

**Some Singular Errors
About Eagles Mere.**

A Philadelphia correspondent writes about a notable feat by Mr. John H. Swinburn of that city in swimming the length of Lake Eagles Mere. It speaks of the distance being a mile and three quarters and if he means that the round trip from one end to the other and back is that long it is approximately correct but the article reads as if the lake was one mile and three quarters in length. The other statement was that the temperature of the water was fifty degrees when in fact it was probably seventy degrees. Really the temperature of the water in Lake Eagles Mere does not vary greatly in any part of it from that of the bathing beach and at no time in any summer has any such figure been reached as it is represented this swimmer had to deal with. The temperature of the water from the bottom of the artesian wells is about from forty two to forty four and is about as cold as one cares to drink it.

There is no danger of cramps at any time in our lake from the coldness of the water. Another statement was that the thermometer went down to thirty six in the middle of the summer. It would be a sufficient answer to this interesting fiction to say that on the lawns of most of the attractive cottages of our place are beds of sensitive flowers that would be ruined in one night with any such conditions. The fact is that at 6:30 in the morning of June 25th the thermometer stood at fifty and this was the lowest figure in daylight this summer. While this summer seems to be characterized as the coolest in many years there has been no time when the visitors were not comfortable as is clearly evident in the larger number than have ever been here before and that they stayed is an unerring indication that they were enjoying it.

Eagles Mere has never made a better record for itself than in this year of Grace 1902. With some changes in methods that it is hoped may be brought about it is destined to continue to grow as it has done. No boom is to be anticipated, no speculation in values but the positive and reliable progress that will stay with it. There is no speculation in Eagles Mere property and it is to be hoped that any such idea may be gotten rid of as we believe it has retarded our progress in the past and perhaps it may still do so to some extent now. It has a positive value but not a speculative one. When holders of property who may have it for sale will learn this lesson it will probably be to their advantage and it certainly will be a good thing for the place.

A gentleman of wide spread observation and who lives at Scranton said to the writer that "there was no place in Pennsylvania that could compare with Eagles Mere and that the Pocono Mountains are not in it." This is no new sentiment but unfortunately our people are inclined sometimes to depend too much on the natural attractions and to forget that unless these natural attractions are supplemented with the comforts and conveniences that belong in present day life together with the attentions that come from alert, intelligent and industrious residents we shall lag in the race for a growth of material prosperity. Nature and skill have done much for our village in the mountain top but we are by no means to the fore as we should be.

However we are strongly inclined to believe that the material advances of the last two years are only the beginnings and that when the crowd comes again in 1903 they will find that our community has not been indulging in any Rip Vanwinkle sleep by any means.

NO TARIFF SMASHING

UNANIMOUS CONCLUSION OF REPUBLICAN LEADERS.

The Business Men of the Country Will Welcome This Decision of the President and His Advisers as Sound, Sensible and Patriotic.

No tariff legislation at this session of congress and no tariff revision now at all is the unanimous conclusion of a conference of Republican congressional leaders at the White House, whither they had been summoned by President Roosevelt.

Representative Babcock of Wisconsin, author of the bill reducing the duties on certain iron and steel products, was present at this conference and joined in its verdict. If the Massachusetts legislature had passed that resolution demanding the passage of the Babcock bill, how absurd would now be the Massachusetts attitude! The Republican majority of the commonwealth has new cause for thankfulness that the common sense of the Massachusetts house balked this programme.

The decision of President Roosevelt and his advisers that the tariff shall not be changed rallies all the solid, conservative business forces of the country to the support of the national administration. Merchants, manufacturers, bankers, are satisfied with things as they are. They have no yearning to embark with new experiments. They know by the experience of 1892-97 the terrible cost of a political campaign against the American system of protection, to which the trade and industry of the United States have adjusted themselves as they have to the gold standard of currency.

Every newspaper that now advocates a smashing of the tariff, every politician that insists on the reopening of this difficult and dangerous question, makes itself or himself at once the foe of every prosperous business man in the community. The Democracy in congress has assailed the army. It has found that that did not "pay" and is now abandoning it, but with that perfect genius for blundering which has distinguished this once great and strong American party ever since it identified itself with the cause of slavery sixty years ago the Democracy, through its infatuated Washington leadership, turns from attacking the honor of the American soldier to attacking the solvency of the American business man.

A campaign for free trade this year will complete the mischief which the free silver folly began and drive the last merchants, manufacturers and bankers out of the Democratic organization. There are few, very few, of these men now in the northern states who call themselves Democrats or even infrequently vote the Democratic ticket. In the south, where the habit of years is stronger, many men of business still cling to the Democracy, but in personal conviction they are not free silver men; they are gold men. They are not free traders; they are protectionists.

In other words, they are all, save in mere habit, Republicans. They want no tariff smashing. They are prosperous; they desire to remain so. An anti-tariff campaign by the Democracy will drive these men over to the Republican party by the hundreds and thousands, and it will do this all the more readily and more surely because, thanks to the "grandfather clause" and other ingenious devices of southern Democratic politicians, all fear of "negro domination" in the southern states has now become a harmless bugaboo.—Boston Journal.
