Experimenting With Trees.

E. J. Bird of this county, is experimenting with 1000 young catalpa trees which he is planting on his farm in Forks where the timber was recently removed. There are four species of the catalpa. They are natives of the West Indies, North America, Japan and China. They grow very rapidly. The wood is remarkably light of a greyish-white color, and fine in texture. It is capable of receiving a brilliant polish and when seasoned is very durable. It has been introduced into Europe and is cultivated in Germany, France and South England.

Cottage Given for Tuberculous Poor.

As an expression of her interest in the state's work for the tuberculous poor, Mrs. R. F. Jones, widow of the Pittsburgh steel manufacturer, has offered Health Commissioner Dixon her magnificent cottage and grounds at Cresson. It lies close by the tract of land given the Commonwealth by Andrew Carnegie for its Western Sanatorium for tuberculosis.

The cottage which is said to have originally cost about \$18,000, is large enough to accommodate at least 20 tuberculous patients and no time will be lost in getting it ready for such occupancy. As the cottage is in good repair this will not take long so that the benefits of the high altitude and healthy climate of Cresson will soon be enjoyed by a number of poor sufferers. In the meantime the Sanatorium buildings on the Carnegie tract will be rapidly pushed forward.

The lot on which the 2 1-2 story Jones' cottage stands is about 100 ft. front and 150 ft. deep. There are in all thirteen bed-rooms in the building, most of them large and comfortable, with big bay-windows into which the sun may pour its healing rays. Wide porches almost surround the cottage. Here the patients may sit in their rest chairs enjoying the pure mountain air and having a view of a surrounding county whose scenic beauty is unsurpassed.

Mrs. Jones' gift to the Commonwealth, like that of Mr. Carnegie, is particularly gratifying in that it shows the complete confidence that exists in the State's campaign against tuberculosis.

Apparently some people are going to make financial gain out of the comet. Such seems to be the intent of the clergyman who urges unmarried people to get married at once, because, so he says, the comet's tail is going to sweep everybody off the face of the earth some time in May. The strange thing about it is that many people believe him and are following his advice; which goes to show that not only is superstition not dead, but that some people seem to be afraid to go alone into the hereafter. But the thought occurs, has anyone a moral right, especially when the motive is selfish, to scare others out of their wits by alarmist prophecies about a harmless comet?

Importance of Proper Breathing.

Improper breathing is a frequent cause of consumption. A large majority of people are too lazy or too ignorant to breathe deep, and hence the lungs are developed only to part of their capacity and thus afford fertile field for the growth of the tuberculosis germ.

Short Talks On Advertising By Charles Austin Bates.

No. 51.

Every advertiser should keep close watch of his daily and weekly sales. He should make a schedule of last year's sales, by days, weeks and months, and enter against it each day's sales for this year, as they are ascertained.

If he sees on Tuesday that Monday's and Tuesday's sales are going to be less than last year's, he should put a good, strong ad in the Tuesday evening and Wednesday morning papers and keep up the treatment as long as it is needed. The same thing applies where only a weekly paper can be used. That is the rational way to advertise—the way to make it pay. Don't merely occupy your "space." Don't say that you will use three inches double for the year, but make up your mind to beat last year's business, if you have to use twenty inches double.

Business is as susceptible to good advertising as the human body is to good medicine. You don't say: "Now, I'll spend \$50 for doctors' bills and medicine this year, and no more"—not a bit of it. When you get sick you don't dicker with the doctor at all. You say: "Get me well as quickly as you can," and you take your medicine like a little man without inquiring the cost. It costs something, of course, but it cannot be helped. It doesn't do any good to grumble about it. The question is whether you want to get well or not. That's the way business and advertising should be considered. Don't understand that I mean to advocate unlimited and promiscuous advertising—I do not, any more than I would advise you to fill yourself up with a lot of medicine when you don't need it. Judicious advertising may mean two inches or two pages. It is bad to use too much space, but it is worse to use too little.

When you get sick you don't dicker with the doctor.

Don't understand that I mean to advocate unlimited and promiscuous advertising.
