Remember the place and date. Sale continues until the 10 of August.

Jacob M. Whinton, MUNCY VALLEY, PA.

NEW JERSEY ENTERPRISE.

An Experiment Station for South New Jersey Contemplated.

Cumberland county (N. J.) Pomona, No. 4, at a recent session appointed a committee from each grange to take preliminary steps toward the establishment of an experiment station in south Jersey, as the soil and climate of the location of the present experiment station in New Brunswick are so different from that part of the state that many of the experiments are not now satisfactory. This committee met recently by special invitation of Professor E. R. Johnstone, principal and superintendent at the Training School for the Feeble Minded in Vineland, and organized the Pomona experiment committee, with Walton E. Davis, Shiloh, chairman and George A. Mitchell, Vineland, secretary. They visited and examined the experimental work being done at this model farm and dairy by Professor Johnstone and his able assistant superintendents; also visited the laundry, cannery, workshops and other places of interest at this wonderful "home." Special experimental work was assigned to each member of the committee, which, with work to be done by members of their respective granges, is to be reported at a future meeting.

National Secretary's Report.

National Secretary Freeman's report for the quarter ending Sept. 30 makes a very creditable showing of grange growth in all parts of the country. Maine adds 14 and California 8 to the number of subordinate granges, and each puts a dormant grange again in line. Michigan leads the procession with 47 new granges and 5 reorganized. Ohio and Maryland each add 22, and West Virginia reorganizes 11. New York gains 16 granges and Pennsylvania 17. New granges in Oregon, Washington, Colorado, Kentucky and South Carolina indicate that grange territory is extending and will soon include every state in the Union.

Topics For Discussion.

What can be done by farmers of this locality to develop the resources of their farms in the most profitable manner? What can the national grange do in addition to what it is now doing to advance the interests of the American farmers? What can be done to increase the attractions of the farm home to make it the brightest and happiest spot on earth? To what extent should the national grange urge the interests of agriculture before the national congress?

Pennsylvania Granges Oppose Oleo

Some of the granges in Pennsylvania are taking up the question of the use of oleo by the government and are protesting against the same. Carpenter grange, No. 454, of Lycoming county has sent a strong resolution to the president and to the state senators protesting against the use of this counterfeit butter at the League Island navy yard. It condemns the use of sale of oleo by or to the government, and calls upon all in authority to maintain an unyielding warfare against the nefarious traffic.

In Special Session.

Special state grange sessions of the New York state grange were held in Newburg and Poughkeepsie in October. At the former place eighty-three candidates were given the sixth degree and at the latter eighty-one. These degrees were conferred in preparation for the taking of the seventh at the national grange. Pennsylvania and New Jersey have also conferred the sixth degree on a large class for the same purpose.

A Worthy Patron.

Hon. S. Fred Nixon, whose death occurred recently and who was speaker of the New York state assembly for several years, was a member of Westfield grange, No. 109, of Cattaraugus county and was universally esteemed by all who knew him.

Bad Road Building.

A road engineer puts it this way: "There ought to be a law to stop fools building highways. This idea that the outer edge of a highway—sod, dirt and stone, all—should be thrown into the center of the road ought to entitle the people who do it to ninety days in jail."

NO LIFE, NO AMBITION, NO ENERGY.

These are common expressions nowadays and the finger post that point with unflinching accuracy to a nervous system robbed of its vitality by over-exertion, overstrain or excess of some kind. That anyone should allow this condition to go on to complete mental, physical or sexual ruin as it surely must if neglected, is a positive crime when the cure is at hand in Dr. A. W. Chase's Nerve Pills—a medicine designed expressly for this condition—a medicine that cures to stay cured by reapplying the very essential of life—Nerve Force.

Mrs. W. C. Masteller of 220 E. 5th St., Bloomsburg, Pa., says:—

"I was feeling very nervous and very much run down last winter when I saw Dr. A. W. Chase's Nerve Pills recommended for such a condition. I got a box and tried them. They have done me a world of good, toned up and strengthened my system generally, made my nerves strong and steady and give me a feeling of life and vigor. The medicine is a good purgator and re-builder and I can recommend it highly to anyone needing a nerve and general tonic." 50c a box at dealers or Dr. A. W. Chase Medicine Co., Buffalo, N. Y. See that portrait and signature of A. W. Chase M. D. are at every package.

The Oppenheimer Treatment

A Factor in Life Insurance

It is well known that a considerable proportion of the applications for life insurance are rejected on account of physical conditions of the applicants, due in a great measure to the presence of albumen or sugar in the urine. A condition indicating or threatening Bright's disease is shown by the presence of albumen and is fatal to the chances of being accepted. A condition indicating or threatening diabetes is manifested by the appearance of sugar. Examining physicians of life insurance companies always seek minutely for symptoms of these diseases, and if the slightest indications are discovered that they exist the applicant is summarily rejected, the risk being recognized as too great.

In cases where the use of alcoholic stimulants has contributed to these conditions it has been found that they are amenable to proper treatment, and permanent relief can be secured by the taking of a course of the Oppenheimer Treatment for alcoholism. In fact, it can be safely stated that 96 per cent of such cases thus treated are restored to normal health. Not only have patients been relieved of these infirmities, but in numerous instances where applicants have been refused by life insurance companies they renewed their applications and after passing a thorough examination were accepted as satisfactory and good risks.

A recent case is that of a man who was anxious to insure for over \$150,000. He had been a good liver and was rejected by several companies on account of albumen. By advice of his physician he took the Oppenheimer Treatment for alcoholism. In a few days the albumen entirely disappeared and his normal health returned in a short time. He again applied for insurance, and on account of the importance of the case was repeatedly examined by several physicians and found to be entirely cured of his trouble. Since then he has been accepted for all the insurance he desired to carry.

The Oppenheimer Treatment for alcoholism is of such a character that several of the large insurance companies accept as good risks men who have taken the Oppenheimer Treatment while rejecting the graduates of other institutions treating alcoholism.

The Oppenheimer Institute of New York has published a report of a special investigation on this subject which will be sent free upon request.

National Master Bachelor is the busiest man in nineteen states or perhaps twenty.

Reducing Width of Highway.

The sentiment in favor of the reduction of the width of highways from sixty to forty feet appears to be becoming quite general. Petitions from landowners in the different states, we learn, are being made to the highway commissioners to this effect. The claim made is that too much land is allowed to grow up to weeds by having the road so wide, as the extra ten feet could be well utilized if taken into the farm. It is claimed also that by narrowing the legal width of highways a better road can be built and more easily kept in good condition.

What does the certificate show? That I was 13.

How do they get thirteen on the certificate when you are not twelve? Father swore I was thirteen, of course.

Mr. Darrow—Mr. Burns, would you just as soon tell the commission how many silk mills there are and how many other mills employ girls?

Mr. Burns—They are scattered all around.

Mr. D.—All these mills employ such girls.

Mr. B.—Certainly.

Mr. D.—Nothing but girls?

Mr. B.—No.

Mr. D.—Are there any mills besides silk mills?

Mr. B.—Yes, button factories and various other things.

The Chairman—Is there any law in this state, gentlemen, about night labor for children?

No answer.

FAIRBANKS

GAS or GASOLINE ENGINES.

There are many Gas and Gasoline Engines and ONE

"FAIRBANKS"

Some resemble it in construction, others in name BUT THERE IS ONLY ONE

FAIRBANKS ENGINE.

Engines that excel in quality and moderate in cost. Vertical from one to ten horse power. Horizontal three horse power up.

THE FAIRBANKS COMPANY, 701 Arch St., Philadelphia. CHARLES L. WING, Agent, Laporte.

To the People:

Rich's Famous All Wool Sock has fallen into competition with a very inferior article. The imitation is so perfect that only an expert is able to detect the counterfeit with its cotton and shoddy mixtures, until the sock is put into service. Unscrupulous competitors are representing the sock as Rich's All Wool, thus deceiving the customer and injuring our reputation.

To protect ourselves and the trade, in the future Rich's Socks will bear a Red Seal Trade Mark printed in White, a facsimile of which is shown above.

Respectfully,

John Rich & Bros. Woolrich, Pa.

Banking by Mail

is simply a matter of dropping a letter in the post office—Write for booklet telling how it is done.
