

Has Some Friend Told You of Foods Shot from Guns?

Folks who eat Puffed Wheat and Puffed Rice are sorry for those who don't.

So they tell of these foods to others, and the others tell others. That's how the use is spread.

Please ask some housewife to tell you how her folks enjoy these foods.

Or try them yourself. One package of Puffed Wheat, at a cost of ten cents, will reveal a new delight.

Puffed Wheat—10c

Puffed Rice—15c

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

You will know, for the first time, how good cereals can be made.

You will see grains that are crisp and nut-like, puffed to eight times their natural size.

You will see grains made four times as porous as bread—ready to melt in the mouth.

You will see grains made digestible—with every starch granule exploded.

And you will see foods that children like better than any foods you know.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.

One package will tell you why people delight in them. Order it now.

Kansas Farmer Uses One While Dragging a Public Highway.

BETTER THAN A HORSE TEAM

Machine For Pulling the Drag Makes Faster Time—Reform the Motor Car Has Brought About In Improvement of Roads.

When the motor car first found its way to the Kansas farm it appeared a luxury. Soon it became a not uncommon pleasure and then a necessity. And a necessity it is today, especially in the Kansas wheat belt, where more cars are to be found on the farms than in any other part of the west.

Many farmers have them, and a majority of those who are not so fortunate have the motor car fever in a most violent form. The farmers confess that this fever can be checked only by a failure of the wheat and corn crop or by the desire of every farmer being gratified by having a car at his disposal.

The machines are now so thick on the Kansas prairies in some sections that one traveling over the rural roads

MOTOR CAR PULLING A ROAD DRAG.

will count at least two motor cars in every five vehicles passed in a day's drive.

There is probably not another machine found on the farm today that can be put to so many practical uses as the motor car. There are very few things to do on the farm except the tilling of the soil in which the car cannot be brought into practical use. It is valued by the farmer for its speed probably more than any other quality, as the farmer is learning more and more to value his time. Just as the man in the office or the factory.

To the north of Salina a dozen miles or so there is a public road which shows that it has been well taken care of. The effect of the King drag is to be seen for more than a mile along one farm, and it is not an uncommon sight on that road to see a farmer with his touring car splashing along at the rate of six to eight miles an hour with a large King drag following, attached to the machine with a chain. This farmer has used the drag for some time, but more frequently in the last few months than ever before. He prefers a car for the drag to a team of horses because he makes better time.

Sometimes it takes two men, one to run the car and the other to weight the drag. A heavy weight will answer the same purpose as the second man, but it is a custom for the farmers to work the roads together, and it comes naturally since the advent of the motor.

It is seldom that the farmer's car is seen at the garage. The farmer is so accustomed to making his own repairs that he naturally falls into the job with the car. He finds it just as easy as repairing his harrow, his cultivator or his bicycle. Perhaps he may have a slight difficulty with some of the electrical parts of the engine, but when he has seen it repaired once he never has the same difficulty again, at least not to such an extent that an expert has to see it.

Two Duels. Sante-Beuve got an excellent advertisement out of a duel fought on a wet day by insisting upon holding his umbrella up with one hand while he fired his pistol with the other. He was willing, he courageously said, to take the risk of being shot, but he must be excused from taking the greater risk of catching cold.

The duel which Benjamin Constant, who suffered from gout, fought sitting in a Bath chair may have been of somewhat similar character. Honor in that case was declared to be satisfied when the Bath chair was hit.—Strand

Dangerous. Father—What are you doing, Emma? Daughter—Oh, Arthur is coming tonight, and I'm cooking something for him. Father—Emma, Emma, you'd better be careful. You'll keep on cooking for him till he breaks the engagement.—Heitere Welt.

It takes a lot of courage on the part of a young man to tell a girl how pretty some other girl is.—St. Louis Globe-Democrat.

AVOID The INTERNAL WRONGS of ALUM

Alum in food causes stomach disorders—Its continued use means permanent injury to health.

Following the advice of medical scientists, England and France have passed laws prohibiting its use in bread making.

American housewives should protect their households against Alum's wrongs by always buying pure Grape Cream of Tartar Baking Powder.

Pure Grape Cream of Tartar Powder is to be had for the asking—

Buy by name—**Royal**

Say plainly **ROYAL BAKING POWDER**

THE GREATEST OF ALL MUSICAL INVENTIONS—THE TWO-HORN DUPLEX PHONOGRAPH

THREE DAYS' FREE TRIAL IN YOUR OWN HOME

The Duplex is the biggest, finest finished, loudest, clearest, sweetest-toned instrument ever put on the American Market. It is the only phonograph manufactured and sold DIRECT FROM FACTORY TO YOU on

EASY PAYMENTS

The Duplex is the only phonograph that gives you all the sound vibrations and gets all the volume of music. This is because of its double vibrating diaphragms in the sound box, and the two horns to amplify the sound waves. All other phonographs, with one-sided diaphragm and a single horn, get only half the music. The Duplex is like a perfectly formed athlete with both sides developed. Other phonographs are like the one-eyed, one-legged, one-lunged defectives sometimes seen—capable of doing something, it is true, but not the best. Don't allow anyone to persuade you to buy another make of phonograph until you have sent for and received our splendid

FREE CATALOGUE

which explains fully the superior qualities of the Duplex. We are the only Company actually manufacturing phonographs and selling direct from factory to user. All other concerns are either jobbers and dealers who do not manufacture what they sell, or are manufacturers who do not sell direct to the user, but market their output through jobbers and dealers. Hence, we can and do

THE SQUARE DEAL

and has consented to assist the readers of this paper in every way in placing their orders for the Duplex during the year this advertisement will run in the paper. When you write for catalogue, mention this paper and address exactly as below; and when you write ask for full particulars regarding our

Home Concert Collection

which we sell on Easy Payments. It consists of the Duplex Phonograph with all the latest improvements—our mechanical feed which relieves the record of all the destructive work of propelling the reproducer (sound box) and needle point across its surface; and our weight regulating device which is the greatest record ever ever invented. Both these are exclusive features of the Duplex and can not be had on any other phonograph. The Home

Concert Collection contains 16 of the best 10-inch records that money can buy, all specially selected to give a variety of music so that a dozen people of the most varied tastes can be given a two hours entertainment at your home and each will be sure to hear at least one of the selections that will give delight. The records contain the best vocal and instrumental pieces, instrumental and vocal solos, vocal duets and quartets, talking pieces, comic songs, operatic pieces, etc. We make the selection, because you know how to choose the best pieces. That's part of our business. We put in 800 assorted needles—four different kinds, capable of producing music soft and strong and low enough for the sick room, or loud and strong enough for a crowd of picknickers. We put in a bottle of oil, a first-class oil can, a can of Monarch grease, and a neat needle box. This collection is intended for you, without buying another cent's worth, 100 evenings of entertainment, and we give you six months to pay for it, a small payment down and six small monthly payments.

THREE DAYS' FREE TRIAL

You are not asked to buy the Duplex and Home Concert Collection "sight unseen" as we used to be. You may try it at your own residence, in which to decide whether you will keep it or send it back. If it does not fulfill your claim for it, after a careful test for three days, box it up and send back by freight at our expense—and we'll pay you advance money back. But (as we feel sure it will) if it pleases you, keep it and write us and say so; and thirty days later we'll send you your first monthly payment, or pay it over to the Editor of this paper, who is authorized to receive monthly payments and send them in. And each time you make a similar payment until all the installments are paid. This is the biggest snap in phonographs ever offered to the public. No harm in investigating it, at any rate. Write to the Editor of this paper; ask him to send in for a catalogue and terms for you, or write direct, mentioning this paper, to

DUPLEX PHONOGRAPH CO., 31 Rose St., Kalamazoo, Mich.

NOTE:—The undersigned has made careful investigation and finds that the Duplex Phonograph Company give their customers fair and honorable treatment, and advises readers of this paper to send for catalogue at further particulars. It costs nothing but a postage stamp or a postal card to try. If you do not wish to take the trouble to write, give me your name and address and I'll do the asking. And I'll see that you get a square deal. Always mention this paper when you write.

CHAS. L. WING, Editor.
