m of beef, mutton, pork, u will, but flavor 'em of fish and put 'em up in six to a box. All the do is to set 'em in the oven des before eating. Five or six for a quarter, and o per cent. I figure that ten factories going inmonths. Do you want than this? Isn't this waters for the trust re

"But I came here for \$11?" almost shouted the creditor as he saw bimself being wound up.

"When this stock was issued, I put up at 40 cents on the dollar. 1 wasn't satisfied to give you the vice presidency. I wanted you to make at dends. I did what I ought to have done for the best friend I have in the world. I took that \$11 I owed you and used it to secure your stock. It wasn't half enough, but you can pay me the balance at your leisure. Some time after we get things started you can hand me your check for it."

"And you mean to say I'm owing

"But don't worry about it, my dear man; don't worry. It's a mere fleabite. When you draw your first \$5,000, we'll square up so as to keep the books straight. Major Crofoot is a man who returns confidence for confidence. Can you be ready to take your position in two days?"

"By thunder, but this is a game to do me up!" shouted the tallor as be

stamped around in great excitement. "I'd like you to take an active interest as soon as possible, as I may promote a three cornered ple company next month, but you can have a week in which to sell your tailor shop and get your hair cut. By the way, you'd better look out for a horse and a carriage. As vice president of the Universal Fishball company you'll be expected to sling on more or less style. I might go out with you this afternoon to look at some diamonds for your wife if you have time. As I said before, as to that little balance between

us, don't let it bother you."

"Then you won't pay me?" "That is about all today," blandly replied the major as he opened the door and beamed upon his creditor. "Three days hence we turn out our first box of fishballs, and they go to the president. Inside of a week he will telegraph us: 'Nothing like 'em on the face of the earth. Send me a carload,' My dear man, Golconda is within our grasp, I've let you into the biggest thing of the twentleth century, but I want no thanks for it. As I am very busy this morning"-

"My \$11?" shouted the tallor as the door closed on him. No answer.

"Major Crofoot, you are an old deadbent!"

No answer. "And I'll stay right here till Satur. other a stilly Hollander. day night to get sight of you and punch

your head!" But he didn't. When a gravelike sllence had continued for five minutes, he got discouraged and scuffled his way down stairs. M. QUAD.

#### MOUNTAIN AIR.

Why It Is More Healthful Than That of Lower Altitudes.

The only reason why mountain air is healthier than low air is that mountain air is cleaner than low air. The chemical composition of the atmosphere differs but little, if at all, wherever the sample be taken. On Pike's peak the relation of oxygen to nitrogen and other constituents of the atmosphere is the same as at the level of the ocean. The favorable effects therefore of a change of air are not to be explained by any difference in the proportion of its gaseous constituents. One important difference, however, is the bacteriological one. The air of high altitudes contains no microbes and is, in fact, sterile, while near the ground and some 100 feet above it microbes are abundant.

In the air of Chicago and other crowded places not only does the microbe impurity increase, but other impurities, such as the products of combustion of coal, accrue also. Several investigators have found traces of hy drogen and certain hydrocarbons in the air, and especially in the air of pine, oak and birch forests. It is to those bodies, doubtless consisting of traces of essential oils, to which the curative effects of certain health resorts are Thus the locality of a fir forest is said to give relief in diseases of the respiratory tract. But all the same, these traces of essential oils and aromatic products must be counted. strictly speaking, as impurities, since they are not apparently necessary con stituents of the air. As recent analy ses have shown, these bodies tend to disappear in the air as a higher altitude is reached until they disappear altogether.-Louisville Dispatch.

One of Napoleon's Fents.

Napoleon added to his many other deeds of interest to the world that of having climbed to the top of a fower on horseback, a feat accomplished May 16, 1797, when he rode to the top of the Campanile, or bell tower of St. Mark's Venice, in order that he himself might give the signal to his fleet of the sur render of the city.
