Last fall Paint the whole interior of the nexts I planted some raspberries in the gar- and walk black to make the interior more perfectly dark .- New York Tri-

Bran as Hog Food.

Regardless of claims made by the hemist for the high feeding value of wheat bran, because of its albuminoid ontent, the writer has many times been disappointed at the results when fed to hogs. Even coarse shorts given in abundance fail to produce corresponding gains in weight. Some time ago an American Experiment Station made a test with wheat bran as compared with cora for feeding hogs. Twelve nigs were used, divided into four uniform lots.

The pigs varied in weight from forty-five pounds to fifty pounds. The first lot of these pigs were fed a ration of fermented or sour bran; the second lot was given untreated bran; the third lot had bran and corn meal: and the fourth lot was fed corn meal.

As long Secured in this way an end post will as bran was fed the pigs, the daily remain immovable for many years --American Agriculturist,

The Honey Bee's Range The range of the honey bee is but

little understood by the average person, many supposing that bees go

miles for the nectar of which honey is made. In fact, they go only a short distance. If bloom is plentiful near and contains too much fiber to be to where the bees are located, they will not go very far, perhaps a mile, assertion that souring or fermenting but if bloom is scarce they may go bran greatly increases its value does five miles. Usually about half that not stand the test in this experiment, distance is as far as they may go in fact, little is gained by fermenting. profitably.

only ten or twenty feet, it would be hopelessly lost. This is a reason why hives should not be moved in summer. When hives must be moved in summer the work should be done at night time when the bees are all at home, or on a wet day when they are not flying. board or other object should be placed in front of the hive to mark its new location. There is no doubt but that bees are guided by sight, and also by smell. They are attracted by the color of the bloom and if they are at work on a certain kind of bloom they are not likely to leave it for another as long as they can find that particular kind.

one Woman's Farm Experience A writer in the National Rural tells

of a woman who planted half her gar den in butter beans, partly because the family liked them, but more because | Wet, guv'nor? No more can anybody she had no other seed and no money else find 'im! ration was fed for ninety-nine days, and then all the lots were fed for twenty-one days more on corn meal. During the first period the bran-fed

The pigs were weighed each week to

lots did not gain very well, They took on fat and growth very slowly. The average dally gain for the 99 days was, for the fermented bran lot, .61 pounds; untreated bran lot, .70; bran and cern meal lot, .76; and for the corn meal lot, 1.08. This was a decided gain in favor of the corn meal, and showed that souring bran had no effect on its digestibility and feeding onlue

The second period brought out some points of interest. When corn meal was used as the entire ration, the lot that had in the previous period been hig. fed fermented bran with a daily gain

rate of 1.14 pounds each day. Likeincreased from .70 pound as a daily gain to 1.24 pounds. The corn and .88 pound daily gain; and the corn gain and increase was small. This was the case even when fed in con-

nection with corn meal. Substantial growth took place during the whole feeding period with the corn meal fed

The experiment clearly shows that bran is desirable as a food for pigs under no circumstances. It is too coarse, profitably and economically used. The

for during the period a difference of There are cases where bees have but forty cents was made in favor of been known to go eight miles in a the fermented over untreated bran. straight line, crossing a body of water While there was a profit of \$4.61 in that distance to hand. If while the feeding bran to pigs, the profit obbee was out the hive should be moved tained by feeding corn meal was \$8.94, or a difference of \$1.33. This is too much difference to be a case of error. and it shows that corn meal is superior to bran as a pig food, and that the latter is for the purpose undesirable and unsatisfactory .- The Farmer's Advocate.

An Einsive Puzzle.

De Wet, the elusive Boer commander, has got to the penny-puzzle stage of popularity in England. Says an American, who purchased one of those 'puzzle" cards from an itinerant vendor: "On it was an outline of the territory lately ruled by Mr. Kruger, with the wording:

"This is the Transvasi; find De Wet.' I turned the card about but could discover no outline suggestive of the eel-like Boer general. With a grin he answered: 'Yer ca't find De he

Rosalyn Fr

New Orleans (Special) .- William Daniels and Ross Johnson were conicted of murder at Lake Charles, La. and sentenced to the state positentiary for life. The case is a remarkable one, since it marks the first in-stance in this State where would-be lynchers have been caught, tried and invicted.

On September 27 of this year an at-mpt was made by a negro at Lake tharles to assault a white woman. The was immediately captured and lodged in jail. At night a mob gathed and attempted to break into the rison. The sheriff's deputies resisted, and during the melee one of number was killed. Daniels and Johnson were convicted of doing the kill-

Launch of New Monitor.

Newport News, Va. (Special),-The onitor Arkansas was launched at the shipyard here. The event was very successful, not being marred by an ac cident of any kind, and the ship rode out on the James River without leaning to starboard or port. Miss Robbie Newton Jones, daughter of Governor Jones, of Arkansas, christened the monitor as it started down the ways. In addition to Governor Jones and a party of Arkansas was Governor Tyler, of Virginia; a large party of naval officers and a number of invited guests. Following the launching was a luncheon given by the officials of the shipyard in honor of the spon-

Shot by a Rabbit Hunter.

New York (Special) .- At Mendham, Morris county, N. J., George Lounsberry, while hunting rabbits, was acci-dentally shot by Henry Van Nest. The charge entered the young man's face and stomach, and his injuries are very serious.

Mangled in a Min.

York, Pa. (Special) .-- Walter Bruau, an employe at the York Haven Paper Mills, was engaged in cleaning the sulphate thresher in the mill, when a serious accident befell him. He had put his head on the inside of the thresher to make an examination, when it was caught by portions of the machinery. His head and face were so horribly mangled that he was gearcely recognizable. He was re-moved to his home, and is in a criti-cal condition, with but slight hopes for his recovery.

Crazed by Son's Injury.

Lansing Ia. (Special).-The 12-year-old son of Chris Rud was run down by a freight train and his left leg severed below the knes. The father took the natter so that he became irresponsi-ble, assaulting an officer who innded him in juil. Within 20 minutes the him in jail. Within 20 minutes the jall and City Hall building were discovered to be on fire, and the agoniz-ing shricks of the prisoner told that had paid the penalty of his reckcost \$12,000, and was totally destroyed.
