Mokoma Wanted for a Noted Picnic Ground.

While at Laporte Tuesday, Gen. Manager S. D. Townsend stated to the News Item that it was his earnest desire to make a beautiful picnic ground at Mokoma and run frequent excursions to it during the warm seasons. Properly handled it could be made to pay handsome returns to all concerned. Why it has not been done is no fault of the fair and enterprising management of the railroad. The Lake property seems to be in the hands of men who care nothing for small returns or any improvement whatever of the property. As it appears, the making of Mokoma lies mostly with the railroad people and they are rather averse to working for peoples' pockets who hold arbitrary views with a chronic desire to possess all the proceeds. There is not likely to be any practical remedy for this state of affairs which holds back the development of this beautiful resort until a suitable valuation is placed upon it by our tax assessor. The very modest tax paid on this valuable property by the wealthy gentlemen who simply hold it for speculation is an item of little consequence to them and should be so adjusted that Laporte could get back some of her deprived assessment valuation.

LAPORTE IS BECOMING A CENTER OF INTEREST.

She Now Grasps Her Vast Opportunity and will Make Up Her Raw Material.

Development in the new stove factory to be erected by Trexler & Terrill will not now be long in getting a start at this place. According to plans now exacted the proposed factory will be in operation by October next.

On Tuesday, General Manager of the W. & N. B. R. R., Mr. Townsend, with his track boss, Ellie Bubb, and surveyor, W. C. Mason, met on the ground of the proposed plant, with Mr. Oscar Trexler, of Allentown, with his superintendent, Mr. Jas. Monroe, and factory foremen, Chas. Smith and N. S. Millet.

The location of the factory was staked out, and a siding surveyed which will be laid by the Railroad Company, at once, when completed the machinery and lumber for the factory will begin to arrive on the grounds. The Borough stone crusher has been moved to the place and will be put in operation this week, crushing stone with which to make a concrete arched steam pit, 80 feet long and wide enough to allow for a double track, on which trucks will pass each holding one half cord of bolts which are steamed before cut into staves.

The main building will be about 125 by 30 feet, with many additional sheds and outbuildings. A one hundred horse power boiler will be installed to generate steam.

The plant when completed will cost in the aggregate \$15,000, and the very substantial manner in which it is constructed, and supplied with the most improved and modern machinery, would indicate that it is no short lived project, but one that will give paying employment to Laporte for many years.

Messrs. Trexler and Terrill have leased all the lands of the Union Tanning Co., in this section of the county and will purchase timber of smaller individual land owners wherever it can be procured. The factory will be stocked with logs principally in winters. The daily capacity will be 30000 staves, employing 25 men in the factory. In the woods upwards of 75 men will be employed at times. Cement manufacturers will be the largest customers for the product of this factory. A large boarding house will be erected near the factory for the accommodation of laborers.

The business of this industry will be transacted mostly through the firms offices at Ricketts. Supt. Jas. Monroe, of near Indianapolis, Ind. will have complete charge of the business with headquarters at this place, however.

Laporte is one of the most favored spots in the county for the manufacture of wooden articles, and the start has been made which will be the up-building of a prosperous commercial village. Withing fifteen miles of her boundary line is two-thirds of the hardwood timber of the county. The prevailing elements of its surface features are forests and broken hills. This fact proves that the hardwood manufacture industry at Laporte has heretofore been pushed by.
