

PRESIDENT FULLER OF THE JEWELERS' ASSOCIATION

Threatened With Loss of Hearing, Smell and Sight From the Ravages of Catarrh.

Pe-ru-na Cured Him.

"I Feel Like a Young Man Again"

Mr. J. W. Fuller.

A GREAT many remedies to temporarily relieve catarrh have been devised from time to time, such as sprays, snuffs, creams and other local applications, but, as a rule, the medical profession has little or no enthusiasm in the treatment of catarrh. It is generally pronounced by them to be incurable.

It therefore created a great sensation in medical circles when Dr. Hartman announced that he had devised a compound which would cure catarrh permanently.

The remedy was named Peruna, and in a short time became known to thousands of catarrh sufferers north, south, east and west.

Letters testifying to the fact that Peruna is a radical cure for catarrh began to pour in from all directions.

Thousands of such letters are on file in the office of The Peruna Medicine Co.

Rev. E. Sturtevant, Pella, Wis., writes: "I feel obliged to extend my personal thanks for my complete restoration. All through the winter I suffered from throat and lung trouble, but recovered my entire health by the use of your excellent remedy, Peruna."

The following letter from a prominent gentleman of Los Angeles is a case in point:

Mr. J. W. Fuller, President of the Jewelers' Association of Los Angeles, Cal., has been in business in that city for seventeen years out of the forty-five that he has been engaged in business. Concerning his experience with Peruna he says:

"I was troubled with catarrh of the head for many years. It affected my sense of smell, hearing and sight. I

spent lots of money with doctors and the use of local applications to relieve me, but to no purpose, until my attention was called to the wonderful effects of Peruna.

"I must say that I met with most surprising and satisfactory results. Peruna took hold of the complaint and drove it entirely out of my system."

"Although well along toward the allotted span of man's life I am pleased as a child over the results, and feel like a young man again."—J. W. Fuller.

Such letters as the above are not used for publication except by the written permission of the writer.

A pamphlet, filled with such letters will be sent to any address free. This book should be read by all who doubt the curability of catarrh.

If you do not receive prompt and satisfactory results from these of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

COMMERCIAL REVIEW.

General Trade Conditions.

R. D. Dun & Co.'s weekly review of trade says:

Milder weather not only accelerated the demand for many lines of merchandise, but reduced the pressure for fuel which threatened to become a serious matter, and incidentally facilitated efforts to reduce the freight congestion. Business fully maintains its gratifying position. The people are consuming on a scale never before known. Firmly held quotations also bear testimony to the fact that demand is often greater than supply.

Increased interest has been displayed by purchasers of all products of iron and steel, giving a decidedly firmer tone to the market, and in many instances quotations have advanced. One of the definite changes was a rise of \$2 a ton in wire products, which was not a surprise, and a new order schedule averaging over 25 cents a ton higher. This makes every step of the process more expensive to the independent producer. Iron, pig iron, coke, wages and freights having reached a high position. To the leading producer, however, the situation is less disturbing, as most of these factors are under one control, and it will be possible to hold prices of finished steel at a fairly conservative position. A very heavy tonnage of pipe has been moved on old orders, and considerable new business is reported.

Few additional advances have occurred in quotations of cotton goods, the developments of the week being chiefly in the direction of establishing the market on the higher basis, which was suggested by earlier sporadic advances. There is more conservatism on the part of buyers.

Business in woollens has fallen off unexpectedly. New England shoe shops have secured moderate advances in several grades of footwear, chiefly of all styles in demand by Western buyers.

Failures for the week numbered 221 in the United States, against 215 last year, and 28 in Canada, compared with 35 a year ago.

To clean jewelry that has no chased work, jewelers moisten the surface with a brush (like that in a mucilage bottle) dipped in alcohol that has a few drops of ammonia for every half pint of alcohol. They with another brush they apply a little powdered whiting, and polish off with a "jewelers brush," which may be well replaced by a baby's fine hair brush when it is no longer in use, enough for baby's basket. When the jewelry is chased or set with real jewels the powder is washed off with soap and water, and the articles are dried by dipping them into fine sawdust. Stones that are "backed" must not be washed.

SCIENCE AND INDUSTRY.

Colorado has anthracite under eighty square miles. The eye is most sensitive to green colors. Every animal has its own kind of flea. The lumber companies of Sweden have formed a trust. The congested counties of Ireland are all on the western coast. The average coffee tree in Honduras produces half a pound of beans. There is more coal in Montana and Wyoming than in Pennsylvania. Greece has as many people as Michigan and as many acres as West Virginia. A red colored solution now obviates the need of a dark room in photography. Anthracite coal, underlying roo acres, has been discovered in Vancouver Island, B. C. Austria-Hungary bought abroad \$344,700,000 worth and sold abroad \$382,500,000 last year. There are more millionaires and more paupers in Moscow than in the whole of England. Crude sugar of the new Cuban crop, which is a large one, is being sold at 1-1 1/2 cents a pound. The origin of natural gas is the action of water upon aluminum carbide, by which methane is evolved. The Grand Rapids and Indiana Railroad recently sent a vaccination train along its lines, and no employe escaped it.

W. H. HICKS AND OTHERS, vs. W. H. HICKS AND OTHERS.

"That crack is a regular mint for conductors and motormen," said the conductor of a street car, pointing to the deep crevice formed by the meeting of the longitudinal cane seat and back. "People are very careless with money; they will frequently drop a nickel or a dime. It gets into that crack, and once there, there it stays. No one would expect the whole bunch of passengers on that side to get up and hang onto a strap while the seat was lifted in order to search for a five or ten cent piece. And so the conductor and motorman reap the harvest."

"The first time I ran on one of these cars I saw the motorman, at the end of the run, diligently turning over the seats."

"What are you looking for, Jim?" I asked him.

"Money," he replied shortly. I laughed at him. But pretty soon I saw him pick up a nickel, then a dime. I've never failed to turn over the seats at the end of a run from that day to this. We often realize a pretty neat little sum in the course of a day's work, and I tell you it comes in handy."

Rather too Smart.

A promising barrister was wont to declare that though many a bad case has been won by brilliant sally in court, equally as many good ones have been lost through overdoing the thing.

Not long ago a case arising out of a street accident came on for hearing at a certain country court.

An electric tramcar had figured in the collision, and when one of the witnesses stepped forward he was at once tackled by the facetious young gentleman engaged by the plaintiffs.

"What are you?" he began abruptly.

"An electric conductor," responded the witness.

"Indeed!" ejaculated the lawyer. "A living lightning conductor, I suppose?"

For one moment the witness hesitated. Then he boldly tackled the facetious one.

"Look here, young man," he remarked, in a fatherly sort of way. "You may not know it, but there are different kinds of conductors. For instance, I'm one and you're another, and I didn't conduct my car better than you're conducting your case. I should earn the sack, and get it!"

The union of energy and wisdom makes the completest character and the most powerful life.

Mrs. Emmons, saved from an operation for Ovaritis, tells how she was cured by Lydia E. Pinkham's Vegetable Compound.

"I am so pleased with the results I obtained from Lydia E. Pinkham's Vegetable Compound that I feel it a duty and a privilege to write you about it."

"I suffered for over five years with ovarian troubles, causing an unpleasant discharge, a great weakness, and at times a faintness would come over me which no amount of medicine, diet, or exercise seemed to correct. Your Vegetable Compound found the weak spot, however, within a few weeks—and saved me from an operation—and all my troubles had disappeared, and I found myself once more healthy and well. Words fail to describe the real, true grateful feeling that is in my heart, and I want to tell every sick and suffering sister. Don't dally with medicines you know nothing about, but take Lydia E. Pinkham's Vegetable Compound, and take my word for it, you will be a different woman in a short time."

Happy Homes

One of the essentials of the happy homes of to-day is a fund of information as to right living and the best methods of promoting health and happiness. With proper knowledge, each hour of recreation, of enjoyment and of effort may be made to contribute to that end and are of not less value than the using of the most wholesome foods and the selecting of the best medicinal agents when needed. With the well-informed, medicinal agents are used only when nature needs assistance and while the importance of cleaning the system effectually, when bilious or constipated, has long been known, yet until within recent years it was necessary to resort to oils, salts, extracts of roots, barks and other cathartics which were found to be objectionable and to call for constantly increased quantities.

Then physicians having learned that the most excellent laxative and carminative principles were to be found in certain plants, principally in the leaves, the California Fig Syrup Co. discovered a method of obtaining such principles in their purest condition and of presenting them with pleasant and refreshing liquids in the form most acceptable to the system and the remedy became known as—Syrup of Figs—as figs were used, with the plants, in making it, because of their agreeable taste.

This excellent remedy is now rapidly coming into universal use as the best of family laxatives, because it is simple and wholesome and cleanses and sweetens the system effectually without disturbing the natural functions and without unpleasant after effects and its use may be discontinued when it is no longer required.

All who would enjoy good health and its blessings should remember that it is the system effectually which physicians and parents well-informed approve and recommend and use and which they and their little ones alike enjoy, because of its pleasant flavor, its gentle action and its beneficial effects.

Syrup of Figs is for sale by all reliable druggists, at the regular price of fifty cents per bottle, in original packages only, having the name of the remedy—Syrup of Figs—and the full name of the Company—California Fig Syrup Co.—printed on the front of every package.
