## FOR THE LITTLE ONES.

Youth of Queen Isabella, the Friend of Every American boy should be interested in the history of the great queen of Spain who pawned her jewels to buy vessels with which to send Christopher Columbus out

to discover the new world. Isabella was born April 22, 1451, at Madrigal, Spain. Her father, King John, was king of Castile, then a separate kingdom, now only a province of Spain. She was named honor of her mother, a princess of Portugal, who brought up her water; it is then taken out, shaken daughter very simply in the obscure village of Arevale. At the age of eleven the little princess was betrothed to Prince Carlos of Aragon, of blotting paper. It then under-who was cruelly poisoned. Other goes a fresh washing by having a matches were arranged for her, but with great spirit the princess refused them and insisted on marry-

ing Prince Ferdinand of Aragon.

Isabella was heiress to the throne, so her marriage was a matter of great importance to the country. water and dried between two leaves October, 1469, after a romantic of blotting paper under heavy prescourtship Ferdinand was married to sure. These successive operations his sweetheart at Valladolid, Spain, and her brother, the king, dying, she was proclaimed queen of Castile proceedings of the so called restor-Dec. 13, 1474. When, in January, 1478, Prince Ferdinand succeeded to the throne of Aragon, the two destroys the paper. #### A Simple Trick.

One need not be an alchemist to make money, as the following trick will show: First pour clear water

DOUBLING YOUR MONEY.

into a glass until it is half full; then throw a bright piece of money into the water and cover the glass with a plate. If the glass is now turned over quickly, the piece of money will be seen gleaming on the plate and a second piece will be seen swimming on the surface of

It is a refraction of the rays of restored to its original position and the water ceases to move the second piece of money disappears.

#### Game of Step.

In the game of step the ground is marked off by two parallel lines, a wide distance apart. One player, who is "it," stands on one of these lines, with his back to the other players, who start at the other line. The one who is "it" counts ten rapidly, during which time the other players approach his line. As he says "Ten!" they stand still in whatever attitude they may be at the moment. He turns his head quickly and calls the name of any player or players whom he sees moving. Any thus caught moving have to go back to the starting line and begin over, while the counter repeats the count of ten and the players again move forward. The object of the game is to cross the counter's line without being seen in

- "Today," said pretty Dolly, as the opened her bright eyes, "I'm going to give my dear mamma A beautiful supprise. I hardly know yet what 'twill be, But I'll soon find a way To do some unexpected thing To please mamma today.
- "I'm tired of doing little things.
- "I'm fired of doing little things.
  Why, any one can sweep
  And dust or wipe the dishes
  Or sing Evelyn to sleep.
  "Tis some hig thing I want to do.
  If I could write a book
  Or save the house from burning now,
  How pleased mamma would look."
- So after breakfast Dolly went And sat healds the fire, While mother cleared the table off And mended budy's tear. She wiped the dishes, unde the beds And braided Besny's hair, While Dolly sat and pondered long Within her easy chair.
- And so Miss Bolly dreamed and planned
  That busy migraing through;
  She could not think of anything
  Quite large enough to do,
  And is she went to bed that night
  She really wondered why,
  When mother kissed her levingly.
  The kiss was half a sigh!
  —Youth's Companion.

New Milk Adulterant. A new milk adulterant has been discovered in use by the dairy inspectors in Minnesota. It is called togen and is composed of sugar, lime and water. It has the effect of making milk appear richer than it is, as the lactic acid in the milk turns the lime to a thick white substance that assimilates with the milk, improving its looks without injuring its taste,

#### ALL OVER THE HOUSE.

Information From an Authority on Cleaning Old Engravings.

The cleaning of old engravings requires special care, and it is sometimes prudent, if they are rare masterpieces, not to confine this operation to strange hands. We give a process of cleaning the result of which is excellent and which we have seen adopted by one of the most celebrated collectors of engravings in Paris. The engraving must be soaked for twelve hours in a flat bottomed basin containing a solution of a half ounce of carbonate of potassium in a half gallon of and placed between two boards heavily weighted down, being first carefully spread between two sheets small jet of pure water played upon it for some hours, when it is dipped for one hour in salt water (half ounce to half gallon of water) and exposed to the air for half a day. It is then washed again in clear proceedings of the so called restorers of engravings, who frequently use chloride water, which rapidly

To Remove the Odor of Mutton.

This recipe is an original and tested one from an old cook, who made use of it for her own personal benefit. The peculiar odor which permeates the flesh of lambs and sheep, the latter especially, is very offensive to most people, and many who would otherwise enjoy the meat cannot eat it on account of this unpleasant attribute. Now, the remedy is simple and inexpensive, for all that is necessary is to take the juice of one lemon and beat with it sufficient butter to make a gravy and pour this over the meat when broifing or when putting it in to bake; it applies to frying also.

Another method which she gave, and which may possibly be known to others, is to pour the gravy of the meat when it is done over some fresh gathered mint leaves, allowing it to remain long enough for the mint to thoroughly flavor it; then pour it back over the meat. This is known as mint gravy.

#### Cleaning House by Machinery.

A friend in Quincy, Ill., gives a glowing account of the new apparatus which cleans house by means of compressed air without disturbing furniture, rugs or bric-a-brac. van stations itself outside the house, and the operator runs his light which causes this curious illu- hose into the rooms, and with an sion, for the moment the glass is odd little device resembling a carpet sweeper inverted he cleans everything in sight and some things which are not, in sight. The machine gathers the dirt into a receptacle of its own. Walls and draperies are cleansed, upholstery, all sorts of things, without clearing the Only a few cities have been visited thus far by this twentieth century wonder worker, but the big red van promises to be a familiar figure on the landscape another spring. It hails from St. Louis .-Good Housekeeping.

The Preparation of Tea. The chairman of the government that few Americans understand how to make tea or how to obtain the maximum benefit from it. It should be taken between meals and without much food, when it becomes a harmless yet powerful tonic. England discovered the secret long ago and hence the universal custom of motion by him. The last one over the 5 o'clock tea, midway between changes places with the counter. the luncheon and dinner hour. The preparation of the tea is more important than the quality, for the best tea badly drawn is worthless. First, the water must be fresh; second, it must be thoroughly boiled for ten minutes; third, the tea must never be allowed to boil and must never draw over ten minutes.

The high place milk once held on the dietary list seems to be under-mined. We know now that it is too heavy for the stomach when other food is taken; that unless it is sipped it forms a mass which is not easy to be digested; that when taken on an empty stomach bread or crackers should be broken into it to avoid the formation of curdlike matter, but with the addition of limewater it may be used with impunity. Brought to the scalding point it is most nourishing.

#### A LITTLE NONSENSE.

Discovery of a Bride at the Outset of

A bride who began housekeeping a New York city apartment a few weeks ago had considerable trouble with roaches. They got into everything. The bride was in distraction. But when her husband got home from his office one night found the bride beaming with

"I have fixed it," she cried, hardly waiting for the man to take off his coat. "I have done just the brightcet thing! I have got rid of them,

or, at least, some of them." Them? Who?" demanded the husband. "Why; the roaches, of course," re-

plied the bride, leading the way to the kitchen. There in the center of a table was a big heap of dead roaches. They were mixed in with a brown

"You got some kind of reach poison, I see," commented the husband.

"It works all right, does it?" "Splendidly. Why, I just put a little heap of it there and it killed all of those right away. But it took me a long time to catch them." "Catch them?"

"Of course. You see, you put some of this powder on a table. Then you catch the bugs and put them into it. It kills most of them right away, but some try to run away and then you have to hold them right in it."

"I see," said the husband, and he walked away without another word. But, then, he had been married only a very few weeks .- New York
