Some Economic Conditions

at Eagles Mere.

Eagles Mere and the region immediately contiguous to it is by no means deriving from the summer business the returns that it should. This is true of every material interest represented in the community, whether it be our working men and women, the farmers, the Land Co., the Boat Co. or the Railroad Company.

Perhaps the earliest fault is with those who own the land, whether the Land Company or private owners. Some one is willing to pay five hundred dollars for a lot and build on it. In the effort to get a little more than the would-be buyer is willing to pay the negotiation fails. What is the result? The lot remains unsold and in nine years it would be necessary to get twice the price in order to cover interest and taxes, the loss in revenue to the Boat Co. will have been not less than fifty to sixty dollars, loss to the Borough about one hundred dollars and loss in current labor, exclusive of that employed in building the cottage, not less than one hundred dollars more.

The summing up is that in the attempt to get a hundred dollars more than the proposed buyer was willing to pay there has been an actual loss of five or six times the difference, not counting the material advance that would have been gained in other property by reason of the advance in population.

Nothing is more needed in Eagles Mere today than greater activity in dealing with possibilities similar to this. It is the fashion to complain of the Land Company and the Boat Company but the fact is that every interest in Eagles Mere is making the same mistake or it looks that way to the writer.

In table supplies we are lamentably deficient so far as home production is concerned and it would be a good thing if we might have a series of Farmers Institutes to demonstrate to us how to avail ourselves of our advantages so as to keep in our midst the largest possible percentage of the money so freely brought here by the summer visitors. With an ice supply unsurpassed as to quality, quantity and inexpensiveness it ought to be possible to preserve every product that could be furnished here and lay it on the tables in a condition that is impossible to any but home producers.

Certainly five thousand chickens ought to be consumed here every summer and be cheaper than beef at Trust prices as well as far superior in quality and acceptability and yet we suppose our own people hardly furnish a hundred. Perhaps we are out in our calculations as to this latter guess but of the prime question we feel sure.

It ought to be possible to produce gilt edge butter here all the year round and with the facilities that nature gives us for cold storage it should be placed before our guests in far better condition than that furnished by foreign creameries.

This market has never been supplied with veal but is filled with Chicago beef until one tires of it.

In garden produce we have practically nothing to sell. Cottages get along fairly well with what is brought in from farms five to twenty five miles away.

Our home work ought to keep employed between seasons enough horses to furnish a team to guests whenever wanted but the fact is that one is fortunate to find a team for a drive unless arranged some time in advance.

Why not let us have a Fair right here in Eagles Mere in September while many of the summer people are still here and yet enough have left to make it possible to entertain any reasonable crowd of Fair visitor. Get Capt. Chase to arrange swimming races, boat races, and every other possible aquatic sport. Let us have base-ball and foot-ball matches, floral domestic, garden, farm and live stock and every other possible exhibit. Make the road round the Lake a driving course for speedy and draft horses, give us bicycle competition, press the Chautauqua Auditorium into the service and fill it with everything within reach that would illustrate possible improvement in anything appertenant to our place. Bring our school children and young people into it and do not leave out the old folks.

Why not? B. G. W.
