

# Nails

Had Turned Blue—  
Limbs Bloated.

Lay in a Stupor From  
Heart Disease.

Dr. Miles' Heart Cure  
Cured Me.

The nails turning blue is a sign of defective circulation as is the bloating of the arms and legs. Other common symptoms of heart disease are shortness of breath from slight exertion, pain in or near heart, smothering spells, palpitation or fluttering, weak, tired and hungry spells, dreaming and nightmare, sudden starting in sleep. In severe cases the brain, stomach, lungs, etc., may become so disordered as to mislead the physicians as to the nature of the disease. If you suffer from any or all of these symptoms your heart is diseased and treatment should not be postponed a single day. Dr. Miles' Heart Cure is guaranteed to help you as it has helped thousands of others.

"I owe my life to Dr. Miles' Heart Cure. After four doctors met in consultation on my case, their verdict was that I had suffered from heart disease so long that they could do nothing for me and I would surely die. My brother said, 'While there is life there is hope, we will try Dr. Miles' Heart Cure.' When I began taking it my nails had turned blue and my arms and legs were bloated to twice their natural size, and I lay in a stupor most of the time. After the first few doses the dizziness went away and after three bottles I was able to go around the house and do my work. Both my family and my nurse think I would have been in my grave had it not been for Dr. Miles' Heart Cure."—Mrs. ROBERT MORRIS, Sackets Harbor, N. Y.

All druggists sell and guarantee first bottle Dr. Miles' Remedies. Send for free book on Nervous and Heart Diseases. Address Dr. Miles Medical Co., Elkhart, Ind.

England, with her 300 years of protection, had become the workshop of the world, and, having induced us, or at least the slave power of the south, which was then in control of the government, to change from protection to free trade, England, we repeat, who was making our goods for us, was laughing in her sleeve at our position commercially and financially. Today the situation is entirely reversed. We are selling more goods than is Great Britain, we are making three times the iron and steel, while fifty years ago she was making about half of that we used. But the comparison between the United States and Great Britain is no longer a fair one. The only proper comparison to make with the United States of America in this year of our Lord 1903, after six years of the wisest protective tariff law ever enacted, is to compare our country with the rest of the world combined, and in that comparison we shall strike a most enviable level and find that in most cases we excel all the rest of the world outside of ourselves put together. It needs no political economy, it needs no theorizing, to learn this lesson of comparisons and to reach a conclusion in accordance with common sense and a practical gathering together and comparison of the facts. Fifty years ago, under free trade, in spite of every favorable condition that could possibly be combined together, we were simply starving—starving as a nation or getting ready to starve; starving as an industrial people or on the verge of starving; starving as an agricultural people, with our barns full of produce that we could not sell; starving as individuals, because we had not the money with which to buy or the work with which to get the money. That was the picture of fifty years ago, and here it is today:

Under a protective tariff and relying entirely upon our own resources we are making to a great extent all that we consume. We are employing ourselves at a high rate of compensation, maintaining a home market for our own productions greater than all the markets of the world, and we are living better, eating more, wearing better clothes, are better housed, better educated, with greater enjoyments, with more luxuries and with a standard of living never before approached by any people on the face of the earth. Such was the "prosperity" of free trade in 1853; such is the prosperity of protection in 1903.

## What is Scott's Emulsion?

It is a strengthening food and tonic, remarkable in its flesh-forming properties. It contains Cod-liver Oil emulsified or partially digested, combined with the well-known and highly prized Hypophosphites of Lime and Soda, so that their potency is materially increased.

## What Will It Do?

It will arrest loss of flesh and restore to a normal condition the infant, the child and the adult. It will enrich the blood of the anemic; will stop the cough, heal the irritation of the throat and lungs, and cure incipient consumption. We make this statement because the experience of twenty-five years has proven it in tens of thousands of cases. Be sure you get SCOTT'S Emulsion. 50c and \$1.00, all druggists. SCOTT & BOWNE, Chemists, New York.

## THE GRANGE

Conducted by J. W. DARROW,  
Press Correspondent New York State  
Grange

### BROADENING THE FIELD.

Some Suggestions by the Hon. George T. Powell on New Lines of Work.  
(Special Correspondence.)

The inception and organization of the grange came through a recognition of the needs of the agricultural class of our country at a time when its interests were very seriously depressed. At the close of the civil war farms were generally heavily mortgaged, and farmers were staggering under the burden of debt.

The work of the grange was to bring farmers together in an organized capacity, to consider the vital problems involved in their business and to devise means by which their burdens might be lifted and agricultural life made as it should be, prosperous, attractive and joyous. The grange has accomplished vast results in this direction.

The good it has done cannot be measured, but new problems are constantly arising, and it is the present and future that have to be considered now and not the past.

While there is a better degree of prosperity at present in agriculture than for many years past, it is not as general as it ought to be. In sections where specialties in farming are followed, which call for a higher degree of knowledge and intelligence, there has been a marked advance in prosperity, but there is a large number of farmers at present in different sections of our country who are struggling with adverse conditions and are little better off than were those at the close of the civil war. The evidence of this is found in the vast tracts of farming land that are offered for sale at prices ranging from \$10 to \$20 per acre in all of our eastern states. Upon land so offered for sale there is a ruinous decadence going on, farm buildings are running down, fences are past repair, farm tenant houses are empty and decaying, roads are not worked, and the rural schoolhouses are in many instances without teachers or children.

The grange needs to transfer its work more actively to these sections, to gather together the scattered and discouraged farmers and what is left of their families. A campaign of real education must be begun; the entire forces of the community must be enlisted, the industrial, the educational and religious, for with these dead or inactive no progress is possible in a community, but with them aroused and active growth will be experienced even with the most adverse surroundings.

The first important work, then, is to carry grange work into the scattered territory, for first of all some form of organization is necessary for systematic work. Then some clearly defined work for the upbuilding of the town should be begun, and the first in importance is its educational interests. The public school can do much, but it must be a live one, and it should contribute more than has been done to the real life and interests of the town. Schools should be a more potent factor in a community and do more for it than teaching in a perfunctory manner the English branches. The grange can with great profit study the needs of the community and then aid in putting the school upon such a working basis as to contribute largely to them. This will naturally lead to the improvement of roads, for the isolated rural school is gone forever, and good roads are a necessity not only for the farmer, but for the daily transportation of his children to and from a strong central school. Road construction becomes a vital problem for the grange to study and work out. Then follow the many questions of the improvement of the farm, the soil, stock, of markets, taxation and of great importance official representation in local as in state and national legislation. The grange should be more definite in its object and more direct in its work, and every new grange organized upon this basis will in time revolutionize any community in which its work is vigorously and intelligently conducted.

Farmers are overwhelmed by many present day problems which are rapidly pressing upon them faster than they are educated to meet them. The grange can do greater service by clearly defining the lines of educational work to be taken up and directing well organized effort toward these ends in all newly organized territory.

The prosperity that is experienced in communities where the grange has done its most progressive work is the evidence of its value and of its possibilities in new territory.

Highland grange, in California, has established a summer school of economics and husbandry for the benefit of all interested in the problems of rural life, which is meeting with great success and proving of real benefit to the farmers of that community.

Grange day at the New York state fair was a marked success. Hon. C. J. Bell, master of Vermont state grange, and Master Brigham made the speeches. State Secretary Giles presided.

Increased numbers means increased power and increased responsibility.

HON. GEORGE T. POWELL.

## MAGAZINE CLUBBING OFFERS

FOR THE SEASON OF 1902-03

THE management of this paper is pleased to announce that it has arranged a series of combination offers, including a large number of the leading periodicals of the day, that will afford its friends their choice of newspapers and magazines at

THE BEST COMBINATION PRICES THAT CAN POSSIBLY BE MADE THIS SEASON.

The prices named are for one year's subscriptions, and in each instance include this paper paid in advance for one year. Subscriptions may be new or renewal except for papers followed by "n" which means new only. Periodicals may be sent to different addresses. Cash must invariably accompany each order.

CLASS A.		CLASS B.		CLASS C.		CLASS D.		CLASS E.	
\$4.00 Art Amateur (n)	This Paper and Any	\$3.00 The Horseman (n)	This Paper and Any	\$3.00 Book Lover (n)	This Paper and Any	This Paper and Any	\$2.00 Breeder's Gazette	This Paper and Any	\$1.00 American Boy

Three - 6.00		10.00 Sandow's Physical Culture Course	
This Paper with SUCCESS and any one of Class A publishers' cost from \$3.00 to \$7 for \$3.50.			

For the lowest combination rates on any Domestic or Foreign Periodical published mention this paper and address The Progress Agency, Waukegan, N. Y.

The NEWS ITEM IS 75c a Year.  
Only 50c If Paid in ADVANCE.

## FAIRBANKS GAS or GASOLINE ENGINES.

There are many Gas and Gasoline Engines and ONE

## "FAIRBANKS"

Some resemble it in construction, others in name BUT THERE IS ONLY ONE

## FAIRBANKS ENGINE.

Engines that excel in quality and moderate in cost. Vertical from one to ten horse power. Horizontal three horse power up.

THE FAIRBANKS COMPANY, 701 Arch St., Philadelphia. CHARLES L. WING, Agent, Laporte.

## GRADUAL DECLINE

This is the fate of sufferers from Kidney trouble, as the disease is so insidious that often people have serious Kidney trouble without knowing the real cause of their illness, as diseased kidneys allow the impurities to stay in the system and attack the other organs. This accounts for the many different symptoms of Kidney Disease.

You begin to feel better at once when taking

## FOLEY'S KIDNEY CURE

as it stimulates the heart, increases the circulation and invigorates the whole system. It strengthens the urinary organs and gives you new life and vigor.

TWO SIZES 50c and \$1.00

JAMES FARLANE, Laporte, Dr. CHAS. D. VOORHEES, Sonestown, Pa.

## Short Talks on Advertising

By Charles Austin Bates.

No. 24.

There is a theory that advertising pays. There are facts which prove the theory true.

All men who advertise are not successful, but with rare exceptions, all successful men have been advertisers.

Advertising is the greatest of all modern engines for facilitating business. Beside it, the telegraph, the telephone, the locomotive and steamboat are dwarfed. If it were not for advertising, these would not be used. Business would not be of sufficient volume to justify their employment.

The man in Chicago advertises, and the man in St. Paul buys—by telegraph, perhaps—and has his purchase delivered by the locomotive. But the advertising came first. It always does.

It conveys information, and an invitation to buy at the same time.

An advertisement in the best paper in town places this information before thousands of buyers, either present or prospective. Count the cost of a suitable advertisement against the possible number of those who will need some special thing on any day. The chances will always be found on the side of the profitability of the advertisement.

Nine times in ten a good ad will bring more than enough in direct profit to pay for itself, leaving its great cumulative value clear gain.

Half the time a good ad will pay an actual direct profit, but to do this, it must be carefully tended. Treat the newspaper fairly and it will pay every time.

Copyright, Charles Austin Bates, New York.

"Advertising is the greatest of all modern engines. Beside it, the telegraph, the telephone, the locomotive and the steamboat are dwarfed."

Chicago man advertises and the man in St. Paul buys—by telegraph.
