HANDS WOULD CRACK OPEN

"About two months ago my hands started to crack open and bleed, the skin would scale off, and the good flesh would burn and itch dreadfully. When my hands first started to get sore, there were small blisters like water blisters which formed. They itched dreadfully, it just semed as though I could tear the skin all off. I would scratch them and the skin would peel off, and the flesh would be all red and crack open and bleed. It worried me very much, as I had never had anything the matter with my skin. I was so afraid I would have to give up my employment.

"My doctor said he didn't think it would amount to anything. But it kept getting worse. One day I saw a piece in one of the papers about a lady who had had the same trouble with her hands. She had used Cuticura Soap and Ointment and was cured. I decided to try them, and my hands were all healed before I used one cake of Cuticura Soap and one box of Cuticura Ointment. I am truly thankful for the good results from the Cuticura Soap and Ointment, for thanks to them I was cured, and did not have to lose a day from work. I have had no return of the skin trouble." (Signed) Mrs. Mary E. Breig, 2522 Brown Street, Philadelphia, Pa., Jan. 12, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 6

Pat Was More Than Willing, A very pretty girl who recently re-turned from Ireland tells of an encounter with an Irish cabby in Dub-lin. She had started out from the hotel to do some shopping, but decided instead to make a tour of the city on a jaunting car. Arriving at the first car stand, and having selected the smartest looking vehicle, she told the driver that she "wanted to engage him for the day." Pat, never backward in paying homage to beauty, earnestly replied: "Begorra, ma'am, you are welcome. I only wish it was for life!"

The Heights of Song.

Miss Mary Garden, at a supper in
New York that preceded her departure for Europe, praised a new tenor.
"He is one of those tenors," said
Miss Garden, "who have to shut their eyes when they sing."
"Why so?" asked a young million-

aire.
"Because," she replied, smiling, "he goes so high it makes him dizzy."

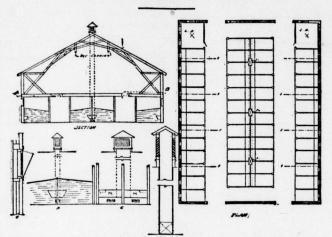

Cement Talk No. 4

We will send you free upon request, a handsome 116 page book with illustrations, entitled "Concrete in the Country," describing how to build various things out of concrete. It tells in plain, simple language how permanent, enduring structures can be built on your place with cement, sand, gravel or crushed stone. It will pay you to write for this book today and it to write for this book today and it will cost you nothing except the postal card. Up-to-date people are now building fence posts, barn floors, foundations, cisterns, sidewalks, cellars, stairways, feeding floors, and so on, of Portland cement concrete. Things built of concrete are easily constructed, cheap and everlasting. They cannot be destroyed by fire and make permanent, handsome improvements on any place. Write us today for the free book. Universal Portland cement handled by representative dealers everywhere.

UNIVERSAL PORTLAND CEMENT CO. FRICK BUILDING, PITTSBURG ANNUAL OUTPUT 10,000,000 BARRELS

EXCELLENT VENTILATION OF STABLES OF ORDINARY SIZE

Most Satisfactory System is Described and Illustrated-No. Plan That Will Automatically Meet All Conditions
of Wind and Weather - The Cause of Corrosion of Metal Frames.

Plan of Stable Showing Method of Ventilation—A, Inlets between ceiling joists; B, Inlets on hay floor; C, Window inlets; D, Side section of double stall and exhaust flue; E, Back view, same; F, Exhaust flue and side connection; I, I, Location of passage inlets.

For stables of ordinary width, the | should be of wood, and it may even common and most satisfactory form pay to cover with a couple of layers of fresh air inlet is a sash at each stall hinged at the botton, opening inward, but with galvanized iron pieces attached to the sides of the window frame, so that the only air attree than the outside air. This means writes George F. Weston in the Country Gentleman. This prevents direct drafts. A piece of chain stapled to the top of the frame, with a beheaded wire nail projecting from the top of the sash, allows the window to be opened any number of links. The free edges of the metal side plates are turned upward so as to make a stop that prevents the windows from fall. Sults are secured from many small in sults are secured from must be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperature, for the stable air is loaded with moisture and products of animust be a material difference in temperatu

There is no system of ventilation that will automatically meet all conditions of wind and weather, which at times will call for the closing of all windows to windward, and opening of those on the sheltered side a mere In winter when the horses come in hot, and, in the case of work horses, cannot be rubbed quite dry, it will often save colds to keep everything tight until they are dry and have cooled off. The stable shown in the illustration is an extra wide one, and to secure sufficient fresh air in-lets for the central double row of horses, it may be necessary to make ducts from the outside to the openings in the ceiling over the center of each passage, about 14 by 20 inches, and marked I, I, I in the plan. These can be closed by a board, with pin sliding on bottom of inside. The eas-iest way to make these ducts is to enclose between two ceiling joists, or if this cannot be done, make as at B on hay floor above.

The exhaust flues for a stable of this design should be three in number, about two feet six inches by one foot six inches, extending from bottom of manger clear to the roof. Each one connects with lateral flues below manger, so as to tap eight stalls, and the openings to each stall should increase in size as they leave the main flue, and be screened with half-inch wire netting to keep out rats. All main exhaust flues in a sta-ble should also have two or the oppo-site sides made with a door just below the ceiling, and two feet down, so that this can be opened up against the ceiling and take out all hot air in summer. Frequently the hay chutes can be so arranged as to serve also for exhaust flues by having a tightfitting door at the hay floor, which is only opened for feeding. They can be of galvanized iron as far up as the celling of stable, out in such a climate as Canada, where the upper space is much lower in temperature, will at three or four.

admitted has to take an upward course over the top of the sash, writes George F. Weston in the Country of the colder outside air. Finally there that prevents the windows from falling open too wide.

sults are secured from many small inlets, instead of the few larger ones, especially as to prevention of injurious drafts.

Moisture condensed during cold weather is the cause of the corrosion of metal frames, and we suggest givthem a couple of coats of asphaltum paint over the interior surface, especially on the sash bars. When of metal the expansion of these is so much greater than of the glass that it is impossible to get a perfect seal or seat between these and the glass, and as a result there have been put on the market many special forms of metal sash to remedy the trou-ble of drip from condensed moisture. Under some conditions, cypress bars may be more durable than iron.

TO DESTROY **GROUND HOGS**

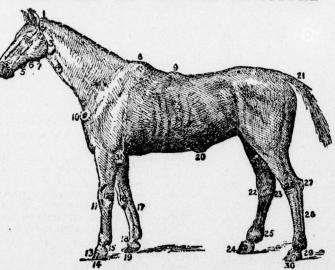

May be Poisoned With Wheat Soaked in a Solution of Strychnine-Also Easy to Trap Them.

(By WALTER B. LEUTZ.)

Ground hogs may be poisoned with wheat soaked in a solution of strychnine, but they can easily be trapped at the entrance of their burrows. A better way is to soak a bit of moss or hay with bisulphate of carbon and place it well down into the burrow covering the entrance with a heavy cloth. The carbon being heavier than air it penetrates to the bottom of the burrow and kills the animals bisulphate of carbon must be observed corked until the moment it is to be

WANTED SOMETHING SOLID.

you up in ... to go down. Do you up in my balloon; now you want Do you want the earth? guessed it. That's just what I do

Thought h 'elt a Hop.
An Irishman we into a into a public house one day and and and for a mug of beer in a great hurr, stating that he was so dry that he thought he could drink a gallon. The publican told him if he would drink it at one draught, without taking the measure away from his lips, he should have it for noth

ing.
"Agraid," said Pat, "and be the howly Saint Pathrick I'll do that

The landlord then drew a gallon of ale, and slyly slipping a red herring ale, and slyly slipping a red nerring into the measure, handed it to Pat, who eagerly raised it to his mouth and drank away until the measure was almost perpendicular. The pubtonishment, and, looking in it, he exclaimed, shaking the froth out:
"Pat, didn't you feel something go-

ing down with the beer when you drank it?"
"Be jabers," said Pat, "I thowt I

felt a hop, sur."

"A Million for Tuberculosis." This will be the third year that Red Cross Christmas seals have been sold on a national basis. In 1908 over \$135,000 was realized from the sale; in 1909, nearly \$225,000, and in 1910 nearly \$310,000. The slogan for this nearly \$310,000. The slogan for this year's sale is "A Million for Tuberculosis from Red Cross Seals." York state led the sale last year with 5,955,872 seals, Ohio coming next with 2,770,112. In addition to these, Pennsylvania, New Jersey, Massachu-setts, Connecticut, California and Rhode Island sold over a million each. Nashville, Tenn., selling 200,000, was the only city receiving over 100,000 seals which sold every one of them.

FOUND RIGHT PATH After a False Start.

"In 1890 I began to drink coffee. "At that time I was healthy and enjoyed life. At first I noticed no bad effects from the indulgence but in course of time found that various troubles were coming upon me

itself sick and nervous headaches, kidney troubles followed and eventually my stomach became so deranged that even a light meal caused me serious

"Our physician's prescriptions failed to help me and then I dosed myself with patent medicines till I was thoroughly disgusted and hopeless.

Finally I began to suspect that coffee was the cause of my troubles. I ex-perimented by leaving it off, except for one small cup at breakfast. This helped some but did not altogether relieve my distress. It satisfied me however, that I was on the right track

"So I gave up coffee altogether and began to use Postum. In ten days found myself greatly improved, my nerves steady, my head clear, my kidneys working better and better, my heart's action rapidly improving, my appetite improved and the ability to eat a hearty meal without subsequent suffering restored to me. And this condition remains.

"Leaving off coffee and using Postum did this, with no help from drugs, as I abandoned the use of medicines when I began to use the food drink." Name given by Postum Co., Battle Creek, Mich.

"There's a reason," and it is explained in the little book, "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

A Worry, Even In Eating. "Well," smiles the wife of the cus-tomer, "you miss one worry that the rest of us have. With your husband in the grocery and meat businesse you don't have to worry about the high cost of living."

"Yes, we avoid that worry," says the market man's wife. "But the trouble is that Mr. Feedem never enjoys his meals. Every time he eats anything he frets about how much he could have sold it for."

Taking No Chances. "They say that people, through association, grow to look like each

"Then I must decline to be engaged to you, Mr. Wombat, even for couple of weeks."

W. N. U., NEW YORK, NO. 36-1911.

The Change of Life is the most critical period of a woman's existence, and neglect of health at this time invites disease.

Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs. Here is proof:

and herbs. Here is proof:

Natick, Mass.,—"I cannot express what I went through during the Change of Life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not keep still. My limbs were cold. I had creepy sensations and could not sleep nights. I was finally told by two physicians that I had a tumor.

"I read one day of the wonderful cures made by Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it has worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women during this period of life. If it will help others you may publish this letter."—Mrs. Nathan B. Greaton, 51 No. Main St., Natick, Mass.

ANOTHER SIMILAR CASE.

Cornwallville, N. Y.—"I have been taking Lydia E. Pinkham's Vegetable Compound for some time for Change of Life, nervousness, and

some time for Change of Life, nervousness, and a fibroid growth.

"Two doctors advised me to go to the hospital, but one day while I was away visiting, I met a woman who told me to take Lydia E. Pinkham's Vegetable Compound. I did so and I know it helped me wonderfully. I am very thankful that I was told to try Lydia E. Pinkham's Vegetable Compound."—Mrs. Wm. Boughton, Cornwallville, N. Y., Greene Co.

The malors of Lydia E. Pinkham's Vegetable Compound.

The makers of Lydia E. Pinkham's Vegetable Compound have thousands of such letters as those abovethey tell the truth, else they could not have been obtained for love or money. This medicine is no stranger - it has stood the test for years.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge.
Address Mrs. Pinkham, Lynn, Mass.
