Why Many Young Men Fail.

It is the fault and the cause of the failure of so many bright, capable young men that, being put into a certain work-day rut, they make no effort to climb or even crawl out of it; they do not seek the work that is not routine and go beyond the terms of the bound in search of additional labor in order to attract the approving notice of their employers. They do not go to their posts or remain at them after the fixed hour. They are content to do enough, and no more than enough, to earn their hire. The life of the average clerk is generally genteel, easy, cleanly; he need not soil his hands nor his clothes and his ambition is satisfied with these pleasant conditions.—Philadelphia Ledger.

Of Interest to Fishermen.

The following is taken from an exchange and may prove of interest to fishermen in this vicinity: The game and fish law of Pennsylvania provide that from sunset to sunrise only eels may be caught in the waters of this state not inhabited by brook trout, by means of what are known as out-lines; each outline must have a tag attached, with the name and address of the owner plainly marked thereon; dead bait must be used, and the lines weighted to the bottom of the stream; all other fish, except eels, carp, suckers, and catfish taken by the outline, must be released with as little injury as possible.

NO BREAKFAST THEIR CREED.

Colony of Westerners Who Starve Themselves and Don't Love Wives.

Edward Wallace Conable, founder of a strange health colony in Colorado several years ago, says a Rogers, Ark., correspondent of the New York Sun, has abandoned the high altitude of the Rockies and has bought 8000 acres of land in Northern Arkansas and colonized it with several hundred followers, all of whom believe in his manner of living.

The colonists eat no breakfast. The men do not love their wives, nor do the wives love their husbands. Living in family groups is a mere matter of form, it is contended, although there have been family squabbles caused by jealous husbands and wives in this colony.

No form of animal life must be killed on the premises, but it is the endeavor of the colonists to drive away all kinds of insects and pests.

The land, which was bought only a few weeks ago, is now being planted in fruit trees, and settlers are building their homes on the wide stretch of the mountain country.

According to their creed, people should live in the highest form of physical and mental life. This embraces extended periods of fasting, for purification of the body and the elimination of disease. It contemplates the nouse of meat, alcoholic stimulants and tobacco.

Conable says that as soon as his crops begin to grow he will allow no one on the premises, except as a temporary guest, who lives on anything but his sort of food. No morning meal will be tolerated by the Conable colony, and no cook stoves will be found in the kitchens.

Fasting is regarded as a means of strengthening the body among these people. Miss Reda Benjamin, a young woman, has just completed a fast of twenty-five days without any bad effect to her body. She has muscles as hard as an athlete and is a perfect specimen of physical womanhood.

No physicians are allowed in the colony. Whenever a person is ill he is placed under the care of one of the health teachers, who, by a system of cereal and fruit products, and by fasting or starving the disease, as they say, attempts to cure the patient.

Conable allows no horses on the farm, and all work is done by human hands or steam power.
