George Robbins of near Sonestown
met with a terrible accident on Mon-
day of this week which cost him
the loss of a foot. He was at work
in the woods with an ax when in
some manner it caught in some near
by brush and caused it to strike his
foot with such force as to almost
sever it from the limb. Dr. Voor-
hes of Sonestown, was hastily sum-
moned and on arriving at Mr. Rob-
bins' home found that the foot could
not be saved. He at once dispatch-
ed for Dr. Randall of Laporte, who
answered the call, and the two phy-
sicians amputated the injured mem-
ber Monday forenoon. The unfor-
tunate young man is the oldest son
of William Robbins, overseer of
Davidson township, and is about 28
years of age and married.

It is hinted at the dairy and food
department that there will be some
surprises in store for the liquor and
beer sellers all over the state. A
singular fact in connection with this
analysis of liquor and malt bever-
ages is that samples of porter pur-
chased from stock that have been
recommended by physicians as ton-
ics, and have been sold as medicines
have been found to contain salicylic
acid, which is a violation of the law.
The analyses have not been com-
pleted and will not be made public
for some weeks.

An old man who had never used
the instrument would not believe
that he could hear his wife talk a
distance of five miles by telephone.
His wife was in a country store sev-
eral miles away, where there was a
telephone, and the skeptic was in a
place where there was a similar
instrument, and on being told how
to operate it, he walked boldly up
and shouted "Hello, Sarah!" At that
instant lightning struck the tele-
phone wire and knocked the man
down, and as he scrambled to his
feet, he excitedly exclaimed. "By
jing, that's her."

Did any of our Laporte people
who were visitors at the Blooms-
burg fair, eat any of these sausages?
The Bloomsburg Sentinel says: "One
of the Fair grafters, who had hard
luck at Milton and came here, tells
the following story: 'I had a graft
selling hot frankfurters, and I laid
in a big supply for Milton Fair, but
the rainy weather was against me.
After three days of dampness and
no business my sausages began to
grow mouldy whiskers. I shaved
the whiskers off and gave them
another boiling. Still the rain con-
tinued and there were no customers.
A second crop of whiskers began to
sprout and this time there were
spots that might seem to indicate in-
cipient small pox. Again I shaved
them and then they began to devel-
ope symptoms of gangrene. On
coming to the Bloomsburg Fair
another boiling helped them some-
what and aided them to get on their
feet again, when we had a good,
clear day. Just as a test I tried one
of the sausages on the fat man in
the side show, and shortly afterward
he lost weight to the extent of ten
pounds; but I managed to get rid
of my stock during the course of the
day."

The cold wave so much dreaded
by most people, is really a blessing
in disguise. According to a medi-
cal journal, it charges the atmos-
phere with fresh oxygen and a sur-
plus of fresh electricity, which pro-
duces a most exhilarating effect upon
mankind. Torpid energies are
aroused, physical vigor resistance
are increased by the advent of a cold
wave to such an extent that any in-
cidental damage is more than made
up for.

The American climate has always
been recognized as a strong factor in
causing the aggressiveness and en-
terprise which have lifted our peo-
ple into the front rank among
nations and made us commer-
cially supreme. The cold wave
with its result of increased energies
and vigor, is a meteorological phe-
nomenon peculiar to this country.
The chief of the weather bureau at
Washington explains the origin of a
cold wave.

"It appears that with a high pres-
sure system rotating with great ve-
locity, large volumes of cold air are
drawn down from above the clouds
so that the cold wave is "home-
made," being simply a product of
motion. The system of motion or-
iginates in the northwest, but the
cold air comes from above the clouds.
The cold wave is not only useful for
its beneficial effect upon the human
system, but as a cleansing and puri-
fying agency. It dissipates the
deadly carbonic acid gas, the product
of respiration and combustion and
the foul effluvia of decaying matter
increasing atmospheric stagnation
and thereby relieving stagnation.

It may not be generally known
that a law was passed last winter
which compels all tax collectors
under a penalty of \$200 to col-
lect and settle their tax duplicates
on or before the 1st day of May fol-
lowing the tax levy. For instance,
the tax for 1903 must be settled by
May next and the 1902 tax is past
due.
