MANY DEPREDATIONS OF THE TURKS.

The Macedonian Question Can Not Be Settled Without the Intervention of the Powers-Bulgaria's War Minister Declares That, Should Turkey Attack, the Present Army Could Hold Turks in Check.

Sofia, Bulgaria (By Cable).-According to reliable reports from Varna at the recent council of ministers presided over by Prince Ferdinand at the palace of Euxinograd it was resolved that Bulgaria should continue to maintain an attitude of the strictest neutrality in the Macedonian question, and further, that the most stringent measures should be adopted to prevent anything likely to cause a disturbance in Bulgaria's relations with Turkey.

The war minister is reported to have spoken strongly in the council against any thought of Bulgaria declaring war on Turkey-first on account of the enormous expediture that such a war would involve, and secondly, because the great powers would never permit Bulgaria to reap the advantage if she

were victorious, Should Turkey attack Bulgaria, declared the minister, the present army first few days, while the entire Bul-garian Army could be mobilized within three to twelve days. Bulgaria would never declare war, he added, but i war was declared against her she would accept the challenge fearlessly.

As an evidence of Bulgaria's peaceful intentions the council decided that upon the first symptoms of disorder on the frontier martial law would be proclaimed at Burgas, Kostendil, Philip-popolis and Sofia.

The ministers expressed the opinion that the powers would soon reach the conviction that the Macedonian ques-tion could not be decided without their intervention.

DASH FOR THE POLE

Commander Peary Will Lead Another Expedition.

WILL BE THOROUGHLY AMERICAN.

The Intrepl Explorer Secures a Three Years' Leave of Absence, and His Enterprise Highly Commended by President Roosevelt and Acting Secretary Darling-The Essential Features of the Plan.

Washington, D. C. (Special).— Commander Robert E. Penry, U. S. N., the well-known Arctic explorer, will make another dash for the North Pole, Leave of absence for three years has been granted him, with the permission of the President, by Mr. Darling, Acting Secretary of the Navy, and he has been assured of the hearty sympathy of both these officials in his new venture. In his letter of application for leave of absence Commander Peary briefly outlines his plan of action. In a suitable ship built in one of our best shipyards, reinforced and strengthened to the maximum degree and fitted with American engines, "so that she may go North as an exponent of American skill and mechanical ability," Com-mander Peary hopes to start with his

expedition about the first of July next.

Upon arriving at the Whale Sound region he will take on board a large number of Eskimos and establish a rmanent base at Cape Sabine hence he will force his way northward Grantland, where he hopes to establish winter quarters on the northern shore. As far as practicable along the route he will establish caches. The following February, with the earliest returning light, he will start due north over the polar pack with a small, light pioneer party and followed by a large main party. In his letter of application to Acting Secretars, Darling for leave to Acting Secretary Darling for leave of absence Commander Peary says:

"I should expect to accomplish the distance to the Pole and return in about 100 days or a little more, an average travel of about 10 miles a day. Re-turning, I should break the ship out turning, I should break the ship clate in the season and return home.

'If ice conditions the first year were such as to prevent reaching the northern shore of Grant Land I should winter as far north as practicable and force the ship to the desired location the following year. In this event the expedition would be gone two years." Distinctive features of Commander Peary's plans are the use of individual sledges with comparative light loads, drawn by dogs; the adoption of Eskimo

methods and costume and the fullest utilization of the Eskimos themselves. Commander Peary believes the ad-antages of his plan and route are a ixed land base 100 miles nearer the ole than any other route; a more rigid ice pack extending further poleward than is to be found on the opposite side of the Pole; a wider land base on which to refreat, and a well-beaten line of communication and retreat from winter quarters to comparatively low latitudes, which is practicable at any season of

the year. Acting Secretary of the Navy Darling, a close student of Arctic work and an enthusiastic believer in the ability American pluck and daring to find the Pole, says in his letter to Commander Peary granting him three years' absence, from April 1 next, that he thinks he is better equipped than any other person in the country to undertake this work. He pays a high compliment to Mr. Peary's courage and abil-

invitation of Emperor Francis Joseph to form a Hungarian Cabinet.

New York Broker Starts to Make Abyssinia a Nation for Negroes.

New York (Special).-William Henry Ellis sailed from this city on board the steamship Lucania, bound on a remarkable mission to Abyssinia. It is the purpose of Mr. Ellis, who is a millionaire several times over, to commercialize Abyssinia and make it the great country of Ethiopians prophesied in the Bible

Mr. Ellis was accompanied by his bride, formerly Miss Maude Sheymond, to whom he was married a few days ago and an emissary of King Menelik II, who came to New York recently to con-sult with the broker toward the fulfill-

ment of his remarkable plans.

Among other things Mr. Ellis intends to establish an Abyssinian bank, bring about friendly commercial relations be tween all countries of the world, train have the full co-operation of King Menelik.

With these preliminaries completed Mr. Ellis will proclaim Abyssinia as the modern Ethiopia, where all negroes of the world will find refuge among their In this way he believes that he can solve the great race problem once and for all, drawing the world's color line

out the boundaries of Abyssinia. Mr. Ellis will move on the Abyssinia capital with impressive pomp. He will engage a great caravan and a force of several hundred servants.

NATIONAL CAPITAL AFFAIRS.

No Change in Treaty.

Secretary of State Hay has sent a ong telegram to United States Minister Beaupre at Bogota, directing him to reiterate to the Government of Colombia the statement made previously by him that the United States will not accept any modification or amendment of the Panama canal treaty. Mr. Beaupre was told to make it clear that President Roosevelt, by whose authority the instructions were sent, was obliged to be guided by the limitations of the law authorizing the construction of the canal, and that he regarded the terms given by the United States as the most liberal that could be obtained by Co-lombia within the scope of the law. The spirit of the instructions is that Colombia can accept the rejected treaty as it stands or lose the opportunity of having the United States build the ca-

nal in its territory.

Dr. Thomas Herran, the Charge d'Affaires of Colombia, is to be asked by the State Department if he was correctly quoted in the assertion attrib-uted to him in a newspaper interview that if he had attempted to make representations to the United States Government in regard to a matter pending before the United States Senate as were made to the Colombian Government by Mr. Beaupre, the American Minister at Bogota, concerning the Panama canal treaty, his passports would have been given to

him by the State Department. Should Dr. Herran admit that he was correctly quoted, he will be politely but emphatically admonished that the sentiment expressed by him is offensive to the United States and its repetition will not be tolerated.

Salicylic Acid in Wine.

The first instance of the Government's refusal to admit to this country adulterated wines under the Pure Food act was noted when entry was refused of a shipment of white wine from Bordeaux,

the Pure Food act entry may be refused to any article of food, wines, etc., where sale and consumption of the same are prohibited in the country whence im-ported. In this case it is shown that on February 23, 1881, the French Govern-ment expressly prohibited the sale of any food substance, solid or liquid, in the composition of which there enters any mantity whatsoever of salicylic acid or its derivatives.

Pay for National Guard.

The War Department has published a decision of the Comptroller of the Treasury, in which he holds that any portion tire squad of secret service men there of the organized militia that shall engage in actual field or camp service for instruction, and the organized militia of any state or territory that shall participate in any encampment, maneuvers and field instruction of any part of the Regular Army, at or near any post or camp on lake or sea coast defenses of the United States, are entitled to pay, sub-sistence and transportation allowance for the entire period from the time when such militia shall start from their home rendezvous to the time of their return to their home rendezvous.
