

## DIFFICULTIES OF MAP MAKING.

For twenty years the Government has been engaged in mapping the United States, and a report just issued by the Geological Survey shows that the larger part is still unsurveyed, says the Washington correspondent of the New York Evening Post. In some of the Western sections the work is attended with the greatest difficulties and dangers. Recently a party sent to map Northern Montana was obliged by the severity of the weather to climb Calf Mountain not less than eight times—the last 1300 feet on foot—before an opportunity was presented to get a photograph of the surrounding country. The photographic method is employed in all such wild regions. When the negatives were finally secured it was after waiting all day in a driving snowstorm; then there was a lull of a few seconds, during which six snapshots were made. During the other seven days the snow was unrelenting.

## CONSUMPTION THREATENED.

"I was troubled with a hacking cough for a year and I thought I had consumption," says C. Unger 211 Maple St., Champaign, Ill. "I tried a great many remedies and I was under the care of physicians for several months. I used one bottle of Foley's Honey and Tar. It cured me, and I have not been troubled since."

## FASTING FOR HEALTH'S SAKE.

We all eat more than we require and this daily repeated superfluity tends to stodge. In a more primitive state of society meals were more irregular, and the amount of food tallied more with the efforts expended in obtaining it. Now we eat because it is meal time; too many of us eat not by rule, but to repletion; while probably all of us eat again before we are really hungry. Day after day a little more is taken than is used, and this excess either disturbs the liver or teases the stomach, or, circulating in a hyperplastic blood, leads to torpor, or sometimes is put out—out of harm's way for the time, but mubh to the distress of the patient later on in the form of fat. Thus, we never have an opportunity of striking a proper balance between intake and output unless we follow the wise maxim of church and fast once a week—not merely abstaining from the more toothsome delicacies, but fasting honestly, even to emptiness and discomfort.—London Hospital.

## ALL WERE SAVED.

"For years I suffered such untold misery from Bronchitis," writes J. H. Johnston, of Broughton, Ga., "that often I was unable to work. Then, when everything else failed, I was wholly cured by Dr. King's New Discovery for Consumption. My wife suffered intensely from Asthma, till it cured her, and all our experience goes to show it is the best Croup medicine in the world." A trial will convince you it's unrivaled for Throat and Lung diseases. Guaranteed bottles 50c and \$1.00. Trial bottles free at W. S. Dickson's.

## NOW THE TIME TO SOW RYE.

The monthly meeting of the Farmers' Association of Franklin county was held in Croft's hall, Marion, on Friday evening, says Chambersburg Public Opinion. The principal speaker of the meeting was Dr. J. M. Martin, of Mercersburg. He took for his topic "How to Make Up the Short Hay Crop." He advocated that the farmer ought to take an equal quantity of hay, fodder and straw and run it through a cutter and all should be fed together. This he said would be a great saving in feed. The rough part cattle would not eat could be used for bedding. He also recommended the sowing of rye. "Now," he said, "is the time to sow it." This he stated would make late pasture even up to the time of snow covering the ground. Cattle should not be turned on the rye pasture when the ground is wet or soft. Early in the spring the rye can again be pastured or cut for feed as a person desire. If it is mown at the proper time it will make nearly as good feed as timothy hay. The speaker estimated that fields now in corn and are to be put in corn again next year ought, by all means, to be sowed in rye. By the early part of May the rye can be plowed under and in this way, he said, rich humus would be added to the soil. Dr. Martin's talk was interesting, practicable and profitable to the farmers in attendance.

## CHRONIC FAULT FINDERS.

There is no need of worrying, fretting and losing sleep because some one has found fault with what you do. 'Tis the common lot of man in business. The merchant doesn't please all of his customers; the postmaster is cuffed and kicked for alleged mistakes; the railroad agent is frequently backed up in the corner and given to understand this and that and the other thing; the butcher is forever reminded of his tough steak, and even the minister finds it hard to please all the congregation with his best sermons. The newspaper man gets more than his share of it and is expected to get out a cheerful newspaper just the same. A man befriends another for years and is turned down and abused. Such things are not pleasant, but they always have been and doubtless always will be so, and the man who goes through them the easiest is the one who pays the least attention to them and goes right along, trying to be pleasant and useful.

Farmers who make a specialty of raising potatoes for the market are not getting one-fourth as much for their potatoes per bushel this year as they did last year at this time. The large decrease in price is attributed to the fact that while there is a considerable larger crop this year, the demand is not better than it was last.

CARRIE DID IT WITH HER AUGER.

From Windsor Journal.

Although Schellsburg, Bedford county, is a quiet remote town without a saloon or hotel there is a "Carrie Nation" there who has sworn vengeance on the fermented spirits. It is rumored that a party of farmers and others of the vicinity had recently secured a half barrel of beer for the purpose of using it on their bait in a fishing expedition, but while the cask was basking in the cooling atmosphere of an ice house the "smasher" learned of its presence in the vicinity through a neighbor woman and she sallied forth with an auger and what she did to the keg the boys declare was a shame. Not even a smell was left. Of course the fishing expedition was nipped in the bud, for there was no use of going without bait. The neighboring distilleries of Hughes and Topper were communicated with. Hughes felt secure as his warehouse was brick, but it is said Mr. Topper is contemplating securing his wooden structure with armor plate to defy Carrie and her little auger.
