THE REPORT SYSTEM.

Enables State Lecturer to Locate Weak Spots and Render Aid.

New Hampshire, Massachusetts and this year New York are conducting a system of quarterly reports from sub-ordinate grange lecturers to the state lecture relative to the work of the lecture hour. The total is little less than amazing. Take the New Hampshire report, for instance, which is for nine months only, ending Oct. 1, 1906. During the nine months there were given in recture granges of the state the en in various granges of the state the

grammes, 134,784.

Three questions were assigned for simultaneous discussion. In February 217 granges considered the teaching of nature studies in our common schools and 863 persons spoke upon this sub-ject before 5,421 people. In May the question whether the state should pay for the damage done by game animals protected by law was raised. Nine hundred and two speakers addressed 4,929 people on this matter.

Co-operation in New Jersey. We shall have to look to New Jersey to find grange co-operation in purchas-ing farm supplies most generally prac-ticed. Here are a few figures showing ticed. Here are a few figures showing the value of such purchases for twelve months in several granges: Vineland, \$48,000; Friesburg, \$3,200; Somerset, \$5,000; Medford, \$7,000 or \$8,000; Hope, \$2,760; Morristown, \$43,000; Riverside, \$14,335; Columbus, \$4,500; Mullica Hill, \$7,000; Ploneer, \$3,500; Mercer, \$6,000. While financial benefits accompany from grange membersing. fits accruing from grange membership are perfectly legitimate, yet it is not grange practice to emphasize these benefits or hold them out as inducements to prospective members.

W. H. Vary of Watertown, N. Y., president of the Central Organization of Co-operative Fire Insurance in that state and which is largely composed of grange fire insurance associations reports for the year 1906 123 compa nies carrying 251.217 policies and risks of \$367,274,418. Losses last year amounted to \$799.690; expenses, \$182,-468. The average cost of insuring \$1,000 of risk was \$2.67 for this year.

It's the canny old bird that cannot be caught with the bird lime of litigation.

You've probably heard of Lawyer Hackett of Somerset. A little while ago he purchased some land over which there had been a lawsuit for years, until the parties had spent half a dozen times what the land was worth. Hackett knew all about it. Some of the people wondered why he wanted to get hold of property with such an incubus of uncertainty on it. Others thought that perhaps he wanted some legal knitting work and would pitch in redhot to fight that line fence question on his own hook.

That's what the owner of the adjoining land thought, says the Baltimore Herald. So he braced himself for trouble when he saw Hackett coming across the fields one day.

Said Hackett: "Where's your claim here, anyway, as to this fence?"

"I insist," replied the neighbor, "that your fence is over my land two feet at one end and one foot at least at the other end."

"Well," replied Hackett, "you go ahead just as quick as you can and set your fence over. At the end where you say that I encroach on you, two feet, at the other end push it onto my land two feet. At the other end push it onto my land two feet.

"But," persisted the neighbor, "that's

set the fence onto my land-four feet. At the other end push it onto my land two feet."

"But," persisted the neighbor, "that's twice what I claim."

"I don't care about that," said Hackett. "There's been fight enough over this land. I want you to take enough so you are perfectly satisfied you have got your rights, and then we can get along all pleasantly. Go ahead and help yourself."

The man paused, abashed. He had been ready to commence the old struggie tooth and nail. But this move of the new neighbor stunned him. Yet he wasn't to be outdone in generosity. He looked at Hackett.

"Squire," said he, "that fence ain't going to be moved an inch. I don't want the blamed old land. There warn't nothing to the fight but the principle of the thing."

Meteorological Cussedness.

Meteorological Cussedness.

At Westtown, Chester Coupty, Pa., the Friends' big school celebrated its one hundredth anniversary recently. They have at the school a kind of diary, or log, which has been kept up continuously for 100 years, and in which the state of the weather every day during all that time has been noted down. The log was consulted for an auspicious date in the matter of weather for the anniversary, and it showed that every June 10 has been clear since the beginning of the school's career. Then some said: "Since it hasn't rained for 100 years on June 10 we had better avoid that date, for it will be sure to rain then this year." But others said that reason and philosophy indicated June 10 to be a day devoted, from some unknown atmospheric causes, to sunshine and blue skies. The latter set of people carried the day, and the school celebrated its anniversary on June 10. But it rained so hard that the guests had to sit around in tents.

She Would Have Stopped It.

Some time ago the wife of an old inhabitant of a Durham, England, village died, leaving a grown-up family behind her. The father remained a widower about eighteen months; then he entered the matrimonial state again. The youngest daughter, aged about twenty, on the day of the wedding, went to the village butcher's.

After the usual courtesies, the butcher asked her: "Is it true yor fether got married agyen?"

"Aye, it's owar true!" said the girl. "Didn't ye want him te get married agyen?"

You don't intend to fret;
You'll never, never see the day

Let an EXPERT BUGGY MAKER Give you some INSIDE FACTS Mr. F. L. Shaw, manager

of our vehicle interests, bought

two buggies from the same house the other day. One cost \$18.00 more than the other. Then he took the buggies all apart to see just why one was higher priced than the other. Here is what he found out:

Both buggies had exactly the same seat and back, same size body, same wheels, shafts and everything else, except that the higher priced one had 14-oz. cloth trimmings instead of Keratol, found in the cheaper; a leather boot, instead of rubber; a better axle, and the finish on the woodwork was slightly better, but not very much.

Road the difference-and learn how easily price can be raised without changing the grade, in a buggy. SIDE BY SIDE:

Difference in Cost \$3.80. Difference in Price to You \$18.00.

What do they give for the \$18.00 difference in price? The actual difference in cost, to the buggy maker, did not exceed \$3.80, yet one buggy costs you \$18.00 more than the other.

Now, either the factory making and selling these buggies to the house Mr. Shaw bought from, was fooling the house, or the house was fooling you. In either case, you were paying \$18.00 for \$3.80 worth.

We tell you these things because we believe in a square

There isn't one purchaser of a buggy in a hundred-no, nor in a thousand-who can tell of his own knowledge the cause for the difference in prices between one buggy and another. We make our own buggies.

We are the only general merchandising concern in the world that does. The prices to you on our different buggies are based on the manufacturing costs.

We make the same small percentage of profit on a \$70.00 rig that we do on a \$40.00 outfit, and you get full value for every dollar you pay. The difference in our buggies is not merely in the price. It's

in the quality. If you are a judge of buggy values we ask you to compare our

vehicles with any make you know of, price for price.

If you are not an expert judge of buggy values, you are safe to order from us, for we give honest value for every dollar you spend. And we guarantee you satisfaction.

The thousands who have purchased vehicles of us write us of their perfect satisfacton and of \$10.00 to \$50.00 saved on each one WHAT OTHERS SAY
