Perusal of the Democratic platforn would lead the unsophisticated to believe that the country has been going to perdition and the Republican party had no other aim but the most selfish and mercenary one.

The platform condemns the new tariff bill as a measure that is an 'imposition' on the consumer. What has the Democratic party in sister, Mrs. W. J. Murelle, at Pennsylaani to say to the fact that numerous Democratic legislators in Washington helped to make the present bill what it is, contributed information and labor necessary in getting it into its present shape?

Undoubtedly it is the best measure of the kind ever constructed. It rerises downward in 80 per cent. of the articles. It advances the taxation on luxuries. It makes as fair a distribution of the tariff costs as can possibly be done and at the same time takes care of the consuming masses.

The truth is that no matter what Mrs. Frank Spargenburg and kind of a bill was constructed it would not please a Democratic convention. It would be inconsistent with the principles of that party to rise and bow acquiescently to the magnificent work of the Republican Congress. Criticism such as is made in the platform injects a little humor into the occasion.

Certain British writers contrive that neither Cook nor Peary discoved the North Pole. Why the West Believes In Building

Highways For Automobiles.

"The good roads movement in the east does not compare with that of the west," said Horace O. Gordon of the Oklahoma Good Roads association

While he was in New York on a visit.
"I think the work of the good roads advocates in the east has stirred up the public demand and desire for 'the best roads in the world' in the west, but I do not believe the eastern states are carrying out the work so thoroughly as the western states.

"We in the west appreciate the fact that the opening of the western country depends entirely upon its roads, and we are not going to build highways which will last merely a decade, the Dushore Review, has purchased the Canton Centinel and again torn up by automobiles.

"We are building roads which the motor cars cannot tear up. We feel that the automobile can do us more good than the horse, because we have to cover hundreds of miles where you

is on the decline, and then when the automobile comes along and tears it up to jump up and yell that the moto car is destroying our roads. The thing to do is to build roads for the automobile, and then the horse can use them as long as he lasts, which will not be a great while."
