A Heart to Heart Talk With The Women and Girls of Pennsylvania.

Why a women's page? Must women be fed on a special and diluted diet? They do read as men read—and all that men read—and add the women's page to it.

Rightly conducted, it is the earnest journalistic attempt to instruct more than to amuse; well edited, it steers clear of the encyclopaedia and the bonfire.

It should be all that a well rounded, interesting, helpful woman is—ready to put out a strong guiding hand whenever it is needed.

It must take itself seriously. It must be honest. It must reflect what really is, and suggest from experience what might be.

A great class turns to the woman's page for council, for advice, for suggestion. The ready made conventions of one set of people would be a misfit on another set, so why tell a woman who has to cook and wash for a husband and six children how to instruct a footman to receive the cards of a caller.

A woman's page should be all things to all women.

No woman's page deserves success that does not give to its least reader a respectful hearing and the best advice in its scope. It must be kind. It must inspire confidence.

It must enter into all the home duties of the housewife with zest and enthusiasm. It must hold the affectionate friendship of its women readers.

All these things the woman's page of 'THE PHILADELPHIA DAILY PRESS' is and does—it is beyond doubt the most practical and truly helpful woman's page ever offered Pennsylvania woman. You cannot afford to miss even one day.

A STRONG PLEA.

National Master Bachelor Before Ways and Means Committee.
A strong plea for denaturalized alcohol was made by National Master Bachelor at Washington before the ways and means committee recently. He gave a number of reasons why Patrons of Husbandry, with a membership of 800,000, representing the organized farmers of the entire country, are actively urging upon congress the enactment of legislation providing for the use, free of tax, of domestic alcohol, which has been rendered unfit for internal use by the mixture of some noxious substance. The great importance to agricultural interests of the proposed legislation rises from two comparatively recent discoveries—first, the invention of a method to use alcohol in connection with the incandescent mantle for lighting purposes, and second, the perfection of the internal combustion engine and its general adoption as a motive power for motor vehicles, farm engines, etc.

Authorities state that a little more than two and a half gallons of 90 per cent alcohol, the strength which has been found most suitable for lighting and motor fuel purposes, can be produced from each bushel of corn. This estimate is confirmed by the report of the commissioner of internal revenue, showing the quantity of distilled spirits produced from corn, barley, rye, etc. With corn costing the distiller 35 cents a bushel the cost of alcohol would be 14 cents a gallon, and at 40 cents a bushel alcohol would cost 16 cents a gallon. It is estimated that the value of the byproducts of the corn after the alcohol is extracted is about sufficient to pay the cost of distillation. Co-operative distilleries for the sole purpose of producing denaturalized industrial alcohol could be established by the farmers and by this means create a greater outlet for such commodities as corn, potatoes, sorghum, etc. In this way the cost to the farmers of this material for lighting, heating, cooking and motor fuel purposes could be kept at the least possible point.

Closing his address, National Master Bachelor stated that the farming interests of the country heartily and earnestly favor legislation which will give them this material for lighting, heating, cooking and for motor fuel, this to be distilled from the products of their farms, which will give them larger additional markets for surplus farm products and which will promote manufacturing interests and increase domestic and export trade.
