### AN EMERGENCY FORCE.

### Six Hundred Marines Will Be Gathered at Norfolk, Va.

Washington (Special). - Secretary Moody has finally decided to augment the United States naval forces on the isthmus by the addition of 600 marines, if Commander McLean's advices indi-cate that these are needed. He has cate that these are needed. He has given orders to Commander Pilsbury of the United States steamer Prairie now at Boston, to proceed with his ship to Norfolk. At that point 600 marines will be gathered ready to take ship when Secretary Moody's advices indicate the necessity for their presence on the Isthmus. Norfolk is the most available point for the congregation of a marine force, as, in addition to its Southern location it has excel-lent camping grounds for marines. The Panther should arrive at Colon

within a day or two with 380 marines oard, so that, with the Prairie's men and the marines on the Cincinnati, who States will have what is regarded as an across the Isthmus

Orders were also sent forward to the San Francisco, now at Norfolk to coal and provision and proceed to San Juan, Porto Rico, there to await any

emergency which may arise.

There is only one United States warship now in Venezuelan waters—the little gunboat Marietta-and the Montgomery is due to arrive shortly a Cape Haytien. The object of the de partment in sending down the San Francisco, it is stated, is to have a vessel ready to meet a call for reinforce-ment either in Venezuela, Hayti or the Isthmus. The duty assigned to the San Francisco should not be confused with that given the gunboat Bancrott. That vessel will probably not be able and will then also proceed to San Juan,

THE PER CAPITA AVERAGE IS \$108. Deposits With Banking Institutions Have Doubled During Each of Two Decades-How the Money is Placed-Figures Compiled From the Reports of the Comptroller of the Currency. J . 800

Washington, D. C. (Special).-The bank deposits of the people of the United States aggregate \$8,500,000,000, an average of \$108 per capita. Ten years ago they aggregated \$4,232,000,000, or half the amount of to-day, and 20 years ago they were \$2,600,000,000, or a little more than one-quarter of those of to-day;

These figures are presented in a table just prepared by the Treasury Bureau of Statistics. They are compiled from the reports of the Comptroller of the Currency and include deposits in national banks, savings banks, State banks, loan and trust companies and private banks, and cover the official figures of the year 1901. The figures for the different classes of banks stand as follows:

National Panks . . . . . . \$2,937.753 Private Banks..... 118,621,903

Aggregate ......\$8,535,053,136 The figures show the total deposits in the different banking organizations of the country, so far as they can be obtained, from 1875 to the present time, though it is proper to add that the figures for private banks include, since 1887, only such banks as voluntarily report to the Comptroller of the Currency. In other words, they are only about one-fourth of the total number of private banks in the United States while during the period from 1875 to 1882 the figures cover the deposits in practically all private banks. Taking the figures at intervals from 1878 to 1901 the total deposits, as given by all banking

institutions, stands as follows: 1878 .....\$1,878,434,270 1882 ..... 2,755.938,053 1887 ..... 3,255,772,134 1892 ..... 4,630,490,136 1897 ..... 5,196,847,530 1901 ...... 8,535,053,130

During recent years the growth has been rapid. From 1878 to 1882 the in-crease was \$877.503.783; from 1882 to 1887, \$499,834,081; from 1887 to 1892, \$1,374,718,022; from 1892 to 1897, \$506,-374, and from 1897 to 1901, \$3,338,-

The Bureau of Statistics of the Departnent of Agriculture, disturbed by com laints of discrepancies between the department's crop reports and various com mercial estimates, has determined to make an investigation with the view of nsuring absolute accuracy in future re-

The subject has been thoroughly considered in the department and Secretary Wilson has authorized Statistician John Hyde to use every available means ascertain wherein the differences lie. has been determined to send at once into the cotton belt 10 experts, who will visit every cotton shipping point and make the closest possible investigation, taking into account every pound of cotton and its origin, whether of this year's crop or

of that of another season. Hyde has been impressed with the idea that much cotton of the comnercial estimates is wrongly placed to the credit of crops to which it does not belong. Frequently crops of a past season still on hand are included in the amount of cotton set down as of this year's crop. This will be one of the main features of the investigation. A considerable lot of cotton is said to be included in the estimates from commercial sources which belongs to what is called the "city crop," which consists of cotton that, in market ampling from season to season in many i the large towns, accumulates in con-

derable quantities.

The effort of the department will be ground outside the house of worship iderable quantities. and, as well as to gleaning information which will tend to absolute reliability in he department's estimates of crops. The early maturing of cotton this season, much of it getting to market during July and August and taking with it cotton of last season, will be treated in the data to be gathered by the experts assigned to make the investigation.

A joint meeting of the legislative committees of the Delaware County Road Drivers' Ass'n and the various granges of the county, who have joined forces in the interest of good roads was held at Media, with Senator W. C. Sproul presiding. These organizations, now very strong in the county, will present a bill before the next Legislature and preliminary arrangements were perfected. The bill will be draft-ed in Media in a short time by sub-committees of the road drivers and grangers, together with a committee representing the Road Drivers' Asso-ciation of Philadelphia and other sim-ilar organizations. It was suggested that the State make a plan to pre-revenue which would permit of pending \$30,000,000 on the roads with-in the next ten years. Under the present conditions of the State finance, it

said, this would not necessitate much of an increase in taxation.
