASCARETS to be all you claim for them, and secured such relief the first trial, that I purchased another supply and was completely cured. I shall only be too glad to recommend Cascarets whenever the opportunity is presented." J. A. SMITH, 2929 Susquehanna Ave., Philadelphia, Pa.

**THE HONEYSUCKLE.**  
"The clover," said the humming-bird, "Was fashioned for the bee; But ne'er a flower, as I have heard, Was ever made for me."  
A passing zephyr paused, and stirred  
Two moonlit drops of dew  
To earth; and for the humming-bird  
The honeysuckle grew.  
—Harper's Weekly.

**JIMMIE'S  
AMBITION.**

BY LESTER L. LOCKWOOD.

"Hello, Jim! What's up now?"  
"Chicken coop—that is, it will be when I manage to get a few more nails in."

Sam Simmins vaulted the low fence, and, standing with his hands in his pockets, watched Jim a few moments. Then he gave an amused whistle. "I say, Jim, there's nothing like having conveniences to work with. Now, if I were to build a chicken coop I should be silly enough to use new wire eight-pennies and a steel-tipped hammer; but I daresay I'm quite behind the times, and that assorted sizes of bent and rusty nails and slippery stone to drive them in with are the latest improved implements—a sort of renaissance in carpentry, eh?"

"Not exactly," replied Jim, laughing, "but it gives you a chance to air that French pronunciation that you had to stay for after school for last night. So there's some good comes from my impoverished resources; after all, that was the phrase I struck on yesterday."

"Don't Miss Lamb put us through the definitions and pronunciations for all they are worth, though? Father says if this thing keeps up he'll have to buy a new dictionary before the year is out—such wear on it, you know. But, to resume the original theme, what are you going to put in your coop when it is done?"

"That is also Miss Lamb's doing. You see, she knows all about my poultry craze—knows I'm saving up to go into the chicken business, I mean—and yesterday she showed me a chance to begin. The folks where she boards are regular chicken cranks, you know—fine stock, incubators, and all that. Well, yesterday she heard Mrs. Jansen says that she had a hen so determined to set that she couldn't break her up, and that she'd sell her very cheap to get rid of her. So Miss Lamb told her about me, and she offered to sell me the hen and a setting of fifteen eggs—all good stock, too, mind you—for \$1. Don't you call that a lay-out now?"

"Tis, for a fact. And you happened to have the dollar?"

"Yes; I've saved up \$1.15, and if I can get the coop done I'm going after school tonight for the hen."

"And I suppose you will buy a bicycle with the proceeds? But that doesn't explain why you are using rusty nails and a stone hammer."

"Why, you see, our hammer is lost, as usual. Some of the children are always getting away with it, and I can't afford to spend my extra 15 cents on nails. That has to go for chicken feed, and I don't know when I'll have a chance to earn any more. So I'm drawing these nails out of the boxes on the kindling pile. They are really mine, you know. I worked for them at Mr. Lake's grocery last vacation."

"Going into business on a strictly cash basis, eh?"

"Yes, sir-ee! That's my ticket, every time."

"Been reading the life of Rockefeller and all those penniless-boy millionaires, I suppose?"

Jim flushed.  
"Well, that's the way to begin, anyhow," he said, sturdily, wrenching at a stubborn nail with the cold chisel; "but I do wish they would always lose the hammer."

"Why don't you wait till it turns up?"

"Too much risk. You must 'make hay while the sun shines,' you know—in other words, set hens while they're in the notion."

"Going into the poultry business with one hen is too slow for me. I'm going to Klondike as soon as school is out, and when I strike it rich in mines you'll be pattering away with an old clucking hen and a half-dozen scrawny chickens."

"All right," responded Jim, cheerily. "It may be slow, but a bird in the hand is worth two in the bush."

"Which, being translated, means 'a hen in the coop is worth two mines in the ground,' I suppose?"

"That's about the size of it. But I say, Sam, before you start for Klondike won't you please hand me that stone lying at your feet—the smooth one that looks like a petrified potato? This loose granite chips off so."

"It does look like a potato—the white elephant variety," said Sam, tossing the stone to Jim.

"Thank you. This will make a fine hammer—so hard and smooth."  
"Ha! Ha! Ha! I should say so!" for at the first stroke on the rusty nail head the stone broke in two, one-half falling to the ground and the nail head grazing Jim's hand. As he turned his hand over to examine the scratch the broken surface of the stone caught his eye. He gave a loud whistle.

"Look here, Sam. Stop your laughing and see what is inside your white elephant potato."

With that keen interest in "specimens" which is the natural birthright of every Rocky Mountain boy. Sam stepped eagerly forward.  
"Geode?"

"Not much! Nothing so common as that. I never saw anything like it."

Jim shook his head, turning the stone from side to side and letting the sunlight play over its surface and reveal its delicate beauty, for in the heart of the common brown stone lay a circular ribbed hollow lined with mother-of-pearl and in one side of this polished nest was a cluster of crystals. "It must be the impression of a fossil shell," said Sam, eyeing it intently.

"Why, yes—of course."  
And Jim stooped to pick up the other half of the stone.

"Yes, here it is. Did you ever see anything so perfect? Some spiral thing that seems to go way down into the stone. Just look at the coloring, will you? Rainbow tints, every one! And—see?—here is the hole where that little bunch of crystals was broken out, and the inside of the shell, or animals—whichever it is—is lined with crystals as far down as you can see."

"Jim, you're in luck. You can sell it at the museum, and for a good price, too."

"No, I shall give it to Miss Lamb for her cabinet. I owe her something for her starting me in business."

"I do believe Jim, you'd give away your head if it was not well fastened on your shoulders. But come, there's the first bell and we must hurry."

Miss Lamb's admiration of the fossil was all that he could have desired.

"I cannot tell you what it is," she said, "but I am sure it is something too rare for you to give away. It ought to have a considerable money value. I cannot accept it from you until I have ascertained its worth."

"All right, then," said Jim, winking at Sam. "You can sell it if you wish, and all above \$5 that it brings you may give to me for my chicken house."

"It's a bargain," said Miss Lamb, laughing, "and the \$5 shall go to the Children's Fresh-Air fund."

The following Saturday Miss Lamb took the specimen to Professor Black, an eminent geologist.

"A turritite!" he exclaimed, excitedly. "Where did you find it?"

Miss Lamb told him the story.  
"Well, well, well! Now, I might go on breaking open stones with my geologist's hammer till the end of time and get nothing for my pains, while this unlettered boy, by a chance blow—why, this is really the finest specimen of its kind that I ever saw! Such a perfect fracture—the whole thing so complete! See how perfectly the two pieces fit together—not a fragment gone!"

"There you are. Just a common stone again. You can scarcely see the crack. Why, Miss Lamb, if I had that in my cabinet I would not take \$100 for it."

"Will you give that for it?"  
"Do you mean to say it is for sale?"

"Yes, the finder is a poor boy and would make excellent use of the money. He is going into the chicken business, and that sum would give him a good start—buildings and all. I tell you, professor, Jim Jones has real pluck and principle."

"I judge so from the novel way in which he was using this rare stone," giving it affectionate, professional little taps.

"Yes, I will give you \$100 for it and thank you very much besides."

The professor wrote his check, gave it to Miss Lamb and locked the turritite in his choicest cabinet.

Of course Jim could hardly believe his good luck, but you may be sure he was quite reconciled to it. By the time his modest chicken house was finished and a dozen glossy black Langshans strutted proudly in their grassy run the old Brahma was off with ten healthy chicks and was given the most comfortable quarters and the choicest food that the yard afforded.

Miss Lamb and Sam Simmins were invited on a special Saturday to inspect the new buildings and stock. They both smiled when they saw a neat arch over the gateway upon which was painted:

TURRILITE CHICKEN RANCH,  
JAMES CONN,  
Proprietor.

"Did you drive these nails with stones?" queried Sam.

"No, indeed," laughed Jim, shaking a new steel-faced hammer perilously near Sam's nose, "but I shall never be sorry that I drove the first ones so."

"Providence helps those who help themselves, you see, Sam," said Miss Lamb.

"Yes," sighed Sam, "Jim struck it rich before I even got started for Klondike, and if I don't get some sort of a move on me he will beat me getting a bicycle yet."

"Struck it rich—that's pretty good, Sam. Yes, it was literally a rich strike, that of the turritite on the rusty nail."—Chicago Record.

**A Personal Equation.**  
In an Edinburgh school an inspector wishing to test the knowledge of a class in fractions, asked a boy whether he would rather take one-sixth or one-seventh of an orange if he got his choice. The boy promptly replied that he would take one-seventh.

At this the inspector explained at length to the class that he who would choose the smaller part, as this boy has done, because it looked the biggest fraction, was very foolish; but the laugh was on the other side when the chirping voice of another little urchin broke in.

"Please, sir, but that chap disna like oranges."—San Francisco Wave.

**Where Reason Totters.**  
Husband—What! Another hundred-dollar gown? Didn't I tell you that you must keep within your allowance?  
"Geode?"

"Not much! Nothing so common as that. I never saw anything like it."  
"What do you reckon it is?"

## THE REALM OF FASHION.

New York City (Special).—The caterers of fashion's follies are ringing in a number of changes, if not distinct novelties. What we have

The two-seamed coat sleeves are gathered at the top, the moderate fullness being accorded to the latest mode. The skirt is shaped with a narrow front gore and wide circular portions that meet in a seam at the center-back. Short darts taken up at the waist line effect a close adjustment over the hips, the fullness at the back being laid in deep backward turning pleats, the edges of which meet over the placket. Gathers may be used to dispose of the fullness if so preferred, as the plain smooth effect is not becoming to all figures.

The skirt is of full length, and the circular flounce, which is of uniform depth, may either be applied over or form the lower portion of the skirt, in which case the skirt is cut off at the indicating line of perforations on pattern.

Suits in this style may be of plain Venetian covert or broadcloth serge, crepon, plain or mixed cheviot, tweed and other wide-width fabrics. To make the waist in the medium size will require two and one-fourth yards of forty-four inch material.

To make this skirt for a woman of medium size will require six and one-fourth yards of material forty-four inches wide.

Spring, summer, autumn and winter, all see one garment that is altogether popular, and that is the separate waist. No matter what may be said to the contrary, no matter what laws the dressmakers try to en-
