

Antitoxin for Fourth of July

The 67 tetanus antitoxin stations throughout the Commonwealth have received their supplies from the Department of Health and are ready to meet the usual Fourth of July demands.

The antitoxin will be furnished without cost to the poor and the stations are so located that every part of Pennsylvania is within easy reach of one. It is essential that the tetanus antitoxin be administered within 24 to 48 hours after the wound has been inflicted.

Any physician can secure an immunizing dose of 1500 units free upon applying to a distributing station, on certifying that it is for the treatment of a person too poor to pay.

In urging the prompt use of antitoxin to prevent lock-jaw following explosive and other wounds, Dr. Dixon Commissioner of Health says:

"Do not consider any such wounds trivial, send for a physician at once. If it is impossible to promptly secure his attendance, wash out the wound thoroughly with hot, boiled water, remove every particle of foreign matter and until the doctor arrives, apply a wet dressing; cloths saturated with a solution made by adding a teaspoon full of salt to a pint of boiled water."

The Antitoxin is in the hands of A. H. Buschhausen, Laporte, for Sullivan County and can be gotten from him.

For the Onion Worm

It appears that the onion plants are unusually badly attacked this year by maggots or worms which feed within them,

A prominent horticulturist in the eastern part of Pennsylvania wrote to State Zoologist Surface, at Harrisburg, asking what to do for this pest, and received the following reply which will be read with interest by all persons who have gardens:

"The insect attacking your onions is, no doubt, the onion Maggot or onion Worm. It is best prevented by pouring a quart of kerosene oil into a half bushel of sand and stirring it well and scattering it over the ground around the plants at the time the onions are set out, this repels the fly which lays the egg from which the maggot hatches. There is no remedy after the onion is once infested. The addition of a little turpentine to the kerosene also increases the repelling value. The sand can be scattered very thinly indeed quite near to the newly set plants or onion sets."

To Produce Good Grapes

A Lebanon county grape grower wrote to Prof. H. A. Surface, and asked him whether he should spray his grapes or bag them. The reply of Professor Surface is as follows:

"It is possible to spray your grapes with arsenate of lead and Bordeaux mixture and have good results. Use three pounds of blue-stone and three pounds of lime in fifty gallons of water to make the Bordeaux mixture. To this add two pounds of arsenate of lead. Spraying once every two or three weeks during the principal part of the growing season will be sufficient, and will give you good returns.

"Of course, putting them in paper bags gives excellent protection, and if a person has only a few vines, I would recommend bagging them. This is done by pinning a two-pound bag around each cluster of grapes shortly after the blossoms fall. It keeps away insects and disease germs, and also it keeps the grapes nice and clean. When you have more than can be economically bagged, the best treatment is to spray them well and thoroughly."

QUALITY

When people realize that it is not the quantity for the money, so much as the quality that counts, then they will patronize the store which does business in good pure goods. Cut prices often mean cut quality. Our prices are as low as good goods will allow. Our goods are not of the cheap mail-order variety. When comparing prices do not forget to compare qualities. If you find the prices lower than ours, then you will find the quality inferior—generally "cheap in use" job lots.

Ask us to show you why our stock is superior.

SUMMER SESSION AT NORMAL.

Prospectus Will Be Sent to All Interested Upon Application.

We are in receipt of the handsome prospectus of the Central State Normal school for the summer session, which begins July 1 and continues for five weeks. We note that the whole cost for this term is but \$30 and that this pays room rent, boarding, washing and tuition. The courses include psychology, history of education, general and special methods, school management and practice teaching in the training school, also mathematics, English, history, sciences, Latin, German and French. Special courses are offered in art, basketry, weaving, vocal and instrumental music, elocution and business. The program will be arranged so that the afternoons and evenings may be devoted to recreation and entertainment. This illustrated prospectus will be sent to all interested in a vacation school upon application to the principal, Dr. George P. Singer; Lock Haven, Pa.

Hotel Burned at East Towanda
Towanda, June 25.—The East Side hotel building at East Towanda was destroyed by fire early this morning. The blaze started about 1:45 and at 3:30 a. m. the three story building was in ruins. The origin of the blaze is unknown. The building has not been occupied in some time, and the supposition is that the fire was started by tramps sleeping in the building. The blaze seemed to originate in a room on the third floor in the southeast corner of the building.

13-Year-Old Boy Kills Big Copperhead With a Stone
Francis Damond, the 13-year-old son of Mr. and Mrs. Francis Damond, who resides northeast Williamsport, yesterday killed one of the largest copperhead snakes that has been slain in that section for years.
The boy was sent to the house and as he approached he saw a large snake crawling from under a tile. He quickly dispatched the tile with a stone and when it measured it was found to be at five feet in length. The body as large as a man's arm.
Francis was accompanied at time by his three-year-old brot
