## **Agricultural**

\* \*\*\*\*\*\*\*\*\*\*\*\* GRAIN FIELDS FOR PASTURE.

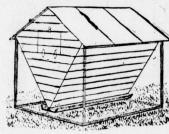

Too Close Grazing and Tramping of Ground Injures Future Yield.

Wheat and rye sown for grain should not be pastured by cattle or sheep, as the close grazing and the tramping of the ground will injure the future yield of both grain and straw. If the growth is rank, lambs and cows may be allowed on the field for a few days. When ground is dry, but close, pasturing must be avoided. The experience of practical farmers is against grazing or cutting either wheat or rye, however, rank may be

Rye, sown for early spring feed, no matter how great may be the growth in the fall, should not be pastured. The same holds true in regard to pas turing crimson clover and English rape. Timothy and red top meadows should not be pastured late in the fall and during the winter months.

### A Self-Feeder.

Here is a practical self-feeder to feed hominy meal. My father used one on his farm, with the desired re-sults, that is, to give plenty of feed to the stock, writes W. C. Wright.

A is the base upon which the feeder rests. (Should be raised on legs if you intend to feed cattle). B and C are the two troughs one on each side. D and E are the two openings from

which the grain flows.

Fill the box with feed and it will run out at the bottom until the two troughs are full, then the feed will stop, because it has the grain stacked up in the troughs until it has clogged

up the two openings. Of course the hopper can be made as big as wished, but the smaller it is made the handier it will be to move about. I think you will find this feedsimple to make as well as prompt

### Get Rid of Burdock.

in its action.

Any of the fields full of burdock? If this pest has a good start it will spread all over the farm by the end of another season. Easy to kill it. The burdock only lives a couple of years if frequently mowed off close to the ground, but the best way is to take an iron bar, drive it down deeply by the side of the root and pry the whole miserable thing out and burn it, root and branch. Every plant thus treated is dead and done for.

The bees should have plenty of water. They consume a great deal, and will travel a long distance to get it. Should there be no running stream or lake of pure water near, it is well to place a pail of fresh water near the apiary every day. Water is used by the bees to dilute the heavy, thickly left over from winter to mak it suitable for the young larvae and also to make the cell wax pliable.

## Improving Orchards.

The best yielding orchard is the one which receives the most intelligent care. By this is meant the most thorough cultivation and the most lib eral manuring. Apples do not grow without something to grow from. They need more in the way of fertility than they can draw from the sky or from the tired and worn out soil. If these the tired and worn out soil. elements are not supplied the trees resent it by withholding their harvest.

## Alfalfa's Value.

According to an experiment by the Kansas experiment station, an early cut alfalfa will produce more pork than will late cut alfalfa. A ton of the former fed with grain produced 868 pounds of pork, while the late cut alfalfa fed with an equal quantity of grain produced only 333 pounds, less than half as much.

The Chicago Live Stock World has set a new pace of much interest to breeders of draft horses, in guaranteeing exhibition stakes for premiums on yearling colts. It proposes to add a thousand dollars to the other sums offered for the best colts registered, of Percheron, Shire, Belgian and Clydesdale breeds.

## Put Markets in Touch.

Good roads will bring the country districts in touch with the markets at all seasons of the year and will give the railroads a year round business on which they can count with a reasonable degree of certainty.

Until frost comes be careful to look over the combs used for extracting, to forestall the ravages of the e-moth; the combs are safe after a good frost or two.

One pint of Silicate of Soda, or water glass dlluted with eight quarts of water, will preserve eggs perfectly for

## **How He Reformed Her**

"Don't you think it's most time we announced our engagement? "We are satisfied with each other—that is, I am satisfied with you—and so many have found it out already I think we might as well give

Constance dimpled her chin into half a smile. "What an idea!" she exclaimed. "Don't you know my good reason for keeping quiet?"

"Ye-es; but there's such a thing as carrying it too far. Just at present you are too popular."

Constance had been eating ice cream. Now she took the spoon out of her mouth, turned it over, and put it in again. "H'm!" she mused, "I can't very well help that."

"On the contrary, you can very well help it. You treat other men just the way you treat me. And I tell you frankly I don't like it."

Both of them were angry now; but fortunatelly her partner for the next dance appeared and Dick withdrew. The newcomer was long and narrow in build, and looked like an English-

"How did you know I was in the li-

brary?" she asked him.
"Because I have always felt you were of sterner stuff than you pretend.

were of sterner stuff than you pretend. I've been all the evening waiting for a chance to speak with you."

"Come, then," pouted the girl.

"We'd better go somewhere else; it's dark here, and naughty."

"You're the greatest riddle I've ever run across," he confided.

Constance stared on

Constance stared on.
"The dance is over," he observed.
Shall I take you back to your box?" "So you wish to be rid of me?"

"No; but I presumed you had this "Perhaps I have, and would rather

stay with you," she teased. "But don't let me detain you; you may want to get back to someone yourself."

The Englishman sat down again

'Do you like Dick Brindsley?" "Yes," she answered steadily. "Why

do you ask?"
"You're not with him so much as you used to be." "I like any number of men," she

evaded. "You're a flirt, in other words!"

"In other words." "Isn't that something to be asham-

"I never learned that it was."

"Then you ought to be taught."
"You're another of these men who want to teach me?"

"I should succeed, if I made the attempt.' "So-o? I dare you. Come to-mor-

The books glowered at each other

and the light blinked at the table. The alcove was empty.

Suddenly a man hurried in and dropped into a chair. His mutterings were interrupted by the reappearance of the Englishman.

"Are you engaged to Miss Doll?" he ventured. Dick swore, and asked how that concerned him.

"I am in love with her." The music sounded, accentuated by the tread of the dancers.

"Do you think it's right for you to keep your engagement a secret?" "Why not? It is her affair, and

"I think it is the world's affair.
Would it be just for married people
to go about as unmarried. Don't you
do it to enable her to attract more

"I don't like the way you put it," snorted Dick.

"No wonder. If women can entice men, men can turn about and entice them If she loves you, all right; and if she does not, then you're well rid of

Dick rose, and his chair toppled. "An engagement should be a more sacred thing than this," persisted the other. "If you do not announce it— then beware!"

Twenty hours passed. The clock on the mantel was sounding 9. A fire on the hearth was singing to itself. There

was no other light. "Depends on how strong he is," came a deep voice.

"Are you strong enough?" tinkled a girl's laugh. "Never mind," retorted the English-

man, crossing to the window. He lifted the shade and peered out. "What are you doing?" she ques-

tioned. "You'll know soon enough," he replied, going back beside her.
"I'm not an inquisitive girl, you

Lucky for me. Listen: Do you believe secret engagements right?"

'Do you?" she parried. "H'm! Well, I don't believe in engagements at all."

"Never expect to get married?" "Married first, engaged after.' Constance laughed nervously.

A little later a park policeman, who had been leaning on the handle bars of his bicycle, saw a man running toward an automobile which stood be-fore the house on the corner. The policeman saw him place a strange great bundle in the tonneau and spring to the wheel. There was the squeal of the spark-advance, the roar of the racing engine, the clack of the shift-lever and the crunch of the gears. The driver leaned forward, shifted to the high, threw in the clutch and was off at break-neck speed.—PERSIS WHITE.

A good many self-made men are

46 245

ashamed of it.

## PRESIDENT'S DAUGHTER.

Old Adage Still True.

"It's a fact," sighed the impover-ished horse dealer, as the cruel wind blew his cotton trousers against his thinning limbs, "it's a fact that my business is getting worse and worse. There's no demand for horses any more. If people get hold of money now they buy automobiles and let their horses go."
"Yes," commented a grizzled old bookworm, "and how vividly the pres-

ent state of the horse market, so dis-heartening to you, is explained by the adage, 'Money makes the mare go.'

-Chicago News.

TREASURER'S SALE OF UNSEATED AND SEATED LAMIS.

Agreeable to the provisions of an Act of Assembly entitled, "An Act directing the mode of selling Unseated Lands for taxes," nassed the 20th day of March, 1815 and the several supplements thereto and also to the provisions of an Act of Assembly relating to the sales of seated lands for taxes, passed the 29th day of April, 1814 and the several supplements thereto, I Selward L. Sweeney, Treasurer of the County of Sullivan hereby give notice to all persons concerned that unless the County, Road, Poor, and School Taxes due on the following tracts of unseated and seated lands situated in said County are paid before the day of sale, the whole or such part of each tract as will pay the taxes and such costs chargeable thereon, will be sold at the Count House, in the Borough of Laporte, in the County of Sullivan, on the 15th day of June A. D. 1910, being the second Monday in June. The sale to be continued by adjournment from day to day if deemed necessary for arrearages of taxes due, and interest and costs accrued on each tract respectively.

CARE OF STORE FIXTURES.

Advantages of a Coat of Lacquer on Brass Work.

Although brass fixtures when new have a fine coat of lacquer to keep them from tarnishing, their protecting layer soon disappears before the attacks of the cleaner. Instead of wresting then with the problem of keeping the unprotected brass bright another coat of lacquer can be put on.
Instead of sending the fixtures to

the factory for this purpose solve the problem for yourself by applying the following solution: Gum shellac dissolved in alcohol makes a thin varnish which is applied with a small brush; ten cents worth of shellac is enough and enough alcohol to make it thin. This is enough to cover many fixtures and the work can be done in less than an hour.

To prevent your nickel fixtures from rusting, especially when you store them in the basement, says the Shoe Retailer, go over them with a cloth dampened with linseed oil, wrap the nickel plated parts in paper. When you next use your fixtures you will not have any rust to contend with.

Many metal stands have glass tops. These tops, from frequent handling, get quite dull in appearance. To bring back the original sparkle and crystal effect to the glass all you need to do is to cover the glass with a coating of whiting dissolved in water and ammonia. When dry rub briskly with monia. dry cheesecloth and you will have a beautifully polished glass top.

LADIES' FIVE-GORED SKIRT.

Pattern No. 3225.—To develop in any of the semi-transparent materials such as nuns' veiling, marquisette grenadine or net, the five-gored model is decidedly advisable. The one shown closes at the side front and fits the

closes at the side front and fits the hips closely, flaring toward the foot. The pattern is in 6 sizes—22 to 32 inches waist measure. For 26 waist the skirt requires of material with map 5 3-8 yards 36 inches wide, or without nap 5 1-8 yards 36 inches wide Width of lower edge about 3 3-4 yards

by Dr. A. S. Alexander, and make yourself horse-wise and crook-proof.

Learn how "bishoping" is done-how a "heaver" is "shut"—a roarer "plugged"—how lameness, spavins, and sweeny are temporarily hidden—the "burglar" dodge -the horsehair trick-cocaine and gasoline doping-the ginger trick-the loose shoe trick-in short how to beat ALL the games of crooked auctioneers and dealers.

It is all in the "Horse Secrets" book, and if you ever buy or sell a horse you need just this knowledge to protect yourself from being swindled.

## Read Our Remarkable Offer Below

A WORD ABOUT THE FARM JOURNAL: This is the foremost farm and home monthly in the world; 33 years old; 650,000 subscribers from Maine to California. Cheerful, quaint, clever, intensely practical, well printed and illustrated. Is for everybody, town, village, suburbs, or country; men, women, boys, girls,—the whole family; absolutely clean and pure; 24 to 60 pages monthly. We recommend it absolutely to every reader of this paper; you will find it unlike any other in the world.

OUR OFFER: { One Copy Horse Secrets Farm Journal - 2 years | All 3 for \$1.25 (We cannot sell "Horse Secrets" by itself-only in this Combination.)
