loal Operators Say They Will Never Vield to Strikers.

THE CONFERENCE IS A FAILURE.

Mine Owners Declare That Anarchy Prevails to Pennsylvania-President Mitchell Willing to Submit the Entire Controversy to the President to Be Adjusted by Arbitration Through a Commission.

Washington, D. D. (Special) .- Presifent Roosevelt is satisfied that the coal of those responsible for the present inplerable condition.

The conference between the President ind the representatives of the contendng forces has been concluded without a settlement or promise of a settlement by the action of those to whom the Presilent made his appeal. The "captains of rapital" and the "captains of labor" were trought face to face in the presence of the chiel Executive at the temporary White House and called upon to by side their personal differences in the in-erest of the whole country.

Mr. John Mitchell, on behalf of the niners, proposed sending the matter to a board or commission of arbitration, and offered to send the miners to work I this were done, abiding without quesaon by the decision of such an impartial tribunal.

The representatives of the mine ownrrs and railroads refused absolutely to have any dealings with Mr. Mitchell, or to give any sort of recognition to the union as having rights or interests to be respected, and proposed simply that any individual miner having a grievance might present his case for settlement by a judge of the Coart of Common Pleas. Mr. Mitchell assumed the attitude of

Mr. Mitchell assumed the attitude of asking nothing but justice, and of being willing to leave it to disinterested parties representing the public to determin what that justice should be. The representatives of the mine owners and roads assumed the attitude of refusing to recognize that the organization reprewhatever in the case.

They could not be moved from this or to be resumed, the parties to the controvesy are no closer than before

The conference, as such, was a failure. ret it may mark the beginning of the end, as it is regarded as almost certain that the President will now bring the subject to the attention of Congress. It is not believed that the question will longer be considered with reference to the wishes and interests of the two warring ele-ments, but will be dealt with, as best it may, as a matter of vital public interest. It is no longer a question of what the strikers or mine owners will do, but one of what the representatives of the people

can do. The spirit in which the "captains of sapital" entered upon the conference was one of condescension, with an air of self-conscious power, giving an impression of definite. Remarks made by a member of the party to the effect that if anyone knew what the President would do now it was more than they did appeared little short of sneering. It is expected that the question will

.

soon he up to Congress. Two conferences were held, and the Interest displayed in both was intense. In his statement of the case the Pres-

ident impressed upon the operators and President Mitchell the great need to the country of a settlement. There submitted their proposition. The minm effect was that whenever there should be differences between the operators and their employes such differences should be referred to a tribunal to be thould be referred to a tribunal to be
