EARLY USE OF SERUM URGED

Dr. Dixon Points Out the Increased Benefit of Using Antitoxin As Soon As Possible After the Onset of the Disease - Use Liberally For Immunizing.

The free distribution of Diphtheria Antitoxin inaugurated by Dr. Samuel G. Dixon, Commissioner of the new State Department of Health, is already showing a splendid saving of precious lives. Out of the total number of cases reported to the Department of Health in January in which the free Antitoxin was administered there were so few deaths as to bring the death rate down to 8.8 per cent. This was a reduction of over 5 per cent. from the December agures. This low death rate as shown by the January records means that instead of about 42 lives being lost out of every hundred cases of Diphtheria, as would be found where Antitoxin is not used, the disease was able to claim only about nine victims. It means that instead of 420 deaths out of every 1000 cases of Diphtheria, the death rate is brought down by the free distribution of Antitoxin to 88.

Health Commissioner Dixon feels confident that as the custom of free distribution of Antitoxin becomes more thoroughly established and the physicians of the State use the serum more promptly after the onset of the disease and in more liberal doses, the death rate will go far lower.

From city, town and country village all over the big State of Pennsylvania the physicians are sending in their re-ports that tell the story of little children stricken down by Diphtheria, and then of the arrest of the dread disease by the administering of the wonderful prophylactic-Antitoxin. Dread disease it hardly need be called any longer. for the hand of death that was for-merly thought to have the little child surely in its grasp, the moment that Diphtheria was diagonsed, has now

lost its power.

At the time that the State Department of Health is supplying Antitoxin for curative purposes, it is also fur-nishing the serum for immunizing. When the family physician is called 1 02 into the humble home and reads upon the child's throat the signs that to his practiced eye mean Diphtheria, he knows also that the little brothers and dsters of the sick child have by this 11 38 time probably been exposed to the 13 45 disease and may be stricken down at any moment. No need for him to wait and see if any of these other children develop the symptoms of the disease He may immediately secure from the 56 22 State's free distributing depots suffi-16 15 cient Antitoxin to immunize every one 22 26 of the little ones, and the older members of the household, too, who have been exposed to the infection.

It is now the aim of the Health Com-missioner to impress upon the physicians of the State the great importance of administering the Antitoxin in curative doses as soon as possible afimmunizing doses as soon as it is known that other children of the household have been in any way ex-28 34 11 38 of this early use is shown very clearly in the clinical reports that the State 18 55 Department of Health receives in cases where the free Antitoxin has 42 73 cases where the free Antitoxin has 30 64 been used. The January records show 19 16 in more than one case that if the Antitoxin had been administered earlier. 41 51 and in some cases more liberally, a life might have been saved

Dr. Dixon greatly appreciates the cooperation he is getting from his fellow 30 43 physicians throughout the state in se-20 62 curing to the people the full benefits 32 57 of the free distribution of Diphtheria 45 08 Antitoxin. On their part the physicians 43 03 are daily telling of the benefits experi-

enced by them in their practices.

Dr. S. F. McDonald, of Lawrence county, writes to the commissioner.
"I am enclosing clinical report of the household of diphtheria treated with nousehold of diphtheria treated with the department Antitoxin. The results were very gratifying. I feel that the furnishing of such for the poor is a boon to scientific medicine, a great aid to the physicians of the state, and a

very much needed charity to the poor."
"It was a matter of life or death with his patients," writes Distributor Houck, of Shenandoah, in telling of the rush of a physician to his depot for the purpose of securing a package of State's Antitoxin.

"I am sure the Antitoxin has saved the life of the patient," writes Dr. N. Ziegenfuss, of South Bethlehem, on the bottom of one of his clinical reports regularly by the commissioner.
